POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS

GROUP 1 - Fireman, Oiler; Mechanic, Grease Truck and Welder's Helpers; Screedman, Pneumatic roller towed by farm type tractor or truck; Scale Operator and such as bin-a-batch; Rubber-tired farm type tractors and tractors under 35 HP without attachments
GROUP 2 - Air Compressors, Power Plants, pumps and welding machines; Concrete mixers, under 1 yd. & concrete batch plants, under 1 yd., gunnite & pumpcrete machine, mechanical bull floats, spreading & finishing machines. Screening Plants. Drilling machines, Diamond, rotary, core & cable drilling; Well under 6". Hoists, scoopmobiles, A-frame Air tugger; Hydrolift, Hydrocranes, winch truck. Loaders: Elevating, belt type loader, front end loader (under 7 yds.) & over head loaders; forklift & lumber stacker on construction job site. Motor man & Industrial locomotive. Tractors under 35 HP with attachments
GROUP 3 - Concrete mixers 1 yd. & over and batch plants 1 yd. & over, single drum paving machines, Crushing plant. Drilling Machine, 6" & over; Front end loaders, 2 yds. & over; Paving: Asphalt plants, boiler or retort heater, distributor, lay down machine, pug mill, breakdown & tandem rollers. Steam Engineer. Trenching Machines. Patrol, rough, not required to blue top or finish
GROUP 4 - Tractor Equipment: Athey & Barber Green Loader, Bulldozer, DH10, DH20, DH21, Dumor, Elevating Grader; Euclid, Highlander, Scraper, Transexcavator, Turnapull, Turnarocker & Tractors 35 HP & up & farm type tractors with backhoe & shovel type attachments
GROUP 5 - Concrete paving machines, double drum. Caterpanes, Hysters, Cherry Pickers, Attachments cranes, side & swing boom tractors; Mechanic, Welder, Patrol, Finish; Grease Truck Operator (Head Oiler). Building Hoist, 1 drum. Concrete Pump (Shorlie Type Trailer Mounted)
GROUP 6 - Shovel, backhoe, clam & dragline 3/4 yds. & under; Cranes 25 tons & under; Building Hoist, 2 drums & up. Concrete pump (Shorlie Type Truck Mounted)
GROUP 7 - Guy & stiff leg derrick, Piledrivers; Crawler or skid rig, Shovel, Backhoe, clam & dragline over 3/4 yds.; Crane over 25 tons. Pecco type cranes
GROUP 8 - Refrigeration, slusher, Jumbo form operators
GROUP 9 - Mucking machines
GROUP 10 - Mine hoists

SUPERSEDEAS DECISION

STATE: Texas
DECISION NO.: TX77-4199
Supersedes Decision No. TX77-4102, dated May 13, 1977, in 42 FR 24707.
DESCRIPTION OF WORK: Building Construction (does not include single family houses & garden type apartments up to & including 4 stories). Building Construction includes construction of enclosures with wall-in access for the purpose of housing persons, machinery, equipment or supplies. It includes all construction of such structures, the installation of utilities & the installation of equipment, both above & below ground level, as well as excavation & foundation.

COUNTIES: Galveston & Harris

DECISION NO. TX77-4006

STATE: Texas

COUNTIES: Brazoria, Chambers, Fort Bend, Galveston, Harris, Liberty, Montgomery, Waller and Wharton Counties in Texas.

DATE: Date of Publication

Decision No. TX77-4006, dated July 8, 1977, in 42 FR 35614.

MODIFICATIONS: Building Construction (does not include single family homes and apartments up to 4 floors); Building Construction (does not include single family homes and apartments up to & including 4 stories); Building Construction including construction of apartments with wall-to-wall carpeting for the purpose of heating, ventilating, refrigerant or sprinklers. It includes all construction of new structures, both above and below ground, and all incidental appurtenant items, such as parking lots, utilities, streets and sewers, water, gas, electrical, waterworks, steam, and other lines constructed as a part of the project.

POWER EQUIPMENT OPERATORS					
GROUP 1	$ 8.63		.40		
GROUP 2	7.56		.40		
GROUP 3	6.34		.40		
GROUP 4	6.23		.40		

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS

GROUP 1 - Heavy Duty Mechanic; Blade Grader - Self-propelled; Bull Clam; Back Filler; Derricks, power operated (all types); Dragline; Push Cat Operator; Euclid Operator; Bull Dozer and all types of Cat Tractors; Cable-Way; Back Hoe; Crane, Power Operated (all types); Elevating Grader, self-propelled; Hoist, Motor Driven, two drums or more; Hix Mobile; High-Lifts & loaders, over 1/3 cu. yd. capacity; Winch Truck; Locomotive; Mixer, 14 cu. ft. or over; Paving Mixer (all sizes); Scraper; Trenching Machine (all sizes); Gradall; Foundation Boring Machine; Scoopmobile; Shovel, Power Operated; Pump Crete Machine; Clam Shell Operator; Rock Crusher, Operated on Job; Welding Machine, 6 to 12, Two 125 cu. ft. Compressors; Well Points, including installations

GROUP 2 - Blade Grader, Towed; Flex Plane; Form Grader; Mixer, less than 14 cu. ft.; Pulsometer; Truck Crane Driver & Oiler, Combination man; Gasoline or Diesel Driven Welding Machine, 3 to 6; Hoist, Single Drum; Pump, 2½ in. or larger; Pneumatic Roller; High-Lifts & Loader, 1/3 cu. yd. or less; Forklift, 1500 lbs. capacity or less; Air Compressors, anytime there are two or more attachments operating on a 125 cu. ft. compressor, a light equipment operator shall be employed. One 125 cu. ft. air compressor and one welding machine requires no operator. One 125 cu. ft. compressor and two welding machines or any 2 air compressors equivalent to a 125 cu. ft. air compressor requires a light equipment operator

GROUP 3 - Firemen

GROUP 4 - Oiler

SUPPLEMENTAL DECISION

STATE: Texas COUNTY: Wichita

DECISION NO. TX77-4207 DATE: Date of Publication

Supersedes Decision No. TX77-4159, dated July 8, 1977, in 42 FR 35620.

DESCRIPTION OF WORK: Building Construction (does not include single family houses & garden type apartments up to 6 including 4 stories). Building Construction includes construction of sheltered enclosures with walk-in access for the purpose of housing persons, machinery, equipment or supplies. It includes all construction of such structures, the installation of utilities & the installation of equipment, both above & below ground level, as well as excavation & foundation.

LABORERS (Area 1)
All Counties and portions of Counties East of the 120th Meridian

Group 1: Brush Hog Feeder; Carpenter Tender; Concrete Crewman (to include stripping of forms, hand operating jacks on slip form construction, application of concrete curing compounds, pumpcrete machine, handling the nozzle of squeezecrete or similar machine 6" and smaller); Concrete Signalman; Crusher Feeder; Demolition (to including clean-up, burning, loading, wrecking and salvage of all material); Driller Helper; Dumpman; Fence Erector to (include guard rails, guide and reference posts, sign posts, and right-of-way markers); General Laborer; Grout Machine Header Tender; Nipper; Riprap Man; Scaleman; Stake Jumper; Structural Mover (to include separating foundation preparation, cribbing, shoring, jacking and unloading of structure); Tailhoseman (water nozzle); Track Laborer (RR); Truck Loader; Timber, Bucker and faller (by hand); Window Cleaner (prior to completion of construction)

Group 2: Cement Finisher Tender; Cement Handler; Demolition Torch; Dope Pot Fireman, non-mechanical; Form Cleaning Machine - Feeder, Stacker; Form Setter, paving; Driller Helper (when required to move position machine); Nozzleman, water and air or steam; Pipe Layer, corrugated metal culvert; Pipewrapper; Pot Tender; Powderman Helper; Power Tool Operator, gas, electric, pneumatic; Sandblast Tailhoseman; Scaffold Erector, wood or steel; Railroad Equipment, power driven, except dual mobile power spiker or puller; Rodder and Spreader; Wheelbarrow, power driven; Well-point Man; Vibrator up to 4"

Group 3: Asphalt Raker; Asphalt Roller, walking; Chain Saw Operator with attachments; Concrete Saw Walking; Grade Checker, using level; Jackhammer Operator; Multi-section Pipe Layer; Nozzleman (to include squeeze and flowcrete nozzle); Pavement Breaker; Power Buggy Operator; Railroad Power Spiker or Puller, dual mobile; Tamper (to include operation of Barco, Essex and similar tamper and pavement breakers); Trencher, Shanwee; Water Pipe Liner; Wagon Drills

Group 4: Chain Saw (faller); Laser Beam Operator; Pipe Layer (Caulker, Collarman, Jointer, Mortarman, Rigger, Jacker, Shorer and Lagger but not including laying corrugated metal culvert pipe)

LABORERS (Area 1) (Cont'd)
All Counties and portions of Counties East of the 120th Meridian

Group 5: Concrete Stack; Mortar Mixer

Group 6: Caisson Worker, free air; High Scaler

Group 7: Brush Machine (to include hoirzontal construction joint clean-up Bruch Machine, power propelled); Drills (to include down-the-hole drills with 3 inch piston or larger and out-of-the-hole drills with 4 inch piston or larger); Gunnite (to include operation of machine and nozzle); Rod Carrier; Monitor Operator, Air Track or similar mounting; Nozzleman (to include jet blasting nozzleman over 1200 pounds, Jet Blast Machine, power propelled, Sand Blast Nozzle); Vibrator, 4 inches and over

Group 8: Air Track Drills with dual mants and Drills; Powderman

Group 9: Tunnel and Shaft, free air
Class A: Bull Gang, Pump Crete Crewman including distribution Pipe, Assembling and dismantle and nipper
Class B: Brakeman, Dumpman
Class C: Miner and Nozzleman for concrete and laser beam operator on tunnels
Class D: Raise and Shaft Miner and Laser Beam Opsrator on Raises and Shafts

POWER EQUIPMENT OPERATORS (Area 1) (Cont'd)
All Counties and portions of Counties East of the 120th Meridian

Group 3: A-Frame Truck (2 or more drums); Assistant Refrigeration Plant and Chiller Operator (over 1,000 tons); Backfillers (Cleveland and similar); Beltcrete Conveyors with power pack or similar; Belt Loader (Kocal or similar); Blade Operator (motor patrol and attachments); Boat Operators; Boom Cats (side); Boring Machine (earth); Boring Machine (rock under 8" bit) (Quarry Master, Joy or similar); Bump Cutter (Wayne, Saginaw or similar); Canal Lining Machine (concrete); Chipper (without crane); Cleaning and Doping Machine (pipeline); Concrete Pumps (squeeze-crete, flow-crete, pump-crete, Whitman and similar); Drills (Churn, Core, Calyx, or Diamond); Elevating Belt-type Loader (Euclid, Barber Green or similar); Elevating Grader-type Loader (Dumor, Adams or similar); Equipment Serviceman, Greaser and Oiler; Generator Plant Engineers (diesel, electric); Gunite Combination Mixer and Compressor; Hoist (2 or more drums or tower hoist); Loader (Overhead and Front-end under 4 yards, R/T); Locomotive Engineer; Mixermobile; Mucking machines; Paver or Curb Extruder (asphalt and concrete); Pump (grout or jet); Rollerman (finishing pavement); Rubber-tired Scraper (one motor with one scraper, under 40 yards); Screed Operator, Soil Stabilizer (P & H or similar); Spreader Machine; Tractor (Crawler, including Dozer, Scraper, Drills, Booms, Rollers, etc.); Traverse Finishing Machine; Trenching Machines (under 7 feet depth capacity); Turnhead Operator; Vacuum Drill (reverse circulation drill, under 8")

Group 4: Asphalt Plant Operator; Crusher, Grizzle and Screening Plant Operator; H.D. Mechanic; H.D. Welder; Refrigeration Plant Engineer (under 1,000 ton); Rubber-tired Scraper, Multi-engine power, with one Scraper (Euclid, TS-24 and similar); Rubber-tired Scrapers, one motor with one scraper (40 yards and over); Surface Heater and Planer Machine; Turnhead (with re-screening)

POWER EQUIPMENT OPERATORS (AREA 1) Cont'd)
All Counties and portions of Counties East of the 120th Meridian

Group 5: Automatic subgrader (ditches and trimmers) (Autograde, ABC, R.A. Hansen and similar on grade wire); Backhoes (under 3 yards); Batch and Wet Mix Operator - multiple units (2 and including 4); Chipper (with crane); Clamshell Operator (under 3 yards); Concrete Slip Form Paver; Cranes all (under 3 yards); Drilling Equipment (8" bit and over) (Robbins' reverse circulation and similar); Loader Operator (Front end and Overhead 4 yards to 8 yards); Pile-driving Engineers; Paver (dual drum); Quad-track or similar equipment; Railroad Track Liner Operator (self-propelled); Rubber-tired Scrapers, multi-engine, power with one scraper (Euclid, TS-24 and similar); Push Pull or Help Mate in use; Rubber-tired Scrapers, multiple engines with tow scrapers; Shovels (under 3 yards); Refrigeration Plant Engineer (1,000 tons and over); Signalmen (Whirleys, Highline Hammerheads or similar); Trenching Machines (7 feet depth and over); Multiple Dozer units with single blade

Group 6: Backhoes (3 yards and over); Batch Plant (over 4 units); Cableway Controller - Dispatcher; Cableway Operator; Clamshell Operator (3 yards and over); Cranes, all - 65 gons and over; Derricks and Stiffleys (65 tons and over); Draglines (3 yards and over); Elevating Belt (Holland type); Loader 360 degrees revolving Koehring Scooper or similar); Loaders (overhead and Front-end over 8 to 12 yards); Rubber-tired Scrapers (multiple engine with three or more scrapers); Shovels (3 yards and over); Tower Crane; Whirleys and Hammerheads (all)

Group 7: Helicopter Pilot; Loaders (Overhead and Front-end - over 12 yards)

POWER EQUIPMENT OPERATORS (Area 2)
All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County

Group 1: Mechanics' Helpers (heavy duty)

Group 2: Oilers, Grade Checkers and Stakemen and/or Brakemen

Group 3: Firemen; Firemen (drier and hot plant)

Group 4: Rollers, Tampers and Vibrators (other than plant, road mix or multi-lift materials); Tractor (farmall type, 60 h.p. and under); Compressor (excavating and general purposes)

Group 5: Oiler Driver on Truck Cranes (over 45 tons up to 100)

Group 6: Blower Distributors and Mulch Seeding Operator; Oil Distributors

Group 7: Locomotive (Dinkey-air, diesel, electric, gas, steam)

Group 8: Equipment Service Oiler; Oiler Driver on Truck Cranes (100 tons and over)

Group 9: Pump (water); Tractors (Farmall type, over 60 h.p.)

Group 10: Post Hole Diggers (mechanical)

Group 11: Brooms (power, Wayne, Saginaw and similar types); Bulldozers (under D9 or similar); Loaders (Fork Lifts or Lumber Stacker - on construction job site - Drott Travel Lift); Rollers, Tampers and Vibrators (twin engine); Saw (concrete); Scrapers (carry-all type, single)

Group 12: Batch Plant (batch and mixer, 200 yards per hour and under); Cranes ("A" Frame Trucks, single power drum); Conveyors; Crusher (rock); Washing and Screening Plants; Finishing Machine Operator, Concrete Paving; Hoists, Air Tuggers, Strato Tower Bucket, Elevators and Dick Winches (power); Loaders (Elevating-Athey, Barber Greene and similar types, and Overhead and Front-end, under 2½ yards); Mixers (asphalt up to 4 tons per batch, and concrete mixer and batch - 200 yards per hour and under); Power Plant Operators; Pumps (Fuller Kenyon and Concrete and Pumpcrete); Rollers, Tampers and Vibrators (on plant, road mix or multi-lifts materials); Screed Man; Spreaders (Blaw Knox, Cedarapids, Jaeger, Flarrety or similar types); Trenching Machine (under 16 inches)

POWER EQUIPMENT OPERATORS (Area 2) (Cont'd)
All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County

Group 13: Mechanics or Welder (heavy duty)

Group 14: Motor Patrol Graders (including Model 14 and similar); Tournapulls, Caterpillar, Euclid Scrapers and similar type equipment (25 yards and under)

Group 15: Compressor (steel erection including sandblasting, painting of the same); Hoists on steel erection, Air Tuggers and Towermobiles; Loaders (fork lifts with tower)

Group 16: Cement Hogs; Loaders (Elevating Grader type, Dumor and similar); Locomotive (geared or rod engine); Mixers (paving); Scraper (carryall type, double)

Group 17: Tractors (farmall type, used as Backhoes, Rubber-tired, Ford, Ferguson, Case and similar type 60 h.p. and under)

Group 18: Bull Dozer (D-9 or similar)

Group 19: Trenching Machines (16 inches and over)

Group 20: Bump Cutter (Concut, Christianson or similar types)

Group 21: Batch Plant (batch and mixer, over 200 yards per hour through 400 yards per hour); Conveyors (Beltcrete with power pack and similar types); Loaders (elevating belt type - Euclid and similar types); Mixer (asphalt, 4 tons and over, per batch, and concrete mixers and batch - over 200 yards per hour through 400 yards per hour, and paving dual)

Group 22: Bulldozer equipped in Yo Yo Operating (while clearing and scaling); Cableways (3 yards and under); Cranes ("A" Frame Trucks, double power drum and Crawler, truck type, floating, Locomotive, Whirley, either 3 yards and under, or 150' of boom including jibs and under, or 45 tons and under: and Hydralifts, Hyster Cat Cranes and attachments and Chipper, wood with boom attachment); Derricks, all; Drilling Machine (Core, Cable Rotary and Exploration); Loader (fork lift with power boom and swing attachment, and overhead and front end, 2½ yards and up to 4 yards); Mixers (mobile type with hoist combination); Motor Patrol Graders (over Model 14 and similar); Mucking Machines (Mole, Tunnel Drill, and/or Shield); Paydozer and Linker Pusher (Quad-9 and similar); Piledriver Engineer, (L.B. Foster Puller or similar, Paving Breaker); Shovels (Crawler and truck types, all attachments, 3 yards and under); Sub Grader (Gurries, CMI and similar types); Tractors (Farmall type, used as Backhoes, Rubber-tired - Ford, Ferguson, Case and similar types - over 60 h.p.); Tournapulls, Caterpillar, Euclid Scrapers and similar type equipment over 25 yards through 40 yards

POWER EQUIPMENT OPERATORS (Area 2) (Cont'd)
All Counties and portions of Counties West of the 120th Meridian (except those enumerated in Area 3) and including the Northern portion of Pacific County

Group 23: Loaders (overhead and front end, 4 yards up to 8 yards)

Group 24: Mixer (concrete mixers and batch over 400 yards per hour through 600 yards per hour)

Group 25: Tournapulls, Caterpillar, Euclid, Scrapers and similar type(over 40 yards through 55 yards)

Group 26: Cableways (over 3 yards); Crane (Crawler, truck type, floating, Locomotive, Whirley, either over 3 yards, or over 150' of boom including jibs or over 45 tons up to 100 tons: and, Tower Cranes, Pecco, Lorraine, Bucyrus and similar types); Helicopter Winch Operator; Remote Control Operator on Rubber-tired Earth Moving Equipment; Shovels (Crawler and truck type, all attachments, over 3 yards up to 6 yards); Slip Form Paver (Zimmerman, CMI and similar types)

Group 27: Tournapulls, Caterpillar, Euclid, Scrapers and similar type equipment (over 55 yards through 70 yards)

Group 28: Loaders (overhead and front end 8 yards and over)

Group 29: Tournapulls, Caterpillar, Euclid, Scrapers and similar type equipment (over 70 yards through 85 yards)

Group 30: Cranes (Crawler, Truck type, floating, Locomotive, Whirley, either 5 yards and over 200' of boom including jibs and over, or 100 tons and over); Shovel (Crawler and Truck type, all attachments, 6 yards and over)

Group 31: Tournapulls, Caterpillar, Euclid, Scrapers and similar type equipment (over 85 yards through 100 yards)

POWER EQUIPMENT OPERATORS (Area 3)
Clark, Cowlitz, Klickitat, Skamania, Wahkaikum, and the Southern portion of Pacific, Counties

Health and Welfare	$ 1.00
Pension	1.00
Vacation	.50
Apprenticeship Training	.05

POWER EQUIPMENT OPERATORS (Area 3)
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 1: Oiler, including Plant, Crane, Crusher, Guardrail equipment, and Trenching Machine; Assistant Conveyor Operator; Crusher Feederman; Deckhand; Self-propelled Scaffolding Operator; Guardrail Punch Oiler; Pump Operator, under 4"; Brakeman; Switchman; Parts Man (tool room)

Group 2: Blade Operator, pulled type; Truck Crane Oiler-driver, 25 ton capacity or over; Crane Fireman, (all equipment except floating); A-Frame Truck Operator, single drum; Tugger or Coffin type Hoist Operator; Driller Helper; Auger Oiler; Boatman; Fork Lift or Lumber Stacker Operator (on job site); Oiler, combination Guardrail Machines; Temporary Heating Plant Operator; Grade Oiler, required to check grade; Grade Checker; Tar Pot Fireman; Tar Pot Fireman (power agitated); H.D. Repairman Helper; Welder's Helper; Helicopter Radioman (ground); Roller Operator, grading of base rock (not asphalt)

Group 3: Asphalt Plant Fireman; Pugmill Operator (any type); Truck mounted Asphalt Spreader, with Screed; Compressor Operator (any power), under 2,250 cu. ft. total capacity; Conveyor Operator; Mixer Box Operator (C.T.B., Dry Batch, etc.); Cement Hog; Concrete Saw; Concrete Curing Machine (riding type); Wire Mat or Brooming Machine; Ross Carrier Operator (on job site); Bucket Elevator Loader, Barber-Greene and similar types; Hydraulic Pipe Press; Pump Operator (any power), 4" and over; Hydrostatic Pump; Motorman; Ballast Jack Tamper; Bell Boy phones, etc.; Tamping Machine, mechanical self-propelled; Hygrographic Seeder Machine, straw, pulp or seed; Broom Operator, self-propelled (on job site); Air Filtration Equipment; Welding Machine Operator

POWER EQUIPMENT OPERATORS (Area 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 4: Screed Operator; Compactor, including Vibratory; Compressor (any power) over 1,250 cu. ft. total capacity; Combination Mixer and Compressor, Gunnite work; Concrete Mixer Operator, single drum, under five bag capacity; Helicopter Hoist Operator; Floating Equipment Fireman; Lull Hi-lift Operator or similar type; Fork Lift, over 5 ton; Service Oiler (greaser); Hydra Hammer or similar types; Pavement Breaker; Pump Operator, more than 5 (any size); Locomotive, under 40 tons; Roller Operator, Oiling, C.T.B.

Group 5: Extrusion Machine; Wagner Factor or similar type (without blade); Concrete Batch Plant Quality Control Operator; Power Jumbo, Setting Slip Forms, etc. in tunnels; Slip Form Pumps, Power driven Hydraulic Lifting Device for concrete forms; Hoist, single drum; Elevator Operator; Pulvamixer or similar types; Chip Spreading Machine Operator; Lime Spreading (on job site); Sweeper (Wayne type) Self-propelled (on job site); Tractor, rubber-tired 50 H.P. Flywheel and under; Trenching Machine, maximum digging capacity 3 ft. depth

Group 6: Asphalt Burner and Reconditioner; Pavement Grinder and/or Grooving Machine (riding type); Cast-in-place Pipe Laying Machine; Maginnis Internal Full Slab Vibrator; Concrete Finishing Machine, Clary, Johnson, Bidwell, Burgess Bridge Deck or similar type; Curb Machine, Mechanical Berm, Curb and/or Curb and Gutter; Concrete Joint Machine; Concrete Planer; Concrete Paving Machine; Concrete Spreader; Loaders, rubber-tired type, 2½ cu. yds. and under; Rock Spreaders, self-propelled.

Group 7: Roller(any asphalt mix); Beltcrete; Pumperete Operator (any type); Cement Pump, Fuller-Kenyon and similar; Concrete Pump; Grouting Machine; Concrete Mixer, single drum, five bag capacity and over; Tower Mobile Operator; A-Frame Truck double drum; Boom Truck; Churn Drill and Earth Boring Machine; Hydraulic Backhoe, wheel type 3/8 cu. yds. and under with or without front end attachments 2½ cu. yds. and under (Ford, John Deere, Case type); Elevating Grader, Tractor towed requiring operator or grader; Pot Rammer; Ballast Regulator; Ballast Tamper, Multiple-purpose; Track Liner; Tie Spacer; Shuttle Car; Locomotive, 40 tons and over

POWER EQUIPMENT OPERATORS (Area 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 8: Diesel-Electric Engineer, Plant, Crusher, Generator, Floating; Batch Plant and/or wet mix, one and two drum; Generator Operator; Belt Loaders, Kolman and Ko Cal types; Asphalt Paver Operator

Group 9: Bulldozer; Drill Cat Operator; Side-boom Cat; Compactor, with blade; Concrete Cooling Machine; Chicago Boom and similar types; Lift Slab Machine; Boom type Lifting Device, 5 ton capacity or less; Cherry Picker or similar type Crane-hoist, 5 ton capacity or less; Grizzley Crusher; Crusher Plant; Drill Doctor; Boring Machine; Guardrail Punch and Auger (all types); Surface Heater and Planer; Hydraulic Backhoe, track type 3/8 cu. yd.; Loader, front end and overhead, 2½ cu. yds. and under 4 cu. yds.; Hammer Operator; Pipe Cleaning, Doping, Bending and Wrapping Machines; Bolt-threading Machine; Drill Doctor (bit grinder); H.D. Mechanic and Welder; Machine Tool Operator; Stationary Drag Scraper; Tractor, rubber-tired over 50 H.P. flywheel; Tractor with boom attachment; Trench Machine, maximum digging capacity over 3 ft. depth; Asphalt Plant Operator

Group 10: Bulldozer, twin engine (TC12 and similar); Cable Plow (any type); Compactor, multi-engine; Jack Operator, Elevating Barges; Barge Operator, self-unloading; Combination H.D. Mechanic-Welder, when dispatched and/or when required to do both; Rubber-tired dozers and Pushers (Michigan, Cat, Hough type); Driller Percussion, Diamond, Core, Cable, Rotary and similar type

Group 11: Mixer Mobile; Concrete Breaker; Crane Operator, 25 tons and under; Combination Guardrail Machines, i.e., Punch, Auger, etc.; Shovel; Dragline; Clamshell, Hoe, etc., under 1 cu. yd.; Grade-alls, under 1 cu. yd.; Mucking Machine (tunnel)

Group 12: Blade Operator; Batch Plant and/or Wet Mix, 3 units or more; Reinforced Tank Banding Machine (K-17 or similar); Hoist, two or more drums; Elevating Loader, Athey and similar; Piledriver (not crane type); Rubber-tired Scraper, single and twin engine, Single Scraper, with Push-pull attachments, self-loader, Paddle Wheel, Auger type; Blade mounted Spreaders, Ulrich and similar types; Shield Operator

POWER EQUIPMENT OPERATORS (Area 3) (Cont'd)
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum and the Southern portion of Pacific, Counties

Group 13: Blade Operator, finish; Blade, externally controlled by electronic, mechanical hydraulic means; Blade, Multi-engines; Concrete Paving Road Mixer; Derrick, under 100 tons; Hoist, Stiff Leg, Guy Derrick or similar, 50 tons and over; Cableway Operator 25 ton and over; Crane, over 25 ton and including 50 tons; Piledriver Operator; Floating Clamshell, etc. under 3 cu. yds.; Floating Crane (derrick barge), less than 30 ton; Elevating Grader, operated by tractor operator, Sierra, Euclid, or similar; Back Filling Machine; Shovel, etc. 1 cu. yd. and less than 3 cu. yds.; Grade-all, 1 cu. yd. and over; Bridge Crane Operator, Locomotive Crane, Gantry and Overhead

Group 14: Tower Crane Operator; Rubber-tired Scraper, with Tandem Scrapers, self-loading, Paddle Wheel, Auger type, Finish and/or 2 or more units

Group 15: Rock Hound Operator; Loader, 4 cu. yds., but less than 6 cu. yds.

Group 16: Autograder or "Trimmer"; Tandem Bulldozer, Quad-nine and similar; Automatic Concrete Slip Form Paver; Concrete Canal Line; Cableway, 25 ton and over; Crane, over 40 ton and including 100 ton; Whirley, 80 ton and under; Floating Clamshell, etc., 3 cu. yds. and over; Floating Crane (derrick barge) 30 ton but less than 80 ton; Loader, 6 cu. yds., but less than 12 cu. yds.; Rubber-tired Scraper, with Tandem Scrapers, Multi-engine; Shovel, etc., 3 cu. yds. but less than 5 cu. yds.; Wheel Excavator, under 750 cu. yds. per hour

Group 17: Crane over 100 ton and including 200 ton; Whirley over 80 ton and including 150 ton; Floating Crane (derrick barge) 80 ton less than 150 ton; Loader, 12 cu. yds. and over; Shovel, etc., 5 cu. yds. and over; Canal Trimmer

Group 18: Crane, over 200 ton; Whirley, 150 ton and over; Floating Crane 150 ton but less than 250 ton; Wheel Excavator, over 750 cu. yds. per hour; Band Wagons, in conjunction with Wheel Excavator

Group 19: Helicopter, when used in erecting work; Floating Crane 250 ton and over; Remote Controlled Earth Moving Equipment; Underwater Equipment, remote or otherwise

TRUCK DRIVERS (Area 1)
All Counties and portions of Counties East of the 120th Meridian

Group 1: Flat Bed Truck, single rear axle; Escort Driver; Fish Truck; Fork Lift, 3,000 pounds and under; Fuel Truck Driver (Steam Cleaner and Washer); Helper and Swamper; Leverperson loading Trucks at Bunkers; Pick-up hauling material; Seeder and Mulcher; Stationary Fuel Operator; Team Driver; Tractor (small rubber tired pulling trailer or similar equipment); Water Tank Truck 1,800 gallons.

Group 2: Bus Driver or Employeehaul Driver; Flat Bed Truck, dual rear axle; Power Boat hauling employees or material; Tireperson No. 1; Warehouseperson

Group 3: Buggy Mobile and similar; Bulk Cement Tanker; Oil Tank Driver; Power operated Sweeper; Semi-trailer, Low Bed, Truck and Trailer; Straddle Carrier (Ross Hyster and similar); Transit Mixers and Trucks hauling concrete (3 yards and under); Trucks, side, end, and bottom dump (under 6 yards); Water Tank Truck (1,801 - 4,000 gallons)

Group 4: Auto Crane - 2,000 pounds capacity; Bulk Cement Spreader; Dumptor (56 yards and under); Flaherty Spreader, Box Driver; Flat Bed Truck (using power take off); Fork Lift (over 3,000 pounds); Oil Distributor Driver (road, bootperson, leverperson helper); Rubber-tired tunnel jumbo; Scissor Truck; Slurry Truck Driver; Transit Mixers and Trucks hauling concrete (over 3 yards to 6 yards); Water Tank Truck (4,001 - 6,000 gallons); Wrecker and Tow Trucks

Group 5: Low Boy (under 50 tons); Service Greaser; Tireperson No. 2; Truck, side, end, and bottom dump (over 6 yards to 12 yards)

Group 6: A-Frame (Swedish Crane, Iowa 3,000, Hydrolift); Water Tank Truck (6,001 - 8,000 gallons)

Group 7: Dumptor (over 6 yards); Transit Mixers and Trucks hauling concrete (6 yards to 10 yards); Trucks, side, end, and bottom dump (over 12 yards including 20 yards)

TRUCK DRIVERS (Area 1) (Cont'd)
All Counties and portions of Counties East of the 120th Meridian

Group 8: Low Boy (over 50 tons); Water Tank Truck (8,001 - 10,000 gallons); Tractor with Steer Trailer

Group 9: Transit Mixers and Trucks hauling concrete (10 yards to 15 yards); Trucks, side, end and bottom dump (over 20 yards including 30 yards); Water Tank Truck (10,001 - 12,000 gallons)

Group 10: Mechanic, Field

Group 11: Tournarocker, D.W.'s and similar, with 2 or 4 wheel power tractor with trailer, gallonage or yardage scale, which is greater; Transit Mixers and Trucks hauling concrete (15 yards to 20 yards); Trucks, side, end and bottom dump (over 30 yards to 40 yards); Water Tank Truck (12,001 - 14,000 gallons)

Group 12: Transit Mixers and Trucks hauling concrete (over 20 yards); Trucks, side, end and bottom dump (over 40 yards to 50 yards)

Group 13: Truck, side, end and bottom dumps (over 50 yards to 100 yards)

Group 14: Helicopter Pilot hauling employees or material; Trucks, side, end and bottom dump (over 100 yards)

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

Memorandum of August 12, 1977

Waiver of the Limitation on the Aggregate of Military Assistance Granted Under the Foreign Assistance Act of 1961, and of Credits Extended and Loans Guaranteed Under the Arms Export Control Act for African Countries in Fiscal Year 1977

[Presidential Determination No. 77–19]

Memorandum for the Secretary of State

THE WHITE HOUSE,
Washington, August 12, 1977.

Pursuant to the authority vested in me by Section 33(b) of the Arms Export Control Act, as amended, I hereby determine that the waiver of the limitations of Section 33(a) of the Arms Export Control Act, as amended, for fiscal year 1977 is important to the security of the United States.

You are requested, on my behalf, to report this determination promptly to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate, as required by law.

This determination shall be published in the FEDERAL REGISTER.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 15904; Amdt. Nos. 1-28 and 91-142]

PART 1—DEFINITIONS AND ABBREVIATIONS

PART 91—GENERAL OPERATING AND FLIGHT RULES

Altitude Alerting System—Required Aural Warning

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment gives an operator the option of using an alerting system which emits both aural and visual signals upon approaching a pre-selected altitude in ascent or descent, or a system which instead provides only a sequence of visual signals when approaching a pre-selected altitude and provides the aural warning only when a deviation from a pre-selected altitude occurs. This regulatory action was initiated in response to a petition filed with the FAA on behalf of certain interested persons.

EFFECTIVE DATE: September 21, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Raymond E. Ramakis, Regulatory Projects Branch, Safety Regulations Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone 202-755-8716.

SUPPLEMENTARY INFORMATION: Interested persons have been afforded an opportunity to participate in the making of these regulations by a Notice of Proposed Rulemaking (Notice No. 76-15) issued June 30, 1976, and published in the FEDERAL REGISTER on July 12, 1976 (41 FR 28535). Due consideration has been given to all comments received in response to the Notice.

The FAA issued Notice No. 76-15 in response to a petition received from the Air Transport Association (ATA). In the Notice the FAA stated that it believes the present aural signal requirement should be amended substantially as proposed by the ATA petition. As explained in the Notice, the aural signal currently required by the regulations now sounds during the altitude acquisition phase of flight for each preselected setting of the altitude alerter. This requirement, combined with the numerous clearances for change of flight altitudes associated with turbojet operations, causes the flight crew to be exposed to the aural signal to the extent that their reaction to the signal may become conditioned indifference. As stated in the Notice the FAA believes an amendment to the current regulation which will allow an operator to use an alerting system that gives an aural warning only when a deviation from a preselected altitude occurs will make the alerting signal more effective.

Most of the 26 public comments received in response to the Notice were generally favorable to adoption of the proposed amendment. Comments from those opposed to the proposal generally expressed concern that the alternative alerting system it would allow to be used may allow altitude overruns to occur and result in possible high "g" maneuvers being used to return to the selected altitude. Concern was also expressed that the operation of turbojet-powered aircraft at high rates of ascent and descent in the low altitude airway structure, where 1,000 feet separation is employed, may be hazardous if only a visual warning is used. The FAA does not agree that the proposed alternative alerting system will create a safety hazard as suggested in these comments. They will be approved by the FAA only if they are developed in accordance with criteria similar to that currently specified in AC 91-22A and the FAA is satisfied that they provide flight crewmembers with an appropriate and effective alert. It should also be pointed out that installation of the system allowed under the proposal is optional and those operators who do not favor its use may elect to continue using the altitude alerting system as currently provided for under § 91.51.

In addition to the amendment proposed in Notice No. 76-15, the FAA considers it appropriate to amend the flush paragraph following § 91.51(b)(5) to make it clear that for operations below 3,000 feet above ground level (AGL) a radio altimeter may be used that provides only one signal, either visual or aural, if the operator has an approved procedure for the use of the radio altimeter to determine decision height (DH) or minimum descent altitude (MDA), as appropriate. Also for purposes of clarification, the abbreviation "AGL" and its meaning is added to Part 1 of the Federal Aviation Regulations by this amendment.

Since the amendments to the flush paragraph and Part 1 are clarifying in nature and impose no additional burden on any person, the Administrator finds that notice and public procedure thereon are unnecessary.

REGULATORY EVALUATION

In accordance with the Department of Transportation regulatory reform policy, an evaluation of the anticipated impacts of this amendment has been made. It has been determined that it is probable that only minor maintenance and capital investment costs will be incurred as a result of this amendment. In any event, any costs incurred will be more than offset by the enhancement of safety which is expected to result from the amendment. Accordingly, it has been determined that this amendment is expected to be neither costly nor controversial and will not impose a significant burden on the private sector, on consumers, or on the Federal, state, or local governments.

PRINCIPAL AUTHORS

The principal authors of this document are William T. Brennan, Air Carrier Regulations Branch, Flight Standards Service, and Robert G. Leary, Office of the Chief Counsel.

Accordingly, Parts 1 and 91 of the Federal Aviation Regulations are amended and revised, effective September 21, 1977, as follows:

1. By amending § 1.2 and inserting in alphabetical order the following abbreviation:

§ 1.2 Abbreviations and symbols.

• • • • • •

"AGL" means above ground level.

• • • • • •

2. By revising § 91.51(b)(1) and the flush paragraph at the end of § 91.51(b)(5) to read as follows:

§ 91.51 Altitude alerting system or device; turbojet-powered civil airplanes.

• • • • • •

(b) Each altitude alerting system or device required by paragraph (a) of this section must be able to:

(1) Alert the pilot: (i) Upon approaching a preselected altitude in either ascent or descent, by a sequence of both aural and visual signals in sufficient time to establish level flight at that preselected altitude; or

(ii) Upon approaching a preselected altitude in either ascent or descent, by a sequence of visual signals in sufficient time to establish level flight at that preselected altitude, and when deviating above and below that preselected altitude, by an aural signal;

• • • • • •

(5) • • •

However, for operations below 3,000 feet AGL, the system or device need only provide one signal, either visual or

V 42 162 AUG 22 77 UM

aural, to comply with this paragraph. A radio altimeter may be included to provide the signal, if the operator has an approved procedure for its use to determine DH or MDA, as appropriate.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 12, 1977.

J. W. COCHRAN,
Acting Administrator.

[FR Doc.77-24149 Filed 8-19-77;8:45 am]

[Docket No. 15959; Amdt. 39-3021]

PART 39—AIRWORTHINESS DIRECTIVES

British Aircraft Corporation BAC 1-11 200 and 400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Amendment adopts a new airworthiness directive (AD) which requires repetitive inspection and replacement, repair, or overhaul, as necessary, of the flap secondary drive shafting and support bearings on British Aircraft Corporation BAC 1-11 200 and 400 series airplanes. This action is necessary to prevent a flap secondary drive shaft failure, which could result in the inability to operate the flaps in the event of a failure in the flap primary drive system.

DATES: Effective September 21, 1977. Compliance required as indicated in the AD.

ADDRESSES: The applicable BAC service bulletin may be obtained from British Aircraft Corporation, Inc., 399 Jefferson Davis Highway, Arlington, Virginia 22202, telephone 703-979-1400. The applicable Hobson Overhaul Manual may be obtained from Lucas Aerospace Limited, Hobson Works, Fordhouses, Wolverhampton W10 7EH, England.

A copy of the BAC service bulletin is contained in the Rules Docket Rm. 916, 800 Independence Avenue SW., Washington D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, telephone 513-38-30.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring repetitive inspection and replacement or overhaul, as necessary, of the flap secondary drive shafting and support bearings on British Aircraft Corporation BAC 1-11 200 and 400 series airplanes was published in the FEDERAL REGISTER at 41 FR 30655. The proposal was prompted by reports of failed and missing flap secondary drive shafts, which could result in the inability to operate the flap in the event of a failure in the primary drive system.

Interested persons have been afforded an opportunity to participate in the making of the amendment. One commentator contended that the requirement to replace the drive shaft when chafing exceeds .005 inch in depth applies only to the torque tube and not the fairlead (chafe strip). British Aircraft Corporation (hereinafter referred to as BAC) confirmed that the chafing limit is not intended to apply to fairleads, but only to torque tubes and end fittings. BAC also advised that if chafing of a torque tube exceeds 0.005 inch, the torque tube is repairable in accordance with Hobson Overhaul Manual 27-50-52. The FAA agrees with these comments and the proposed amendment has been changed accordingly.

The commentator also contended that the requirement to overhaul the secondary shafts at 30,000 hours total time in service should exclude shaft P/N CHA493-1345, since this shaft has not been subject to failure. BAC confirmed this. The FAA agrees with the comment and the proposed amendment has been changed accordingly.

The commentator further contended, for shafts which have accumulated 30,000 hours total time in service, that the requirement to replace the tubing within 50 hours after the effective date of this AD appears inconsistent with the provision that permits the shaft to remain in service to 35,000 hours if inspected every 1,000 hours upon reaching 30,000 hours. The FAA agrees and the proposed amendment has been changed to require repetitive inspection every 1,000 hours upon reaching 30,000 hours, and to require replacement of the tubing, which is part of the required overhaul procedure, upon accumulating 35,000 hours.

The FAA has reevaluated the need for the proposed amendment and determined that it should be adopted.

DRAFTING INFORMATION

The principal authors of this document are F. J. Karnowski, Europe, Africa, and Middle East Region, E. S. Newberger, Flight Standards Service, and R. N. Lane, Office of the Chief Counsel.

ADOPTION OF AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following Airworthiness Directive:

BRITISH AIRCRAFT CORPORATION. Applies to BAC 1-11 200 and 400 series airplanes, certificated in all categories.

Compliance is required as indicated.

To detect and prevent possible failure of the flap secondary drive shafting, accomplish the following:

(a) Inspect the spanwise secondary drive shafts between wing ribs (L.H. and R.H.) 6 and 15 for 200 series airplanes, and between wing ribs (L.H. and R.H.) 1 and 15 for 400 series airplanes, for failure or damage in accordance with paragraph 2.4 of the accomplishment instructions of British Aircraft Corporation Alert Service Bulletin 27-A-PM5341, issue 1, dated November 28, 1975, or an FAA-approved equivalent, as follows:

(1) For flap secondary drive shafts with less than 24,000 hours total time in service on the effective date of this AD, within the next 1000 hours time in service or prior to exceeding 3000 hours total time in service, whichever occurs later, unless already accomplished within the preceding 2000 hours time in service.

(2) For flap secondary drive shafts with 24,000 or more hours total time in service on the effective date of this AD, within the next 1000 hours time in service, unless already accomplished within the preceding 1000 hours time in service.

(b) Repeat the inspection required by paragraph (a) of this AD as follows:

(1) For flap secondary drive shafts with more than 3000 but less than 24,000 hours total time in service, at intervals not to exceed 3000 hours time in service from the last inspection.

(2) For flap secondary drive shafts with 24,000 or more hours total time in service, at intervals not to exceed 2000 hours time in service from the last inspection.

(c) The repetitive inspections required by paragraphs (b) and (f) of this AD may be discontinued when the flap secondary drive shaft is replaced, repaired, or overhauled in accordance with paragraph (d) or (e) of this AD.

(d) If, during an inspection required by this AD, a flap secondary drive shaft is found missing, failed, or distorted, or if a torque tube or end fitting is chafed in excess of 0.005 inch in depth, or if any looseness or separation is found at the end riveted joint, before further flight, replace the shaft with a new shaft of the same part number and comply with paragraph (g) of this AD. In lieu of replacement, a torque tube chafed in excess of 0.005 inch in depth may be repaired in accordance with Hobson Overhaul Manual 27-50-52, Figure 402, or an FAA-approved equivalent, after which comply with paragraph (g) of this AD.

(e) Except as provided in paragraph (f) of this AD, prior to exceeding 30,000 hours total time in service on the flap secondary drive shafts listed in paragraph (a) of this AD, or within 1000 hours time in service after the effective date of this AD, whichever occurs later, overhaul the flap secondary drive shafts listed in paragraph (a) of this AD, with the exception of shaft P/N CHA493-1345, in accordance with paragraph 2.3 of the accomplishment instructions of British Aircraft Corporation Alert Service Bulletin 27-A-PM5341, issue 1, dated November 28, 1975, or an FAA-approved equivalent, and comply with paragraph (g) of this AD. During overhaul the shaft tubing must be scrapped but serviceable end fittings may be re-used.

(f) The overhaul of the flap secondary drive shafts and inspection of the adjacent shaft support bearings, required by paragraph (e) of this AD, may be accomplished upon the accumulation of 35,000 hours total time in service if, upon the shafts reaching 30,000 hours total time in service, the inspection required by paragraph (a) of this AD is repeated at intervals not to exceed 1000 hours from the last inspection.

(g) When replacing or repairing a flap secondary drive shaft in accordance with paragraph (d) of this AD or overhauling a flap secondary drive shaft in accordance with paragraph (e) of this AD, inspect the adjacent shaft support bearings of shafts replaced, repaired, or overhauled for excessive radial play in accordance with paragraph 2.5 of the accomplishment instructions of British Aircraft Corporation Alert Service Bulletin 27-A-PM 5341, issue 1, dated November 28, 1975, or an FAA-approved equivalent.

(h) If, during an inspection required by paragraph (g) of this AD, the support bearing is found to have radial play in excess of 0.020 inches Total Indicated Reading (T.I.R.), replace the bearing with a serviceable bearing of the same part number within the next 500 hours time in service.

(i) Operators who have not kept records of hours time in service on individual flap secondary drive shafts shall substitute airplane hours time in service in lieu thereof.

This amendment becomes effective September 21, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 12, 1977.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[FR Doc.77-24152 Filed 8-19-77;8:45 am]

[Docket No. 77-GL-6; Amdt. 39-3020]

PART 39—AIRWORTHINESS DIRECTIVES

McCauley Propellers Model ()2D34C53-() Constant Speed Series

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), which replaces AD 75-24-12. The new AD requires hub inspection, and rework or replacement of McCauley 2D34C53/74E and 2D34C53-A/74E propellers installed on Lycoming O-360 series engines which are subjected to ground strikes or other incidents resulting in bent blades. This AD also requires replacement of some Model B2D34C53-N/74E propellers used on Lycoming I0-360 series engines, as the result of an inflight failure and findings of several cracked hubs of a certain lot. Furthermore, due to service experience, additional periodic inspections of the affected Model 2D34C53-() and B3D 34C53-() series propeller hubs are required until the propellers have been modified to, or replaced by McCauley oil-filled series hubs containing a dyed oil crack detection system.

DATE: Effective date—August 26, 1977. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: Information relating to the service documents referenced in the body of the AD may be obtained from McCauley Accessory Division, Cessna Aircraft Company, Box 7, Roosevelt Station, Dayton, Ohio 45417.

Copies of the service information incorporated in this AD are contained in the Rules Docket, Office of the Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois 60018; and at FAA Headquarters, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Henry L. Weiss, Engineering and Manufacturing Branch, Flight Standards Division, AGL-214, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone 312-694-4500, extension 308.

SUPPLEMENTARY INFORMATION: Amendment 39-2434, AD 75-24-12, superseded Amendment 39-940 (35 FR 3108), AD 70-04-02, as amended by Amendment 39-1013 (35 FR 10106), effective November 26, 1975. AD 75-24-12 required an improved hub replacement for their earlier McCauley 2D34C53/74E and 2D34C53-A/74E propeller models. Also, certain Model B2D34C53-N/74E propellers were recalled for replacement of a certain lot of hubs due to some failures which were experienced in service.

Thereafter, a proposal to amend Part 39 of the Federal Aviation Regulations was published in 42 FR 17138, March 31, 1977. The proposal, which requires further periodic inspection and rework, or replacement of the affected McCauley Model ()2D34C53-() series propeller hubs, was issued in conjunction with the National Transportation Safety Board's (NTSB) Safety Recommendations of September 21, 1976. These recommendations were based in part on NTSB's metallurgical laboratory examination of five failed propeller hubs four of which were different models having certain design improvements intended to decrease fatigue type failures.

The only comments received about the proposal concerned minor corrections to some of the propeller model designations and the suggestion to likewise include the phrase, "or later Federal Aviation Administration approved revisions," after the reference to McCauley Service Letter Number 1974-3, dated March 29, 1974. These recommendations were adopted in the new airworthiness directive which is being issued.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and good cause exists for making this amendment effective in less than 30 days.

In accordance with Departmental Regulatory Reform, dated March 23, 1976, we have determined that the expected impact of this final regulation is so minimal that it does not warrant an evaluation.

DRAFTING INFORMATION

The principal authors of this document are H. L. Weiss, Flight Standards Division, Great Lakes Region, and J. K. McLaughlin, Office of the Regional Counsel, Great Lakes Region.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

MCCAULEY PROPELLERS. Applies to the following two-bladed constant speed propellers installed on but not limited to Mooney M20C, M20D, M20G, and Fuji FA-200-180 type aircraft.

PROPELLER MODEL
2D34C53, -XM, or -XMN
2D34C53-A, -AM, or -AMN
2D34C53-K, -KM, or -KMN
2D34C53-M, or -MN
2D34C53-NM
2D34C53-N
B2D34C53-J, -JM, or -JMN
B2D34C53-K, -KM, or -KMN
B2D34C53-M, or -MN
B2D34C53-NM
B2D34C53-N

Compliance required as indicated, unless already accomplished. To detect propeller hub cracks and prevent possible hub failures, accomplish Paragraphs (a), (b), or (c) as applicable:

(a) All Models 2D34C53 and 2D34C53-A propellers.

(1) Within 25 hours time in service after the propeller has been involved in a ground strike, it must be removed, inspected and reworked, or replaced in accordance with Paragraph (d)(1).

(2) Within 100 hours time in service after the effective date of this Airworthiness Directive, all other Model 2D34C53 and 2D34C-53-A must be removed, inspected and reworked, or replaced in accordance with Paragraph (d)(1).

(b) Model B2D34C53-N/74E propellers having hub serial numbers 705516 through 705560.

(1) Propellers with less than 975 hours time in service as of the effective date of this Airworthiness Directive must be inspected and modified in accordance with Paragraph (d)(2) prior to the accumulation of 1000 hours time in service.

(2) Propellers with 975 or more hours time in service, or whose total time in service is unknown, must be inspected and modified in accordance with Paragraph (d)(2) within the next 25 hours time in service after the effective date of this Airworthiness Directive.

(c) All Model 2D34C53, 2D34C53-( ), B2D34C53-( ) series propellers listed above (excluding Model B2D34C53-N/74E propellers with hub serial numbers 705516 through 705560 cited in preceding Paragraph (b)).

(1) Propellers with less than 500 total hours time in service as of the effective date of this Airworthiness Directive inspect in accordance with Paragraph (d)(3) within 525 total hours time in service, unless already accomplished within the last 25 hours, and reinspect in accordance with Paragraph (d)(3) every 100 hours time in service from the last inspection until 1200 hours time in service is reached at which time compliance with Paragraph (d)(4) is required.

(2) Propellers with 525 or more total hours in service but less than 1175 hours in service as of the effective date of this Airworthiness Directive inspect in accordance with Para-

V 42162 AUG 22 77 UM

graph (d)(3) within the next 25 hours time in service, unless already accomplished within the last 25 hours, and reinspect in accordance with Paragraph (d)(3) every 100 hours time in service from the last inspection until 1200 hours time in service is reached at which time compliance with Paragraph (d)(4) is required.

(3) Propellers with 1200 or more hours time in service or whose total time in service is unknown, as of the effective date of this Airworthiness Directive, inspect in accordance with Paragraph (d)(4) within the next 25 hours time in service, unless already accomplished within the last 300 hours time in service from the last inspection, and reinspect in accordance with Paragraph (d)(4) every 300 hours time from the last inspection.

(d) *Action Required:*

(1) Remove propeller from the aircraft, disassemble, inspect components, rework or replace hub in accordance with McCauley Service Bulletin Number 121, dated February 15, 1977, and Service Manual Number 720415, or later Federal Aviation Administration approved revisions, or an equivalent procedure approved by the Chief, Engineering and Manufacturing Branch, Great Lakes Region.

(2) Remove propeller from the aircraft, disassemble, inspect components and replace hub in accordance with McCauley Service Bulletins No. 115 dated September 30, 1975, and No. 121, dated February 15, 1977, and Service Manual No. 720415, or later Federal Aviation Administration approved revisions, or an equivalent procedure approved by the Chief, Engineering and Manufacturing Branch, Great Lakes Region.

(3) Inspect all external surfaces of the propeller hub for cracks by dye penetrant method. Replace before further flight any cracked hub with an oil-filled Model 2D34C53-XMNO, -AMNO, -KMNO, -MNO, -NMO, -NO, -O, or B2D34C53-JMNO, -KMNO, -MNO, -NMO, -NO, or -O hub, as applicable, in accordance with McCauley Service Bulletin No. 121 dated February 15, 1977, or later Federal Aviation Administration approved revisions.

(4) Remove propeller from the aircraft, disassemble to allow complete inspection of the hub. Inspect all internal and external hub surfaces for cracks by dye penetrant method in accordance with McCauley Service Letter No. 1974-3 dated March 29, 1974, or later Federal Aviation Administration approved revisions. Replace before further flight any cracked hub with an oil-filled Model 2D34C53-XMNO, -AMNO, -KMNO, -MNO, -NMO, -NO, -O, or B2D34C53-JMNO, -KMNO, -MNO, -NMO, -NO, or -O hub, as applicable, in accordance with McCauley Service Bulletin No. 121 dated February 15, 1977, and Service Manual No. 720415, or later Federal Aviation Administration approved revisions.

(e) *Exemption.* The foregoing inspections may be discontinued after the replacement of Model 2D34C53, 2D34C53-(), or B2D34C53-() series hubs with an oil-filled Model 2D34C53-XMNO, -AMNO, -KMNO, -MNO, -NMO, -NO, -O, or B2D34C53-JMNO, -KMNO, -MNO, -NMO, -NO, or -O hub, as applicable, in accordance with McCauley Service Bulletin No. 121 dated February 15, 1977, and Service Manual 720415, or later Federal Aviation Administration approved revisions.

(McCauley Service Bulletin Nos. 77B and 88 also pertain to this subject.)

The manufacturer's specifications and procedures identified in this Directive are incorporated herein and made part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by the directive who have not already received these documents from the manufacturer, may obtain copies upon request to McCauley Accessory Division, Cessna Aircraft Company, Box 7, Roosevelt Station, Dayton, Ohio 45417. These documents may also be examined at the Great Lakes Regional Office, 2300 East Devon Avenue, Des Plaines, Illinois 60018, and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. 20591. A historical file on this airworthiness directive which includes incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and the Great Lakes Region.

This supersedes Amendment 39-940 (35 FR 3108) AD 70-4-2, as amended by Amendment 39-1013, (35 FR 10106); and Amendment 39-2434 (40 FR 53548), AD 75-24-12.

This amendment becomes effective: August 26, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Illinois, on August 11, 1977.

JOHN M. CYROCKI,
Director, Great Lakes Region.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on June 19, 1967.

[FR Doc.77-24153 Filed 8-19-77;8:45 am]

[Docket No. 77-WE-21-AD; Amdt. 39-3016]

PART 39—AIRWORTHINESS DIRECTIVES

AiResearch Model TSCP700 -4B and -5 APU's

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Final rule.

SUMMARY: This airworthiness directive (AD) requires an initial and recurring inspection of the AiResearch Model TSCP700 -4B and -5 Auxiliary Power Units (APU). This AD is required because low cycle fatigue cracks have developed in parts which could result in failure of a segment of the rim and possible release of high energy fragments or parts of the compressor assembly.

DATE: Effective date—August 24, 1977. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: The applicable service bulletin may be obtained from AiResearch Manufacturing Company of Arizona, P.O. Box 5217, Phoenix, Arizona 85010, telephone 602-267-3011.

A copy of the service bulletin for this amendment is contained in the Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Kye L. Olsen, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009, telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: Uncontained separations of the compressor first stage disc of the AiResearch Model TSCP700 Series APU's have occurred in service. In at least one case, failure of this part in an APU installed in an Aerospatiale Model A-300B aircraft resulted in the compressor assembly becoming unstacked and the second stage compressor disc was ejected through the APU compartment and trajected from the aircraft during ground operation. Primary cause of the failure of the first stage disc is development of low cycle fatigue cracks in the blade dove tail slots. Propagation of these cracks can result in tensile overload separation of a segment of two to five blades span of the disc rim. Failures of this nature pose a safety hazard to persons near the aircraft, e.g. ground crews or persons in the terminal buildings. In addition, high energy disc fragments could also cause secondary damage to aircraft fuel, hydraulic and electrical systems and corresponding fire hazard to passengers during ground operations.

Since this condition is likely to exist or develop on APU's of the same TSO design, this AD requires the initial and recurring inspection of the suspect compressor discs to insure that those discs which already have detectable cracks are promptly removed from service.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are John A. Kenworthy, Aircraft Engineering Division, and Richard G. Wittry, Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations, is amended by adding the following new airworthiness directive:

AIRESEARCH MANUFACTURING COMPANY OF ARIZONA: Applies to AiResearch Model TSCP700 -4B and -5 Auxiliary Power Units (APUs) which have first stage compressor discs P/Ns 969600 -1 or -2 installed.

Compliance required before accumulating a total of more than 3000 cycles on the first stage compressor discs, or within the next 300 cycles after the effective data of this AD, whichever occurs later, unless already accomplished within the last 1700 cycles, and thereafter at intervals not to exceed 2000 cycles since the last inspection.

To prevent a high energy release of first stage compressor blades and disc parts due to the possible fatigue failure of the disc, accomplish the following:

(a) Remove the first stage disc from the compressor section of the APU and inspect the blade dove tail slots of the disc in accordance with either of the following methods or an equivalent method approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(1) Use an eddy current probe made in accordance with instructions contained in paragraph 2.B.(4) of AiResearch Service Bulletin TSCP700-49-A3912, dated May 16, 1977, and a visual display instrument Nortec Model No. NDT-6D. In addition to this test apparatus, P/N 969600 -1 or -2 compressor disc, or segment thereof, known to be free of cracks and a corresponding disc, or segment thereof, which has been verified to contain a detectable crack must be available to calibrate the inspection test apparatus. These sample disc(s) may be obtained from the AiResearch Manufacturing Company or, subject to the acceptance of the assigned FAA maintenance inspector, furnished by the operator.

An acceptable procedure for calibrating and using this test equipment is provided in paragraph 2.A., 2.B.(1), 2.B.(2), 2.B.(3), 2.B.(5) and 2.B.(8) of AiResearch Service Bulletin TSCP700-A3912, dated May 16, 1977, supplemented by AiResearch Gage Operating Instructions MSC-4769, MSC-4770 or MSC-4771, as appropriate.

(2) Use tooling described in paragraphs 1.G and procedures prescribed in paragraph 2. of AiResearch Service Bulletin TSCP700-49-A3912, Revision 2, dated June 27, 1977, or later FAA approved revisions.

(b) All discs found to not meet the inspection criteria covered by the procedure described in paragraphs (a)(1) or (a)(2) must be removed from service. Except as provided in paragraph (c)(4), replacement discs of P/Ns 969600 -1 or -2 must be inspected in accordance with paragraph (a) before being installed in the APU for service, unless already inspected within the last 3000 cycles in service, and thereafter at intervals not to exceed 2000 cycles since the last inspection.

(c) For purposes of this AD:

(1) A cycle is defined as a start and acceleration to at least 95% high pressure spool (N_2) rpm followed by a shutdown, during which low pressure spool (N_1) rpm reaches, or exceeds 97% rpm nominal. If, in any start, operating and shutdown sequence, the low pressure spool (N_1) is prevented from exceeding 91% rpm nominal, only one half of a cycle must be recorded.

(2) Operators who have not kept a record of operating starts on individual discs may assume two starts have occurred for each recorded APU operating hour of service, or any other cycle per hour ratio approved by the operator's assigned FAA maintenance inspector, provided the request contains substantiating data to justify the alternative ratio.

(3) Operators who have not kept a record of APU operating hours of service shall estimate hours of APU operation by equating APU operation to airplane hours time in service using a ratio approved by the operators' assigned FAA maintenance inspector and justified by substantiating data.

(4) Unused replacement discs installed per (b) above may be assumed to have zero cycles and need not be inspected prior to installation.

NOTE.—AiResearch Model TSCP700 -4B and -5 APU are known to be installed in McDonnell Douglas Model DC-10 series aircraft and Aerospatiale Model A-300B aircraft.

This amendment becomes effective August 24, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949 and OMB Circular A-107.

Issued in Los Angeles, California, on August 9, 1977.

ROBERT H. STANTON,
Director,
FAA Western Region.

[Docket No. 76-GL-21, Amdt. 39-3018]

PART 39—AIRWORTHINESS DIRECTIVES

Hartzell Compact Series Propellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule and correction.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which amends AD 77-12-06 to clarify the compliance schedule outlines in Paragraphs (a) and (d). Comments received from the public have suggested that this compliance schedule as originally written could be incorrectly interpreted. The clarification incorporated in this amendment is intended to prevent erroneous interpretation of the schedule.

This amendment also includes a correction to AD 77-12-06 that was made effective June 29, 1977, and copies of which were concurrently air mailed to all known users of the propellers referenced by this AD. The correction was required because of an oversight in the prescription of compliance times in Paragraph (c)(2).

DATE: Effective date—August 26, 1977.

FOR FURTHER INFORMATION CONTACT:

M. J. Walker, Engineering and Manufacturing Branch, Flight Standards Division, AGL-214, Federal Aviation Administration, 2300 E. Devon Avenue, Des Plaines, Illinois 60018, telephone 312-694-4500, extension 309.

SUPPLEMENTARY INFORMATION: Since the issuance of Amendment 39-2922, 42 FR 31152, AD 77-12-06, the FAA has received comments indicating that it is possible to misinterpret the compliance schedule prescribed in Paragraphs (a) and (d) of the amendment. To clarify these paragraphs and prevent misinterpretation of the compliance that is intended, AD 77-12-06 is being amended.

This amendment also offers an opportunity to publicly correct an oversight in Paragraph (c)(2) of the original amendment which did not allow certain aircraft time to comply with the AD, and as a result unintentionally grounded those aircraft. All known users of the propellers reference in this AD were notified of the error by an air-mail letter dated June 29, 1977. This document will serve to notify all others.

Since this amendment provides a clarification, includes a correction, and imposes no additional burden on any person, notice and public procedures are unnecessary and the amendment may be made effective in less than 30 days.

In accordance with Departmental Regulatory Reform dated March 23, 1976, we have determined that the expected impact of this final regulation is so minimal that it does not warrant an evaluation.

DRAFTING INFORMATION

The principal authors of this document are M. J. Walker, Flight Standards Division, Great Lakes Region, and J. McLaughlin, Office of the Regional Counsel, Great Lakes Region.

CORRECTION

Amendment 39-2922, 42 FR 31152, AD 77-12-06, Paragraph (c)(2), is corrected by replacing Paragraph (c)(2) with the following new paragraphs:

(c)(2)(i) Propeller Models ()HC-C2YK-()()()/()()7666A-() with less than 500 hours time in service since last inspection and rework in accordance with AD 75-07-05 as of the effective date of this correction, remove, inspect and rework, or replace if necessary in accordance with Hartzell Bulletin 118A or later FAA approved revision(s) prior to the accumulation of 600 hours time in service since last compliance with AD 75-07-05.

(c)(2)(ii) Propeller Models ()HC-C2YK-()()()/()()7666A-() with 500 or more total hours in service, or whose time in service is unknown, since last inspection and rework in accordance with AD 75-07-05, as of the effective date of this correction, remove, inspect and rework, or replace if necessary in accordance with Hartzell Bulletin No. 118A, or later FAA approved revision(s) within the next 100 hours or 60 days after the effective date of this correction, whichever occurs first.

(c)(2)(iii) Reinspect and if necessary rework propellers cited under preceding paragraphs (c)(2)(i) and (c)(2)(ii) in accordance with Hartzell Service Letter 61B, or later FAA approved revision(s).

ADOPTION OF THE AMENDMENT

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39-2922, 42 FR 31152, AD 77-12-06, is hereby amended by deleting Paragraphs (a)(1) and (d)(2) and substituting the following:

(a)(1) All propellers not specified in paragraph (b), (c), or (d) of this AD, prior to the accumulation of 1300 hours total time in service, or within the next 300 hours if time in service is over 1000 hours or unknown, or within one year after the effective date of this AD, whichever occurs first; remove, inspect and rework, or replace if necessary in accordance with Hartzell Bulletin 118A dated February 15, 1977. Reinspect and, if necessary, rework in accordance with Hartzell Bulletin 118A at intervals specified in Hartzell Service Letter 61B (Overhaul Periods for Hartzell Propellers) dated September 10, 1976 or later FAA approved revision(s).

(d)(2) Propeller Models ()HC-C2YK-()()()/F()8475()-() or-F()8477()-() used on but not limited to Aero Commander 200B and 200D, Aerostar, Mooney M22, Britten Norman BN-2, BN-2A, and BN-2A-6, Bellanca 17-31, Embraer EMB-200A, Piper PA32-260 and PA32-300, and Sial Marchetti S-208 series aircraft; compliance the same as in Paragraph (a)(1) preceding.

V 42 162 AUG 22 77 UM

This clarifying amendment becomes effective August 26, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Illinois, on August 10, 1977.

JOHN M. CYROCKI,
Director,
Great Lakes Region.

[Docket No. 77-NE-15; Amdt. 39-3019]

PART 39—AIRWORTHINESS DIRECTIVES

Avco Lycoming T53 Series Turboshaft Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment requires filling the T53 series engine fuel regulator with damping fluid to prevent vibration leading to fatigue failure of the P1 multiplier lever.

DATES: Effective date August 31, 1977. Compliance required by September 15, 1977.

ADDRESSES: To obtain copies of the service bulletin referenced in the AD, contact Avco Lycoming Division, 550 South Main Street, Stratford, Connecticut 06497.

FOR FURTHER INFORMATION CONTACT:

Donald F. Perrault, Propulsion Section, ANE-214, Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone 617-273-7337.

SUPPLEMENTARY INFORMATION: There have been failures of the T53 engine fuel regulator P1 multiplier lever resulting in engine flameout. Investigation by the engine and fuel regulator manufacturers indicated the failure was due to fatigue. The vibration of the P1 multiplier lever was excited by output shaft unbalance within a specific range of compressor rotor speed. Further testing showed that this vibration condition was eliminated by filling the P1 multiplier sense cavity with a damping fluid.

Based upon the results of this investigation, the P1 sense cavity of affected fuel regulators is required to be fluid-damped and the regulator assemblies reidentified.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Donald F. Perrault, Engineering and Manufacturing Branch, Flight Standards Division, and George L. Thompson, Associate Regional Counsel.

ADOPTION OF THE AMENDMENT

Pursuant to the authority delegated to me by the Administrator, Section 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

AVCO LYCOMING. Applies to Avco Lycoming T53 series engine models equipped with fuel regulators P/N 1-170-240-52, P/N 1-170-240-58, or P/N 1-170-240-59.

Compliance required by September 15, 1977.

To preclude possible failure of the fuel regulator P1 multiplier lever resulting in flameout of the engine, perform the following in accordance with Avco Lycoming Service Bulletin No. 0048, dated July 28, 1977, or later revision approved by the Chief, Engineering and Manufacturing Branch, FAA, New England Region:

1. Fill the fuel regulator P1 multiplier cavity with silicone oil, General Electric P/N SF96-100, or equivalent.

2. Reidentify the fuel regulator, from P/N 1-170-240-52 to P/N 1-170-240-61, or from P/N 1-170-240-58 to P/N 1-170-240-60, or from P/N 1-170-240-59 to P/N 1-170-240-62.

The Manufacturer's Service Bulletin identified and described in this directive is incorporated herein and made a part hereof pursuant to 5 U.S.C. 522(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Avco Lycoming Division, 550 South Main Street, Stratford, Connecticut 06497. These documents may also be examined at Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C.

A historical file on this A.D. which includes the incorporated material in full is maintained by the FAA at its Headquarters in Washington, D.C., and at New England Region.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular 107.

Issued in Burlington, Massachusetts, on August 11, 1977.

WILLIAM E. CROSBY,
Acting Director,
New England Region.

NOTE.—The incorporation by reference provisions of this document were approved by the Director of the Federal Register on June 16, 1967.

[FR Doc.77-24169 Filed 8-19-77;8:45 am]

[Airspace Docket No. 77-GL-22]

PART 71—DESIGNATION OF FEDERAL AIRWAYS AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to designate additional controlled airspace, a transition area, near Belvidere, Illinois, to accommodate a new instrument approach procedure to the Belvidere Airport.

EFFECTIVE DATE: December 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Doyle Hegland, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone 312-694-4500, Extension 456.

SUPPLEMENTARY INFORMATION: The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions, and other aircraft operating under visual conditions. The floor of the controlled airspace in this area will be lowered from 1200' above ground to 700' above ground. The circumstance which created this action was a request from the Belvidere Airport officials to provide that facility with instrument approach capability. The development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

DRAFTING INFORMATION

The principal authors of this document are Doyle W. Hegland, Airspace and Procedures Branch, Air Traffic Division, and Joseph T. Brennan, Office of the Regional Counsel.

DISCUSSION OF COMMENTS

On page 33344 of the FEDERAL REGISTER dated June 30, 1977, the Federal Aviation Administration published a Notice of Proposed Rulemaking which would amend Section 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Belvidere, Illinois. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rulemaking.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective December 30, 1977, as follows:

In Section 71.181 (42 FR 440), the following transition area is added:

BELVIDERE, ILLINOIS

That airspace extending upward from 700' above the surface with a five statute mile radius of the Belvidere Airport (latitude 42°19'25" N, longitude 88°50'25" W), Belvidere, Illinois, and within two statute miles either side of a 255° bearing from the airport, extending from the five-mile radius area to six and one-half statute miles southwest of the airport.

(This amendment is made under the authority of Section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.81 of the Federal Aviation Regulations (14 C.F.R. 11.61).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Des Plaines, Illinois, on August 10, 1977.

JOHN M. CYROCKI,
Director, Great Lakes Region.

In § 71.181 (42 FR 440), the following transition area is added:

BELVIDEAE, ILLINOIS

That airspace extending upward from 700' above the surface within a five statute mile radius of the Belvidere Airport (latitude 42°19'25" N., longitude 88°50'25" W.), Belvidere, Illinois, and within two statute miles either side of a 255° bearing from the airport, extending from the five-mile radius area to six and one-half statute miles southwest of the airport.

[FR Doc.77-24170 Filed 8-19-77;8:45 am]

[Airspace Docket No. 76-PC-10]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Hawaiian Islands Transition Areas and Controlled Airspace

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Hawaiian Islands transition area by establishing an outer transition area with a base of 5,500 feet above the surface and an inner transition area with a base of 1,200 feet above the surface. This amendment establishes a common floor of controlled airspace between oceanic/domestic areas surrounding the entire State of Hawaii. A review of the controlled airspace in the vicinity of the Hawaiian Islands indicated a need for simplification of the Hawaiian Islands transition area.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

HISTORY

On June 13, 1977, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Hawaiian Islands transition area by establishing an outer transition area with a base of 5,500 feet above the surface and an inner transition area with a base of 1,200 feet above the surface (42 FR 30210). Interested persons were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. We received no comments on the NPRM. Section 71.181 was republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 440), and amended on May 23, 1977, and June 9, 1977, (42 FR 20621, 29476).

THE RULE

This amendment to Subpart G of Part 71 of the Federal Aviation Regulations (FARs) alters the Hawaiian Islands transition area from a maze of control areas with arbitrary boundaries and nonstandard bases of 700 feet, 1,200 feet, 2,500 feet, 3,500 feet, 5,000 feet and 14,500 feet to a standard outer transition area with a base of 5,500 feet above the surface and a standard inner transition area with a base of 1,200 feet above the surface. The outer transition area establishes a common floor of controlled airspace between oceanic/domestic areas and the inner transition area provides controlled airspace for low altitude flights close to the islands. This amendment adopts the airspace action proposed in the NPRM and in addition deletes the Zaney transition area which was established on May 23, 1977. Since the Zaney transition area has the same 1,200 foot floor as the inner transition area established by this amendment, it is being absorbed in that transition area under this amendment and separate notice and public procedure for such action is unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished and amended (42 FR 440, 20621 and 29476) is amended, effective 0901 G.m.t., October 6, 1977, as follows:

In § 71.181, the following transition areas are amended as follows:

1. In the Hawaiian Islands transition area, the text is deleted and "The airspace extending upward from 5,500 feet above the surface within the area bounded by a line beginning at Lat. 24°03' N., Long. 156°19' W., to Lat. 23°32' N., Long. 155°29' W., to Lat. 23°00' N., Long. 154 39' W., to Lat. 22°22' N., Long. 153°53' W., to Lat. 21°43' N., Long. 153°09' W., to Lat. 20°16' N., Long. 152°14' W., to Lat. 19°13' N., Long. 151°52' W., to Lat. 17°40' N., Long. 155°49' W., to Lat. 18°28' N., Long. 158°55' W., to Lat. 18°57' N., Long. 159°55' W., to Lat. 19°35' N., Long. 160°36' W., to Lat. 22°19' N., Long. 162°29' W., to Lat. 23°07' N., Long. 162°13' W., to Lat. 23°49' N., Long. 161°39' W., to Lat. 24°17' N., Long. 160°52' W., to the point of beginning; and the airspace upward from 1,200 feet above the surface within the area described above bounded by a line beginning at Lat. 22°28' N., Long. 155°48' W., to Lat. 21°00' N., Long. 153°51' W., thence clockwise along the arc of a 115-mile radius circle of the HILO VORTAC (Lat 19°43'26" N., Long. 155°00'49" W.), to Lat. 19°00' N., Long. 153°23' W., to Lat 19°00' N., Long. 157°40' W., to Lat. 20°28' N., Long. 160°29' W., thence clockwise along the arc of a 115-mile radius circle of the South Kauai VORTAC (Lat. 21°54'13" N., Long. 159°31'54" W.), to Lat. 23°30' N., Long. 159°02' W., to the point of beginning." is substituted therefor.

2. In the Hilo, Hawaii, transition area all after "the HILO VORTAC 099° radial;" is deleted.

3. In the Honolulu, Hawaii, transition area all after "extending from 13 miles to 14 miles southwest of the VORTAC;" is deleted.

4. In the Kahului, Hawaii, transition area all after "extending from 14 miles to 17 miles northeast of the VORTAC;" is deleted.

5. In the Kaneohe, Hawaii, transition area all after "the 8-mile radius area to 12 miles N of the TACAN;" is deleted.

6. In the Kona, Hawaii, transition area all after "to 17.5 miles north of the VORTAC;" is deleted.

7. In the Lihue, Hawaii, transition area all after "10.5 miles southeast of the Lihue VORTAC;" is deleted.

8. In the Molokai, Hawaii, transition area all after "to a point 7 miles east of this intersection;" is deleted.

9. North Hilo, Hawaii, transition area is deleted.

10. Sunrise, Hawaii, transition area is deleted.

11. Swordfish, Hawaii, transition area is deleted.

12. Upolu, Hawaii, transition area is deleted.

13. In the Waimea-Kohala, Hawaii, transition area all after "11.5 miles northeast of the Kamuela VOR;" is deleted.

14. Zaney, Hawaii, transition area is deleted.

(Secs. 307(a), 313(a) and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510; Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 15, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air
Traffic Rules Division.

[Airspace Docket No. 77-EA-68]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Transition Area: Charlottesville, Va.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Charlottesville, Va. Control Zone and Transition Area, by changing the name of the Charlottesville, Va., radio beacon in the description to Azalea Park radio beacon.

EFFECTIVE DATE: 0901 GMT October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, telephone 212-995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart F and G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Charlottesville, Va., Control Zone and Transition Area.

In view of the editorial nature of the amendment, notice or public procedure hereon are unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F and G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT October 6, 1977, as follows:

1. Amend Section 71.171 of Part 71 of the Federal Aviation Regulations so as to amend the description of the Charlottesville, Va. control zone by deleting, "Charlottesville, Va., RBN" and by inserting, "Azalea Park RBN" in lieu thereof.

2. Amend Section 71.181 of Part 71 of the Federal Aviation Regulations so as to amend the description of the Charlottesville, Va., 700-foot floor transition area by deleting, "Charlottesville, Va., RBN" and by inserting "Azalea Park RBN" in lieu thereof.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, New York, on August 8, 1977.

L. J. CARDINALI,
Acting Director,
Eastern Region.

[FR Doc.77-24171 Filed 8-19-77;8:45 am]

[Airspace Docket No. 77-EA-64]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Revocation of Control Zone: Hazleton, Pa.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revokes the Hazleton, Pa., Control Zone. This all results from a closing of the Supplementary Aviation Weather Reporting Station (SAWRS) at the Hazleton Municipal Airport.

EFFECTIVE DATE: August 25, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, telephone 212-995-3391.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to revoke the Hazleton, Pa., Control Zone. With the closing of the SAWRS at the airport, the weather observations required to support the control zone are no longer available. Thus, the zone must be revoked.

Since this amendment decontrols airspace and is therefore relieving, notice or public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective August 25, 1977, as follows:

1. Revoke the Hazleton, Pa., Control Zone.

(Sec. 307(a), and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, New York, on August 9, 1977.

WILLIAM E. MORGAN,
Director, Eastern Region.

[FR Doc.77-24156 Filed 8-19-77;8:45 am]

[Docket Nos. 16388 and 16389; Special Federal Aviation Regulation No. 33-1]

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS OF SMALL AIRCRAFT

Flight Recorders and Cockpit Voice Recorders

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment removes a provision which excluded certain large airplane flight recorder and cockpit voice recorder installations from the relief provided by Special Federal Aviation Regulation No. 33 ("SFAR No. 33"). The intended effect of this amendment is to allow certain large airplanes, which had a flight recorder and cockpit voice recorder installed on the effective date of SFAR No. 33, to be operated without a flight recorder or cockpit voice recorder for a temporary period. This change is needed in order to relieve certificate holders of the continued use and maintenance of flight recorder and cockpit voice recorder installations on certain large airplanes.

EFFECTIVE DATE: September 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. D. A. Schroeder, (AFS-901), Safety Regulations Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: 202-755-8517.

SUPPLEMENTARY INFORMATION:

HISTORY

This amendment is based on a notice of proposed rulemaking (Notice 76-29) published in the FEDERAL REGISTER on December 30, 1976 (41 FR 56827). That notice invited comments by all persons interested in the making of the proposed rule. All interested persons have been afforded an opportunity to participate in the making of this amendment and due consideration has been given to all matters presented. Eight commenters responded to Notice 76-29. Except as specifically discussed hereinafter, this amendment and the reasons therefor are the same as those in Notice 76-29.

By way of background, it should be noted that SFAR No. 33 was adopted to avoid possible adverse economic impact which might result from continuation of the flight recorder and cockpit voice recorder requirements during development of new rules in the Part 135 Regulatory Review Program. SFAR No. 33 did not apply to the designated large airplanes which had a flight recorder and cockpit voice recorder installed on the effective date of SFAR No. 33. Notice 76-29 proposed to amend SFAR No. 33 to make it applicable to those airplanes in order to relieve certificate holders of expenses resulting from continued use of the recorders during the time anticipated to be required for completion of rulemaking in the Part 135 Regulatory Review Program.

DISCUSSION OF COMMENTS

Three commenters opposed the proposal and another commenter supported that part of the proposal relating to the flight recorder and opposed the proposal as it related to the cockpit voice recorder. Three commenters supported the proposal and another stated that it did not oppose the proposal. One of the commenters supporting the proposal, an industry association, stated that the flight recorder and cockpit voice recorder do not enhance the safety of a particular flight and the economic detriment resulting from inspections and maintenance is significant. An operator supporting the proposal commented that the proposal would permit standardization of equipment in its fleet of airplanes. That operator noted that under SFAR No. 33 it is necessary to maintain recorder installations in existence on the effective date of SFAR No. 33, but it is not necessary to make recorder installations on its airplanes acquired after that date. Another operator supporting the proposal commented that it had been necessary to repair the flight data recorder frequently which resulted in significant loss of airplane utilization.

Opposition to the proposal centered on the contention that the cockpit voice recorder and flight recorder are useful tools in aircraft accident investigations. It should also be noted that the one comment received on SFAR No. 33 emphasized accident investigation usefulness. However, none of the commenters opposing the proposal on this basis cited any accidents involving airplanes having a maximum passenger capacity of 30 seats or less, a maximum payload capacity of 7,500 pounds or less, and a maximum zero fuel weight of 35,000 pounds or less, operated by a Part 121 or 135 certificate holder, in which the probable cause could not have been determined without cockpit voice recorder and flight recorder information. In addition, although some commenters opposing the proposal minimized the economic impact of maintenance and servicing of the recorders, none submitted any economic data to support its contentions.

One commenter suggested that flight recorder and cockpit voice recorder costs could be reduced to reasonable levels if smaller recorders would be developed. While this suggestion is beyond the scope of the proposal in Notice 76-29 and consequently has not been discussed herein, it is appreciated.

The FAA has carefully considered all of the comments received in response to Notice 76-29, including those which stressed the accident investigation usefulness of the flight recorder and cockpit voice recorder. The FAA has also considered maintenance and servicing expenses and has concluded that safety and the public interest do not require continued use of flight recorder and cockpit voice recorder installations on airplanes described in paragraph (b)(2) of section 1 of SFAR No. 33, during the period until June 30, 1978, which is the time anticipated to be required for completion of rulemaking in the Part 135 Regulatory Review Program.

DRAFTING INFORMATION

The principal authors of this document are Thomas G. Walenta, Flight Standards Service, and Richard C. Beitel, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, Special Federal Aviation Regulation No. 33 is amended, effective September 21, 1977, by revising paragraph (b) of section 1 to read as follows:

1. *Applicability.* • • •

(a) • • •

(b) This regulation does not apply to Convair 240, 340, and 440; Martin 202 and 404; Fairchild F-27 and FH-227; and Hawker Siddeley 748 airplanes.

(Secs. 313(a), 601, and 604 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1424); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 15, 1977.

LANGHORNE BOND,
Administrator.

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER B—CONSUMER PRODUCT SAFETY ACT REGULATIONS

PART 1201—SAFETY STANDARD FOR ARCHITECTURAL GLAZING MATERIALS

Temporary Stay For Laminated Glass In Category II Products

AGENCY: Consumer Product Safety Commission.

ACTION: Temporary stay of the standard for architectural glazing materials as it applies to laminated glass used in category II products.

SUMMARY: The Commission temporarily stays the application of the consumer product safety standard for architectural glazing materials as it applies to laminated glass used in "category II" products that comply with the voluntary industry standard in order to allow completion of impact testing. The results of these impact tests should enable the Commission to determine if the allegation that laminated glass cannot qualify for use in category II products is correct.

DATES: The stay for laminated glass in category II products is effective from July 6, 1977 through December 3, 1977.

V 42162 AUG 22 77 UM

FOR FURTHER INFORMATION CONTACT:

Allen Brauninger, Directorate of Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207, 301–492–6629.

SUPPLEMENTARY INFORMATION:

On January 6, 1977, the Consumer Product Safety Commission promulgated a standard for architectural glazing materials (16 CFR Part 1201) designed to eliminate or reduce the unreasonable risks of injury associated with architectural glazing materials (42 FR 1428). The standard is designed to insure that the glazing materials used in certain architectural products either do not break when impacted with a specified energy, or break with such characteristics that they are less likely than other glazing materials to present an unreasonable risk of injury.

On June 27, 1977, the Laminators Safety Glass Association (LSGA) filed with the Commission, among other documents, a petition to stay the effective date of the architectural glazing standard as it applies to laminated glass. LSGA alleged in its petition that laminated glass used in category II products may not meet the requirements of the standard. It submitted preliminary test data in support of its petition and advised that impact testing of laminated glass would be completed in late August or early September. LSGA also submitted a petition under section 10 of the Consumer Product Safety Act, 15 U.S.C. 2059, requesting in part that the standard be amended to exclude laminated glass. A copy of the petition to stay the standard and petition to amend the standard (CP 77–16) is available for review in the Office of the Secretary, 1111 18th Street, NW., Third Floor, Washington, D.C. 20207.

The Commission, in view of the allegations of LSGA, which if correct could have a significant adverse economic effect on the laminated glass industry and on consumers' ability to obtain replacement glazing, on July 28, 1977 granted a temporary stay of the standard as it applies to laminated glass used in category II products when such glazing complies with American National Standards Institute Standard, "Performance Specifications and Methods of Test for Safety Glazing Material used in Buildings," 1975, ANSI Z97.1–75. The stay applies for a period of 150 days beginning on the effective date of the standard, July 6, 1977, and ending December 3, 1977. The stay will allow the LSGA to complete its testing of laminated glass. The Order of the Commission is set forth below:

BEFORE THE UNITED STATES CONSUMER PRODUCT SAFETY COMMISSION

In The Matter of Laminators Safety Glass Association

ORDER

On consideration of the Laminators Safety Glass Association's (LSGA) request that the Commission stay the Standard for Architectural Glazing Materials as it applies to laminated glass used in "Category II" products, pending completion of impact tests to determine if laminated glass can comply with the Standard, the Commission grants a temporary stay of the Standard as set forth below. The temporary stay is granted in order to allow the laminated glass industry an opportunity to complete impact testing of laminated glass now underway. The results of this testing should enable the Commission to determine if the allegation by LSGA that laminated glass cannot consistently "pass" the requirements of the Standard is correct. The stay will also provide the Commission time to address the petition submitted by LSGA under section 10 of the Consumer Product Safety Act, 15 U.S.C. 2059, to amend the Standard to exempt laminated glass from the impact test requirements for Category II products, or to enlarge the size of the panels included within category II products, or to create a third classification of architectural products to be impacted at an energy level between 150 and 400 foot pounds, or to provide such other relief as may be appropriate.

The Standard for Architectural Glazing Materials, 16 CFR 1201, is stayed as it applies to laminated glass, as defined below, used in category II products (also defined below) only, when such glazing complies with American National Standards Institute Standard, "Performance Specifications and Methods of Test for Safety Glazing Material Used in Buildings," 1975, ANSI Z97.1–75. The stay shall apply for a period of 150 days beginning on the effective date of the Standard, July 6, 1977 and ending December 3, 1977.

Laminated glass is defined in the Standard as meaning:

Glazing material composed of two or more pieces of glass, each piece being either tempered glass, heat strengthened glass, annealed glass or wired glass, bonded to an intervening layer or layers of resilient plastic material. 16 CFR § 1201.2(a)(13).

Category II products mean any of the following architectural products:

(i) Shower doors and enclosures.
(ii) Bathtub doors and enclosures.
(iii) Sliding glass doors (patio type).
(iv) Storm doors or combination doors that contain any piece of glazing material greater than 9 square feet (0.83 square meters) in surface area of one side of the piece of glazing material.
(v) Doors that contain any piece of glazing material greater than 9 square feet (0.83 square meters) in surface area of one side of the piece of glazing material.
(vi) Glazed panels that contain any piece of glazing material greater than 9 square feet (0.83 square meters) in surface area of one side of the piece of glazing material. 16 CFR 1201.2(a)(4).

Decided: July 28, 1977.

Dated: August 17, 1977.

For the Commission,

RICHARD E. RAPPS, *Secretary.*

(Secs. 7, 9, Pub. L., 92–573, 86 Stat. 1215; 15 U.S.C. 2056, 2058.)

Effective date: This stay applies between July 6, 1977 and December 3, 1977.

Dated: August 17, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product Safety Commission.

[FR Doc.77-24219 Filed 8-19-77;8:45 am]

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-5854; IC-9889]

PART 231—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER

PART 271—INTERPRETATIVE RELEASES RELATING TO THE INVESTMENT COMPANY ACT OF 1940 AND GENERAL RULES AND REGULATIONS THEREUNDER

Withdrawal of Undertaking Required of Investment Companies

AGENCY: Securities and Exchange Commission.

ACTION: Amendment of guidelines.

SUMMARY: Because the expense of having a shareholder meeting to satisfy the undertaking applicable to certain investment companies to have a shareholders meeting within 180 days of the effectiveness of a registration statement under the Securities Act of 1933 for the purpose of electing directors may not result in significantly increasing the protection of investors, the Commission announces an amendment to the Guidelines to delete the undertaking.

EFFECTIVE DATE: Immediately.

FOR FURTHER INFORMATION CONTACT:

Walter R. McEwen, Division of Investment Management, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 (202–755–4866).

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Securities and Exchange Commission is hereby publishing an amendment made to the Guidelines for the Preparation of Forms S–4 and S–5 Including the Prospectus for a Management Investment Company (the "Guidelines") (IC 7220, 33–5259, June 14, 1972 (37 FR 12790) to delete the requirement that newly formed management investment companies registering securities under the Securities Act of 1933 (the "Securities Act") (15 U.S.C. 77a et seq.) as amended by Pub. L. No. 94–29 (June 4, 1975)) on Forms S–4 or S–5 (17 CFR 239.14, 239.15) undertake to have a meeting of shareholders no later than 180 days after the effective date of the registration statement under the Securities Act for the purpose of electing directors. This undertaking, coupled with a second undertaking to seek shareholder approval of the advisory contract at the first annual or special meeting, has the effect of requiring an approval of the contract and election of directors within such 180 day period. In its program to reexamine its regulation of investment companies, the staff has become convinced that the operation of the undertaking causes investment companies to incur the not insignificant cost of an annual or special meeting without significantly increasing the protection of investors. The staff believes that the continued applicability of the undertaking in the Guidelines which requires such investment companies to have shareholders vote on the advisory contract at the first annual or special meeting will serve as sufficient protection of the rights of investors.

Given that the withdrawal of the 180 day requirement may result in a longer period before shareholder approval, directors of the investment company, notably independent directors, should pay particular heed to their responsibilities under the Investment Company Act of 1940 (the "1940 Act") with respect to approval and monitoring of the advisory contract in the period prior to such shareholder approval.

Further, in view of the 1940 Act requirements as to shareholder approval, the staff believes that such annual or special meeting should occur as soon as is possible in order to receive public shareholder approval while accommodating reasonable business planning. The staff believes that such meeting normally would be scheduled to occur within a year from commencement of the public offering contemplated by the registration statement.

Should persons wish to comment on or seek further information regarding the foregoing staff position, they may do so by contacting Walter R. McEwen whose address appears above, by telephone or in writing.

By the Commission.

Dated: August 12, 1977.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[FR Doc.77-24127 Filed 8-19-77;8:45 am]

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7504]

PART 7—TEMPORARY REGULATIONS UNDER THE TAX REFORM ACT OF 1976

Amounts at Risk With Respect to Certain Activities

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations relating to the determination of the amount at risk for activities begun prior to the effective date of the at risk provisions and continued after the effective date. Changes to the applicable tax law were made by the Tax Reform Act of 1976. These regulations provide necessary guidance to the public for compliance with the at risk provisions, and affect most persons who engage in activities covered by those provisions which were begun, but not completed, prior to the effective date.

DATE: The regulations are effective for taxable years beginning after December 31, 1975, except as otherwise provided.

FOR FURTHER INFORMATION CONTACT:

David Jacobson of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) 202–566–3923.

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains amendments to the Temporary Regulations under the Tax Reform Act of 1976 (26 CFR Part 7) under section 465 of the Internal Revenue Code of 1954. These amendments are proposed to conform the regulations to section 204 of the Tax Reform Act of 1976 (90 Stat. 1531).

EXPLANATION OF THE REGULATIONS

Section 204 of the Tax Reform Act of 1976 (90 Stat. 1531) amended the Internal Revenue Code by adding section 465. Section 465 provides that losses from certain activities will be allowed only to the extent the taxpayer is at risk with respect to the activity. In general, section 465 applies to holding, producing or distributing motion picture films or video tapes; farming; leasing tangible personal property (section 1245 property); and exploring for, or exploiting, oil and gas resources. Section 465 generally applies to losses attributable to amounts paid or accrued in taxable years beginning after December 31, 1975.

These temporary regulations provide rules for determining amounts at risks as of the first day of the first taxable year section 465 is applicable. They apply to activities begun, but not completed, prior to the effective date of section 465.

DRAFTING INFORMATION

The principal author of this regulation was David Jacobson of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, 26 CFR Part 7 is amended as follows:

The following sections are inserted in the appropriate place:

§ 7.465–1 Amounts at risk with respect to activities begun prior to effective date; in general.

Section 465 provides that a taxpayer (other than a corporation which is not a subchapter S corporation or a personal holding company) engaged in certain activities may not deduct losses from such activity to the extent the losses exceed the amount the taxpayer is at risk with respect to the activity. For the types of activities to which section 465 applies and for determining what constitutes a separate activity, see section 465(c). Section 465 generally applies to losses attributable to amounts paid or incurred in taxable years beginning after December 31, 1975. For the purposes of applying the at risk limitation to activities begun before the effective date of the provision (and which were not excepted from application of the provision), it is necessary to determine the amount at risk as of the first day of the first taxable year beginning after December 31, 1975. The amount at risk in an activity as of the first day of the first taxable year of the taxpayer beginning after December 31, 1975, (for the purposes of § 7.465–1 through 7.465–5 such first day shall be referred to as the effective date) shall be determined according to the rules provided in sections 7.465–2 through 7.465–5.

§ 7.465–2 Determination of amount at risk.

(a) *Initial amount.* The amount a taxpayer is at risk on the effective date with respect to an activity to which section 465 applies shall be determined in accordance with this section. The initial amount the taxpayer is at risk in the activity shall be the taxpayer's initial basis in the activity as modified by disregarding amounts described in section 465(b) (3) or (4) (relating generally to amounts protected against loss or borrowed from related persons).

(b) *Succeeding adjustments.* For each taxable year ending before the effective date, the initial amount at risk shall be increased and decreased by the items which increased and decreased the taxpayer's basis in the activity in that year as modified by disregarding the amounts described in section 465(b) (3) or (4).

(c) *Application of losses and withdrawals.* (1) Losses described in section 465(d) which are incurred in taxable years beginning prior to January 1, 1976 and deducted in such taxable years, will be treated as reducing first that portion of the taxpayer's basis which is attributable to amounts not at risk. On the other hand, withdrawals made in taxable years beginning before January 1, 1976, will be treated as reducing the amount which the taxpayer is at risk.

(2) Therefore, if in a taxable year beginning prior to January 1, 1976 there is a loss described in section 465(d), it shall reduce the amount at risk only to the extent it exceeds the amount of the taxpayer's basis which is not at risk. For the purposes of this paragraph, the taxpayer's basis which is not at risk is that portion of the taxpayer's basis in the activity (as of the close of the taxable year and prior to reduction for the loss) which is attributable to amounts described in section 465(b) (3) or (4).

(d) *Amount at risk shall not be less than zero.* If, after determining the

V42N162 AUG 22 77 UM

amount described in paragraph (a), (b), and (c) of this section, the amount at risk (but for this paragraph) would be less than zero, the amount at risk on the effective date shall be zero.

§ 7.465–3 Allocation of loss for different taxable years.

If the taxable year of the entity conducting the activity differs from that of the taxpayer, the loss attributable to the activity for the first taxable year of the entity ending after the beginning of the first taxable year of the taxpayer beginning after December 31, 1975, shall be allocated in the following manner. That portion of the loss from the activity for such taxable year of the entity which bears the same ratio as the number of days in such taxable year before January 1, 1976, divided by the total number of days in the taxable year, shall be attributable to taxable years of the taxpayer beginning before January 1, 1976. Consequently, that portion shall be treated in accordance with § 7.465–2.

§ 7.465–4 Insufficient records.

If sufficient records do not exist to accurately determine under § 7.465–2 the amount which a taxpayer is at risk on the effective date, the amount at risk shall be the taxpayer's basis in the activity reduced (but not below zero) by the taxpayer's share of amounts described in section 465(b) (3) or (4) with respect to the activity on the day before the effective date.

§ 7.465–5 Examples.

The provisions of § 7.465–1 and § 7.465–2 may be illustrated by the following examples:

Example (1). J and K, as equal partners, form partnership JK on January 1, 1975. Partnership JK is engaged solely in an activity described in section 465(c)(1). On January 1, 1975, each partner contributes $10,000 in cash from personal assets to JK. On July 1, 1975, JK borrows $40,000 (of which J's share is $20,000) from a bank under a nonrecourse financing arrangement secured only by the new equipment (for use in the activity) purchased with the $40,000. On September 1, 1975, JK reduces the amount due on the loan to $36,000 (of which J's share is $18,000). On October 1, 1975, JK distributes $3,000 to each partner. For taxable year 1975, JK has no income or loss. Although J's basis in the activity is $25,000 ($10,000+$18,000−$3,000) J's amount at risk on the effective date is $7,000 determined as follows:

Initial amount at risk	$10,000
Plus: Items which increased basis other than amounts described in sec. 465(b) (3) or (4)	0
Total	10,000
Less: Distribution	3,000
J's amount at risk on effective date	7,000

Example (2). Assume the same facts as in Example (1) except that JK has a loss (as described in section 465(d)) for 1975 of which J's share is $12,000. Although J's basis in the activity is $13,000 ($10,000+$18,000−($3,000+$12,000)) J's amount at risk on the effective date is $7,000 determined as follows:

Initial amount at risk	$10,000
Plus: Items which increased basis other than amounts described in sec. 465(b) (3) or (4)	0
Total	10,000
Less: Distribution	3,000
Portion of loss ($12,000) in excess of portion of basis not at risk ($18,000)	0
	3,000
J's amount at risk on effective date	7,000

Example (3). Assume the same facts as in Example (1) except that JK has a loss (as described in section 465(d)) for 1975, and J's share is $23,000. J's basis in the activity is $2,000 ($10,000+$18,000−($3,000+$23,000)). The amount at risk on the effective date is determined as follows:

Initial amount at risk	$10,000
Plus: Items which increased basis other than amounts described in sec. 465(b) (3) or (4)	0
	$10,000
Less: Distribution	3,000
Portion of loss ($23,000) in excess of portion of basis not at risk ($18,000)	6,000
	8,000
J's amount at risk on the effective date	2,000

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

NOTE.—This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

Approved: August 13, 1977.

LAURENCE N. WOODWORTH,
Assistant Secretary of the Treasury.

JEROME KURTZ,
Commissioner of Internal Revenue.

[T.D. 7503]

PART 9—TEMPORARY INCOME TAX REGULATIONS UNDER THE TAX REDUCTION ACT OF 1975

Foreign Base Company Shipping Income

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations relating to an election permitted to United States shareholders of controlled foreign corporations by the Tax Reduction Act of 1975. These regulations provide necessary guidance for making the election.

DATE: The regulations are effective for taxable years of foreign corporations beginning after December 31, 1975, and for taxable years of United States shareholders within which or with which such taxable years of such foreign corporations end.

FOR FURTHER INFORMATION CONTACT:

Benjamin J. Cohen of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T), 202–566–4454.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On August 9, 1976, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 955 of the Internal Revenue Code of 1954, 41 FR 33285. The amendments were proposed to conform the regulations to section 602 of the Tax Reduction Act of 1975 (89 Stat. 58). No public hearing has been held. After consideration of all relevant comments, the rules in §§ 1.954–7(b) and 1.955A–4 are temporarily adopted by this Treasury decision.

DRAFTING INFORMATION

The principal author of this regulation was Benjamin J. Cohen of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, 26 CFR Part 9 is amended by adding a new § 9.2 to read as follows:

§ 9.2 Election as to date of determining qualified investment in foreign base company shipping operations.

The rules in §§ 1.954–7(b) and 1.955A–4 (as published with notice of proposed rulemaking in the FEDERAL REGISTER for Monday, August 9, 1976 (41 FR 33285)) shall apply until superseded by final regulations.

(Secs. 955(b) and 7805, Internal Revenue Code of 1954 (89 Stat. 63 and 68A Stat. 917; 26 U.S.C. 955 and 7805).)

WILLIAM E. WILLIAMS,
Acting Commissioner of Internal Revenue.

Approved: August 13, 1977.

LAURENCE N. WOODWORTH,
Assistant Secretary of the Treasury.

[FR Doc.77-24187 Filed 8-19-77;8:45 am]

Title 33—Navigation and Navigable Waters

CHAPTER 1—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 75–222]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Lake Champlain, N.Y.

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This amendment changes the regulations governing the operation of the Vermont Department of Highways drawbridge between Sandy Point, Grand Isle (South Hero Island) and Knight Point, North Hero Island to provide periods when the draw need not open for the passage of vessels. The data submitted demonstrated that full-time attendance on a year-round basis and during evenings was not justified. The amendment relieves the state of the obligation of maintaining a full-time drawtender.

EFFECTIVE DATE: This amendment is effective on September 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G–WBR/73), Room 7300, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202–426–0942.

SUPPLEMENTARY INFORMATION: On December 8, 1975, the Coast Guard published a proposed rule (40 FR 57222) concerning this amendment. The Commander, Third Coast Guard District, also issued a public notice on December 10, 1975. Interested persons were given until January 9, 1976, to submit comments.

DRAFTING INFORMATION

The principal persons involved in drafting this rule are: Frank L. Teuton, Jr., Project Manager, Office of Marine Environment and Systems, and Lieutenant Edward J. Gill, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF COMMENTS

Seven responses were received regarding the highway bridge between Sandy Point, Grand Isle and Knight Point, North Hero Island (§ 117.191(c)). Three had no comment or supported the proposal. Four objected to the proposed change and recommended extending the periods when the draw would open on signal. The applicant was informed of these objections and agreed to extend these periods from June 1 through September 30 to May 15 through October 15. The Coast Guard feels that this change will provide for the reasonable needs of navigation. If navigation increases or decreases, these regulations may be amended to reflect this change.

In consideration of the foregoing, Part 117 of Title 33 of the Code of Federal Regulations is amended as follows:

§ 117.190 [Amended]

1. By deleting § 117.190(f) (3) and (4).

2. By adding a new § 117.191 immediately after § 171.190 to read as follows:

§ 117.191 Navigable waters in the State of Vermont and their tributaries: bridges when constant attendance of draw tenders is not required.

(a) Lake Champlain; Vermont Department of Highways bridge across entrance to Missisquoi Bay, between Alburg Tongue and Hog Island, at East Alburg. The draw shall open on signal if at least 24 hours notice is given.

(b) Lake Champlain; Missisquoi Bay, Central Vermont railroad bridge. The draw shall open on signal from June 1 through September 30 from 7 a.m. to 11 p.m. At all other times the draw shall open on signal if at least 24 hours notice is given to Central Vermont Railway, Inc., St. Albans, Vermont 05478.

(c) Lake Champlain; Vermont Department of Highways bridge between Sandy Point, Grand Isle (South Hero Island) and Knights Point, North Hero Island.

(1) From May 15 through October 15, the draw shall open on signal from 7 a.m. to 9 p.m.

(2) From May 15 through October 15, the draw shall open on signal from 9 p.m. to 7 a.m. if at least four hours notice is given.

(3) From October 16 through May 14, the draw shall open on signal if at least 24 hours notice is given.

(4) During periods of advance notice requirements, the draw shall open as soon as possible for public vessels of the United States.

(d) The owners of or agencies controlling these bridges shall keep a copy of the regulations in this section pertaining to each bridge, and a notice stating how the advance notices required by this section, are to be given. This notice shall be conspicuously posted on both the upstream and downstream sides of the bridge.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5).)

The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended and OMB Circular A–107.

Dated: August 15, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard Commandant.

[FR Doc.77-24295 Filed 8-19-77;8:45 am]

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5622]

[Riverside 597]

CALIFORNIA

Revocation of Air Navigation Site Withdrawal

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

SUMMARY: This order will restore a small parcel of public land to the operation of public land laws, including the mining laws.

DATE EFFECTIVE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Eldon G. Hayes, 202–343–8731.

By virtue of the authority contained in section 204 of the Act of October 21, 1976, 43 U.S.C. 1701, et seq., it is ordered as follows:

1. Air Navigation Site withdrawal of September 26, 1957, which withdrew the following described lands for use of the Corps of Engineers, United States Army, for the Silver Mountain Beacon Site, is hereby revoked as to the following described lands:

SAN BERNARDINO MERIDIAN

T. 6 N., R. 4 W.,
Sec. 10, commencing at the center of said sec. 10, S. 56°58' W., 1,869 feet; S. 10°15' E., 165 feet to the true point of beginning; S. 79°45' W., 40 feet; S. 10°15' E., 50 feet; N. 79°45' E., 40 feet; S. 10°15' E., 90 feet, more or less, to the south line of said SE¼NW¼SW¼;
Thence easterly along said south line 10.2 feet; N. 10°15' W., 142 feet, more or less, to a point distant N. 79°45' E., 10 feet from the true point of beginning; S. 79°45' W., 10 feet to the true point of beginning.
Sec. 15, A square parcel of land, measuring 50 feet on each side, said sides bearing due north, east, south and west, the center point of said square parcel being described as follows: Commencing at a point on an existing powerline running approximately east and west from which point the center of sec. 10, said township and range, bears N. 56°58' E., 1,869 feet, thence S. 10°15' E., 3,412.50 feet to a point, said point being the center point of said square parcel of land.

The tracts as described contain approximately 0.114 acre in San Bernardino County.

2. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, at 10 a.m. on September 20, 1977, the lands shall be open to operation of the public land laws generally. All valid applications received at or prior to 10 a.m. on September 20, 1977, shall be considered as simultaneously filed at that time. The lands will be open to location under the United States mining laws and to applications and offers under the mineral leasing laws at 10 a.m. on September 20, 1977.

Inquiries concerning the lands should be addressed to the Bureau of Land Management, Room E–2841, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

GUY R. MARTIN,
Assistant Secretary of the Interior.

AUGUST 15, 1977.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20149; FCC 77-518]

LOCAL GOVERNMENT AND MANUFACTURERS RADIO SERVICES

Making Available Four 173 MHz Splinter Frequencies for Telemetry and Remote Control Operations; Second Report and Order, (Proceeding Terminated)

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allocates several 150–174 MHz band "splinter" and "offset" channels for remote control and telemetry operations in the private land mobile services. The action is expected to alleviate the congestion on the presently allocated splinter channels.

EFFECTIVE DATE: September 6, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mr. Herb Zeiler or Mr. Tom Tycz, Industrial and Public Safety Rules Division, Safety and Special Radio Services Bureau, 202-632-6497.

In the matter of amendment of Parts 89 and 91 of the Commission's Rules and Regulations to make available four 173 MHz splinter frequencies to the Local Government and Manufacturers Radio Services for telemetry and remote control operations (Docket No. 20149); Second Report and Order (Proceeding Terminated).

Adopted: July 21, 1977.

Released: August 4, 1977.

I

Background Statement

1. We initiated this rule making proposing to make four 173-MHz "splinter" channels available for remote control and telemetry operations in the Local Government and Manufacturers Radio Service.[1] Following, in July 1975, the proposal, essentially as made, was adopted.[2] In the proceeding, however, a number of parties urged us to explore further the possibilities for allocating additional "narrow-band frequencies" for use in simiiar "non-voice signalling" operations; and, in response, we issued the Further Notice with which we are concerned here.[3]

2. In the Further Notice, we proposed to make available seven channels in the 150–174 MHz range for use in remote control and telemetry systems.[4] As in our earlier proceeding, these channels were to be allocated to the Local Government and to the same Industrial Radio Services group. In addition, we asked for suggestions from the parties as to any other narrow band frequencies they thought could be employed similarly. The objective here was to explore all possibilities for using any remaining bandages and "splinter" bandwidths in this very crowded part of the radio spectrum. Further, it had come to our attention that certain telemetry systems might require a wider bandwidth than could be used on the 7.5 kHz splinter frequencies; and comments on this were also requested.[5]

3. The comments and replies of interested parties have been filed.[6] We have considered them, and our disposition of the various views and recommendations follows.

II

Recommendation of the Parties In General

4. Our proposal to allocate the seven 152–158 MHz "splinter" frequencies for telemetry and remote control operations in the Local Government and Industrial Services group was supported, on major respects, by API, NABER, NAM, SIRSA, and UTC.[7] However, use of three of these channels (those adjacent to allocations in the Part 21, Domestic Public Radio Services)[8] was opposed to strongly by AT&T, GTE, NARS, and Motorola. FEA expressed the view that there was a need for additional frequencies for "load management" operations by power utilities, but it did not comment specifically on the particular frequencies proposed in the Further Notice. In addition, a number of parties expressed the need for more spectrum for non-voice use at 150 MHz and some urged allocation of frequencies at 450 MHz and 900 MHz for this purpose.[9] UTC specifically recommended use of six "offset" channels in the 173–174 MHz range;[10] and it also suggested seven additional VHF channels as ones which might possibly be employed in narrow-band telemetry operations.[11]

III

Discussion and Conclusions

The Frequencies 154.45625, 154.46375, 154.47125 and 154.47875 MHz

5. The frequency 154.45625 MHz (in the 154.4525–154.4600 MHz band) is presently allocated in the Local Government Radio Service for emergency call box service. See Sections 89.259(f) and (g) (1) and (2). As pointed out in the Further Notice, the channel is in use by a very limited number of licensees. Interest in using it for call boxes has been minimal for several years, and there are other frequencies available for call box operations. Except for UTC, there were no arguments against reallocation of the band for shared use for telemetry and remote control operations. UTC pointed out that this channel (154.45625 MHz) would only be 7.5 kHz removed from 154.46375 MHz, a frequency allocated in the Power Radio Service and used there in relatively high-powered systems for electricity "load shedding." See Sections

[1] Notice of Proposed Rulemaking, Docket No. 20149, Telemetry and Remote Control Operations, 48 FCC 2d 568 (1974). The channels (173.20375 MHz; 173.2100 MHz; 173.3906 MHz; and 173.39625 MHz) were available up to then solely in the Power, Petroleum, Special Industrial, Forest Products, and Business Radio Services. The proposal called for their use in the Local Government and Manufacturers Radio Services where there had developed a need for air, noise, and water quality monitoring systems.

[2] First "Report and Order," Docket No. 20149, 173 MHz Splinter Frequencies, 54 FCC 2d 612 (1975).

[3] Further Notice of Proposed Rulemaking, Docket No. 20149, 173 MHz Splinter Frequencies, 54 FCC 2d 618 (1975).

[4] The seven channels referred to are: 152.25875 MHz; 152.85875 MHz; 154.45625 MHz; 154.46375 MHz; 154.47125 MHz; 154.47875 MHz; and 157.75125 MHz. See 173 MHz Splinter Frequencies, cited supra fn. 4, at pages 618–619.

[5] See op. cit., supra fn. 6. The parties did not address themselves to the possible requirement for wider bandwidth channels (greater than 7.5 kHz) for telemetry operations. Accordingly, we will not explore this subject further at this time. However, recommendations of additional channels for "narrow-band" usages were made; and these proposals will be discussed in our opinion, below.

[6] American Telephone and Telegraph Company (AT&T); GTE Service Corporation (GTE); Motorola, Inc.; Telecommunications Committee of the National Assocation of Manufacturers (NAM); Special Industrial Radio Service Association, Inc. (SIRSA); Central Committee on Telecommunications of the American Petroleum Institute (API); National Association of Radiotelephone Systems (NARS); Utilities Telecommunications Council (UTC); Federal Energy Administration (FEA). Reply comments were filed by: Telephone and Data Systems, Inc. (TDS); American Telephone and Telegraph Company; Motorola; Central Committee on Telecommunications of the American Petroleum Institute; Special Industrial Radio Service Association; Utilities Telecommunications Counsel; National Association of Business and Educational Radio, Inc. (NABER); National Association of Radiotelephone Systems; and GTE Service Corporation.

[7] The reference, here, is to 152.25875, 152.85875, 154.45625, 154.46375, 154.47125, 154.47875, and 157.75125 MHz, the proposed allocation as set forth in our Further Notice. UTC did express opposition to "shared use" of 154.46375 MHz which, at the time, was available only to eligibles in the Power Radio Service.

[8] These channels are: 152.25875, 152.85875, and 157.75125.

[9] Since this proceeding was intended to deal with VHF bandedges and offset channels, the request concerning frequencies at the 450 and 900 MHz bands will not be disposed of here.

[10] The six "offsets" proposed were 173.2375, 173.2625, 173.2875, 173.3125, 173.3375, and 173.3625. These frequencies are 12.5 kHz offset from 173.225, 173.275, 173.325 MHz, and 173.375 MHz, allocated for base/mobile operation in the Motion Picture and Relay Press Radio Service; and from 173.250, 173.300, and 173.350 MHz, allocated for base/mobile operation in the Power, Petroleum, and Forest Products Radio Services.

[11] The suggested channels were: 152.465, 152.495, 157.725, 158.115, 158.475, 158.715, and 161.625 MHz. This recommendation is discussed below.

91.254(b)(17), (18), and (19). In those circumstances, UTC suggested that the channel would be of little use due to the potential for interference from Power Radio Service operations. While we agree that operations on this frequency would not be compatible with operations on 154.46375 MHz in the same area, we feel that the frequency could be used effectively in many parts of the country in view of the narrow-band technical requirements on both frequencies and the requirement for frequency coordination. Accordingly 154.45625 MHz will be reallocated.[12]

6. The frequency 154.47875 MHz is in the band 154.4750–154.4825 MHz. It is presently unassigned; and there were no comments in opposition to its proposed allocation. However, both 154.45625 MHz (just discussed) and this channel, 154.47875 MHz, are only 11.25 kHz removed from regularly assigned base/mobile frequencies.[13] Using present "off-the-shelf" equipment, from the standpoint of adjacent channel, base/mobile operations, the signals transmitted on the splinter channels must be treated on a par with co-channel interference potentials, and it is important that restrictions be imposed designed to keep potential interference to mobile voice systems to a minimum. To accomplish this, in addition to other antenna limitations now prescribed for these frequencies, we will limit stations operating in a fixed mode on the channels to a maximum ERP of 20 watts with antenna height restricted to 50 feet above ground. Mobile operations on these two frequencies will be limited to 2 watts ERP; and both mobile and fixed stations will be authorized only on a secondary basis to adjacent channel, base/mobile operations. Further, interservice coordination with adjacencies will be required. With these conditions, then, 154.47875 MHz is being reallocated as planned.

7. The frequency 154.46375 MHz (in the band 154.4600–154.4675 MHz) is presently allocated in the Power Radio Service primarily for assignment to multiple address fixed stations used for electricity "peak load shaving," or "shedding," or electricity load management. In areas 75 miles or more from the urban areas of 200,000 or more population, this frequency may also be assigned in the Power Radio Service for the type of remote control and telemetry we are concerned with here. In the Notice, we proposed to make it available in Local Government and in several Industrial services for remote control and telemetry in the same remote areas (e.g. 75 miles from some urban centers). UTC opposed the proposal. It argued that load management operations (i.e. peak load shedding by power utilities are not confined to large urbanized areas so that use of that frequency for other purposes outside the Power Radio Service would not be practical. Further, UTC says, this channel fulfills a "high priority" need; and that our proposal comes at a time when the electric utility industry is making plans for more extensive programs for load management. In these circumstances, UTC concludes, that the availability of this channel should not be expanded as proposed.

8. We are aware of the fact that 154.46375 MHz is employed in the power field for high priority, load management functions and of the importance of such usage. Nevertheless, we believe the channel can be made available in rural areas on a shared but secondary basis in radio services in addition to Power (e.g. Local Government and the Industrial group). Thus, we would limit such assignments to areas outside a 120.7 km (75 miles) from the "centers"[14] of urbanized areas of 200,000 or more population (U.S. Census of population, 1970).[15] With this condition, and with coordination and the use of directional antennas and "tone-coded" transmission techniques, we believe shared use of the channel is feasible; and we are accordingly allocating it essentially as proposed.

9. The final channel in this group, 154.47125 MHz (in the band 154.4675–154.4750 MHz) is presently shared between the Petroleum and Special Industrial Radio Services. API and SIRSA state, generally, that sharing with eligibles in the other five services involved is feasible and, hence, concur in it. They do feel that interservice coordination should be required; but we intend this to be the case and appropriate rules for that purpose are being adopted. With this, the splinter channel 154.47125 MHz will be allocated as proposed.

10. In summary, the frequencies 154.45625, 154.46375, 154.47125, and 154.47875 MHz are allocated for shared use for remote control and telemetry operations, with the restrictions specified in the rules, in the Local Government and in the mentioned Industrial Services (Power, Petroleum, Forest Products, Special Industrial, Manufacturers, and Business for mobile only). We plan to assign the center frequency only and that will be required. Paging systems (including tone paging) or other voice emissions will not be authorized. With the technical standards prescribed in detail in the rules, we believe that these frequencies would be useful in many applications and would be effectively shared.

The Frequencies 152.95875, 152.85875, and 157.75175 MHz

11. The other three splinter frequencies proposed in the Notice are located within the 30 kHz bandeges between frequencies allocated in the Domestic Public Land Mobile Radio Service and frequencies allocated in the private land mobile radio services. In all three cases, each proposed frequency is 18.75 kHz removed from the domestic public adjacency, and 11.25 kHz from the private land mobile adjacency. Two of the three domestic public adjacencies, namely 152.240 MHz and 152.840 MHz, are used for one-way paging operations. The third, 157.770 MHz, is not a paging channel, but the other adjacency 157.740 MHz, 11.25 kHz removed, is a paging channel, 157.740 MHz, in the Business Radio Service. We asked for comments specifically on the interference potential of this proposal since the planned remote control and telemetry or load management systems would be interfaced with radio paging systems.

12. Comments filed by AT&T, NARS, GTE, and Motorola, Inc., urged that we not adopt this proposal because, it was argued, operation of control or telemetry stations on the above-mentioned splinter frequencies would cause serious interference to paging operations on the adjacencies. The basic reasons advanced relate to interference, particularly interference to paging operations. Motorola, a leading manufacturer of paging equipment, as well as AT&T stated that the selectivity (that is, the discrimination against adjacent channels signals) of a typical paging receiver is about 60 dB for 30 kHz separation, drops down to about 35 dB for 15 kHz, and to about 25 dB when the separation is only 11.25 kHz, as it would be the case with the Business paging channel 157.740 MHz. Accordingly, it argued that, unless the stations on the adjacent frequencies are co-located, there would be some portion of the paging service area in which the interfering signal would be stronger than the desired signal. Depending on the power used, AT&T suggests that the interference area could be from one to two and a half miles in radius around the interfering transmitter site, or even greater near the fringe area of the paging station's coverage. Even if a station on the splinter frequency were located up to more than one mile outside the service area of the paging station, it is claimed that interference would be caused inside the service area. This interference would be multiplied if more stations were to be authorized on the proposed splinter frequency.

13. Further, it is claimed, the selectivity of paging receivers now in the market is state-of-the-art, and cannot be significantly improved unless new equipment designs are developed and tested. New equipment designs would result in costlier equipment, and would not, they point out, be immediately helpful in view of the vast number of existing equipment now in the hands of the public.

[12] Also as proposed, the few existing systems on this frequency will be "grandfathered."

[13] The regularly assigned base/mobile frequencies are: 154.445 MHz, allocated in the Fire Radio Service (See Sections 89.359 (f) and (g)); and 154.490 MHz, allocated in the Special Industrial Radio Service (See Sections 91.504 (a) and (b)).

[14] The "center" of urbanized areas are determined from the Appendix, page 226, of the U.S. Commerce publication, "Air Line Distances Between Cities in the United States."

[15] The urbanized areas involved are listed at Appendix A to this Second Report and Order.

V42162 AUG 22 77 UM

14. We have considered those comments carefully and in light of the equipment in use today it appears that the interference potential of our proposal would be significant and the impact could be felt by a substantial number of radio users. In reaching this conclusion, we have also considered carefully the arguments of those who supported our proposal. But even the supporters of this proposal, namely UTC, API, SIRSA, and NAM, acknowledge its interference potential but argued that it could be overcome by close, interservice coordination. However, even if we were to assume that coordination would avoid most interference problems, we point out that there is no available mechanism for interservice coordination. There is no frequency coordination body, as such, for the Domestic Public Land Mobile Service and the requirement for frequency coordination in the Business Radio Service applies only to frequencies above 450 MHz. Thus, this possible method of avoiding interference problems is not available [16]. We have also considered making these frequencies available on a secondary, non-interference basis. However, this approach also presents similar problems and, in view of the nature of the systems involved, interference, though serious, would be difficult to detect and identify and, when identified, adjustments would be disruptive and difficult to enforce. For all these reasons, we have concluded that the public interest would not be served by the adoption of this proposal at this time.

15. We have also considered the possibility suggested by UTC, that we utilize the frequencies 152.495, 158.115, and 158.475 MHz, which are also within the bandedges between Domestic Public and private land mobile radio allocations; the frequencies 152.465 and 157.725 MHz, situated between Taxicab and Business paging frequencies; and the frequency 161.625 MHz, which is a bandedge between Maritime and Broadcast Remote Pickup allocations. However, we have also concluded that use of these frequencies for the purposes of this proceeding would not be practically feasible. The frequencies 152.465 and 157.725 MHz are the subject of the rule making proceeding in Docket 20685 and their future use, if any, would be decided there. While it might be possible to make some use of the frequency 161.625 MHz, the fact that it is situated between Maritime and Remote Pickup allocations makes its usefulness for industrial telemetry doubtful. The Maritime and Remote Pickup Services are administered differently and are governed by rules and standards that are different from those applicable to the Public Safety and Industrial Radio Services; and this would make it difficult to properly coordinate the use of the channel and to have easy access to records sufficient to eliminate possible conflicts which could arise. We feel that the problem that would be generated would negate the value of the allocation and, accordingly, we have decided not to reallocate that frequency 161.625 MHz.

16. The potential for interference discussed in paragraphs 12–14, above, would exist if the frequencies 152.495, 158.115, and 158.475 MHz were made available. The frequencies 152.495 and 158.475 MHz are 15 KHz removed from the frequencies 152.480 and 158.460 MHz, respectively, which are allocated for paging service in the Business Radio Service and for two-way base/mobile service in the Special Industrial and in the Forest Products Radio Services in rural areas. Also, the frequency 158.100 MHz is primarily a paging frequency in the Domestic Public Land Mobile Service. The selectivity limitations of today's paging receivers and the heavy use of the frequencies for Business paging in urban areas, the extensive use of these same adjacencies in rural areas by Special Industrial and Forest Products licensees, as well as the potential for interference to Domestic Public paging operations on the other adjacencies dictate, in our view, that we not adopt UTC's proposal. However, 15 kHz separation, even where paging receivers are not involved, require geographic separation and close interservice coordination, the mechanism for which is not now available.

17. For all of these reasons, we have concluded that further use of the bandege frequencies mentioned is not feasible for the purposes of this proceeding at the present time.

The Offset Frequencies in the 173 MHz Band

18. On the other hand, we agree with UTC that some use can be made of the frequency spectrum between the assignable frequencies allocated for private land mobile radio systems in the 173 MHz band. In that band, there are seven assignable frequencies for private systems, four of which are allocated for shared use in the Relay Press and Motion Picture Radio Services and the remaining three are allocated for shared use in the Power, Petroleum, and Forest Products Radio Services. These frequencies are spaced at 25 KHz. UTC proposed that 6 kHz splinters be interspersed, centered at 12.5 kHz from the regularly assigned frequencies, and be made available in the Power Radio Service, principally for multiple address, load management operations with 300 watt output power. While, as we have said, we think that some use of these offset "splinters" can be made, 300-watt omni-directional systems suggested by UTC would not be compatible with land mobile operations on the regularly assignable frequencies.[17] But with suitable restrictions, comparable to these applicable to the use of "off-sets" in the Business Radio Service allocations in the 450–470 MHz band, these frequencies may be made available. However, the limited use possible also dictates that these should also be made available in Local Government and in the Industrial group of services for environmental monitoring, remote control and for telemetry, in addition to the Power Radio Service.

19. As to the restrictions, use would be limited to fixed nonvoice operation; paging will not be permitted; and all fixed station operation on these channels will be limited to a maximum ERP of 20 watts, with antenna height above ground not to exceed 50 feet. Fixed stations will be required to have directional antennas with a front-to-back ratio of at least 20 dB. However, provisions have been made for authorizing the use of omni-directional antennas with unity gain when a need is shown to transmit to at least three receiving locations separated by a total of 160 degrees in azimuth. Narrow band emission commensurate with the existing 173 MHz splinter operations will be required. In particular, for FM transmitters, the sum of the highest modulating frequency and the amount of frequency deviation may not exceed 2.8 kHz. For AM transmitters, the highest modulating frequency may not exceed 2000 Hz. The carrier frequency must be maintained with 0.0005 percent of the center of the frequency band, and the authorized bandwidth may not exceed 6 KHz. Finally, interservice coordination for co-channel and adjacent channel purposes will be required, and operations on the off-set splinters will be authorized on a secondary basis to adjacent channel users.

Summary

20. In summary, we have decided to allocate four channels in the 154 MHz range for remote control and telemetry operations; and six channels at 173 MHz for use in similar types of systems. All of the frequencies are being made available on a limited and conditioned basis

[16] In the private land mobile radio services, where the separation between assignable frequencies in the 150–162 MHz band is 15 kHz, the rules require a minimum geographic separation of 10 miles (7 in some cases) and close coordination if stations on adjacent frequencies are to be separated by more than 10 but less than 35 miles. Thus, as AT&T argued, use of these frequencies would place limits on future uses of the regularly assigned adjacent frequencies for domestic public land mobile purposes, a consequence not contemplated in this proceeding.

[17] A 12.5 KHz separation provides adjacent channel attenuation only on the order of 20 dB to land mobile operations. With high power, gain antennas, and substantial antenna height, the area of possible interference to 12.5 KHz adjacent channel mobile operations would be quite large. For instance, a 300 watt (ERP) transmitted signal with unity gain antenna (omnidirectional) and with an antenna height of only 200 feet (AAT) would provide a calculated 20 dBu signal to a 30-foot receiving antenna at a distance of approximately 46 miles from the transmitter basel on F (50,50) propogation curves. This same transmitter would provide a 34 dBu signal to a 30-foot receiving antenna at distances up to approximately 38 miles using F (50,10) curves. This 34 dBu signal level would be equivalent to a 14 dBu signal level 12.5 KHz removed which just maintains a desired-to-undesired signal ratio of 6 dB. Since the 173 MHz band in question is primarily a base/mobile band, it is clear that restrictions must be imposed to preserve the basic land mobile priority of the band.

with more stringent requirements applicable to some of the channels in order to avoid possible interference to adjacent channel base/mobile operations. Overall, in this rulemaking, we have carefully examined what we feel are all feasible potentials for the present use of bandedge frequencies and off-sets in the 150–174 VHF band. While there may be some additional bandedge channels or off-sets that might be used in certain remote areas under some conditions, we do not believe that such usage should be permitted on a regular basis and we are satisfied at least for the present, that additional VHF channels are not reasonably available for remote control and telemetry purpose. Accordingly, we feel that this proceeding should be terminated insofar as reallocation of additional bandedge channels in this part of the spectrum are concerned.[18] The further requirements for remote control and telemetry, which the comments reflect exist, will have to be satisfied using the frequencies presently available for these purposes and will be further considered in other pending proceedings.

21. One further matter, UTC in its comments suggested two minor editorial changes. The first, involves deletion of the term "load shedding" and "peak shaving" and using the term "load management" in their place. (See Section 91.254(b)(17).) We agree with the clarification asked. We also agree with UTC to clarify Section 91.254(17) to make clear that multiple address directional as well as omni-directional antennas may be employed. We point out, however, that the possible antenna gain is much greater for a directional antenna than for an omni-directional antenna, and, therefore, licensees should take this gain factor into account when designing a system and power values.

22. Also, as we suggested in the Notice, full and complete cooperation among the various industry frequency advisory committees which must coordinate, on an interservice basis the selection of these frequencies. Thus, it seems to us that responses to coordination requests should be made as promptly as possible, and that the absence of a reply with specific objections within a reasonable period of time, such as three weeks, may be taken to be an affirmative response.

23. Finally, we are taking this opportunity to change our current practice for licensing VHF splinter frequencies. Under our present procedure a separate application must be submitted for each fixed transmitter contemplated. In the past, this has not been a problem because the number of transmitters to be operated by individual entities was small. Hence, an applicant was required to prepare a few separate applications. Recently, however, the number of transmitters requested by a single entity has increased dramatically. According to our records, requests now routinely involve more than 10 and sometimes approach 100 or more units. Following the present procedure in licensing these new large systems, in our opinion would be burdensome to both the applicant and the Commisssion without any apparent value to either. Therefore, we are initiating the following new procedure for licensing fixed operations on the VHF splinter and offset frequencies. Only one application per system would be filed (for transmitters to be considered in a system, they must interact or be related to each other in some way). While more than one splinter frequency is permitted on each license, only one call sign will be assigned. Attached to the license application, on a separate sheet, will be a list of the location by geographical coordinates, power (ERP), and antenna height (above ground) and direction of each transmitter and associated antenna in the system. If after a license is granted, and the licensee wishes to add additional transmitters to the system, the license could be modified with just a listing similar to that submitted with the original application, of all transmitters, attached to the application for modification.

24. In view of the foregoing the Commission concludes that the public interest will be served by adopting the rule amendments set forth below. Accordingly, *it is ordered*, That pursuant to authority contained in Section 4(i) and 303 of the Communications Act of 1934, as amended; that Parts 2, 89, and 91 of the Commission's Rules and Regulations are amended effective September 6, 1977, as shown below.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303).

Federal Communications Commission,
Vincent J. Mullins,
Secretary.

[18] Our decision here has been based in large measure on the limitations of radio receivers, particularly paging receivers, now in use in the 150–174 MHz band. However, we expect the new generations of receivers to have significantly improved selectivity and stability characteristics which would allow us to revisit the bandedges and make some use of them at that time.

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

I. Part 2 of Chapter I of Title 47 of the Code of Federal Regulations, § 2.106 is amended as follows:

§ 2.106 Table of frequency allocations.

Band (Megahertz)	Service	Class of station(s)	Frequency (Megahertz)	Nature of service; nature of stations
7	8	9	10	11
• • • •	• • • •	• • • •	• • • •	• • • •
153.7325 to 154.4825...	Land mobile.	Base land mobile fixed..	154.2	Industrial, public safety (NG26) (NG57) (Earth telecommand).
154.4825 to 154.6375.....	do.....	Base land mobile.....		Industrial.
• • • •	• • • •	• • • •	• • • •	• • • •

PART 89—PUBLIC SAFETY RADIO SERVICES

II. Part 89 of the Commission's Rules is amended as follows:

1. Section 89.259(f) Table and Paragraph (g) are amended as follows:

§ 89.259 Frequencies available to the local government radio service.

• • • • • •

(f) • • •

Frequency or band	Class of station(s)	Limitations
MHz		
• • • •	• • • •	•
154.115	Base and mobile	19
154.43625	Fixed and mobile	15,16,17,19
154.46375	do	13,15,16, 17,18
154.47125	do	13,15,16,17
154.47875	do	15,16,17,19
154.965	Base and mobile	
• • • •	• • • •	•
173.210	Fixed and mobile	13,14,16,17
173.2375	do	15,16,17,19
173.2625	do	15,16,17,19
173.2875	do	15,16,17,19
173.3125	do	15,16,17,19
173.3375	do	15,16,17,19

173.3900	do	13,14,16,17
• • • •	• • • •	•

(g) • • •

(1) reserved

(2) reserved

• • • • • •

(13) The maximum power output of the transmitter may not exceed 50 watts for fixed stations and 1 watt for mobile stations. A1, A2, A9, F1, F2, or F9 emission may be authorized.

• • • • • •

(16) This frequency is available on a shared basis with the Power, Petroleum, Forest Products, Special Industrial, Business and Manufacturers Radio Services for remote control and telemetry operations. Evidence of interservice coordination is required.

• • • • • •

(18) Use of this frequency is limited to stations located at least 120.7 km (75 miles) from the center of any urbanized area of 200,000 or more population (U.S. Census of Population 1970). Operation is on a secondary basis to that in the Power Radio Service.

(19) The maximum effective radiated power (ERP) may not exceed 20 watts for fixed stations and 2 watts for mobile stations. The height of the antenna system may not exceed 15.24 meters (50 feet) above ground. All such operation is on a secondary basis to adjacent channel land mobile operations.

• • • • • •

PART 91—INDUSTRIAL RADIO SERVICES

III. Part 91 of the Commission's Rules is amended as follows:

V42162 AUG 22 77 UM

1. Section 91.254(a) Table and Paragraph (b) are amended as follows:

§ 91.254 Frequencies available.

(a) * * *

POWER RADIO SERVICE FREQUENCY TABLE

Frequency or band	Class of station(s)	Limitations
MHz		
* * *	* * *	* * *
153.725	Base or mobile	
154.45625	Fixed or mobile	16,18,22,23
154.46375	do	17,18,19,23
154.47125	do	18,20,22,23
154.47875	do	16,18,22,23
158.130	Base or mobile	
* * *	* * *	* * *
173.2100	Fixed or mobile	20,21,22,23
173.2375	do	16,18,22,23
173.240	Base or mobile	12
173.2625	Fixed or mobile	16,18,22,23
173.2875	do	16,18,22,23
173.300	Base or mobile	12
173.3125	Fixed or mobile	16,18,22,23
173.3375	do	16,18,22,23
173.340	Base or mobile	12
173.3625	Fixed or mobile	16,18,22,23
173.3900	do	20,21,22,23
* * *	* * *	* * *

(b) * * *

(16) The maximum effective radiated power (ERP) may not exceed 20 watts for fixed stations and 2 watts for mobile stations. The height of the antenna system may not exceed 15.24 meters (50 feet) above ground. All such operation is on a secondary basis to adjacent channel land mobile operations.

(17) This frequency is available primarily for assignment to multiple address fixed stations employing either omni-directional antennas or multiple address directional antennas used for power utility multiple address load management applications and to mobile stations used for the remote control of objects and devices. The maximum power that may be authorized to fixed stations is 300 watts output and maximum power that may be authorized for mobile stations is 1 watt output. A1, A2, A9, F1, F2, F9 emission may be authorized.

* * * * *

(19) This frequency may also be assigned to operational fixed stations employing directional antenna systems (front-to-back ratio of 20 db) when such stations are located at least 120.7 kM (75 miles) from the center of any urbanized area of 200,000 or more population (Census of Population 1960). The maximum power output of the transmitter for such fixed stations may not exceed 50 watts.

(20) The maximum output power of the transmitter may not exceed 50 watts for fixed stations and 1 watt for mobiles. A1, A2, A9, F1, F2, or F9 emission may be authorized.

* * * * *

(23) This frequency is available on a shared basis with the Local Government, Petroleum, Forest Products, Special Industrial, Business and Manufacturers Radio Services for remote control and telemetry operations. Evidence of interservice coordination is required.

* * * * *

2. Section 91.304(a) Table and Paragraph (b) are amended as follows:

§ 91.304 Frequencies available.

(a) * * *

PETROLEUM RADIO SERVICE FREQUENCY TABLE

Frequency or band	Class of station(s)	Limitations
MHz		
* * *	* * *	* * *
153.680	Base or mobile	9,10

* * *	* * *	* * *

(b) * * *

(24) The maximum output power of the transmitter may not exceed 50 watts for fixed stations and 1 watt for mobile stations. A1, A2, A9, F1, F2, or F9 emission may be authorized.

* * * * *

(26) This frequency is available on a shared basis with the Local Government, Power, Petroleum, Forest Products, Special Industrial and Business Radio Services for remote control and telemetry operations. Evidence of interservice coordination is required.

* * * * *

(28) The maximum effective radiated power (ERP) may not exceed 20 watts for fixed stations and 2 watts for mobile stations and the height of the antenna system may not exceed 15.24 meters (50 feet) above ground. All such operation is on a secondary basis to adjacent channel land mobile operations.

(29) Use of this frequency is limited to stations located at least 120.7 km (75 miles) from the center of any urbanized area of 200,000 or more population (U.S. Census of Population, 1970). Operation is on a secondary basis to that in the Power Radio Service.

Title 49—Transportation

CHAPTER I—MATERIALS TRANSPORTATION BUREAU, DEPARTMENT OF TRANSPORTATION

[Docket No. HM-139; Amdt. Nos. 173-107, 178-43]

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

PART 178—SHIPPING CONTAINER SPECIFICATIONS

Conversion of Individual Exemptions to Regulations of General Applicability

AGENCY: Materials Transportation Bureau, D.O.T.

ACTION: Final rule.

SUMMARY: This action is being taken to incorporate into the Department's Hazardous Materials Regulations a number of changes based on the data and analysis supplied in selected exemption applications, or from existing special permits and exemptions. The need for this action has been created by the public demand to make available new packaging and shipping alternatives that have proven themselves safe under the Department's special permit and exemption programs. The intended effect of these amendments is to provide wider access to the benefits of transportation innovations recognized and shown to be effective and safe.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Alan I. Roberts, Director, Office of Hazardous Materials Operations, 2100 2nd Street, SW., Washington, D.C. 20590 202-426-0656.

SUPPLEMENTARY INFORMATION: On April 7, 1977, the Materials Transportation Bureau (MTB) published a Notice of Proposed Rule Making, Docket HM-139; Notice 77-3 (42 FR 18409) which proposed these amendments. The background and the basis for incorporating these exemptions into the regulations were discussed in that notice. Interested persons were invited to give their views prior to the closing date of May 5, 1977. The primary drafters of this document are Darrell L. Raines and John C. Allen of the Office of Hazardous Materials Operations, Exemptions Branch, and George W. Tenley of the Assistant General Counsel for Materials Transportation Law.

Several changes were made in response to public comments received by the Bureau. Notice 77-3 proposed to add a paragraph (b)(11) to § 173.119 to authorize DOT Specification 12P fiberboard boxes with inside 2U polyethylene containers for flammable liquids n.o.s., with flash points above 20° F. Several commenters pointed out that the 12P/2U composite packaging is already authorized under § 173.119(m)(8) for flammable liquids, regardless of flash point, which have a secondary hazard. It is argued that this packaging should also be authorized for flammable liquid n.o.s. commodities which have no secondary hazard classification but have flash points below 20° F. The Bureau agrees and consequently the 12P/2U packaging is added as a new paragraph § 173.119 (a)(27) instead of § 173.119(b)(11).

Several objections were received concerning the addition of the DOT-56 portable tank as an authorized container for magnesium powder in § 173.220(b). One commenter suggests the inclusion of other safety features that are now contained in the exemption. Upon further evaluation, the Bureau has decided to withdraw the proposed amendment to § 173.220(b) until further experience is gained with the portable tanks under exemption.

A new sentence is added at the end of the proposed change to § 173.276(a)(9) which authorizes hydrazine in DOT Specification 12B fiberboard boxes with an inside Specification 2E polyethylene container. The new sentence restricts this packaging to hydrazine solution only. This change is based on a comment received from the holder of DOT-SP 6561, the permit upon which the rule change is based.

The Bureau does not agree with the views of a commenter on the rule change to § 178.33a-2(b) which increases the maximum capacity of the DOT Specification 2Q container from 50 cubic inches to 55 cubic inches. The commenter suggested that the maximum capacity authorized for both the 2P and 2Q containers be increased to 62 cubic inches or approximately one liter to forestall future requests for capacity increases. It was also suggested that the criteria for qualifying containers for limited quantities for compressed gases in § 173.306(a)(3)(i) and (b)(1) and for ORM-D commodities in § 173.1200(a)(8)(ii)(A) be increased to 62 cubic inches. These suggestions go far beyond the proposal in Notice 77-3 and the Bureau has no experience through its exemption and special permit program to warrant making such changes under Docket HM-139 at this time.

The only other change in the proposals contained in Notice 77-3 concerns the redesignation of the rule change to § 173.276 to incorporate the DOT-34 container as an authorized container for hydrazine solution based upon DOT-SP 6561. Notice 77-3 identified the new paragraph to § 173.276 as (a)(9). However, the DOT-34 will be added as paragraph (a)(10) since another rule change to authorize the 12B/2E composite packaging has been added as § 173.276(a)(9).

Analysis of these amendments and comments thereon indicate that the costs of regulatory enforcement will not be significantly affected, nor will additional costs be imposed on the private sector, consumers, or Federal, State, or local governments, since these amendments will authorize the general use of shipping alternatives previously available to only a few users under exemptions. The safety record or analysis of shipments under the exemptions, identified in Notice 77-3, demonstrate that significant environmental impacts will not result from any of these amendments.

Since these amendments are relaxations of existing rules, and place no additional burden on any person, they are being made effective in less than 30 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, 49 CFR Parts 173 and 178, are amended as follows:

1. In § 173.66 paragraphs (c), (d) and (d)(1) are revised to read as follows:

§ 173.66 Blasting caps, blasting caps with safety fuse, blasting caps with metal clad mild detonating fuse, and electric blasting caps.

* * * * * *

(c) Blasting caps containing not more than 50 grains of explosive composition each must be placed in strong inside containers, in which they fit snugly. When caps are loaded vertically in inside metal containers, they must be covered by suitable elastic material placed over the caps. Not more than 100 such blasting caps may be packed in a single container. All inside containers, except polyethylene plastic bags not subject to static generation, must then be packed snugly in cartons or wrapping made of paper or pasteboard.

(d) Not more than 5000 blasting caps, containing not more than 50 grains of explosive composition each, packed in inside containers as prescribed in paragraph (c) of this section, must be packed in outside containers complying with the following specifications:

(1) Specification 14, 15A or 16A (§178.165, 178.168, 178.185 of this subchapter) wooden boxes (see § 173.67(a)(1), Note 1) or Specification 12H, 23F, or 23H (§ 178.209, 178.214, 178.219 of this subchapter) fiberboard boxes. Inside containers must be cartons or wrappings with further inside containers as prescribed in paragraph (c) of this section. Polyethylene plastic bags may be used as the only inside containers provided the bags are not subject to static generation and fit snugly in the outside box. Inside containers, except the polyethylene plastic bags, must be separated from the outside box by at least 1-inch of tightly packed sawdust, excelsior, or equivalent cushioning material. Gross weight of the completed package shall not exceed 150 pounds.

* * * * * *

2. In § 173.107 paragraph (d)(1) is added to read as follows:

§ 173.107 Primers, percussion caps, grenades, empty, primed, and cartridge cases, empty, primed.

* * * * * *

(d) * * *

(1) Specification 12B (§ 178.205 of this subchapter). Fiberboard box. Caps must be packed in inside metal cans containing not more than 100 caps each. Can must then be packed in a chipboard box with not more than 10 cans per box. Not more than 5 chipboard boxes shall be packed in the 12B fiberboard box. The completed package must be such that the explosion of a part of the caps will not cause the explosion of all the caps.

* * * * * *

3. In § 173.119 paragraph (a)(27) is added to read as follows:

§ 173.119 Flammable liquids not specifically provided for.

(a) * * *

(27) Specification 12P (§ 178.211 of this subchapter). Fiberboard boxes with inside Specification 2U (§ 178.24 of this subchapter) polyethylene containers not over 5-gallon capacity each. Authorized only for material which will not react dangerously with or cause decomposition of polyethylene. Not authorized for transportation by air.

* * * * * *

4. In § 173.208 paragraph (b)(4) is added to read as follows:

§ 173.208 Titanium metal powder, wet or dry.

* * * * * *

(b) * * *

(4) Specification 17C (§ 178.115 of this subchapter). Metal drums (single trip) not over 30-gallon capacity.

5. In § 173.239 paragraph (a)(2) is added to read as follows:

§ 173.239 Barium azide—50 percent or more water wet.

(a) * * *

(2) Specification 21C (§ 178.224 of this subchapter). Fiber drum with inside glass bottle not over 1-pound capacity each. Bottles must have rubber stoppers wire-tied for securement. If shipment is to take place at a time freezing weather is to be anticipated, a suitable antifreeze solution must be used to prevent freezing.

6. In § 173.245b paragraph (a)(6) is revised to read as follows:

§ 173.245b Corrosive solids not specifically provided for.

(a) * * *

(6) Plastic drum or pail not exceeding 80 pounds net weight and not over 7-gallon capacity.

* * * * * *

7. In § 173.247 paragraph (a)(2) is revised to read as follows:

§ 173.247 Acetyl bromide, acetyl chloride, acetyl iodide, antimony pentachloride, benzoyl chloride, boron trifluoride-acetic acid complex, chromyl chloride, dichloroacetyl chloride, diphenylmethyl bromide solution, pyro sulfuryl chloride, silicon chloride, sulfur chloride (mono and di), sulfuryl chloride, thionyl chloride, tin tetrachloride (anhydrous), titanium tetrachloride, and trimethyl acetyl chloride.

(a) * * *

(2) Specification 6D (§ 178.102 of this subchapter) Cylindrical steel overpack with inside Specification 2S or 2SL (§§ 178.35, 178.35a of this subchapter) polyethylene packaging. Polyethylene used must be Type III as set forth in Appendix B—Specifications for Plastics to Part 178 of this Title. Authorized for acetyl chloride, dichloroacetyl chloride, sulfuryl chloride and trimethyl acetyl chloride only.

* * * * * *

8. In § 173.264 paragraph (b)(1) is amended by changing the first sentence to read as follows:

§ 173.264 Hydrofluoric acid: white acid.

* * * * * *

(b) * * *

(1) Specification 3', 3A, 3AA, 3B, 3C, 3E, 4, 4A, 25', or 38' (§§ 178.36, 178.37, 178.38, 178.40, 178.42, 178.48, 178.49 of this subchapter); also specification 4B, 4BA, 4BW or 4C (§§ 178.50, 178.51, 178.61, 178.52, of this subchapter) if not brazed. * * *.

* * * * * *

9. In § 173.272 paragraphs (d) and (j)(6) are revised and paragraph (j)(28) is added to read as follows:

§ 173.272 Sulfuric acid.

* * * * * *

(d) *Sulfuric acid concentration of greater than 51 percent to not over 65.25 percent:* Authorized packaging is described in paragraphs (1) through (16), (27) and (28) of paragraph (j) of this section.

* * * * * *

(j) * * *

(6) Specification 6D or 37M (nonreusable container) (§§ 178.102, 178.134 of this subchapter). Cylindrical steel overpacks with an inside specification 2S, 2SL, or 2T (§§ 178.35, 178.35a, 178.21 of this subchapter) polyethylene container. Overpack of over 30-gallon capacity must be constructed of at least 16-gauge steel throughout when used for sulfuric acid of 93 percent or greater concentration.

* * * * * *

(28) Specification MC 310, MC 311 or MC 312 (§ 178.340, 178.343 of this subchapter). Tank motor vehicles having steel cargo tanks equipped with a phenolic lining impervious to the lading. Not authorized for transportation by water.

V42I162 AUG 22 77 UMI

10. In § 173.275 paragraph (a)(5) is added to read as follows:

§ 173.275 Difluorophosphoric acid, unhydrous, monofluorophosphoric acid, anhydrous, hexafluorophosphoric acid, and mixtures thereof.

(a) * * *

(5) Specification 6D (§ 178.102 of this subchapter). Cylindrical steel overpack with inside specification 2S or 2SL (§§ 178.35, 178.35a of this subchapter) polyethylene packaging. Net weight may not exceed 550 pounds.

* * * * *

11. In § 173.276 paragraphs (a) (9) and (a)(10) are added to read as follows:

§ 173.276 Anhydrous hydrazine and hydrazine solution.

(a) * * *

(9) Specification 12B (§ 178.205 of this subchapter). Fiberboard box with one inside Specification 2E (§ 178.24a of this subchapter) polyethylene bottle not over 4½-quart capacity. Polyethylene bottle must be of Type III high density polyethylene having a minimum wall thickness of 30 mils and bottle must be securely closed with a screw cap. Authorized for hydrazine solution only.

(10) Specification 34 (§ 178.19 of this subchapter) polyethylene container without overpack, not over 30-gallon capacity. Authorized for hydrazine solution only.

12. In § 173.304 the Table in paragraph (a)(2) is amended by revising the entry for sulfuryl fluoride to read as follows:

§ 173.304 Charging of cylinders with liquefied compressed gas.

(a) * * *

(2) * * *

Kind of gas	Maximum permitted filling density (see note 1)	Containers marked as shown in this column or of the same type with higher service pressure must be used except as provided in sec. 173.34 (a), (b), sec. 173.301(j) (see notes following table)
*	*	*
(Revise)		
Sulfuryl fluoride..	106	DOT-3A480; DOT-3AA480; DOT-3E1800; DOT-4B480; DOT-4BA480; DOT-4BW480.
*	*	*

* * * * *

13. In § 173.377 paragraph (b)(6) is revised to read as follows:

§ 173.377 Hexaethyl tetraphosphate mixtures; methyl parathion mixtures; organic phosphorus compound mixtures; organic phosphate compound mixtures; parathion mixtures; tetraethyl dithio pyrophosphate mixtures; and tetraethyl pyrophosphate mixtures, dry.

* * * * *

(b) * * *

(6) Specification 12B (§ 178.205 of this subchapter). Fiberboard box with inside Specification 2D (§ 178.23 of this subchapter) paper bags not over 4-pound capacity each and having an additional foil liner. The mixture may be further packed in water soluble 1½ mil polyvinyl alcohol film pouches of not more than 8-ounce capacity each with not more than 10 pouches per specification bag. Completed package may not exceed 65 pounds gross weight and must meet the test requirements of paragraphs (d) and (e) of this section. Authorized only for mixtures in which the liquid is absorbed in concentrations no greater than 67 percent.

* * * * *

14. In § 178.33a, § 178.33a–2(b) is revised to read as follows:

§ 178.33a Specification 2Q, inside nonrefillable metal containers.

* * * * *

§ 178.33a–2 Type and size.

* * * * *

(b) The maximum capacity of containers in this class shall not exceed 55 cubic inches (30.5 fluid ounces). The maximum inside diameter shall not exceed 3 inches.

* * * * *

EFFECTIVE DATE: This amendment is effective August 22, 1977.

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e).)

NOTE.—The Materials Transportation Bureau has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Issued in Washington, D.C. on August 17, 1977.

JOHN J. FEARNSIDES,
Acting Director,
Materials Transportation Bureau.

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75–16; Notice 15]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS, AIR BRAKE SYSTEMS

Exclusions From Standard's Applicability

AGENCY: National Highway Traffic Safety Administration (NHTSA).

ACTION: Final rule.

SUMMARY: This amendment adds a small number of vehicles to the category of oversize and specialized vehicles that are permanently excluded from the applicability of Standard No. 121, Air Brake Systems, extends the existing temporary exclusion of heavy hauler trailers and auto transporters until January 1, 1979, and eliminates the "no lockup" requirement in the case of trailers designed exclusively for harvesting lumber or pulpwood, and in the case of inboard wheels on trailers with more than four wheels on an axle system. The amendment responds to manufacturer petitions for exclusion from some or all of the requirements of the standard because of the vehicles' distinctive configurations and functions.

DATE: Effective date August 22, 1977.

ADDRESS: Petitions for reconsiderations should refer to the docket number and be submitted to: Room 5108, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Duane Perrin, Office of Crash Avoidance, National Highway Traffic Safety Administration, Washington, D.C. 20509, 202–426–2153.

SUPPLEMENTARY INFORMATION: Standard No. 121 (49 CFR 571.121) regulates the braking system performance of air-braked trucks, buses, and trailers, and has been in effect for trailers since January 1, 1975, and for trucks and buses since March 1, 1975. Certain vehicles were excluded from the standard's applicability because their functions or construction dictate oversize or distinctive operational characteristics that result in restricted highway operation (e.g., low speed, permit requirements, daytime operation) which limits hazards and the possibility of accidents. Also their distinctive configurations and low production volumes increase compliance costs.

Because of unavailability of components and other constraints, certain other vehicle categories were excluded from all or some of the standard's requirements for a temporary period. The temporary exclusions that remain in effect are scheduled to end on September 1, 1977.

Several vehicle manufacturers and trade associations petitioned for extension of some of the temporary exclusions, or conversion of them into permanent exclusions. The Truck and Bus Safety Subcommittees of the National Motor Vehicle Safety Advisory Council and National Highway Safety Advisory Committee recommended to the Secretary of Transportation that particular vehicle types be granted full or partial exclusions from the standard.

Based on consideration of the petitions and on the recommendations of the Truck and Bus Safety Subcommittees, the NHTSA proposed several new permanent exclusions from the standard. The 108-inch-width exclusion was proposed for expansion to include vehicles with a width of more than 102 inches. In all States other than Hawaii, vehicles of this width are allowed on the highway only in permit operation. The agency finds that these vehicles are operated with the same level of care as vehicles of 108 inches in overall width. No adverse comment

was received on the proposal and it is accordingly made final.

The agency proposed permanent exclusion of vehicles whose gross vehicle weight rating (GVWR) exceeds 120,000 pounds, under the assumption that such vehicles always operate under restrictions of State motor vehicle administrations. Comments were solicited on whether such vehicles exist that are not already excluded from the standard under another category, and whether such vehicles ever operate in unrestricted highway use. Fruehauf, Rogers Brothers, and Talbert Trailers pointed out that Michigan allows unrestricted highway operation of certain trailers in excess of 120,000 lbs. GVWR. These trailers may be flatbeds, tankers, or dump bodies with 8 or more axles and are currently being built to conform to the standard. Low bed heavy hauler trailers, on the other hand, must have their axles aft of the load, and do not have room for as many as eight axles without exceeding the State length limit requirements, and hence are still subject to restricted operation. It is apparent that the exclusion should be narrowed so that its language reaches only those vehicles originally intended for exclusion. It appears that only low bed "heavy hauler" trailers in this weight range fall under State operating restrictions. As made final, therefore, the exclusion is narrowed to cover only a trailer that has a GVWR of more than 120,000 pounds and a body that conforms to the height limitation for heavy hauler trailers of 40 inches. Fruehauf suggested a 44-inch deck height criterion, but offered no supporting information, and the NHTSA sees no reason to change from the 40 inches presently specified for heavy hauler trailers.

The third proposed permanent exclusion was for "load divider" dollies that are designed exclusively for use with the larger trailers that are already excluded from all the requirements of the standard. This addition was supported, but the Truck Trailer Manufacturers Association (TTMA) and others requested a correction in the description of the vehicle. The agency referred to the "fifth wheel plate" of the dolly which improperly described the connecting or mating devices employed. The proposal is made final, with an appropriately broader statement of vehicle description.

Several commenters argued for additional permanent exclusions from the standard. Schwartz Manufacturing Company asserted that the "heavy hauler" trailers that are currently excluded from the standard for a limited period should all be permanently excluded because of their off highway use and their typical ownership by a small company with limited maintenance resources. The agency has proposed and is making final an extension of the existing temporary exclusion while it develops more data on the difficulty encountered by manufacturers in constructing these vehicles to comply with the standard. Information requests have been issued by the agency and replies have been received which are presently undergoing analysis. Until analysis is completed, it would be premature to act on the Schwartz request, and it is therefore declined.

Master Truck, the City of San Diego, and the Lake Disposal Corporation supported the Truck and Bus Safety Subcommittees' suggestion to exclude refuse trucks from Standard No. 121 entirely, or at least from the "no lockup" provision. The commenters pointed out that the duty cycle of these vehicles differs from that for highway tractor-trailer combinations and that much of the travel is at low speeds between pick-ups. The City of San Diego pointed out that it must purchase from the low bidder, which can result in having to service several of the commercially available antilock systems, thereby compounding maintenance problems. The agency does not dispute these points, but also does not view them as peculiar to the brake systems of these vehicles. Refuse collection and hauling presumably does put distinctive strains on a vehicle, and the problem of low-bid contracting does occur in municipal fleet maintenance. It is assumed that such problems with braking and other vehicle systems occurred prior to implementation of Standard No. 121 and that adaptive steps were taken to compensate for them. It is conceivable in fact, that some of the adaptations (such as the use of longer wearing but less effective brake linings) may have reduced somewhat the braking capability of some refuse haulers in relation to vehicles of comparable size that serve other functions. It is the agency's considered judgment that the duty cycle of a particular vehicle type should not be fully determinative of its braking capability or general safety characteristics. For this reason, the agency declines to act on requests for exclusion of these vehicles but will continue to give consideration to this and other proposed adjustments in the standard's applicability.

Zieman Manufacturing Company asked that trailers with a GVWR of 10,000 pounds or less with air-over-hydraulic brakes be excluded from the standard's applicability. Such an exclusion was proposed in June 1975 (40 FR 24915, June 11, 1975) in response to the petition of Altec Industries. On the basis of comments received, particularly those of the California Highway Patrol, it was decided not to provide such an exclusion because of the potential for abuse of the category. The Zieman request is therefore not adopted.

No comment was received from any mobile crane manufacturer on the wisdom of continuing the present limits for these vehicles: exclusion of larger categories only, unless top speed is restricted to 45 mph. In the absence of comment, the agency has decided to leave the present exclusions affecting mobile cranes unchanged, except for the over 102-inch width exclusion previously discussed.

It is noted that the existing permanent exclusion of non-cargo-carrying trailers was inadvertently restated in the proposal in exactly the opposite form from that intended. The error is corrected in this amendment.

As a general matter, the continuation of temporary exclusions for heavy hauler trailers and auto transporters was supported. Little information was provided in the comments on the readiness of manufacturers to implement the standard by January 1, 1979. Information requests have been sent to the affected manufacturers to develop additional data. Freightliner Corporation, as the manufacturer of incomplete truck tractors for auto transporter combinations, argued for the indefinite exclusion of these combinations from the standard.

Freightliner's first argument was that the high center-of-gravity characteristics of the towing vehicle (car carried over the cab) and the unique load transfer characteristics of the articulation point on some auto transporters can produce effects which combine to offset the advantages of imposition of the standard on these vehicles. The agency understands that these factors can make compliance for auto transporters more difficult, and has acknowledged this fact by proposing an effective date for auto transporters that is four years after the initial effective date for other highway vehicles. However, the agency is also aware that auto transporters can be (and have been) built to comply fully with the present requirements of the standard. If Freightliner or any other interested party has data to show that the present requirements are insufficient to ensure a safe braking system for auto transporters, the agency solicits their suggestions for improvements.

As a practical matter, the agency has stated (May 5, 1975, NHTSA letter to E. Hammond, Trailmobile Tech. Center) that it will use the chassis manufacturer's load limitations, both weight and center-of-gravity, for purposes of determining compliance. Thus Freightliner's "envelope" of specifications in its incomplete vehicle document would be the outside limit for loading the completed tractor for compliance test purposes. The only limitation on this method would be an "envelope" of specifications so conservative that the braking characteristics of the vehicle as completed would constitute a safety-related defect.

The second point raised by Freightliner is that the testing procedures in the standard may need to be modified before tractors and trailers of the auto transporter combination can be tested separately. During the period of continued delay, the NHTSA intends to call a public meeting to discuss this problem with the affected chassis-cab manufacturers and the auto transporter industry. Freightliner's suggestion for indefinite delay appears unnecessary and, accordingly, is declined.

Freightliner's third argument was that, assuming the incompatibility between the tractor and trailer portions of an auto transporter is great, the agency should not require their compliance with the standard until all incompatibility is removed from all air-braked

V 42162 AUG 22 77 UMI

vehicle combinations subject to the standard. Actually, the compatibility problems between tractor and trailer are probably less in the case of auto transporters than other combinations because there is more pairing of tractors and trailers in this industry than in the case of dry freight vans. The NHTSA tests mentioned by Freightliner will be completed prior to the January 1, 1979 effective date for auto transporters.

PACCAR, Inc., and Mack Trucks, Inc., both commented favorably on the American Trucking Association's request to continue the exclusion of vehicles equipped with an axle with a gross axle weight rating (GAWR) of 24,000 pounds or more. The agency did not propose continuation because no vehicle or axle manufacturer had petitioned for delay, and because there was strong evidence that the exclusion was being abused by manufacturers who would provide a higher-than-normal rating to avoid the requirements of the standard. PACCAR's expectation that few such vehicles are built because permits are required for loads of more than 24,000 pounds on an axle is not to the point. It is not the gross vehicle weight on the highway that is controlling here, but simply the capacity of the axle installed by the manufacturer. In other words, the vehicle could obtain complete exclusion by the installation of heavy axles, whether or not they are ever used on the highway at full capacity requiring permit operation.

Mack noted the many truck types (e.g., cement mixers, dump trucks) whose permits, if any, do not closely control the actual operation of the vehicle. As a practical matter, these vehicles operate in unrestricted operation with extremely heavy, and often high center-of-gravity loads, that necessitate extremely good braking. The agency continues to believe that an exclusion at this GAWR level is unjustified. The 29,000-pound exclusion reflects the larger vehicles with truly distinctive configuration and more specialized operation that justify special treatment.

Mack, PACCAR, and the ATA also recommended extension of the exclusion for vehicles with two or more front steerable axles with a GAWR of 16,000 pounds or more for each axle. No supporting data was presented and no other comments were received. In the absence of any supporting data the request is denied.

The partial exclusion from the "no lockup" requirement in the case of "wheels other than the outermost on an axle system with more than four wheels" was supported without comment and is therefore made final. Rogers Brothers suggested that use of "axle system" to describe the row of wheels across the vehicle could be misleading. The agency's use of the term as part of its certification requirement to state "axle system" GAWR has not proved troublesome. On the basis of this experience, the terminology is made final as proposed.

The TTMA suggested that the exclusion of certain logging and pulpwood trailers from the "no lockup" requirement be expanded to permit them the same parking brake option as is provided to agricultural commodity trailers. While not within the scope of this notice, the agency will consider this suggestion in its next parking brake proposal.

While the Truck and Bus Safety Subcommittees did not take a position on the proposal, it is noted that their June 23, 1977, letter to Secretary Adams reaffirmed their earlier recommendations for revision of Standard No. 121.

The economic impact of this rule has been considered and has been determined to be minimal. This is due primarily to the low production volume both collectively and by individual firms and the brief leadtime remaining to make considerable design changes. This could even cause substantial adverse economic and financial impacts if these manufacturers were forced to comply by the September 1, 1977, effective date. However, it has also been determined that the additional leadtime provided by this Final Rule should be sufficient to modify production lines which would incorporate the necessary design changes to accommodate the FMVSS 121 hardware.

§ 571.121 [Amended]

In consideration of the foregoing, Standard No. 121, (49 CFR 571.121) is amended as follows:

1. Section S3 (Application) is amended to read:

S3 *Application.* This standard applies to trucks, buses, and trailers equipped with air brake systems. However, it does not apply to:

(a) Any vehicle that has an overall vehicle width of more than 102 inches with extendable equipment in the fully retracted position;

(b) Any vehicle equipped with an axle that has a gross axle weight rating (GAWR) of 29,000 pounds or more;

(c) Any truck or bus that has a speed attainable in 2 miles of not more than 33 mph;

(d) Any truck that has a speed attainable in 2 miles of not more than 45 mph, an unloaded vehicle weight that is not less than 95 percent of its GVWR, and no capacity to carry occupants other than the driver and operating crew;

(e) Any trailer that has a gross vehicle weight rating (GVWR) of more than 120,000 pounds and whose body conforms to that described in the definition of "Heavy hauler trailer" set forth in S4;

(f) Any trailer that has an unloaded vehicle weight which is not less than 95 percent of its GVWR; and

(g) Any load divider dolly.

In addition, the standard does not apply to a heavy hauler trailer manufactured before January 1, 1979; any vehicle manufactured before January 1, 1979, that, in combination with another vehicle, constitutes a part of an auto transporter and any vehicle manufactured before September 1, 1977, that has a GAWR for any axle of 24,000 pounds or more, or two or more front steerable axles with a GAWR of 16,000 pounds or more for each axle.

2. Section S4 (Definitions) is amended by the addition of the following definition, between the definitions of "Auto transporter" and "Speed attainable in 2 miles":

"Load divider dolly" means a trailer composed of a trailer chassis and one or more axles, with no solid bed, body, or container attached, and which is designed exclusively to support a portion of the load on a trailer or truck excluded from all the requirements of this standard.

3. The date "September 1, 1977" in the first paragraph of S5.3 is changed to "January 1, 1979."

4. Section S5.3.2 is amended by replacing the period at the end of paragraph (b) with ", or" and by the addition of a new paragraph (c) to read:

S5.3.2 * * *

(c) In the case of an axle system having more than four wheels, lockup of any wheel other than the outermost wheel at each end of the axle system.

5. A new section S5.3.2.2 is added to read:

S5.3.2.2 When stopped in accordance with S5.3.2., any trailer designed exclusively for harvesting logs or pulpwood and constructed with a skeletal frame with no means for attachment of a solid bed, body, or container, and with an arrangement of air control lines and reservoirs designed to minimize damage in off-road operations, need not meet the requirements relating to wheel lockup, but must nevertheless meet the requirements of staying within the 12-foot lane.

Effective date finding. Because these amendments relieve a restriction and do not create additional responsibilities for any person, it is found that an immediate effective date that advises manufacturers of the new requirements as soon as possible is in the public interest.

The program official and lawyer principally responsible for this rulemaking document are Duane Perrin and Tad Herlihy, respectively.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegation of authority at 49 CFR 1.50.)

Issued on August 16, 1977.

HOWARD DUGOFF,
Acting Administrator.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Browns Park National Wildlife Refuge, Colorado, to Upland Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Browns Park National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Cottontail rabbit season, October 1, 1977, through February 28, 1978, inclusive.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Browns Park National Wildlife Refuge, Greystone Route, Maybell, Colorado 81640, telephone: 303-365-3695.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of cottontail rabbits is permitted on the Browns Park National Wildlife Refuge, Colorado, except in those areas designated by signs as closed to hunting. These areas are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 10597 West 6th Avenue, P.O. Box 25486, Denver, Colorado 80215. Upland game hunting shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

JAMES A. CREASY,
Refuge Manager, Browns Park National Wildlife Refuge.

AUGUST 1, 1977.

[FR Doc.77-24228 Filed 8-19-77;8:45 am]

PART 32—HUNTING

Opening of Browns Park National Wildlife Refuge, Colorado, to Big Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to big game hunting of Browns Park National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Archery deer season, September 3 through September 25, 1977, inclusive. Antique firearm deer season, September 10 through September 18, 1977, inclusive. Rifle deer season, October 15 through October 19, 1977, inclusive.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Browns Park National Wildlife Refuge, Greystone Route, Maybell, Colorado 81640, telephone: 303-365-3695.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer is permitted on the Browns Park National Wildlife Refuge, Colorado, except in those areas designated by signs as closed to hunting. These areas are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 10597 West 6th Avenue, P.O. Box 25486, Denver, Colorado 80215. Big game hunting shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

JAMES A. CREASY,
Refuge Manager, Browns Park National Wildlife Refuge.

AUGUST 1, 1977.

[FR Doc.77-24229 Filed 8-19-77;8:45 am]

PART 32—HUNTING

National Wildlife Refuges in Washington

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of certain National Wildlife Refuges in Washington is compatible with the objectives for which these areas were established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public. This document establishes special regulations effective for the upcoming hunting seasons for migratory game birds, upland game, and big game.

DATE: September 1, 1977 to June 30, 1978.

ADDRESS: Contact the Refuge Manager at the address and/or telephone number listed below in the body of Special Regulations.

FOR FURTHER INFORMATION CONTACT:

Joseph R. Blum, Area Office Manager, U.S. Fish and Wildlife Service, Building "A", 2625 Parkmont Lane, Olympia, Washington 98502. Telephone: FTS 434-9578 or 9579, Com'l 206-753-9578 or 79.

SUPPLEMENTARY INFORMATION: Hunting is permitted on the National Wildlife Refuges indicated below in accordance with 50 CFR Part 32 and the following Special Regulations. Portions of refuges which are open to hunting are designated by signs and/or delineated on maps. No vehicle travel is permitted except on maintained roads and trails. Special conditions applying to individual refuges are listed on the reverse side of maps available at refuge headquarters and from the office of the Regional Director, Fish and Wildlife Service, P.O. Box 3737, Portland, Oregon 97208. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

1. Migratory game birds may be hunted on the following refuge areas:

Conboy Lake National Wildlife Refuge, Box 5, Glenwood, Washington 98619. Contact Refuge Manager at 509-364-3410.

Special Condition: No Canada goose hunting permitted.

2. Migratory game birds except doves and pigeons may be hunted on the following refuge areas:

Columbia National Wildlife Refuge, P.O. Drawer F, Othello, Washington 99344. Contact Refuge Manager at 509-488-3831.

Special Condition: Hunters using field 226-227 near Royal Lake must register before hunting and may shoot from designated sites only. Hunters are required to provide and use a minimum of one dozen waterfowl decoys while hunting from designated sites.

Toppenish National Wildlife Refuge, Route 1, Box 1300, Toppenish, Washington 98948. Contact Refuge Manager at 509-865-2405.

Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882. Contact Refuge Manager at 503-922-3232.

Columbian White-Tailed Deer National Wildlife Refuge, Route 1, Box 376C, Cathlamet, Washington 98612. Contact Refuge Manager at 206-795-4915.

Ridgefield National Wildlife Refuge, P.O. Box 467, Ridgefield, Washington 98642. Contact Refuge Manager at 206-887-8276.

Special Conditions: (1) Hunting will be allowed on Saturdays, Sundays, and Wednesdays during the regular waterfowl season. Hunting will not be allowed on Federal holidays.

(2) A Federal permit, available from the refuge office, is required to enter the public hunting area. Permits will be issued by mail, only on a first-come, first-served basis. Only one regular permit may be held by a hunter at any one time.

(3) Hunters may shoot only from blinds assigned by drawing at the checking station. A recreational use fee of $3 will be charged for each hunter's use of a blind. Fee for holders of Golden Age Passport is $1.50.

(4) Steel shot only may be possessed or used on the refuge hunting area.

V42162 AUG 22 77 UMI

(5) Hunters may possess and use not more than twenty (20) shells on the north hunting area or twelve (12) shells on the south hunting area per hunter per day.

3. Migratory game birds except snipe and pigeons and doves may be hunted on the following refuge areas:

McNary National Wildlife Refuge, P.O. Box 308, Burbank, Washington 99323. Contact Refuge Manager at 509–547–4942.

Special Conditions: (1) Hunters are required to park vehicles in designated parking areas only.

(2) On Burbank Slough, hunting will be permitted on Wednesday, Saturday, Sunday and Thanksgiving Day only. No additional hunting will be permitted during the State extended goose-hunting season. In the north and south one-thirds of hunting area, hunting is from marked sites only. Reservations are required for use of goose-hunting sites in fields 5 and 6.

(3) On the Hanford Island Division, hunting is permitted only on the five upstream islands from opposite the Hanford 300 area-Sagemoor Road upstream to BPA power line crossing. The Hanford Island offshore from the Graduate Center, Sprout Road is closed to hunting.

(4) All public use on the Strawberry Island Division is prohibited.

Willapa National Wildlife Refuge, Ilwaco, Washington 98624. Contact Refuge Manager at 206–484–3482.

LEWIS AND LEADBETTER POINT UNITS

Special Conditions: Hunter registration is required. Leadbetter Point is the only refuge unit open to black brant hunting after close of general season.

RIEKKOLA UNIT

Special Conditions: (1) Hunter registration is required.

(2) Hunting will be permitted on Wednesdays and Saturdays only.

(3) Hunting will not be permitted on Federal holidays.

(4) Hunting will be from designated blinds only with no more than three (3) hunters per blind. Blind selection is by drawing each hunt morning at check station.

(5) Hunters may possess and use not more than ten (10) shells per hunter per day.

(6) This area closes at the end of the regular waterfowl season. No extension of the season is provided for the hunting of black brant.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Upland game may be hunted on the following refuge areas:

Columbia National Wildlife Refuge, P.O. Drawer F, Othello, Washington 99344. Contact Refuge Manager at 509–488–3831.

Special Conditions: (1) Open to the hunting of rabbits in addition to game birds.

(2) Upland game birds may be hunted during State seasons running concurrently with the waterfowl season.

(3) Hunters using field 226–227 near Royal Lake must register before hunting and may shoot from designated sites only.

Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882. Contact Refuge Manager at 503–922–3232.

Special Condition: Only those areas posted "Public Hunting Area" are open to upland game bird hunting.

Conboy Lake National Wildlife Refuge, Box 5, Glenwood, Washington 98619. Contact Refuge Manager at 509–364–3410.

Special Condition: Cottontail rabbit and snowshoe hare may also be hunted during the State season concurrent with the waterfowl season.

Toppenish National Wildlife Refuge, Route 1, Box 1300, Toppenish, Washington 98948. Contact Refuge Manager at 509–865–2405.

Special Condition: Rabbits and upland game may only be hunted during that part of the State season concurrent with the waterfowl hunting season.

Willapa National Wildlife Refuge, Ilwaco, Washington 98624. Contact Refuge Manager at 206–484–3282.

LONG ISLAND UNIT

Special Conditions: (1) Archery hunting for blue and ruffed grouse only.

(2) Permits for the opening weekend will be limited and obtained in advance. Applications are available from the Refuge Manager.

(3) After opening weekend, hunters must possess regular hunting permit available at refuge headquarters and at the Nahcotta Dock.

McNary National Wildlife Refuge, P.O. Box 308, Burbank, Washington 99323. Contact Refuge Manager at 509–547–4942.

Special Conditions: (1) Pheasants only may be hunted during the first half of the State's split season or through November 6, whichever is earlier.

(2) Pheasant hunting will be restricted to Wednesdays, Saturdays, and Sundays.

(3) Hunters are required to park vehicles in designated parking areas only.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

1. Big game hunting is permitted on the following refuge area:

Little Pend Oreille National Wildlife Refuge, Route 1, Colville, Washington 99114. Contact Refuge Manager at 509–684–2821.

2. Deer hunting only is permitted on the folowing refuge areas:

Columbia National Wildlife Refuge, P.O. Drawer F, Othello, Washington 99344. Contact Refuge Manager at 509–488–3831.

Conboy Lake National Wildlife Refuge, Box 5, Glenwood, Washington 98619. Contact Refuge Manager at 509–364–3410.

Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882. Contact Refuge Manager at 503–922–3232.

3. Bear, deer and elk may be hunted on the following refuge areas:

Willapa National Wildlife Refuge, Ilwaco, Washington 98624. Contact Refuge Manager at 206–484–3482.

LONG ISLAND UNIT

Special Conditions: (1) Archery hunting only is permitted.

(2) Permits for opening weekend will be limited and obtained in advance. Applications are available from the Refuge Manager.

(3) After opening weekend, hunters must possess regular hunting permit available at refuge headquarters and at the Nahcotta Dock.

(4) Use of bait/or baiting for bears is prohibited.

These provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

The primary author of this document is Joseph R. Blum, Area Office Manager; Telephone FTS 434–9578 or 9579, Com'l 206–753–9578 or 9579.

Dated: August 15, 1977.

R. KAHLER MARTINSON,
Regional Director,
Regional Office, FTS: 429–4050.

[FR Doc.77–24230 Filed 8–19–77;8:45 am]

PART 32—HUNTING

Opening of the J. Clark Salyer National Wildlife Refuge, North Dakota, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to hunting of J. Clark Salyer National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 17, 1977, through December 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Jon M. Malcolm, J. Clark Salyer National Wildlife Refuge, Upham, N. Dak. 58789, Telephone No. 701–768–3223.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; upland game; for individual wildlife refuge areas.

Hunting of Hungarian partridge and sharp-tailed grouse is permitted on the J. Clark Salyer National Wildlife Refuge, North Dakota, from sunrise to sunset September 17, 1977 through December 11, 1977, only on the area designated by

signs as open to hunting. This open area comprising of approximately 25,500 acres, is delineated on a map available at the refuge headquarters and from the office of the Regional Director, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. All hunters must exhibit their hunting license, game and vehicle contents to Federal and State officers upon request.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August15,1977.

JON M. MALCOLM,
Refuge Manager.

[FR Doc.77–24231 Filed 8–19–77;8:45 am]

PART 32—HUNTING

Opening of Quivira National Wildlife Refuge, Kansas, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to hunting of Quivira National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1977, through January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Darling, Refuge Manager, Quivira National Wildlife Refuge, P.O. Box G, Stafford, Kansas 67578. A/C 316–486–2393.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Hunting is permitted on the Quivira National Wildlife Refuge, Kansas, only on the areas designated by signs as being open to hunting. These areas comprising 7,990 acres are delineated on maps available at the refuge headquarters and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 1748, 601 East 12th Street, Kansas City, Mo. 64196. Hunting of migratory waterfowl, mourning doves, snipe, rails and woodcock shall be in accordance with all applicable State regulations subject to the following conditions:

1. Blinds—only temporary blinds constructed above ground of natural vegetation are permitted.

2. Dogs—not to exceed two per hunter may be used only for retrieving.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

AUGUST 5, 1977.

LAURENCE R. VEIKLEY,
Acting Refuge Manager, Quivira National Wildlife Refuge, Stafford, Kansas.

[FR Doc.77–24232 Filed 8–19–77;8:45 am]

PART 32—HUNTING

National Wildlife Refuges in Oregon

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulations.

SUMMARY: The Director has determined that the opening to hunting of certain National Wildlife Refuges in Oregon is compatible with the objectives for which these areas were established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public. This document establishes special regulations effective for the upcoming hunting seasons for migratory game birds, upland game, and big game.

DATES: August 27, 1977 through June 30, 1978.

ADDRESSES: Contact the Refuge Manager at the address and or telephone number listed below in the body of Special Regulations.

FOR FURTHER INFORMATION CONTACT:

Philip B. Aus, Area Office Manager, U.S. Fish and Wildlife Service, 4620 Overland Road, Boise, Idaho 83705, Telephone: FTS 554–1960, Com'l 208–384–1960.

SUPPLEMENTARY INFORMATION: Hunting is permitted on the National Wildlife Refuges indicated below in accordance with 50 CFR Part 32 and the following Special Regulations. Portions of refuges which are open to hunting are designated by signs and/or delineated on maps. No vehicle travel is permitted except on maintained roads and trails. Special conditions applying to individual refuges are listed on the reverse side of maps available at refuge headquarters and from the office of the Regional Director, Fish and Wildlife Service, P.O. Box 3737, Portland, Oreg. 97208. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

1. Migratory game birds may be hunted on the following refuge areas:

Ankeny National Wildlife Refuge, Route 1, Box 198, Jefferson, Oreg. 97532. Contact Refuge Manager at 503–327–2444.

Special Conditions: (1) All hunters must check in and out of the refuge daily by use of self-service permits.

(2) Hunting is permitted on Wednesdays, Saturdays, and Sundays from opening shooting time until 12:00 noon during the authorized season.

(3) A Federal permit is required and will be issued on an advance reservation basis. Application for reservation will be accepted between September 15 and October 15.

(4) Steel shot only may be possessed or used on the refuge hunting area.

(5) Hunters are limited to the possession and use of twenty (20) shells per day.

Deer Flat National Wildlife Refuge, Snake River Islands Sector (Headquarters: Deer Flat National Wildlife Refuge, Route 1, Box 1457, Nampa, Idaho 83651). Contact Refuge Manager at 208–467–5245.

Special Conditions: (1) Doves may be hunted on the Snake River Islands sector only.

(2) Waterfowl hunting blinds are on a first-come, first-served basis.

Malheur National Wildlife Refuge, P.O. Box 113, Burns, Oreg. 97720. Contact Refuge Manager at 503–493–2323.

Special Conditions: (1) Doves may be of the refuge in Blitzen Valley west of Highway 205 south of Diamond Lake will be open to hunting as posted.

(2) Use of motors on boats is prohibited.

(3) The hunting areas will be closed if Malheur Lake Marsh recedes to 15,000 acres by September 1, 1977.

William L. Finley National Wildlife Refuge, Route 2, Box 208, Corvallis, Oreg. 97330. Contact Refuge Manager at 503–753–8056

Special Conditions: (1) All hunters must check in and out of the refuge daily by use of self-service permits.

(2) Hunting is permitted on Wednesdays, Saturdays, and Sundays from opening shooting time each day until 12 noon, during the authorized season only.

(3) A Federal permit is required and will be issued on an advance reservation basis. Application for reservation will be accepted between September 15 and October 15.

(4) In the designated goose hunting area "A", hunters may shoot from assigned blind sites only and are limited to the use of ten (10) shells per day.

(5) Hunters are limited to the possession and use of twenty (20) shells per day on area "B".

(6) Steel shot only may be possessed or used on the refuge hunting area.

V 42 162 AUG 22 77 UMI

2. Migratory game birds except snipe and pigeons and doves may be hunted on the following refuge areas:

Baskett Slough National Wildlife Refuge, Route 1, Box 709, Dallas, Oreg. 97338. Contact Refuge Manager at 503–623–2749.

Special Conditions: (1) Hunting is permitted on Wednesdays, Saturdays, and Sundays from opening shooting time until 12:00 noon during the authorized season.

(2) A Federal permit is required and will be issued on an advance reservation basis. Application for reservation will be accepted between September 15 and October 15.

(3) Steel shot only may be possessed or used on the refuge hunting area.

(4) Hunters are limited to the possession and use of twenty (20) shells per day.

Cold Springs National Wildlife Refuge, Hermiston, Oreg. (Headquarters: Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oreg. 97882. Contact Refuge Manager at 305–922–3232).

Klamath Forest National Wildlife Refuge (Headquarters: Klamath Basin National Wildlife Refuge, Route 1, Box 74, Tulelake, California 96134). Contact Refuge Manager at 916–667–2231).

Special Conditions: (1) Boats with or without motors are permitted. Air-thrust and inboard water-thrust boats are prohibited.

(2) All decoys, boats and other personal property must be removed from the refuge at the close of each day.

(3) No person may possess any weapon or ammunition that may not be legally used for taking waterfowl.

Lewis and Clark National Wildlife Refuge, Route 1, Box 376C, Cathlamet, Wash. 98612. Contact Refuge Manager at 206–795–4915.

Special Condition: Posted portions of the Lewis and Clark National Wildlife Refuge in Clatsop County will be closed to waterfowl hunting.

Lower Klamath National Wildlife Refuge (those portions in Oregon), Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 74, Calif., 96134). Contact Refuge Manager at 916–667–2231.

Special Conditions: (1) Posted retrieving zones are established on certain hunting units. Possession of firearms in these retrieving zones is prohibited except, unloaded firearms may be taken through these zones when necessary to reach or leave hunting areas. Decoys may not be set in retrieving zones.

(2) Boats with or without motors are permitted. Air-thrust and inboard water-thrust boats are prohibited.

(3) All decoys, boats, and other personal property must be removed at the close of each day.

McKay Creek National Wildlife Refuge, Pendleton, Oreg. (Headquarters: Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oreg. 97882). Contact Refuge Manager at 503–922–3232.

Special Condition: Hunting will be permitted on Wednesdays, Saturdays, Sundays and State holidays.

Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oreg. 97882. Contact Refuge Manager at 503–922–3232.

Special Conditions: (1) Waterfowl hunting is permitted during open hours each Wednesday, Saturday, Sunday and State holiday (except Dec. 25) during waterfowl season.

(2) Hunting is by permit only. Successful applicants may bring one unnamed guest and must arrive at the checking station no later than ONE hour before shooting time or the reservation is cancelled. Checking station will open one to one and one-half hours before shooting time. "No-show" vacancies will be filled from a waiting line after reservations have been accommodated and just prior to shooting time.

(3) Applications will be accepted during two sign-up periods. Permits are nontransferable.

(4) The use of steel shot will be mandatory. It will be unlawful to possess lead shot while hunting ducks, geese, and coots.

(5) Waterfowl hunting will be from blinds only. Details will be available at the check stand.

Upper Klamath National Wildlife Refuge, (Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 74, Tulelake, Calif. 96134). Contact Refuge Manager at 916–667–2231.

Special Conditions: (1) Boats with or without motors are permitted. Air-thrust and inboard water-thrust boats are prohibited.

(2) All decoys, boats and other personal property must be removed from the refuge at the close of each day.

(3) No person may possess any weapon or ammunition that may not be legally used for taking waterfowl.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Ankeny National Wildlife Refuge, Route 1, Box 198, Jefferson, Oreg. 97352. Contact Refuge Manager at 503–327–2444.

Special Conditions: (1) No hunting permitted after November 6, 1977. (2) All hunters must check in and out of the refuge daily by use of self-service permits. (3) Hunters on the area served by each registration station will be limited to 50 at any one time.

Baskett Slough National Wildlife Refuge, Route 1, Box 709, Dallas, Oreg. 97338. Contact Refuge Manager at 503–623–2749.

Special Conditions: (1) No hunting permitted after November 6, 1977.

(2) All hunters must check in and out of the refuge daily by use of self-service permits.

(3) Hunters on the area served by each registration station will be limited to 50 at any one time.

Cold Springs National Wildlife Refuge, Hermiston, Oreg. (Headquarters: Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oreg. 97882). Contact Refuge Manager at 503–922–3232.

Deer Flat National Wildlife Refuge, Snake River Islands Sector (Headquarters: Deer Flat National Wildlife Refuge, Route 1, Box 1457, Nampa, Idaho 83651). Contact Refuge Manager at 208–467–5245.

Hart Mountain National Wildlife Refuge, P.O. Box 111, Lakeview, Oreg. 97630. Contact Refuge Manager at 503–947–3315.

Malheur National Wildlife Refuge, P.O. Box 113, Burns, Oreg. 97720. Contact Refuge Manager at 503–493–2323.

Special Condition: Hunting will be permitted during the last nine days of the State season on the upland game hunting area and during State seasons running concurrently with the waterfowl season on the waterfowl hunting area, and that portion of the refuge in the Blitzen Valley west of Highway 205 as posted.

McKay Creek National Wildlife Refuge, Pendleton, Oreg. (Headquarters: Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oreg. 97882). Contact Refuge Manager at 503–922–3232.

Special Condition: Hunting is permitted on Wednesdays, Saturdays, Sundays, and State holidays.

Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oreg. 97882. Contact Refuge Manager at 503–922–3232.

Special Conditions: (1) Hunting will be permitted from 12 noon until closing time on Wednesdays, Saturdays, Sundays, and State holidays.

(2) Pheasant hunters must check in and out of the refuge daily at the refuge check stations.

William L. Finley National Wildlife Refuge, Route 2, Box 208, Corvallis, Oreg. 97330. Contact Refuge Manager at 503–753–8056.

Special conditions: (1) No hunting permitted after November 6, 1977.

(2) All hunters must check in and out of the refuge daily by use of self-service permits.

(3) Hunters on the area served by each registration station will be limited to 100 at any one time.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

1. Big game hunting is permitted on the following refuge area:

Hart Mountain National Wildlife Refuge, P.O. Box 111, Lakeview, Oreg. 97630. Contact Refuge Manager at 503–947–3315.

Special Conditions: (1) Hunters are required to check in and out of refuge.

(2) Antelope and sheep hunters are required to attend a pre-hunt indoctrination session.

2. Deer hunting only is permitted on the following refuge areas:

Baskett Slough National Wildlife Refuge, Route 1, Box 709, Dallas, Oreg. 97338. Contact Refuge Manager at 503–623–2749.

Special Conditions: (1) No hunting after November 6, 1977.

(2) All hunters must check in and out of refuge daily by use of self-service permits.

(3) The use of rifles is prohibited.

Deer Flat National Wildlife Refuge, Snake River Islands Sector, Headquarters: Deer Flat National Wildlife Refuge, Route 1, Box 1457, Nampa, Idaho 83651. Contact Refuge Manager at 208–467–5245.

Malheur National Wildlife Refuge, P.O. Box 113, Burns, Oreg. 97720. Contact Refuge Manager at 503–493–2323.

Special Conditions: (1) That portion of the refuge in the Blitzen Valley west of Highway 205 will be open as posted to deer hunting in accordance with regular State season.

(2) The special archery area (bow and arrow only) will be opened for hunting from September 7 through September 18, 1977.

(3) The archery area will be closed to hunting if hazardous fire conditions cause a State closure of their archery areas.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

PART 32—HUNTING

National Wildlife Refuges in Idaho

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of certain National Wildlife Refuges in Idaho is compatible with the objectives for which these areas were established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public. This document establishes special regulations effective for the upcoming hunting seasons for migratory game birds, upland game, and big game.

DATES: September 1, 1977 through June 30, 1978.

ADDRESSES: Contact the Refuge Manager at the address and/or telephone number listed below in the body of Special Regulations.

FOR FURTHER INFORMATION CONTACT:

Philip B. Aus, Area Office Manager, U.S. Fish and Wildlife Service, 4620 Overland Road, Boise, Idaho 83705, Telephone: FTS 554–1960 Com'l 208–384–1960.

SUPPLEMENTARY INFORMATION: Hunting is permitted on the National Wildlife Refuge indicated below in accordance with 50 CFR 32 and the following Special Regulations. Portions of refuges which are open to hunting are designated by signs and/or delineated on maps. No vehicle travel is permitted except on maintained roads and trails. Special conditions applying to individual refuges are listed on the reverse side of maps available at refuge headquarters and from the office of the Regional Director, Fish and Wildlife Service, P.O. Box 3737, Portland, Oreg. 97208. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

§ 32.12 Special regulations: migratory game birds; for individual wildlife refuge areas.

1. Migratory game birds may be hunted on the following refuge area:

Deer Flat National Wildlife Refuge, Route 1, Box 1457, Nampa, Idaho 83651. Contact Refuge Manager at 208–467–5245.

Special Conditions: (1) Dove and snipe hunting is permitted on the Snake River Islands sector only.

(2) Goose hunting is prohibited on the Lake Lowell sector.

2. Migratory game birds except doves and pigeons may be hunted on the following refuge area:

Kootenai National Wildlife Refuge, Star Route No. 1, Box 160, Bonners Ferry, Idaho 83805. Contact Refuge Manager at 509–267–3888.

Special Conditions: (1) Hunting permitted on Saturdays, Sundays, Tuesdays, Thursdays.

(2) The use of steel shotshells is required.

3. Migratory game birds except snipe and pigeons and doves may be hunted on the following refuge areas:

Bear Lake National Wildlife Refuge, P.O. Box 9, Montpelier, Idaho 83254. Contact Refuge Manager at 208–847–1757.

Special Conditions: Air-thrust boats are prohibited. Other boats are permitted from one week prior to the opening of migratory waterfowl hunting until the close of the season.

Camas National Wildlife Refuge, Hamer, Idaho 83425. Contact Refuge Manager at 208–662–5423.

Grays Lake National Wildlife Refuge, P.O. Box 837, Soda Springs, Idaho 83216. Contact Refuge Manager at 208–547–4996.

Special Conditions: (1) The use of air-thrust boats is prohibited. Other boats are permitted from the opening of migratory waterfowl hunting until the close of the season.

(2) Entry to hunting area is by foot travel only.

Minidoka National Wildlife Refuge, Route 4, Rupert, Idaho 83350. Contact Refuge Manager at 208–436–3589.

§ 32.22 Special regulations: upland game; for individual wildlife refuge areas.

Upland game may be hunted on the following refuge areas:

Bear Lake National Wildlife Refuge, P.O. Box 9, Montpelier, Idaho 83254. Contact Refuge Manager at 208–847–1757.

Camas National Wildlife Refuge, Hamer, Idaho 83425. Contact Refuge Manager at 208–662–5423.

Deer Flat National Wildlife Refuge, Route 1, Box 1457, Nampa, Idaho 83651. Contact Refuge Manager at 208–467–5245.

Minidoka National Wildlife Refuge, Route 4, Rupert, Idaho 83350. Contact Refuge Manager at 208–436–3589.

Special Condition: Upland game birds and cottontails may be hunted during the waterfowl hunting season.

§ 32.32 Special regulations: big game; for individual wildlife refuge areas.

1. Big game hunting is permitted on the following refuge area:

Grays Lake National Wildlife Refuge, P.O. Box 837, Soda Springs, Idaho 83216. Contact Refuge Manager at 208–547–4966.

Special Conditions: (1) Deer and moose only may be hunted.

(2) Entry to hunting area is by foot travel only.

(3) Horses may be used only to retrieve big game animals.

2. Deer hunting only is permitted on the following refuge areas:

Deer Flat National Wildlife Refuge, Route 1, Box 1457, Nampa, Idaho 83651. Contact Refuge Manager at 208–467–5245.

Special Condition: Deer hunting is permitted on the Snake River Islands sector only.

Kootenai National Wildlife Refuge, Star Route No. 1, Box 160, Bonners Ferry, Idaho 83805. Contact Refuge Manager at 509–267–3888.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

The primary author of this document is Philip B. Aus, Area Office Manager; Telephone FTS 554–1960, Com'l 208–384–1960.

Dated: August 15, 1977.

PART 32—HUNTING

Opening of Quivira National Wildlife Refuge, Kansas, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Quivira National Wildlife Refuge is com-

V 42 162 AUG 22 77 UM

patible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1977, through January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Darling, Refuge Manager, Quivira National Wildlife Refuge, P.O. box G, Stafford, Kans. 67578. 316-486-2393.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Hunting is permitted on the Quivira National Wildlife Refuge, Kansas, only on the areas designated by signs as being open to hunting. These areas comprising 7,990 acres are delineated on maps available at the refuge headquarters and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 1748, 601 East 12th Street, Kansas City, Mo. 64106. Hunting of ring-necked pheasants, bobwhite, squirrel and rabbits shall be in accordance with all applicable State regulations subject to the following conditions:

1. The use of rifles is prohibited for taking squirrel and rabbits.

2. The hunting of any species after sunset is prohibited.

3. The hunting of all upland game will close at the end of the ring-necked pheasant and/or bobwhite seasons.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

The U.S Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

LAURENCE R. VEIKLEY,
Acting Refuge Manager, Quivira National Wildlife Refuge, Stafford, Kans.

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 601—REGIONAL FISHERY MANAGEMENT COUNCILS

PART 602—GUIDELINES FOR DEVELOPMENT OF FISHERY MANAGEMENT PLANS

Interim Regulations

AGENCY: National Oceanic and Atmospheric Administration/Commerce

ACTION: Extension of Period for Public Comment Upon Interim Regulations

SUMMARY: Interim Regulations under the Fishery Conservation and Management Act were published in the FEDERAL REGISTER July 18, 1977, (42 FR 36980) to provide the Regional Fishery Management Councils with needed guidance for their effective operation. At the request of the Pacific Fishery Management Council, the comment period is extended from September 16 to September 30, 1977.

DATES: Comments must be submitted by September 30, 1977.

ADDRESSES: All submissions received by the Director, National Marine Fisheries Service, Washington, D.C., 20235, on or before that date will be considered prior to the publication of final regulations.

Dated: August 16, 1977.

WINFRED H. MEIBOHM,
Acting Deputy Director, National Marine Fisheries Service.

[FR Doc.77-24233 Filed 8-19-77;8:45 am]

PART 680—INTERNATIONAL AGREEMENTS

Canadian Agreement

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Final regulations.

SUMMARY: These regulations require U.S. fishermen fishing for species regulated under the U.S.-Canada Reciprocal Fisheries Agreement for 1977, and dealers who buy fish from them, to maintain catch data and make it available to the NMFS or authorized officials of a State agency which has entered into an agreement with NMFS to collect this data. This document is necessary to implement provisions of the Agreement which require the two parties to exchange appropriate fishery statistics on a timely and regular basis.

EFFECTIVE DATE: August 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard Schaefer, Fisheries Management Operations Division, National Marine Fisheries Service, Washington, D.C. 20235, 202-634-7454.

SUPPLEMENTARY INFORMATION: On July 26, 1977, the President signed Public Law 95-73, an amendment to the Fishery Conservation Zone Transition Act, which gives effect during 1977 to the Reciprocal Fisheries Agreement between the Government of the United States and the Government of Canada (Agreement) signed on February 24, 1977.

Article 13 of the Agreement provides that the two parties agree to exchange appropriate fishery statistics on a timely and regular basis where necessary to permit an accurate determination to be made of the time at which an allocation or catch level is reached.

The regulations describe the requirements and procedures for:

(1) Owners or operators of fishing vessels of the United States that fish in the Atlantic or Pacific Canadian fishery zone to maintain an accurate log of fishing operations.

(2) Dealers that purchase or receive species listed in sections 680.4(b) and 680.7(b) of this part to furnish a complete record of each purchase of any species taken in the Atlantic or Pacific Canadian fishery zone to an authorized official of the United States.

The regulations set forth involve a foreign affairs function of the United States, and are exempt from the rulemaking procedures of the Administrative Procedure Act. Formal notice of proposed rulemaking is therefore not required.

Signed at Washington, D.C., on August 16, 1977.

JOSEPH W. SLAVIN,
Acting Associate Director, National Marine Fisheries Service.

Sec.
680.1 Purpose.
680.2 Definitions.
680.3 General.
680.4 Atlantic areas and species.
680.5 Reports and records.
680.6 [Reserved]
680.7 Pacific areas and species.
680.8 Reports and records.

AUTHORITY: Fishery Conservation Zone Transition Act, Pub. L. 95-6.

§ 680.1 Purpose.

The purpose of these regulations is to implement Public Law 95-73, an amendment to the Fishery Conservation Zone Transition Act, P.L. 95-6, which provides for the collection of catch and effort statistics of U.S. fishermen fishing in Canadian waters in the Atlantic and Pacific Ocean under Article XIII of the Reciprocal Fisheries Agreement between the United States and Canada signed on February 24, 1977.

§ 680.2 Definitions.

(a) *Agreement* means the Reciprocal Fisheries Agreement Between the United States of America and the Government of Canada, signed February 24, 1977, that entered into force on July 26, 1977.

(b) *Authorized official means:*

(1) Any commissioned, warrant or petty officer of the Coast Guard;

(2) Any agent of the National Marine Fisheries Service;

(3) Any officer designated by the head of any State agency which has entered into an agreement with the Secretary of Commerce to carry out the provisions of these regulations; and

(4) Any Coast Guard personnel accompanying and acting under the direction of any person described in (1) of this paragraph.

(c) *By catch* means the fish of any species other than the directed fishery species that are caught during a directed fishery.

(d) *Directed fishery* means a fishery conducted for the purpose of catching one or more designated species.

(e) *Persons* means any individual, partnership, corporation, or association

subject to the jurisdiction of the United States.

(f) *Regulatory area.* The term "Regulatory Area" means and includes the whole of those portions of the convention of the International Convention for the Northwest Atlantic Fisheries (ICNAF) area which are separately described as follows:

(1) *Subarea 1.* The term "subarea 1" means that portion of the Convention area, including all waters except territorial waters, which lies to the north and east of a rhumb line from a point in 75°00′ north latitude and 73°30′ west longitude to a point in 69°00′ north latitude and 50°00′ west longitude; east of 59°00′ west longitude; and to the north and east of a rhumb line from a point in 61°00′ north latitude and 59°00′ west longitude to a point in 52°15′ north latitude and 42°00′ west longitude.

(2) *Subarea 2.* The term "Subarea 2" means that portion of the Convention area, including all waters except territorial waters, lying to the south and west of Subarea 1, as defined in subparagraph (1) of this paragraph, and to the north of the parallel of 52°15′ north latitude.

(3) *Subarea 3.* The term "Subarea 3" means that portion of the Convention area, including all waters except territorial waters, lying south of the parallel of 52°15′ north latitude; and to the east of a line extending due north from Cape Bauld on the north coast of Newfoundland to 52°15′ north latitude; to the north of the parallel of 39°00′ north latitude; and to the east and north of a rhumb line extending in a northwesterly direction which passes through a point in 42°30′ north latitude, 55°00′ west longitude in the direction of a point in 47°50′ north latitude 60°00′ west longitude, until it intersects a straight line connecting Cape Ray, on the coast of Newfoundland, with Cape North on Cape Breton Island; thence in a northeasterly direction along said line to Cape Ray.

(4) *Subarea 4.* The term "Subarea 4" means that portion of the Convention area, including all waters except territorial waters, lying to the west of Subarea 3 as described in subparagraph (3) of this paragraph, and to the east of a line described as follows: Beginning at the terminus of the international boundary between the United States of America and Canada in Grand Manan Channel, at point 44°46′35.34″ north latitude, 66°54′11.23″ west longitude; thence due south to the parallel of 43°50′ north latitude; thence due west to the meridian of 67°40′ west longitude; thence due south to the parallel of 42°40 north latitude; thence due east to a point in 66°00 west longitude; thence along a rhumb line in a southeasterly direction to a point in 42°00′ north latitude, 65°40′ west longitude; thence due south to the parallel to 39°00′ north latitude.

§ 680.3 General.

(a) Any violation of these regulations by any person shall be deemed to be an act prohibited by section 307 of the Fishery Conservation and Management Act of 1976 and such person shall be liable to the United States for a civil penalty as provided for in section 308 of the Act.

(b) Information submitted pursuant to these regulations shall be disclosed consistent with Part 603 of Title 50.

§ 680.4 Atlantic areas and species.

(a) All U.S. fisheries for species and stocks found off Canada in Subareas 2, 3, and 4 of the Regulatory Area and regulated in accordance with the Agreement are subject to the reporting requirements in section 680.5.

(b) The species and subarea include:

Species	*Subarea*
Cod	4VSW
Cod	4X[1]
Haddock	4VW
Do	4X
Silver Hake	4VWX
Redfish	2+3K
Do	4VWX
Pollock	4VWX
Flounders	4VWX
Herring	4XW

[1] Offshore.

In addition, any bycatch of species not listed above taken while fishing for the above species in accordance with the Agreement is subjected to the reporting requirements set forth below.

§ 680.5 Reports and records.

(a) *Owner or master.* In case of a U.S. vessel fishing for any of the species regulated under the Agreement, the owner or master of such vessel must maintain in an official logbook an accurate log of fishing operations showing date, type, and size of gear used, area fished, duration of fishing time or tow, and the estimated weight in pounds of each species taken at 12-hour intervals. The official logbook may be obtained upon request from the:

Regional Director, National Marine Fisheries Service, NOAA, 14 Elm Street, Gloucester, Massachusetts 01930.

(b) The logbook must be presented for examination and subsequent return to the owner or master of the vessel upon proper demand by any authorized official at any time during or at the completion of a fishing trip. Such required documentation must be maintained by the owner or master of the vessel for 1 year subsequent to the date of the last entry in the logbook and made available to any authorized official upon demand.

(c) *Dealers.* All persons, individuals firms or corporations, at any port or place within the United States, that buy from U.S. flag vessels or from a carrier licensed as a common carrier engaged in either interstate or intrastate commerce, any species taken by any U.S. fishing vessel and regulated in accordance with the Agreement must furnish to the Regional Director at the address in paragraph (a), within 72 hours of sale or within 72 hours after buying or receiving, or upon the vessel's return to any port of the United States, a complete and accurate record of each purchase, on forms supplied by the National Marine Fisheries Service at the address indicated in paragraph (a) of this section.

(d) All persons purchasing or receiving any regulated species caught by U.S. vessels under the Agreement for transport to any port of the United States must maintain records identical to those required under paragraph (a) of this section.

§ 680.6 [Reserved]

§ 680.7 Pacific areas and species.

(a) All U.S. fisheries for species and stocks found off Canada in Pacific Marine Fisheries Commission Groundfish Statistical Areas 3C, 3D, 5A, and 5B, regulated in accordance with the Agreement, are subject to the reporting requirements in section 680.8.

(b) The species and areas include:

Species	*Area*
Blackcod	3C, 3D, 5A, 5B
Pacific Ocean perch	3C, 3D, 5A, 5B
Rockfishes other than Pacific Ocean perch	3C, 3D, 5A, 5B
Other groundfish	3C, 3D, 5A, 5B
Shrimp	3C

§ 680.8 Reports and records.

(a) *Owner or master.* In case of a U.S. vessel fishing for any of the species regulated under the Agreement, the owner or master of such vessel must maintain in an official logbook an accurate log of fishing operations showing date, type, and size of gear used, area fished, effort in hours trawled, or number of longline units and duration of soaking time, and the estimated weight in pounds of each species taken from these areas by each gear type. The official logbook may be obtained from the NMFS or the State agency which has entered into an agreement with the Secretary of Commerce to carry out the provision of these regulations.

(b) The logbooks must be presented for examination and subsequent return to the owner or master of the vessel upon proper demand by any authorized official at any time during or at the completion of a fishing trip. Such required documentation must be maintained by the owner or master of the vessel for 1 year subsequent to the date of the last entry in the logbook and made available to any authorized official upon demand.

(c) *Dealers.* All persons, individual, firms or corporations, at any port or place within the United States, that buy from U.S. flag vessels or from a carrier licensed as a common carrier engaged in either interstate or intrastate commerce, any species taken by any U.S. fishing vessel and regulated in accordance with the Agreement must furnish to an authorized official within 72 hours a complete and accurate record of each purchase, on forms supplied by the National Marine Fisheries Service or furnished by a State agency which has entered into an agreement with the Secretary of Commerce to carry out the provisions of these regulations.

(d) All persons purchasing or receiving any regulated species caught by U.S.

V 42162 AUG 22 77 UM

vessels under the Agreement for transport to any port of the United States must maintain records identical to those required under paragraph (a) of this section.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 779-4]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Massachusetts Revision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: A revision to the State Implementation Plan (SIP), changing the expiration date of Regulation 5.1, "Sulfur Content of Fuels and Control Thereof," from July 1, 1977 to July 1, 1978, is approved. The regulation, which was approved by EPA on December 5, 1975 as a revision to the original SIP, relaxes the sulfur limitations for fossil fuels burned by large sources in the Metropolitan Boston Intrastate Air Quality Control Region.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Wallace Woo, Air Branch, EPA Region I, Room 2113, JFK Federal Building, Boston, Massachusetts 02203, 617-223-5609.

SUPPLEMENTARY INFORMATION: On May 31, 1972 (37 FR 10872), pursuant to Section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved, with exceptions, the Massachusetts Implementation Plan for the attainment of National Ambient Air Quality Standards (NAAQS).

On December 5, 1975 (40 FR 56889) the Administrator approved a revision to the State Implementation Plan (SIP) for the Metropolitan Boston Intrastate Air Quality Control Region (AQCR), which relaxed the sulfur in fuel limitations contained in Regulation 5.1, "Sulfur Content of Fuels and Control Thereof," until July 1, 1977. Fossil fuel utilization facilities located in the cities and towns of Arlington, Belmont, Boston, Brookline, Cambridge, Chelsea, Everett, Malden, Medford, Newton, Somerville, Waltham, and Watertown having an energy input capacity of two and one-half billion Btu per hour or greater are permitted to burn fossil fuel with a sulfur content not in excess of 0.55 pound per million Btu heat release potential (approximately equivalent to 1.0% sulfur content residual fuel oil by weight). All other consumers of residual fuel oil located in these cities and towns must continue to burn fuel with a sulfur content not in excess of 0.28 pound per million Btu heat release potential (approximately equivalent to 0.5% sulfur content residual fuel oil by weight), in accordance with the original SIP regulation. For other towns in the AQCR, facilities having an energy input capacity of one hundred million Btu per hour or greater are permitted to burn fossil fuel with a sulfur content not in excess of 1.21 pounds per million Btu heat release potential (approximately equivalent to 2.2% sulfur content residual fuel oil by weight), and all other consumers of residual fuel oil are limited to burning fuel with a sulfur content not in excess of 0.55 pound per million Btu heat release potential (approximately equivalent to 1.0% sulfur content residual fuel oil by weight), in accordance with the original SIP regulation.

On April 1, 1977, the Commissioner of the Massachusetts Department of Environmental Quality Engineering (the Massachusetts Department) submitted a revision to the SIP which would change the expiration date of Regulation 5.1 from July 1, 1977 to July 1, 1978. The proposed one-year extension gives the regulation an effective life of 2 years and 7 months, from December 5, 1975 to July 1, 1978. No other provisions of the regulation are changed.

The regulation requires that each source be reviewed by the Massachusetts Department and be granted a permit prior to burning the higher sulfur content fuel. The Massachusetts Department has the authority to set conditions of approval to insure that the NAAQS are not violated. A violation of the applicable NAAQS within the area of impact of a facility, or of other applicable SIP regulations, including the opacity and particulate emission limitations, will result in a mandatory return by that source to a lower sulfur fuel.

On June 13, 1977 the Regional Administrator published a proposed rulemaking notice (42 FR 30218) proposing approval of the revision and soliciting comments on the effects of continued burning of higher sulfur fuel. Comments were submitted by the Greater Boston Chamber of Commerce and the Boston Edison Company. Both expressed support of the proposed time extension and urged approval of the revision, based on the economic benefits to be gained and on the demonstration that burning higher sulfur fuel would not cause NAAQS violations.

The twenty-eight sources in the AQCR in the size categories affected by the regulation were approved by EPA in a December 5, 1975 final rulemaking notice. However, several of the sources that converted to higher sulfur fuel failed to meet the opacity and/or particulate emission limitations when burning the higher sulfur fuel. These sources will not receive a permit to burn higher sulfur fuel during the extended effective period of the regulation unless they demonstrate to the Massachusetts Department their ability to meet the applicable regulations.

Eastman Gelatin Corporation of Peabody, Massachusetts is being disapproved on the basis of the Massachusetts Department's submittal, which shows that the source may have contributed to violations of the NAAQS for total suspended particulates (TSP) recorded at an ambient monitoring station in Peabody. This source must burn fuel in accordance with the original SIP regulation.

Since use of higher sulfur content fuels may result in increased particulate emissions, the Massachusetts Department will be using the time during the extended effective period to continue development of a plan to attain TSP ambient standards and to develop a long-term plan to permit the burning of higher sulfur fuel, providing that such can be done without causing or contributing to TSP standards violations. This revision is thus an interim measure, allowing time to complete the studies required for the development of a TSP attainment plan and for evaluating the consistency of this sulfur in fuel strategy with TSP standards attainment/maintenance.

There have been no violations of the NAAQS for sulfur dioxide in the AQCR since the regulation has been in effect, and the Massachusetts Department's analysis shows that none are predicted to occur.

After evaluation of the State's submittal, the Administrator has determined that the Massachusetts revision meets the requirements of the Clean Air Act and 40 CFR Part 51. Accordingly, this revision is approved as a revision to the Massachusetts Implementation Plan.

(Section 110(a) of the Clean Air Act, as amended, 42 U.S.C. § 1857c-5(a).)

Dated: August 17, 1977.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart W—Massachusetts

1. In § 52.1120(c), Subparagraph (6) is revised to read as follows:

§ 52.1120 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified. * * *

(6) Revisions to Regulation No. 5, increasing allowable sulfur content of fuels in the Boston Air Pollution Control District submitted on July 11, 1975 by the Secretary of Environmental Affairs, and on April 1, 1977 by the Commissioner of the Massachusetts Department of Environmental Quality Engineering.

2. In § 52.1126, a new paragraph (f) is added as follows:

§ 52.1126 Control Strategy: Sulfur Oxides.

* * * * *

(f) Massachusetts Regulation 5.1 for the Metropolitan Boston Air Pollution Control District is approved except as to the following source which remains subject to the applicable originally approved requirement of Regulation 5 which stipulates that sources outside the Boston "core area" are permitted to burn fossil

fuel having a sulfur content not in excess of 0.55 pounds per million Btu heat release potential (approximately equivalent to 1.0 percent sulfur content residual oil by weight):

Eastman Gelatin Corporation, Peabody, Massachusetts.

[FRL 772-8]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Approval/Disapproval of Revisions to the Rules and Regulations of Various Air Pollution Control Districts in State of California

EDITOR'S NOTE: The following document contains multiple separate preambles although the amendments to 40 CFR Part 52 are contained in a single regulatory text that follows the preambles. EPA submitted the document in this form because the amendatory action is based on separate proposed rulemaking actions.

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: The purpose of this preamble is to introduce a series of preambles explaining the Agency's actions in approving, disapproving, and amending various existing or newly submitted portions of California's State Implementation Plan. The preambles covering the various Air Pollution Control Districts (APCD) involved are followed by a single regulatory text that relates to these Counties. In addition, the regulatory text also contains corrections of various clerical errors in certain approvals which have previously been published.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, 100 California Street, San Francisco, California 94111, 415-556-7288.

SUPPLEMENTARY INFORMATION: Following this introductory preamble are the preambles for the following APCD's in the State of California: Colusa County, Fresno County, Kern County, Kings County, Lake County, Madera County, Mariposa County, San Joaquin County, Shasta County, Tulare County, and Tuolumne County. A single regulatory text covering the regulatory actions for all these Counties follows the preambles.

The regulatory package also contains corrections of various clerical errors in the previously published regulatory texts affecting the following APCDs: Bay Area, Butte County, Calaveras County, Glenn County, Great Basin Unified, Imperial County, Lassen County, Modoc County, Sacramento County, San Diego County, Sierra County, Siskiyou County, Stanislaus County, Sutter County, Tehama County, and Yuba County.

It should also be noted that regulations for the Counties incorporated in the Great Basin Unified APCD have been listed in the Identification of Plan section where such rules were revoked through the unification process.

(Secs. 110, 301, Clean Air Act, as amended, (42 U.S.C. 1857c-5, 1857g).)

Dated: August 9, 1977.

DOUGLAS M. COSTLE,
Administrator.

[FRL 773-1]

Approval of Revisions to Colusa County Air Pollution Control Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the Colusa County Air Pollution Control District's Rules and Regulations with the exception of regulations concerning malfunction, new source review, and certain exemptions from agricultural burning prohibitions which will be addressed in separate FEDERAL REGISTER notices.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Region IX, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, 100 California Street, San Francisco, California 94111, 415-556-7288.

SUPPLEMENTARY INFORMATION: On November 1, 1976 (41 FR 47949), EPA proposed approval/disapproval of revisions to the Colusa County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973, January 10, 1975, and February 10, 1976. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received on the changes being acted on in this final rulemaking notice. A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rule, final action will be taken in a separate FEDERAL REGISTER notice.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Secs. 110, 301, Clean Air Act, as amended, (42 U.S.C. 1857c-5, 1857g).)

[FRL-773-2]

Approval of Revisions to the Fresno County Air Pollution Control District's Rules and Regulations in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the Fresno County Air Pollution Control District's Rules and Regulations with the exception of regulations concerning incinerators which are disapproved, and new source review, malfunction, exceptions from opacity, emergency episode, gasoline vapor recovery, and certain exemptions from agricultural burning prohibitions which will be handled in separate FEDERAL REGISTER notices.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, San Francisco, California 94111, 415-556-7288.

SUPPLEMENTARY INFORMATION: On November 1, 1976 (41 FR 47950), EPA proposed approval of revisions to the Fresno County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973, October 23, 1974, January 10, 1975, and February 10, 1976. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. The Fresno County Department of Health commented that the total contribution to particulate ambient air quality from small incinerators was small and that Rule 407 should be approved. No other comments were received. EPA is not aware of documentation to support this statement.

V 42 162 AUG 22 77 UM

A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rule, final action will be taken in a separate FEDERAL REGISTER notice.

In 41 FR 47950, the EPA proposed to disapprove Rule 407 Disposal of Solid or Liquid Wastes. This rule is disapproved by this notice. A discussion of the basis for the disapproval is found in 41 FR 47950. For Federal enforcement purposes Rule 407.1, Disposal of Solid or Liquid Wastes, submitted on June 30, 1972 and approved as part of the SIP, will remain in effect.

The EPA is approving Rules 422 and 423 for new source performance standards and hazardous air pollutants, as proposed. This does not constitute delegation of these programs, which will be handled in a separate FEDERAL REGISTER notice.

In 41 FR 47950 the EPA proposed to approve the addition of paragraphs (f) and (g) to Rule 402, Exceptions, which were submitted on October 23, 1974. This rule provides additional exemptions from opacity regulations for sources which exceed the regulations due to equipment breakdown or acts of God. The EPA has determined that the proposed approval was in error and, therefore, is not approving Rule 402. This rule will be acted on in a separate FEDERAL REGISTER notice. Therefore, paragraphs (a) through (e) of Rule 402, submitted on June 30, 1972 and approved under 40 CFR 52.223, remain in effect for Federal enforcement purposes.

In 41 FR 47950 the EPA proposed to approve Rule 103. Confidential Information, to rescind the Federal regulation in 40 CFR 52.224(b) for Fresno County, and to rescind the current disapproval notice in 40 CFR 52.224(a). These are approved/disapproved as proposed.

In 41 FR 47950, the EPA proposed approval of Rule 409, Organic Solvents, as being consistent with the Federally promulgated regulations in 40 CFR 52.254. At that time it was proposed to eliminate Fresno County from 40 CFR 52.254. The EPA has determined that Rule 409 does not provide for hourly emission limitations for organic solvents. Therefore, EPA is retaining the hourly emission rates in 40 CFR 52.254 (b), (c) and (d), and other portions of § 52.254 needed for interpretation or enforcement of these limitations, while approving Rule 409, which contains daily emission limitations, and Rules 409.1 and 409.2 which are adequate.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Secs. 110, 301, Clean Air Act, as amended, (42 U.S.C. 1857c–5, 1857g).)

[FRL 773–3]

Approval of Revisions to the Lake County Air Pollution Control District's Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the Lake County Air Pollution Control District's Rules and Regulations with the exception of regulations concerning malfunction and new source review, as well as certain exemptions from agricultural burning prohibitions, which will be addressed in a separate FEDERAL REGISTER notice.

Under Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, 100 California Street, San Francisco, California 94111, 415–556–7288.

SUPPLEMENTARY INFORMATION: On November 1, 1976 (41 FR 47951), the EPA proposed approval of revisions to the Lake County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973; July 19, 1974; October 23, 1974; July 22, 1975; November 3, 1975; and February 10, 1976. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received. A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rule, final action will be taken in a separate FEDERAL REGISTER notice.

Part II, Authorization and Disclosure (submitted October 23, 1974), now allows emission data to be made available to the public, which provision is consistent with 40 CFR 51.10(e). Therefore, 40 CFR 52.224 is being amended to exempt the Lake County APCD from the requirements of § 52.224.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Secs. 110, 301, Clean Air Act, as amended (42 U.S.C. 1857c–5 and 1857g).)

[FRL 773–4]

Approval of Revisions to the Kern County Air Pollution Control District's Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the Kern County Air Pollution Control District's Rules and Regulations with the exception of regulations concerning incinerators and scavenger plants which are disapproved, and malfunction, gasoline vapor recovery, emergency episode, new source review, and certain exemptions from agricultural burning prohibitions, which will be handled in separate FEDERAL REGISTER Notices.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, San Francisco, Calif. 94111, 415–556–7288.

SUPPLEMENTARY INFORMATION: On November 1, 1976 (41 FR 47950), EPA proposed approval of revisions to the Kern County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973, July 19, 1974, January 10, 1975, and July 22, 1975. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. Kern County APCD opposes disapproval of the scavenger plant rule because construction of new scavenger plants (which reduce SOx emissions) could be discouraged. They oppose disapproval of the change in the incinerator regulation because this change will not have a significant effect on ambient particulate concentrations in Kern County. No other comments were received on the changes being acted on in this final rulemaking notice. EPA is not aware of documentation to support these comments.

A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rule, final action will be taken in a separate FEDERAL REGISTER notice.

In 41 FR 47950, the EPA proposed to disapprove Rule 407.1 Disposal of Solid or Liquid Wastes and Rule 407.3 Scavenger Plants. These are disapproved by this notice. A discussion of the basis for this disapproval is found in 41 FR 47950.

For Federal enforcement purposes Rule 407.1, Disposal of Solid or Liquid Wastes, submitted on June 30, 1972 and approved under 40 CFR 52.223, will remain in effect.

For Federal enforcement purposes, Rule 407, Sulfur Compounds, submitted on June 30, 1972 and approved under 40 CFR 52.223, will continue to remain in effect for sulfur scavenger plants.

The EPA is approving Rules 422 and 423 for new source performance standards and hazardous air pollutants, as proposed. This does not constitute delegation of these programs, which will be handled in a separate FEDERAL REGISTER Notice.

In 41 FR 47950 the EPA proposed to approve Rule 103, Confidential Information, to rescind the Federal regulation in 40 CFR 52.224(b) for Kern County, and to rescind the current disapproval notice in 40 CFR 52.224(a). These are approved/disapproved as proposed.

In 41 FR 47950, the EPA proposed approval of Rules 410, 410.1, and 410.2, Organic Solvents, as being consistent with the Federally promulgated regulations in 40 CFR 52.254. At that time it was proposed to eliminate Kern County from 40 CFR 52.254. The EPA has determined that Rule 410 does not provide for hourly emission limitations for organic solvents. Therefore, EPA is retaining the hourly emission rates in CFR 52.254 (b), (c), and (d) and other portions of § 52.254 needed for interpretation or enforcement of these limitations, while approving Rule 410, which contains daily emission limitations, and Rules 410.1 and 410.2, which are adequate.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sec. 110, Clean Air Act, as amended, (42 U.S.C. 1857c–5).)

[FRL 773–5]

Approval of Revisions to the Kings County Air Pollution Control District's Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the Kings County Air Pollution Control District's Rules and Regulations with the exception of regulations concerning malfunction, new source review, emergency episode, gasoline vapor recovery, and certain exemptions from agricultural burning prohibitions which will be handled in separate FEDERAL REGISTER notices.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, San Francisco, California 94111, 415–556–7288.

SUPPLEMENTARY INFORMATION: On November 23, 1976 (41 FR 51619), EPA proposed approval of revisions to the Kings County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973, July 22, 1975, and April 21, 1976. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received on the changes being acted on in this final rulemaking notice.

A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rule, final action will be taken in a separate FEDERAL REGISTER notice.

In 41 FR 51619 the EPA proposed to disapprove Rule 405, Process Weight. This rule is disapproved by this notice. A discussion of the basis for this disapproval is found in 41 FR 51619.

For Federal enforcement purposes Rule 405, Process Weight, submitted on June 30, 1972 and approved under 40 CFR 52.223, will remain in effect.

In 41 FR 51619, the EPA proposed approval of Rule 410, Organic Solvents, as being consistent with the Federally promulgated regulations in 40 CFR 52.254. At that time it was proposed to eliminate Kings County from 40 CFR 52.254 (a) through (l). The EPA has determined that Rule 410 does not provide for hourly emission limitations for organic solvents. Therefore, EPA is retaining only the hourly emission rates in 40 CFR 52.254 (b), (c) and (d) and all of paragraphs (m) and (n) such that these limitations can continue to be Federally enforced, while approving Rule 410, Organic Solvents.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sec. 110, Clean Air Act, as amended, (42 U.S.C. 1857c–5).)

[FRL 773–6]

Approval of Revisions to the Madera County Air Pollution Control District's Rules and Regulations in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions of the Madera County Air Pollution Control District's Rules and Regulations with the exception of regulations concerning scavenger plants and process weight which are disapproved, and malfunction, exceptions from opacity, new source review, emergency episode, gasoline vapor recovery, and certain exemptions from agricultural burning prohibitions which will be handled in separate FEDERAL REGISTER notices.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, 100 California Street, San Francisco, California 94111 415–556–7288.

SUPPLEMENTARY INFORMATION: On November 23, 1976 (41 FR 51620), EPA proposed approval of revisions to the Madera County Air Pollution District's Rules and Regulations submitted on July 25, 1973, July 19, 1974, and January 10, 1975. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received.

A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rules, final action will be taken in a separate FEDERAL REGISTER notice.

V 42162 AUG 22 77 UMI

In 41 FR 51620, the EPA proposed to disapprove Rule 405, Process Weight and Rule 407.3, Scavenger Plants. These are disapproved by this notice. A discussion of the basis for the disapproval is found in 41 FR 51620.

For Federal enforcement purposes Rule 405, Process Weight, submitted on June 30, 1972 and approved under 40 CFR 52.223, will remain in effect.

Rule 407, Sulfur Compounds, submitted on June 30, 1972 and approved under 40 CFR 52.223, remains in effect for sulfur scavenging plants.

In 41 FR 51620, the EPA proposed to approve Rule 103, Confidential Information, to rescind the Federal regulation in 40 CFR 52.224(b) for Madera County, and to rescind the current disapproval notice in 40 CFR 52.224(a). These are approved/disapproved as proposed.

In 41 FR 51620, the EPA proposed approval of Rules 409, 409.1, and 409.2, Organic Solvents, as being consistent with the Federally promulgated regulations in 40 CFR 52.254. At that time it was proposed to eliminate Madera County from 40 CFR 52.254. The EPA has determined that Rule 409 does not provide for hourly emission limitations for organic solvents. Therefore, EPA is retaining the hourly emission rates in 40 CFR 52.254 (b), (c), and (d), and other portions of § 52.254 needed for interpretation or enforcement of these limitations, while approving Rule 409, which contains daily emission limitations, and Rules 409.1 and 409.2, which are adequate.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sec. 110, Clean Air Act, as amended, (42 U.S.C. 1857c-5).)

[FRL 773-7]

Approval of Revisions to Mariposa County Air Pollution Control District's Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the Mariposa County Air Pollution Control District's Rules and Regulations with the following exceptions: Regulations concerning new source review, exceptions to agricultural burning rules, and malfunction will be addressed in a separate FEDERAL REGISTER package; and Rule 209, Fossil Fuel-Steam Generator Facility, is disapproved. It is also the purpose of this action to rescind the current disapproval notices in 40 CFR 52.224(a) and 40 CFR 52.234(a) for Mariposa County and to rescind the substitute regulations in 40 CFR 52.224 (b) and 40 CFR 52.224(d) for Mariposa County.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attention: David R. Souten, Chief, California SIP Section, Air Programs Branch, San Francisco, California 94111, 415-556-7288.

SUPPLEMENTARY INFORMATION: On November 1, 1976 (41 FR 47952) EPA proposed approval of revisions to the Mariposa County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973 and January 10, 1975. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received on the changes being acted on in this final rulemaking notice. A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rules, final action will be taken in a separate FEDERAL REGISTER notice.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Secs. 110, 301, Clean Air Act, as amended, (42 U.S.C. 1857c-5, 1857g).)

[FRL 773-8]

Approval of Revisions to San Joaquin County Air Pollution Control District's Rules and Regulations in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the San Joaquin County Air Pollution Control District's Rules and Regulations with the exception of regulations concerning malfunction, new source review, in-stack monitoring, emergency episodes, gasoline vapor recovery, and certain exemptions from agricultural burning prohibitions.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attention: David R. Souten, Chief, California SIP Section, Air Programs Branch, San Francisco, California 94111, 415-556-7288.

SUPPLEMENTARY INFORMATION: On November 1, 1976 (41 FR 47953), EPA proposed approval of revisions to the San Joaquin County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973, October 23, 1974, and February 10, 1976. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received on the changes being acted on in this final rulemaking notice. A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rule, final action will be taken in a separate FEDERAL REGISTER notice.

In 41 FR 47953, the EPA proposed to disapprove Rule 407.1, Disposal of Solid or Liquid Wastes and Rule 407.3, Scavenger Plants. These regulations are disapproved in this notice. A discussion of the basis for this disapproval is found in 41 FR 47953.

For Federal enforcement purposes, Rule 407, Sulfur Compounds, submitted June 30, 1972 and approved as part of the SIP, is retained and will continue to remain in effect for sulfur scavenger plants.

For Federal enforcement purposes, Rule 407.1, Disposal of Solid or Liquid Waste, submitted on June 30, 1972 and approved as part of the SIP, is retained and will continue to remain in effect, while the revised rule 407.1 submitted on February 10, 1976 is disapproved.

In 41 FR 47953, the EPA proposed approval of Rule 409, Organic Solvents, as being consistent with the Federally promulgated regulations in 40 CFR 52.254, Organic solvent usage. At that time, it was proposed to eliminate San Joaquin County from 40 CFR 52.254 requirements. Subsequently, the EPA has determined that the proposed approval was in error in that Rule 409, unlike 40 CFR 52.254, did not provide for hourly emission limitations for organic solvents. Therefore, EPA is retaining the hourly

emission limitations contained in paragraphs (b), (c), and (d) of Federal Regulations § 52.254, and approving Rule 409, and retaining portions of 40 CFR 52.254 needed for interpretation of the hourly emission limitation.

The EPA is approving Rules 422 and 423 for new source performance standards and hazardous air pollutants, as proposed. This does not constitute delegation of these programs, which is handled in a separate FEDERAL REGISTER notice.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sec. 110, Clean Air Act, as amended (42 U.S.C. 1857c-5).)

[FRL 774-1]

Approval of Revisions to Shasta County Air Pollution Control District's Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the Shasta County Air Pollution Control District's Rules and Regulations with the exception of regulations concerning malfunction, new source review, and certain exemptions from agricultural burning prohibitions which will be addressed in a separate FEDERAL REGISTER notice.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, Region IX, 100 California Street, San Francisco, California 94111 (415-556-7288).

SUPPLEMENTARY INFORMATION: On November 1, 1976, (41 FR 47949 et seq.), EPA proposed approval of revisions to the Shasta County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973, July 19, 1974, January 10, 1975, and July 22, 1975. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received on the changes being acted on in this final rulemaking notice. A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rules, final action will be taken in a separate FEDERAL REGISTER notice.

This action rescinds the current disapproval notice and substitute regulation for Shasta County APCD in 40 CFR 52.224 (a) and (b).

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sec. 110 Clean Air Act, as amended, (42 U.S.C. 1857c-5).)

[FRL 774-2]

Approval of Revisions to the Tulare County Air Pollution Control District's Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval/disapproval of revisions to the Tulare County Air Pollution Control District's Rules and Regulations with the exception of regulations concerning malfunction, organic solvents, new source review, emergency episodes, gasoline vapor recovery, exceptions, in-stack monitoring, and certain exceptions to the agricultural burning prohibitions which are not included here and will be addressed in separate FEDERAL REGISTER packages.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being forced by the State and local air pollution control agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, 100 California Street, San Francisco, California 94111, 415-556-7288.

SUPPLEMENTARY INFORMATION: On November 1, 1976 (41 FR 47955), EPA proposed approval of revisions to the Tulare County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973, October 23, 1974, and January 10, 1975. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received on the changes being acted on in this final rulemaking notice. A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rules, final action will be taken in a separate FEDERAL REGISTER notice.

In 41 FR 47955, the EPA proposed to disapprove Rule 407.3, Scavenger Plants. This regulation is disapproved in this notice. A discussion of the basis for this disapproval is found in 41 FR 47955.

For Federal enforcement purposes, Rule 407, Sulfur Compounds, submitted June 30, 1972 and approved as part of the SIP, is retained and will continue to remain in effect for sulfur scavenger plants.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sec. 110, Clean Air Act, as amended (42 U.S.C. 1857c-5)).

[FRL 774-3]

Approval of Revisions to the Tuolumne County Air Pollution Control District's Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Final Rulemaking.

SUMMARY: It is the purpose of this action to promulgate final approval of revisions to the Tuolumne County Air Pollution Control District's Rules and Regulations with the following exceptions: Rules involving new source review, exception to agricultural burning, emergency episodes, and malfunction will be addressed in separate FEDERAL REGISTER packages; the additions are disapproved involving Rule 207, Particulate Matter, and Rule 209, Fossil Fuel-Steam Generator Facility; the revocations are disapproved concerning Rule 414, Effluent Oil Water Separators, and Rule 413, Organic Liquid Loading. For Federal enforcement purposes, Rules 404, 407(b), 408 (Fuel Burning Equipment), 412, and 413 submitted on June 30, 1972 and approved as part of the California State Implementation Plan (SIP) remain in effect as a portion of the approved SIP. It is also the purpose of this action to rescind the current disapproval notice in 40 CFR 52.224(a) for Tuolumne County and to rescind the substitute regulation in 40 CFR 52.224(b) for Tuolumne County.

Pursuant to Section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions. The Administrator finds good cause for making this rulemaking effective immediately since the regulations being approved are currently being enforced by the State and local air pollution control

V 42 162 AUG 22 77 UM

agencies, and therefore pose no further requirement on any affected facility.

EFFECTIVE DATE: August 22, 1977.

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, Chief, California SIP Section, Air Programs Branch, San Francisco, California 94111, 415–556–7288.

SUPPLEMENTARY INFORMATION: On November 1, 1976 (41 FR 47956), EPA proposed approval of revisions to the Tuolumne County Air Pollution Control District's Rules and Regulations submitted on July 25, 1973 and July 22, 1975. These revisions were submitted by the California Air Resources Board for inclusion in the California State Implementation Plan (SIP). The Proposed Rulemaking Notice provided for a 30-day public comment period. No comments were received on the changes being acted on in this final rulemaking notice. A description of the regulations being acted on in this rulemaking is available in the Proposed Rulemaking Notice. Although EPA proposed to disapprove the malfunction rule, final action will be taken in a separate FEDERAL REGISTER notice.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

(Sec. 110, Clean Air Act, as amended (42 U.S.C. 1857c-5).)

Subpart F of Part 52 of Chapter I, Title 40, of the Code of Federal Regulations is amended as follows:

1. In § 52.220 the following changes are made:

a. Paragraph (c)(20) is deleted and reserved.

b. Paragraphs (c)(21)(i)–(v) and (vii)–(xii) are revised; and (xiv)–(xxviii) are deleted.

c. Paragraph (c)(22)(i) is revised.

d. Paragraphs (c)(23)(i)(A) are revised and (c)(23)(ii) and (iii) are deleted.

e. Paragraphs (c)(24)(iv)–(viii) are revised.

f. Paragraphs (c)(25) introductory text and (c)(25)(i)–(iv) are added.

g. Paragraphs (c)(26)(iii)–(v) are revised and (vi)–(xiii) are added.

h. Paragraphs (c)(27)(i) and (iii) are revised.

i. Paragraphs (c)(28)(iii), (iv), and (ix) are revised and (v)–(viii) are added.

j. Paragraph (c)(29) introductory text is added; (c)(29)(i) and (ii)(B) are added.

k. Paragraphs (c)(30)(iii) and (viii) are revised and (iv), (v), (vi)(A), and (vii) are added.

l. Paragraphs (c)(31)(i)(C), (D), (E) are added and (31)(v)(A) is added.

m. Paragraph (c)(32)(ii) is revised.

* * * * *

3. Section 52.226, paragraph (b) is added as follows:

§ 52.226 **Control strategy and regulations: Particulate matter, San Joaquin Valley Intrastate Region.**

* * * * *

(b) The following regulatory changes represent a relaxation of previously submitted regulations and an adequate control strategy has not been submitted showing that the relaxation will not interfere with attainment and maintenance of the National Ambient Air Quality Standards for particulate matter:

(1) Kings County APCD.

(i) Rule 405, Process Weight, submitted on July 25, 1973 is disapproved; and Rule 405, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(2) Calaveras County APCD.

(i) The revocation of Rule 407(b), Combustion Contaminants, is disapproved; and Rule 407(b), submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(ii) The revocation of Rule 408, Fuel Burning Equipment, is disapproved; and Rule 408, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(iii) The addition of Rule 209, Fossil Fuel-Steam Generator Facility, is disapproved; and Rule 408, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(3) Tuolumne County APCD.

(i) Rule 207, Particulate Matter, submitted on July 22, 1975 is disapproved; and Rules 404 and 407(b), submitted on June 30, 1972 and previously approved in 40 CFR 52.223 are retained.

(ii) Rule 209, Fossil Fuel-Steam Generator Facility, submitted on July 22, 1975 is disapproved; and Rule 408, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(4) Fresno County APCD.

(i) Rule 407, Disposal of Solid or Liquid Wastes, submitted on February 10, 1976 is disapproved; and Rule 407.1, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(5) San Joaquin County APCD.

(i) Rule 407.1, Disposal of Solid or Liquid Wastes, submitted on February 10, 1976 is disapproved; and Rule 407.1, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(6) Mariposa County APCD.

(i) Rule 209, Fossil Fuel-Steam Generator Facility, submitted on January 10, 1975 is disapproved; and Rule 6.4, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(7) Kern County APCD.

(i) Rule 407.1, Disposal of Solid or Liquid Wastes, submitted on July 22, 1975 is disapproved; and Rule 407.1, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(8) Madera County APCD.

(i) Rule 405, Process Weight, submitted on January 10, 1975 is disapproved; and Rule 405, submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

4. Section 52.231 is added as follows:

§ 52.231 **Regulations: Sulfur oxides, San Joaquin Valley Intrastate Region.**

(a) The following regulations are disapproved since neither they nor the plan provide for the degree of control needed for the attainment and/or maintenance of the national standards for sulfur oxides in the San Joaquin Valley Intrastate Region:

(1) San Joaquin County APCD.

(i) Rule 407.3, Scavenger Plants, submitted on October 23, 1974, is disapproved; and Rule 407, Sulfur Compounds, submitted on June 30, 1972, and previously approved in 40 CFR 52.223, is retained and will continue to remain in effect for sulfur scavenger plants.

(2) Tulare County APCD.

(i) Rule 407.3, Scavenger Plants, submitted on October 23, 1974, is disapproved; and Rule 407, Sulfur Compounds, submitted on June 30, 1972, and previously approved in 40 CFR 52.223, is retained and will continue to remain in effect for sulfur scavenger plants and other sulfur compound emitting sources.

(3) Kern County APCD.

(i) Rule 407.3, Scavenger Plants, submitted on July 19, 1974, is disapproved; and Rule 407, Sulfur Compounds, submitted on June 30, 1972, and previously approved in 40 CFR 52.223, is retained and will continue to remain in effect for sulfur scavenger plants.

(4) Madera County APCD.

(i) Rule 407.3, Scavenger Plants, submitted on January 10, 1975, is disap-

V 42 162 AUG 22 77 UM

proved; and Rule 407, Sulfur Compounds, submitted on June 30, 1972, and previously approved in 40 CFR 52.223, is retained and will continue to remain in effect for sulfur scavenging plants and other sulfur compound emitting sources.

5. Section 52.234, paragraph (a)(2)(ii) is added as follows:

§ 52.234 Source surveillance.

(a) * * *

(2) * * *

(ii) Mariposa County APCD.

* * * * *

6. Section 52.246, paragraph (b) is revised as follows:

§ 52.246 Control of dry cleaning solvent vapor losses.

* * * * *

(b) This section is applicable in the Metropolitan Los Angeles, Sacramento Valley, San Joaquin Valley, and San Francisco Bay Area Intrastate Air Quality Control Regions (the "Regions"), except as follows:

(1) In the following portions of the Sacramento Valley Region, this section is rescinded:

(i) Sacramento County APCD.

* * * * *

7. Section 52.252, paragraph (b) is revised as follows:

§ 52.252 Control of degreasing operations.

* * * * *

(b) This section is applicable in the Metropolitan Los Angeles, Sacramento Valley, San Joaquin Valley, and San Francisco Bay Area Air Quality Control Regions (the "Regions"), except as follows:

(1) In the following portions of the Sacramento Valley Region, this section is rescinded:

(i) Sacramento County APCD.

* * * * *

8. In § 52.254, paragraphs (a)(1)(ii)–(v) and (a)(2) are added as follows:

§ 52.254 Organic solvent usage.

(a) * * *

(1) * * *

(ii) Kern County APCD.

(iii) Fresno County APCD.

(iv) San Joaquin County APCD.

(v) Madera County APCD.

(2) In the following portions of the San Joaquin Valley Region, only the hourly emission limitations contained in paragraphs (b), (c), and (d) of this section and the architectural coatings and solvent disposal emission limitations contained in paragraphs (m) and (n) of this section are in effect; the following paragraphs, needed for interpretation and enforcement of these emission limitations, are also in effect: Paragraphs (e) through (l) and (o) through (q) of this section.

(i) Kings County APCD.

* * * * *

9. In § 52.269, paragraphs (b)(1)(i) and (ii) are added as follows:

§ 52.269 Control strategy: Photochemical oxidants (hydrocarbons) and carbon monoxide.

* * * * *

(b) * * *

(1) * * *

(i) Calaveras County APCD.

(A) The revocation of Rule 412, Organic Liquid Loading, is disapproved; and Rule 412 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(B) The revocation of Rule 413, Effluent Oil Water Separators, is disapproved; and Rule 413 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(ii) Tuolumne County APCD.

(A) The revocation of Rule 413, Organic Liquid Loading, is disapproved; and Rule 413 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

(B) The revocation of Rule 414, Effluent Oil Water Separators, is disapproved; and Rule 414 submitted on June 30, 1972 and previously approved in 40 CFR 52.223 is retained.

* * * * *

10. Section 52.272 is added as follows:

§ 52.272 Research operations exemptions.

(a) The requirements of § 51.22 of this chapter are not met because the following regulations allow exemptions to be granted from the applicable emission limitations, thereby potentially rendering the applicable limitations unenforceable. Furthermore, the regulations are inconsistent with the Clean Air Act, because the regulations could permit violations of the National Ambient Air Quality Standards under some circumstances.

(1) Sacramento Valley Intrastate Region.

(i) Sacramento County APCD.

(A) Rule 30, Exceptions, submitted on January 22, 1974 is disapproved.

[FR Doc.77-23642 Filed 8-19-77;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 981]

HANDLING OF ALMONDS GROWN IN CALIFORNIA

Proposed Salable and Reserve Percentages for the 1977–78 Crop Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal would establish marketing percentages for California almonds for the 1977–78 crop year. Under the proposal, 100 percent of the marketable almonds would be salable, and handlers could ship almonds freely to all markets. The anticipated marketable supply is expected to equal the market needs.

DATE: Written comments to this proposal must be received by September 7, 1977.

ADDRESS: Written comments should be submitted in duplicate to the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. All written submissions will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–3545.

SUPPLEMENTARY INFORMATION: This proposal was unanimously recommended by the Almond Board of California. The Board is established under the marketing agreement, as amended, and Order No. 981, as amended (7 CFR Part 981), regulating the handling of almonds grown in California. The amended marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

In arriving at its recommendation, the Board estimated production, handler carryover as of July 1, 1977, and other factors as prescribed in § 981.49 related to the establishing of salable and reserve percentages. The Board also considered the domestic industry's need to maximize sales in both the domestic and export markets in view of current world market conditions.

The Board, therefore, recommended that the percentages for the 1977–78 crop year be established at 100 percent salable and 0 percent reserves.

The proposal is as follows:

§ 981.227 Salable and reserve percentages for almonds during the crop year beginning July 1, 1977.

The salable and reserve percentages during the crop year beginning July 1, 1977, shall be 100 and 0 percent, respectively.

Dated: August 16, 1977.

CHARLES R. BRADER,
Acting Director,
Fruit and Vegetable Division.

[7 CFR Part 981]

ALMONDS GROWN IN CALIFORNIA

Proposed Expenses of the Board and Rate of Assessment for the 1977–78 Crop Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on proposed expenses of $6,401,620 and a rate of assessment of 2.18 cents per pound (kernelweight basis), for the maintenance and functioning of the Almond Board of California. This regulation would enable the Board to collect assessments from handlers on all almonds handled and use the resulting funds for its expenses.

DATE: Comments due September 7, 1977.

ADDRESS: Comments should be sent to: Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written materials shall be submitted, and they shall be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: 202–447–3545.

SUPPLEMENTARY INFORMATION: The marketing agreement, and Order No. 981, both as amended, regulate the handling of almonds grown in California. They are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Board, established under the order, is responsible for its local administration.

The proposal is as follows:

§ 981.327 Expenses of the Board and rate of assessment for the 1977–78 crop year.

(a) *Expenses.* Expenses in the amount of $6,401,620 are reasonable and likely to be incurred by the Board during the crop year beginning July 1, 1977, for its maintenance and functioning and for such purposes as the Secretary may, pursuant to the provisions of this part, determine to be appropriate.

(b) *Rate of assessment.* The rate of assessment for said crop year, payable by each handler in accordance with § 981.81, less any amount credited pursuant to § 981.41 but not to exceed 2 cents per pound of almonds (kernelweight basis), is fixed at 2.18 cents per pound of almonds (kernelweight basis).

Dated: August 17, 1977.

CHARLES R. BRADER,
Acting Director,
Fruit and Vegetable Division.

[FR Doc. 77-24181. Filed 8-19-77; 8:45 am]

[7 CFR Part 991]

HOPS OF DOMESTIC PRODUCTION

Proposed Expenses of the Hop Administrative Committee and Rate of Assessment for the 1977–78 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on proposed expenses of $195,230 and a rate of assessment of 0.3 cent per pound of salable hops handled, for the maintenance and functioning of the Hop Administrative Committee. This regulation would enable the Committee to collect assessments from handlers on all hops handled and use the resulting funds for its expenses.

DATE: Comments due September 7 1977.

ADDRESS: Comments should be sent to: Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written materials shall be submitted, and they shall be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

V 42 162 AUG 22 77 UM

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: 202–447–3545.

SUPPLEMENTARY INFORMATION: The order, Order No. 991, as amended, regulates the handling of hops of domestic production, and is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Committee, established under the order, is responsible for its local administration.

The proposal is as follows:

§ 991.312 Expenses of the Hop Administrative Committee and rate of assessment for the 1977–78 marketing year.

(a) *Expenses.* Expenses in the amount of $195,230 are reasonable and likely to be incurred by the Hop Administrative Committee during the marketing year beginning August 1, 1977, for its maintenance and functioning and for such purposes as the Secretary may, pursuant to the provisions of this part, determine to be appropriate.

(b) *Rate of assessment.* The rate of assessment for said marketing year, payable by each handler in accordance with § 991.56, is fixed at 0.3 cent per pound of salable hops.

Dated: August 17, 1977.

CHARLES R. BRADER,
Acting Director,
Fruit and Vegetable Division.

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 73]

PHYSICAL PROTECTION OF PLANTS AND MATERIALS

Performance Oriented Safeguards Requirements; Extension of Comment Period

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Extension of comment period to September 19, 1977.

SUMMARY: On July 5, 1977, NRC published a proposed rule to improve control and protection of nuclear materials at NRC licensed fuel cycle facilities (42 FR 34310). Comments were requested by August 19, 1977. Several Federal Agencies and affected licensees have requested more time to comment. In view of the complexity of the rule and the concerns expressed by commentors, the NRC is hereby extending the comment period to expire September 19, 1977.

DATE: Comments must be received on or before September 19, 1977.

ADDRESSES: Comments or suggestions for consideration in connection with the proposed amendments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Docketing and Service Branch. Copies of comments received may be examined at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Mr. L. J. Evans, Jr., Chief, Requirements Analysis Branch, Division of Safeguards, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, 301–427–4043 or Mr. R. J. Jones, Chief, Material Protection Standards Branch, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, 301–443–6973.

Dated at Washington, D.C., this 18th day of August 1977.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 77-Ea-69]

TRANSITION AREA, WURTSBORO, N.Y.

Proposed Designation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate a Wurtsboro, N.Y., Transition Area, over Wurtsboro-Sullivan County Airport, Wurtsboro, N.Y. This designation will provide protection to aircraft executing a new instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATE: Comments must be received on or before September 22, 1977.

ADDRESS: Send comments on the proposal in triplicate to: Chief, Airspace and Procedures Branch, AEA–530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA–530, Air Traffic Division, Federal Aviation Administration, Federal Building, J. F. K. International Airport, Jamaica, N.Y. 11430. Telephone 212–995–3391. The docket may be examined at the following location: FAA, Office of the Regional Counsel, AEA–7, Federal Building, J. F. K. International Airport, Jamaica, N.Y. 11430.

COMMENTS INVITED

Interested parties may participate in the proposed rulemaking by submitting such writen data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430. All communications received on or before September 22, 1977, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, AEA–530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, N.Y. 11430, or by calling 212–995–3391. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a transition area over Wurtsboro-Sullivan County Airport, Wurtsboro, N.Y. The area will commence at 700 feet above the surface and add controlled airspace to that already in existence of from approximately 5 miles to the south around to 10 miles to the northwest; 8 miles to the north around to the east.

DRAFTING INFORMATION

The principal authors of this document are Frank Trent, Air Traffic Division, and Thomas C. Halloran, Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Section 71.181 of Part 71 of the Federal Aviation regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Wurtsboro, N.Y., 700-foot floor transition area as follows:

WURTSBORO, N.Y.

That airspace extending upward from 700 feet above the surface within a 5.5-mile radius of the center, 41°35'52" N., 74°27'32" W., of Wurtsboro-Sullivan County Airport, Wurtsboro, N.Y.; within a 9.5-mile radius of the center of the center of the airport, extending clockwise from a 352° bearing to a 016° bearing from the airport; within a 10.5-mile radius of the center of the airport, extending clockwise from a 016° bearing to a 025° bearing from the airport; within a 12-mile radius of the center of the airport, extending clockwise from a 025° bearing to a 036° bearing from the airport; within a 14.5-mile radius of the center of the airport, extending clockwise from a 036° bearing to a 070° bearing from the airport; within an 8.5-mile radius of the center of the airport, extending clockwise from a 070° bearing to a 086° bearing from the airport; within an 8.5-mile radius of the center of the airport, extending clockwise from a 169° bearing to a 192° bearing from the airport; within a 10.5-mile radius of the center of the airport, extending clockwise from a 192° bearing to a 238° bearing from the airport; within a 12-mile radius of the center of the airport, extending clockwise from a 238° bearing to a 310° bearing from the airport; within an 11.5-mile radius of the center of the airport, extending clockwise from a 310° bearing to a 385° bearing from the airport; within a 10-mile radius of the center of the airport, extending clockwise from a 335° bearing to a 352° bearing from the airport; within 4.5 miles north and 6.5 miles south of the Stewart VOR (41°30'30" N., 74°-05'51" W.) 228° radial, extending from 2.5 miles west to 19.5 miles west of the Stewart VOR; excluding the portions that coincide with the Newburgh, N.Y., and Monticello, N.Y., transition areas. This transition area is effective from sunrise to sunset, daily.

(Sec. 307(a), Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Executive Order 11949 and OMB Circular A–107.

Issued in Jamaica, N.Y., on August 9, 1977.

WILLIAM E. MORGAN,
Director, Eastern Region.

[FR Doc.77-24154 Filed 8-19-77;8:45 am]

CIVIL AERONAUTICS BOARD

[14 CFR Part 399]

[PSDR–49; Docket No. 31290]

DOMESTIC PASSENGER-FARE LEVEL POLICIES AND STRUCTURE POLICIES

Advance Notice of Proposed Rulemaking

AUGUST 17, 1977.

AGENCY: Civil Aeronautics Board.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The regulatory policies and ratemaking standards developed by the Board in the Domestic Passenger Fare Investigation (DPFI) were designed to ensure the lowest cost transportation possible, with a reasonable quality of service in a regulated industry characterized generally by service rather than normal-fare price competition and a lack of entry by new carriers. The basic characteristics of the industry appear to be changing as several new entrants seek certification to provide low price service in certain markets and the existing carriers have begun to compete in their normal fares. The Board has, therefore, decided to solicit public views on whether any of the Board's DPFI policies need to be modified to accommodate these changes, and to encourage a better performance by the domestic airline passenger system.

DATES: Comments due by September 21, 1977. Reply comments due by October 6, 1977. Requests to be placed on the service list by September 1, 1977.

ADDRESSES: Comments should be sent to Docket 31290, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. Docket comments may be examined at the Docket Section, Civil Aeronautics Board, Room 711, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Norman D. Schwartz, Legal Division, Bureau of Economics, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202–673–5056).

SUPPLEMENTARY INFORMATION: The DPFI, which the Board instituted in January 1970,[1] was a comprehensive inquiry into the passenger fares charged for scheduled services within the 48 contiguous States. As a result of this examination, the Board developed a detailed set of regulatory policies and ratemaking standards against which to test the lawfulness of passenger fares in interstate air transportation, including load factor,[2] seating configuration, fare structure, discount fare dilution, joint fares and rate of return on investment standards.

Under the Board's ratemaking policies, normal fares are based on industry average costs, as adjusted by the Board's standards, and on a mileage-related formula that establishes equal fares for trips of equal distances. Although the Board permitted the carriers pricing flexibility through the use of discount fares[3] and off-peak fares,[4] it rejected proposals that the carriers be allowed the flexibility to set normal fares within a zone ranging both above and below the levels found reasonable in the investigation. The Board pointed out that the carriers had historically not engaged in price competition in normal fares, even though they had been free before the DPFI to propose changes upward or downward in these fares. The Board noted that the absence of such price competition was directed attributable to the economic structure of the industry. Carriers showed little inclination to engage in price competition in normal fares because competitors were free to match any reductions, with the result that a carrier could expect a fare decrease only to dilute its yields and not to improve its market position. Moreover, because entry or the threat of entry into major domestic markets by new airlines proposing new types of service at lower fares was virtually nonexistent, the incumbent carriers had no need to compete on the basis of price.[5] Thus, the Board concluded that fare flexibility within a zone of reasonableness would not lead to price competition, but would simply allow the carriers to raise their fares above cost, which would lead in turn to additional service competition.[6]

The conditions that led the Board to reject the concept of fare flexibility may no longer prevail. The Board is currently conducting two route proceedings which involve applications for new and innovative low-price service, as well as applications for initial licenses by new airlines.[7] Additionally, the incumbent carriers have begun to engage in price competition in normal fares.[8]

These developments provide the occasion for the Board to reevaluate its policies on entry and price competition. It is our tentative view that both new entry based upon low-fare proposals and increased price competition among incumbent carriers are in the public interest and should be encouraged. This view calls into question the decisions we reached in the DPFI on the subject of pricing flexibility and fare structure, and make it necessary for us to reexamine those decisions to see how, if at all, the DPFI standards should be modified. We have not decided what modifications in the DPFI standards, if any, might be advisable to accomplish these objectives; before we do so, we are interested in receiving the views of all interested persons on this issue.

To guide the responses, we list below a number of questions to which we ask the public to respond. This list should not be regarded as exhaustive; the Board is receptive to all suggestions on how increased price competition within the industry can and should be encouraged. Interested persons will have the opportunity also to file reply comments. Once these comments and reply comments are received and analyzed, the Board will issue a notice of proposed rulemaking

[1] Order 70–1–147 (January 29, 1970).

[2] The DPFI load-factor standard is currently being reexamined in Docket 27417.

[3] Under the Board's policies, the carriers are permitted to offer discount fares which are not unjustly discriminatory and which will be profitable in the short run. This latter policy is being reexamined in Docket 30891.

[4] Domestic Night Coach Fares Investigation, Opinion and Order on Discretionary Review, Order 77–4–133 (April 26, 1977) (Docket 26510).

[5] Two new entrants—Air New England and Air Midwest—requested that their limited operations be governed by the Board's DPFI determinations. These requests were granted by Orders 74–10–101 and 74–10–102 (October 18, 1974) for Air New England; and by Orders 76–11–3 (November 2, 1976) and 76–12–22 (December 6, 1976) for Air Midwest.

[6] Although the Board rejected the "zone of reasonableness" proposals, it did encourage the carriers to offer new types of low-cost services at fares below the coach level, reflecting those lower costs.

[7] Chicago-Midway Low-Fare Route Proceeding (Docket 30277); Transcontinental Low Fare Route Proceeding (Docket 30356).

[8] E.g., TWA's "Super Coach" fares approved by Order 77–7–29 (July 11, 1977).

V 42162 AUG 22 77 UM V

setting forth such specific modifications to the DPFI standards as may be necessary to achieve these goals.

ISSUES WHICH SHOULD BE ADDRESSED:

I. FARE UNIFORMITY

A. Should the Board continue to require uniform fares for individual markets of the same distance? If so, on what costs should these fares be established:

1. Industry average costs (current DPFI procedure);
2. Individual carrier costs:
3. Other?

B. Should the fare level and structure reflect such factors as:

1. Peak-load principles (by market or system-wide);
2. Market and/or station density;
3. Load factor, seating and aircraft utilization standards (by market or system-wide);
4. Other?

C. If the Board regulates fares according to any of the above criteria, how can low-fare services of incumbents or new entrants in individual markets be accommodated? Should it establish upper and/or lower limits? How, if at all, should DPFI standards be modified?

II. FARE FLEXIBILITY

A. Should the Board permit fare flexibility, as a means of encouraging new entry and increasing price competition?

1. How should the Board establish maximum fares? Should it use:
(a) Industry average costs under current DPFI methodology or as adjusted to reflect those factors in I.B. above;
(b) Individual carrier costs;
(c) Other?

2. Should the Board establish minimum fare levels? If so, should such minimums be based upon:
(a) Industry average noncapacity costs;
(b) Individual carrier capacity and/or noncapacity costs;
(c) Some other form or proxy for marginal costs, either short-run or long-run;
(d) Some arbitrary percentage of the maximum;
(e) Other?

B. If any of the above alternatives were adopted, how should the following problems be handled:

1. What methods or standards should be employed to detect and prevent predatory pricing?
2. Within the maximum and minimum standards, should there be restrictions on a carrier's ability to adjust fares? If so, what type of restrictions should be adopted? For example, should the restrictions differ between a carrier initiating a lower fare and one responding; or should carriers in competitive markets be allowed to match lower fares based upon the costs of the lowest cost carrier?
3. How should joint fares and joint fare dilution be handled?
4. In evaluating low-fare proposals, how should circuity for multistop and connecting services be treated? For example, should fares for such services be based upon segment local fares or shortest authorized/direct mileage?
5. What methods should be adopted to measure and prevent cross-subsidization, if any, as between:
(a) Competitive and monopoly markets:
(b) Dense and thin markets;
(c) Short-haul and long-haul markets;
(d) Other?
6. How should the carriers' overall revenue need be determined? What restrictions, if any, are needed to ensure that fares based upon short-run marginal costs do not encourage investment and scheduling which result in long-run incremental costs exceeding revenues from such fares (e.g., the normalization method now used by the Board in determining the industry rate of return)?
7. In computing the costs against which low fares are to be tested, how should the Board consider the effects of the additional traffic on the quality of service available (e.g., inability to obtain a seat on the flight of one's choice)? Should these additional costs be reduced by adopting such devices as increased fares for certain reservations; discounts and/or boarding priority rules?

Interested persons may take part in this rulemaking by submitting 20 copies of written data, views, or arguments on the subjects discussed. All relevant material received by the dates shown at the beginning of this notice will be considered by the Board before taking final action on the proposed rules.

Those persons planning to file comments or reply comments who wish to be served with such comments filed by others, and are willing to serve their own comments on others, shall file with the Docket Section, at the address and by the date shown at the beginning of this notice, a request to be placed on the Service List. The Service List will be prepared by the Docket Section and sent to the persons named on it. Those persons are to serve each other with comments or reply comments at the time of filing, and are to include proof of service (Rule 8(e), 14 CFR 302.8(e)) with each filing.

Individual members of the general public who wish to express their interest as consumers by informally taking part in this proceeding may do so by submitting comments in letter form to the Docket Section, without having to file additional copies.

(Sec. 204, 403, 404, and 1002, Federal Aviation Act of 1958, as amended; 72 Stat. 743, 758, 760, and 788, as amended; (49 U.S.C. 1324, 1373, 1374; and 1482; 5 U.S.C. 553).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-24239 Filed 8-19-77;8:45 am]

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[27 CFR Part 4]

[Notice No. 310]

LABELING AND ADVERTISING OF WINE

Standards of Fill for Wine

AGENCY: Bureau of Alcohol, Tobacco and Firearms.

ACTION: Proposed rule.

SUMMARY: The proposed rules would permit use of a greater variety of wine containers larger than 3 liters, would redefine a "liter" of wine at a reference temperature of 20 degrees celsius, and would permit the Director to grant exemptions to the bottles per case requirement in certain instances. The Director is proposing these changes in response to industry and consumer comments that the present metric standard of fill regulations are more restrictive than the former requirements concerning the U.S. or "customary" bottle sizes.

DATE: Written comments, or requests to hold or testify at a public hearing must be received by October 21, 1977.

ADDRESS: Written comments and requests for hearing may be addressed to: Director, Bureau of Alcohol, Tobacco and Firearms, Washington, D.C. 20226. Attention: Regulations and Procedures Division. Written comments, may be inspected by any person in Room 6213, Ben Franklin Post Office Building, 1200 Pennsylvania Avenue NW., Washington, D.C. between 8:30 a.m. and 5 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Charles N. Bacon, Research and Regulations Branch, at 202-566-7626.

SUPPLEMENTARY INFORMATION:

THE METRIC STANDARDS OF FILL

The metric wine bottle sizes which the Bureau authorized for optional use beginning January 1, 1975, range in size from 100 milliliters (3.4 fluid ounces) to 3 liters (101 fluid ounces). These metric sizes will replace the customary U.S. sizes for all wine bottle after December 31, 1978. One objective we expect to accomplish by adopting the metric standards of fill is to reduce the number of bottle sizes while providing a logical sequence of metric sizes which consumers can easily compare and unit price. Another objective in adopting metric sizes is to promote international wine trade by changing to bottle sizes which are used in many of the world's wine producing nations.

The largest metric standard of fill for wine is 3 liters (101 fl. oz.) which nearly equals ¾ gallon (102.4 fl. oz.). Since the U.S. standards of fill includes sizes of 1 gallon (128 fl. oz.), 3 gallons, and 4.9 gallons, the largest metric size, 3 liters, represents a significant decrease in the size of large containers of wine available to consumers. The Bureau did not adopt a size larger than 3 liters since at the time we considered the metric standards of fill in 1974, there was almost no interest expressed in sizes larger than one gallon. We concluded that public interest was not sufficient to justify the inclusion of larger metric sizes.

Since adopting the metric standards of fill, one consumer and several industry members have requested the Director to reexamine the possibility of authorizing the use of larger wine containers. As a result, the Director is proposing to authorize additional large wine sizes by using one of two alternate proposals. The first, proposal "A", would add either a 4 or a 5 liter size to the metric standards of fill and would permit use of any container of 10 liters or larger for packaging wine. The second, proposal "B", would permit use of any wine container larger than 3 liters as long as the containers were filled and labeled in even liter amounts (4 liters, 5 liters, 6 liters, etc.).

REPLACEMENT FOR THE GALLON

Several petitioners, including the Wine Institute, a trade association representing the California wine industry; Heublein Wines; Inc., and a consumer have petitioned for a 4 liter standard of fill to replace the gallon. The consumer petition points out that the 3 liter size is 21% smaller than a gallon and that many consumers may prefer the larger size for both convenience and economy. For example, wine bottled in a large size such as 4 liters would probably cost less per milliliter than would wine in a 1.5 or 3 liter bottle. Similarly, a 4 liter size might prove more convenient for use at picnics or large social gatherings.

The Director agrees that a 4 liter wine bottle might have certain advantages when compared to the 3 liter bottle. We also recognize that other large sizes such as 5 liters might satisfy the same needs as the 4 liter size; i.e., to replace the gallon "jug". Five liters is 32% larger than a gallon and would offer the consumer a wider size spread from 3 liters than the 4 liter size would offer. The 5 liter size might also be more acceptable in international trade since the European Economic Community has recognized it for trade among member nations.

The Director, therefore, proposes to amend § 4.73 to authorize a replacement for the gallon wine container. Either of the two alternatives outlined above would accomplish this: proposal "A", which would add either a 4 or a 5 liter standard of fill; or proposal "B", which would permit any even liter size larger than 3 liters such as 4 liters, 5 liters, 6 liters, etc. We particularly solicit comments which would enable us to select either (or none) of these proposals for the gallon replacement (under proposal "A" there would only be one additional size of 4 or 5 liters while under proposal "B" there would be several new sizes).

As part of proposal "A", the Director would also amend § 4.37(b) by specifying the equivalent U.S. fluid ounces required to appear on labels in conjunction with the proposed metric sizes; this required statement would read either "4 liters (135 fl. oz.)," or "5 liters (169 fl. oz.)." The Director further proposes to amend § 4.74 to specify that 4 or 5 liter bottles be packed 4 per case. We welcome comments concerning these case requirements since we realize that the size of these proposed cases, 16 liters (4.23 gallons) or 20 liters (5.28 gallons), might pose packaging problems or might be too heavy to transport easily. Under proposal "B" there would be no case packing requirements for the new sizes.

WINE CONTAINERS LARGER THAN 10 LITERS

Several persons requesting large wine containers sought either very large standards of fill (12 or 18 liters), or the use of any size bottle which exceeds a certain size. For example, the present exemption from the standards of fill permits the use of any size container of 5 gallons (18.93 liters) or larger. If this exemption were lowered to 12 liters, wine bottlers could use containers of 10, 12, 15, or 18 liters.

The Wine Institute's petition requested new standards of fill of 12 and 18 liters. These sizes roughly correspond to the U.S. standards of fill of 3 gallons (11.36 liters) and 4.9 gallons (18.55 liters) which bottlers may no longer use after December 31, 1978. Traditionally, these sizes have been large demijohns or wooden casks used primarily for bulk sales of wine to restaurants or hotels. Recent innovations in technology, however, permit the packaging of wine in large containers made of steel or various plastics. These new containers now make the sale, storage and use of large wine containers practical for many households.

Large stainless steel canisters (similar to those used for dispensing soft drinks) are used by many hotels, restaurants, and taverns for dispensing wine by the glass. These canisters are reusable since they may be refilled by the winery many times. Although consumers do not generally use them, hotels, restaurants, wineries, and other companies have substantial investments in these canisters and their related dispensing apparatus. Without a change in the standard of fill regulations, wineries would be unable to fill these containers after December 31, 1978.

The second new container type is a collapsible plastic bag, filled with wine and encased in cardboard, wood, or rigid plastic. These lightweight containers are easy to dispense wine from and will not break like glass. They also permit the storage of wine for relatively long periods of time since, as wine is dispensed from the plastic bag, the bag collapses forming a vacuum which prevents air from coming into contact with the wine. Storage of these containers in a home refrigerator is possible due to their compact nature; a typical 3 gallon plastic wine pack in a cardboard box measures 9 by 9 by 10 inches and weighs 25 pounds. Additionally, a container made of these plastic materials is cheaper to produce than a traditional glass bottle containing a similar quantity of wine. The compact size, lightweight, and lower production cost all contribute to making wine in large plastic containers potentially less expensive per milliliter than wine packed in large glass bottles.

The Director agrees that some large container sizes for wine are necessary and desirable. Although we have received petitions requesting several large sizes, the Director proposes to authorize additional large sizes by either of the proposals already mentioned. Proposal "A" would amend § 4.70 to exempt containers of 10 liters (2.64 gallons) or larger from the standards of fill, thus allowing use of any container of 10 liters or larger. Proposal "B" would allow use of any wine containers larger than 3 liters as long as they were in even liter amounts, thus allowing use of 10, 11, 12, 18 or other even-liter sizes.

Although one objective of "going metric" was to reduce the large number of wine bottle sizes, we feel that permitting use of several container sizes over 10 liters will not promote consumer confusion. It seems likely that the demand for these large containers would limit the number of sizes actually produced. Moreover, it would permit the continued use of reusable canisters similar to the current standards of fill of 3 gallons and 4.9 gallons, and would permit the introduction of new economy sizes such as 10 or 15 liters.

Proposal "A" would not only exempt wine containers of 10 liters or larger from the standards of fill, but also from the standard design, headspace and case requirements. Similarly, proposal "B" is worded to exclude containers of 10 liters or larger from the standard design, headspace, and case requirements. However, due to the nontraditional materials used for many of these containers, i.e., wood, steel, cardboard, and plastic, and their nontraditional construction (wine packed in a plastic bag encased in an opaque outer box), the usual headspace and design requirements are impractical since the wine usually is not visible upon examination of the container.

DEFINITION OF THE LITER

Section 4.10 defines a "liter" or "litre" as the volume of 1000 cubic centimeters at 4 degrees Celsius (39.4 degrees Fahrenheit) and equivalent to 33.814 U.S. fluid ounces. This definiiton recognizes that the liter is derived from a basic metric unit, the meter. Also, since the volume of a liquid changes with the temperature, § 4.10 defines the liter at a specified reference temperature, 4 degrees Celsius, the temperature at which water is densest.

The American Society of Enologists has petitioned the Director to raise the reference temperature for a liter of wine from 4 degrees to 20 degrees Celsius (68 degrees Fahrenheit). In their petition, the Society of Enologists points out that

V 42 16 2 AUG 22 77 UM V

4 degrees Celsius refers to a liter of water but that that temperature is not used as a reference for a liter of alcoholic beverage. They also note that the International Organization of Weights and Measures no longer defines the liter with reference to any temperature; therefore the definition at § 4.10 is not current.

Raising the reference temperature for a liter of wine to 20 degrees Celsius would bring this closer to the temperature at which winery bottling operations are conducted. All liquids change in volume somewhat with temperature changes, and wine increases in volume slightly as the temperature is raised. Although this increase is insignificant for most wines, the volume of wines over 14% alcohol, such as sherry or port, increases about 3% as the temperature increases from 4 degrees to 20 degrees Celsius. Proprietors of wineries might need to compensate for this volume change in these wines during bottling since a measured liter at 20 degrees Celsius, approximate bottling room temperature, would not equal the defined liter at 4 degrees Celsius. However, this correction would be unnecessary if the liter were defined at 20 degrees Celsius.

Twenty degrees Celsius is an internationally used reference temperature for a liter of alcoholic beverage. The European Economic Community and numerous individual nations use this reference temperature for a liter of wine. The United States has already taken a significant step toward international trade in wine by adopting metric standards of fill; adoption of an internationally used reference temperature for the liter should further benefit international trade.

The Director, therefore, proposes to amend the definition of "liter" or "litre" appearing at § 4.10 by raising the reference temperature from 4 degrees to 20 degrees Celsius (68 degrees Fahrenheit).

WINE BOTTLES PER CASE

At the time of adoption of metric standards of fill, the Bureau also adopted § 4.74 which prescribes a standard number of metric bottles per case. This requirement was imposed to simplify marketing of wine by retailers, and to simplify packaging, handling, inventorying and recordkeeping of wine by producers and wholesalers.

Although most bottles can be easily packed as required, some bottles cannot because of their unusual or distinctive shapes. These bottles often require more packaging materials resulting in a case which is either too bulky or too heavy to be easily handled. Another reason some producers cannot pack the prescribed number of bottles per case is that some states may require case sizes which differ from those required by § 4.74.

In order to avoid any potential problems resulting from unusual bottles or differing state requirements, the Director proposes to further amend § 4.74 by adding paragraph (b) which would allow a wine bottler or importer to vary from the prescribed bottles per case requirement if, upon application to the Director, he or she could demonstrate good cause.

NONSTANDARD BOTTLES AND CASES OF IMPORTED WINE

Section 4.46, Certificate of nonstandard fill, allows the importation of bottled wine in containers not conforming to the metric standards of fill if the wine is bottled before January 1, 1979. The Director now proposes to permit the importation of metric wine bottles in cases not conforming to the bottles per case requirement of § 4.74, after December 31, 1978, if the importer furnishes to Customs a copy of the approved application exempting the wine from those requirements. (This is the application proposed at § 4.74(b) which the Director would approve if good cause were demonstrated.)

A further proposed addition to § 4.46 would be an exemption allowing importation of wine which is not required to conform to the standard wine bottle regulations. These exemptions provided at § 4.70(b) include sake and wine in containers of 5 gallons or larger (it is elsewhere proposed to lower this exemption to 10 liters). The Director also proposes to change the title of § 4.46 to read "Nonstandard bottles and cases" to reflect the exemptions for nonstandard cases.

EQUIVALENT FLUID OUNCE STATEMENT

Section 4.37(b) now requires that when net contents are stated in metric measure, the equivalent volume accurate to the nearest one-tenth fluid ounce will also appear on the label. This requirement is intended to provide the consumer a means of determining the approximate content of a metric bottle of wine if the consumer is unfamiliar with the metric system.

The Director proposes to amend § 4.37 (b) by requiring the equivalent volume statement in excess of 100 fluid ounces to be expressed to the nearest full ounce; for example, 5 liters (169 fl. oz.). We feel that the significance of the tenth of a fluid ounce is lost when the volume of the container exceeds 100 fluid ounces. Moreover, this U.S. fluid ounce equivalent is an approximate quantity used only to inform the consumer of the approximate size of a metric bottle. It is not for keeping wholesale or retail records or for determining the appropriate gallonage taxes; therefore, it is unnecessary for this quantity to be precisely accurate.

The Director also notes that it has been the Bureau's policy to require that equivalent fluid ounces be expressed to the nearest full ounce for volumes over 100 ounces. Section 4.37(b) now specifies the equivalent of 3 liters as 101 fluid ounces. With the proposed addition of large standards of fill, the Bureau desires to reaffirm its present policy on equivalent volume statements.

DEFINITION OF "PACKER"

Section 4.10 currently defines a "bottler" as any person who places wine in containers of a capacity of 1 gallon or less, and a "packer" as any person who places wine in containers larger than 1 gallon. With the proposed addition of either a 4 or a 5 liter standard of fill, or of even liter sizes larger than 3 liters, the Director proposes to change "1 gallon" to "4 liters" in these definitions since the 4 (or 5) liter container is expected to replace the gallon.

DRAFTING INFORMATION

The principal author of this regulation is Charles N. Bacon of the Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms. However, personnel from other offices of the Bureau and from the Treasury Department participated in developing the regulation, both on matters of substance and style.

AUTHORITY AND ISSUANCE

The proposed regulations are to be issued under the authority contained in Section 5 of the Federal Alcohol Administration Act (49 Stat. 981, as amended (27 U.S.C. 205)).

In view of the above, the Director is amending 27 CFR Part 4 as follows:

PARAGRAPH 1. Amend § 4.10 by: (1) changing in paragraph (i), the term "1 gallon" to read "4 liters"; and (2) changing in paragraph (o) the reference temperature for the liter from 4 degrees Celsius to 20 degrees Celsius and by adding the phrase "of wine" in the definition. As amended, § 4.10 (i) and (o) read as follows:

§ 4.10 Meaning of terms.

* * * * * * *

(i) *Container.* Any bottle, barrel, cask or other closed receptacle irrespective of size or of the material from which made for use for the sale of wine at retail. "Bottler" means any person who places wine in containers of 4 liters or less; and "packer" means any person who places wine in containers in excess of 4 liters.

* * * * * * *

(o) *Liter or litre.* A metric unit of capacity equal to 1000 cubic centimeters of wine at 20° Celsius (68° Fahrenheit), and equivalent to 33.814 U.S. fluid ounces. For purposes of this part, a liter is subdivided into 1000 milliliters (ml).

* * * * * * *

PAR. 2. Amend § 4.37 by: (1) adding subtitles to each of the lettered paragraphs; (2) specifying the U.S. equivalent volumes for the proposed 4 or 5 liter standards of fill (under proposal "A"); and (3) requiring that equivalent net volume statements for containers of 100 U.S. fluid ounces or larger be expressed to the nearest whole ounce. The amended portions of § 4.37 read as follows:

§ 4.37 Net contents.

(a) *Statement of metric net contents.* * * *

(b) *Statement of U.S. equivalent net contents.* * * *

(1) For the metric standards of fill:

5 liters (169 fl. oz.) or 4 liters (135 fl. oz.), 3 liters (101 fl. oz.), 1 liter (33.8 fl. oz.), 750 milliliters (25.4 fl. oz.), 375 milliliters (12.7 fl. oz.), 187 milliliters (6.3 fl. oz.) and 100 milliliters (3.4 fl. oz.).

(2) Equivalent volumes of less than 100 fluid ounces will be stated in fluid ounces only, accurate to the nearest one-tenth of a fluid ounce; for example, 700 ml (23.7 fl. oz.).

(3) Equivalent volumes of 100 fluid ounces or more will be stated in fluid ounces only, accurate to the nearest whole fluid ounce; for example, 10 liters (338 fl. oz.).

(c) *Exceptions.* * * *

(d) *Net contents marked in bottle.* * * *

(e) *Tolerances.* * * *

(f) *Unreasonable shortages.* * * *

PAR. 3. Revise § 4.46 by: (1) adding a paragraph permitting the release from customs custody of metric bottles of wine in nonstandard cases if the Director has granted an exemption; (2) cross referencing the exemption from standards of fill granted by § 4.70 (b)(1) and (b)(2); and (3) dividing the section into paragraphs and retitling the section. As revised, § 4.46 reads as follows:

§ 4.46 Nonstandard bottles and cases.

(a) *Exemptions from standards of fill.* After December 31, 1978, a person may import wine in containers not conforming to the metric standards of fill prescribed at § 4.73 if the wine is—

(1) Accompanied by a statement signed by a duly authorized official of the appropriate foreign country, stating that the wine was bottled or packed before January 1, 1979;

(2) Being withdrawn from a Customs bonded warehouse into which it was entered before January 1, 1979; or

(3) Exempt from the standard of fill requirements as provided by § 4.70(b)(1) or (b)(2).

(b) *Exemption from standard cases.* After December 31, 1978, a person may import wine in containers conforming to the metric standards of fill and in cases not conforming to the bottles per case requirements of §4.74 if the wine is—

(1) Accompanied by a copy of the application approved by the Director as provided in § 4.74(b);

(2) Being withdrawn from a Customs bonded warehouse into which it was entered before January 1, 1979; or

(3) Exempt from the standard wine container regulations as provided by § 4.70(b)(1) or (b)(2).

PAR. 4. Amend § 4.70 by lowering the exemption from standard wine container regulations from 5 wine gallons to 10 liters and by making certain editorial changes to improve the clarity of the section. The amend portions of § 4.70 read as follows:

§ 4.70 Application.

(a) * * *

(b) Sections 4.70–4.74 will not apply to—

(1) Sake;

(2) Wine packed in containers of 10 liters or more;

(3) Imported wine in the original containers in which entered customs custody if the wine was bottled or packed before January 1, 1979; or

(4) Wine domestically bottled or packed, either in or out of customs custody, before October 24, 1943, if the container, or the label on the container, bears a conspicuous statement of the net contents, and if the actual capacity of the container is not substantially less than the apparent capacity upon visual examination under ordinary conditions of purchase or use.

(c) Sections 4.73–4.74 will not apply to wine domestically bottled or packed, either in or out of customs custody, before January 1, 1979, if the wine was bottled or packed according to the standards of fill prescribed by § 4.72.

PAR. 5. Amend § 4.73 by: (1) adding either 4 or 5 liters to the metric standards of fill (proposal "A") or adding a paragraph permitting use of any container larger than 3 liters if it is an even liter amount (proposal "B"); (2) adding subtitles to each of the lettered paragraphs; and (3) making editorial changes to improve the clarity of the section. As amended, § 4.73 reads as follows:

§ 4.73 Metric standards of fill.

(a) *Authorized standards of fill.* The standards of fill for wine are the following:

5 liters or 4 liters, 3 liters, 1.5 liters, 1 liter, 750 milliliters, 375 milliliters, 187 milliliters, and 100 milliliters.

(b) *Sizes larger than 3 liters.* Wine may be bottled or packed in containers of 4 liters or larger if the containers are filled and labeled in quantities of even liters (4 liters, 5 liters, 6 liters, etc.). Containers of less than 10 liters are subject to the standard wine container requirements of § 4.71.

(c) *Tolerances.* The tolerances in fill are the same as are allowed by § 4.37 in respect to statement of net contents on labels.

(d) *Completeness of conversion.* Once a bottler has discontinued bottling a given type or style of bottle (for example: burgundy bottle, champagne bottle, etc.) corresponding to a standard of fill prescribed by § 4.72, and has begun bottling in a replacement standard of fill prescribed by this section, the bottler may not revert back for that particular type or style of bottle, to the standard of fill prescribed by § 4.72.

(e) *Effective date.* The effective date of paragraphs (a) through (c) of this section is January 1, 1979, except that the standards of fill prescribed by this section may be applied in lieu of those listed at § 4.72 on or after January 1, 1975. When the metric standards of fill are applied prior to January 1, 1979, the equivalent volume in U.S. measure will also be stated as specified in § 4.37(b).

PAR. 6. Amend § 4.74 by: (1) adding a paragraph providing an exception to the bottles per case requirement in instances when the bottler or importer can demonstrate good cause; and (2) by requiring the proposed 4 or 5 liter bottles to be packed 4 per case.

As amended, § 4.74 reads as follows:

§ 4.74 Bottles per shipping case.

(a) *General.* Wines bottled subject to the standards of fill prescribed by § 4.73 will be packed with the following number of bottles per shipping case or shipping container—

Bottle sizes:	Bottles per case
5 or 4	4
3	4
1.5	6
1	12
750 ml	12
375 ml	24
187 ml	48
100 ml	60

(b) *Exception.* The Director may waive the bottles per case requirement set forth in paragraph (a) of this section if the bottler or importer can prove good cause. The bottler or importer shall make written application, in duplicate, to the Director and shall not introduce wine in nonstandard cases into interstate or foreign commerce or remove the wine from customs custody until the Director approves the application.

Signed: July 15, 1977.

REX D. DAVIS,
Director.

Approved: August 3, 1977.

BETTE B. ANDERSON,
Under Secretary of the Treasury.

[27 CFR Part 181]

EXPLOSIVE MATERIALS REGULATIONS

Correction

In FR Doc. 77-22016 appearing at page 39316 as the Part II of the issue of Wednesday, August 3, 1977, and corrected on page 40921 in the issue of Friday, August 12, 1977, the following changes should be made:

1. The correction which appeared on page 40921 in the issue of Friday, August 12, 1977 should be deleted in its entirety.

2. In the first column on page 39322 in the issue of Wednesday, August 3, 1977, in the second and last lines of the Note, the date, "August 3, 1979" should be deleted and the following should be inserted in lieu thereof: "(two years from the date these regulations are published in the FEDERAL REGISTER)".

3. In the second column of this same page 39322, in the last line of the Note, the date "August 3, 1977" should be deleted and the following should be inserted: "(two years from the date these regulations are published in the FEDERAL REGISTER)".

4. On page 39326 in the table in § 181.218:

(a) Under the entry "Inhabited Buildings", the second number under "Unbarricaded", now reading "160" should read "180".

(b) Under the entry "Separations of Magazines", under "Unbarricaded", the forty-second number reading "230" should read "238".

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 117]

[CGD 77-094]

GRAND RIVER, MICHIGAN

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the Michigan Department of State Highways and Transportation, the Coast Guard is considering amending the regulations for the U.S. Highway 31 drawbridge across the Grand River, mile 2.9, near Grand Haven, Michigan. These amendments would provide for more restrictive opening periods than presently exist. The purpose of these regulations is to relieve congestion caused by heavy vehicular traffic in the area of the bridge, particularly, during the periods of greatest use (midspring to midfall). Regulations presently in force for the railroad bridges across the Grand River, mile 2.8, and at the mouth of Spring Lake mile 0.2, will be included without change in this section for clarity.

DATES: Comments must be received on or before September 23, 1977.

ADDRESSES: Comments should be submitted to and are available for examination at the office of the Commander (obr), Ninth Coast Guard District, 1240 East Ninth Street, Cleveland Ohio 44199.

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G-WBR/73), Room 7300, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590, 202-426-0942.

SUPPLEMENTARY INFORMATION: Each person submitting comments should include his name and address, identify the bridge, an give reasons for any recommended change in the proposal.

The Commander, Ninth Coast Guard District, will forward any comments received with his recommendations to the Chief, Office of Marine Environment and Systems, U.S. Coast Guard Headquarters, Washington, D.C., who will evaluate all communications received and recommend final action on this proposal to the Commandant, U.S. Coast Guard. The proposed regulations may be changed in the light of comments received.

DRAFTING INFORMATION

The principal persons involved in drafting this proposal are: Frank L. Teuton, Jr., Project Manager, Office of Marine Environment and Systems, and Lieutenant Edward J. Gill, Jr., Project Attorney, Office of the Chief Counsel.

DISCUSSION OF THE PROPOSED REGULATIONS

Presently, the highway bridge at mile 2.9 of the Grand River opens on signal for the passage of vessels from March 16 through December 15. From December 15 through March 15, the draw opens on signal if at least 24 hours notice is given. The proposed operation regulations would require the draw to open on signal from March 16 through May 14, and from October 15 through December 14. From May 15 through October 14, the draw would open on signal from 9:03 p.m. until 6:03 a.m. From 6:03 a.m. until 9:03 p.m. the draw would open from three minutes before to three minutes after the hour and half-hour. From December 15 through March 15 the draw would open on signal if at least 24 hours notice is given.

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations, be amended by:

1. Revoking § 117.641(f) (3) and (4).
2. Revising § 117.685 to read as follows:

§ 117.685 Grand River and the channel at the mouth of Spring Lake, Michigan, bridges.

(a) Grand Trunk Western Railroad bridge, mile 2.8.

(1) The draw shall open on signal from March 16 through December 14.

(2) The draw shall open on signal from December 15 through March 15 if at least 24 hours notice is given.

(3) The opening signal is one blast of a whistle, horn, or by shouting.

(b) U.S. Highway 31 bridge, mile 2.9.

(1) From March 16 through May 14, and from October 15 through December 14, the draw shall open on signal.

(2) From May 15 through October 14, the draw shall open on signal from 9:03 p.m. until 6:03 a.m. From 6:03 a.m. until 9:03 p.m., the draw shall open on signal from three minutes before to three minutes after the hour and half-hour

(3) From December 15 through March 15, the draw shall open on signal if at least 24 hours notice is given.

(4) Commercial vessels, public vessels of the United States, vessels in distress, and state or local government vessels used for public safety shall be passed through the draw as soon as possible at any time even though the closed periods may be in effect.

(5) The owner of or agency controlling this bridge shall keep a copy of these regulations conspicuously posted both upstream and downstream, either on the bridge or elsewhere in such a manner that it can easily be read from an approaching vessel at all times, with a notice stating exactly how notice is to be given to the authorized representative of the bridge owner to effect an opening.

(6) The opening signal for this bridge is one long blast followed by one short blast of a whistle, horn, or by shouting.

(c) Railroad drawbridge across the mouth of Spring Lake.

(1) The draws shall open on signal from March 16 through December 14. From December 15 through March 15 the draws shall open on signal if at least 24 hours notice is given.

(2) The opening signal is two blasts of a whistle, horn, or by shouting.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5).)

The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A-107.

Dated: August 15, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard,
Commandant.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[41 CFR Part 24-1]

[Docket No. R-77-460]

PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

Small Business Set-Asides

AGENCY: Office of Administration, HUD.

ACTION: Notice of proposed rulemaking.

SUMMARY: HUD proposes to increase the range of construction contracts routinely set-aside for small businesses from a range of $10,000 to $500,000 to a range of $2,000 to $1,000,000. This action is proposed to aid small businesses competing for HUD construction contracts, including repair and reconditioning contracts.

DATE: Public comments must be received by September 22, 1977.

ADDRESS: Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

William F. Grigg, 202-382-5391.

SUPPLEMENTARY INFORMATION: The Department of Housing and Urban Development proposes to revise 41 CFR 24-1.709.50 to increase the range of proposed procurement contracts subject to a class set-aside for small businesses. If the contracting officer determines that a particular procurement falling within the class set-aside is unsuitable for set-aside in whole or in part, the set-aside may be withdrawn or modified in accordance with 41 CFR 24-1.709. The change in the dollar range for class set-asides to small businesses is being proposed to broaden the opportunities for small businesses.

Interested persons may participate in this rulemaking by submitting written data, views, or arguments to the Rules Docket Clerk at the address listed above. Each person submitting a comment should include his or her name and address, refer to this proposal by the docket number indicated in the heading and give reasons for any recommendations. Copies of comments received by the date

indicated above will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination by interested persons in the Office of the Rules Docket Clerk at the address listed above. The proposal may be changed in the light of the comments received.

The Department has determined that an Environmental Impact Statement is not required with respect to this rule. A copy of the Finding of Inapplicability is available for inspection at the above address.

It is hereby certified that the economic and inflationary impacts of this proposed rule have been carefully evaluated in accordance with OMB Circular A-107 and Executive Order 11821.

Accordingly, it is proposed to amend 24 CFR 24-1.709.50 to read as follows:

§ 24-1.709.50 Small business class set-aside for construction, including repair and reconditioning.

A class set-aside is hereby made for each proposed procurement for construction, including repair and reconditioning, in an amount ranging from estimates of $2,000 to $1,000,000. Accordingly, contracting officers shall set-aside for small business each proposed procurement in this range. If a contracting officer determines that any particular procurement falling within the class set-aside requirements of this Section is unsuitable for such a set-aside in whole or in part, the set-aside may be withdrawn or modified in accordance with HUDPR 24-1.709. Proposed procurements for construction which exceed an estimate of $1,000,000 shall be considered for set-aside on a case-by-case basis.

(Sec. 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).)

Issued at Washington, D.C. August 11, 1977.

PATRICIA ROBERTS HARRIS,
Secretary, Department of
Housing and Urban Development.

[FR Doc.77-24183 Filed 8-19-77;8:45 a.m.]

DEPARTMENT OF TRANSPORTATION

Materials Transportation Bureau

[49 CFR Part 193]

[Notice No. 77-4A; Docket No. OPSO-46]

LNG FACILITIES; FEDERAL SAFETY STANDARDS

Extension of Comment Period and Listing of Supplementary Sources of Background Materials

AGENCY: Materials Transportation Bureau; Office of Pipeline Safety Operations, DOT.

ACTION: Supplement to Advance Notice of Proposed Rulemaking, and extension of time for comments.

SUMMARY: This supplemental notice of proposed rulemaking lists sources of background materials used to develop draft safety regulations included in the advanced notice of proposed rulemaking, and extends the time for filing comments. The Supplemental notice is needed because of requests from some of the commenters that we supply source information that they say will be useful in making complete and helpful comments. The deadline for comments has been extended to allow commenters additional time to procure copies and to refer to the copies before commenting further.

DATE: The comment period of Notice No. 77-4 is extended to December 1, 1977.

ADDRESS: Comments should be sent to: Director, Office of Pipeline Safety Operations, Department of Transportation, Trans Point Building, 2100 Second Street, SW., Washington, D.C. 20590.

All comments received will be available for inspection and copying at Docket Room 6500, Trans Point Building.

FOR FURTHER INFORMATION CONTACT:

Peggy Hammond, 202-426-0135.

SUPPLEMENTARY INFORMATION: The Materials Transportation Bureau (MTB) published an Advance Notice of Proposed Rulemaking (ANPRM) (42 FR 20776) on April 21, 1977, concerning Federal safety standards for LNG facilities. The ANPRM contains a comprehensive set of draft regulations which are intended to serve as a basis for public comment and participation in identification of LNG safety problems and the development of appropriate regulatory solutions to those problems, considering all reasonable alternatives. Since the ANPRM was published, MTB has received requests to identify any sources of information used to develop the draft safety regulations included in the ANPRM which were not mentioned in the preamble. Persons making the requests have indicated that background material would be useful in making comprehensive comments on the ANPRM, especially in areas which are significantly different from the present standards in NFPA 59A.

It is MTB's policy to solicit the greatest possible participation by the public in the rulemaking process at any early stage and to ensure, to the extent possible, that the public is aware of the issues upon which it is asked to comment. Therefore, MTB is publishing the following list of the principal information among sources which have either general or specific relation to the draft regulations published in the ANPRM. To the best of MTB's knowledge, items on the list are available from the addresses given.

While the draft regulations are in general based upon the National Fire Protection Association Standard 59A (1975 edition) and the other listed materials, the use of the material and its application in developing the draft regulations was determined by MTB's staff. Materials used may have been modified based upon personal expertise, experience, and engineering judgment.

The following information sources are applicable to the board body of the draft regulations.

CODES, STANDARDS, AND REGULATIONS

(Items 1-7, National Fire Protection Association (NFPA).)

1. Storage and Handling of Liquefied Natural Gas, NFPA 59A, 1971, 1972, and 1975 editions—Applicability—Basic, general reference.

2. Flammable and Combustible Liquids Code, NFPA 30—Applicability—Subpart E.

3. Installation Maintenance and Use of Portable Fire Extinguishers, NFPA 10—Applicability—Subpart N (incorporated § 193.1207 and 193.1307(c)(1)).

4. Stationary Combustion Engines and Gas Turbines, NFPA 37—Applicability—Subpart D (incorporated § 193.329).

5. Fire Prevention in Use of Cutting and Welding Processes, NFPA 51B—Applicability—Subpart N (incorporated § 193.1305(b)(4)).

6. National Electrical Code, NFPA 70—Applicability—Subparts D and N (incorporated §§ 193.323(a)(2) and 193.1305(a)(2)).

7. Recommended Practice on Static Electricity, NFPA 77—Applicability—Subparts D, F, and H (incorporated § 193.1305(a)(2)).

8. Regulations Covering the Design, Operation, Maintenance, and Repair of Liquefied Natural Gas (LNG) Plants and Systems—DPU—11725 F. Massachusetts Gas Distribution Codes, Section 5—Department of Public Utilities, Commonwealth of Massachusetts—Applicability—General background.

9. Proposed N.Y. Administrative Code 16 NYCRR, Part 259, Liquefied Natural Gas, New York Public Service Commission—Applicability—Subparts B, E, and K and General background.

10. Proposed Chapter 377, Liquefied Natural Gas of Title 12 NJAC, Department of Labor and Industry, State of New Jersey—Applicability—Subpart B and General background.

11. Cryogenics Safety Manual—A Guide to Good Practice, British Cryogenics Council—Applicability—Subpart L and General background.

12. Safety Recommendations, IGE SR 11, Liquefied Natural Gas, Parts 1 and 2, Communications 763, 776, and 856, The Institution of Gas Engineers—Applicability—Subpart F and General background.

13. Liquefied Flammable Gases, Storage and Handling—Imperial Chemical Industries Limited—Applicability—General background.

14. Building Standard Law, EHS, Law Bulletin Series, ERS Vol. III, No. 3,600, Elburn-Horei-Sha, Inc. — Applicability — General background.

(ITEMS 15-21, AMERICAN PETROLEUM INSTITUTE (API))

15. Pipeline Valves, API Spec. 6D—Applicability—Subparts C, D, and G.

16. Recommended Practice for Electrical Installations in Petroleum Processing Plants, API RP 540—Applicability—Subpart D.

17. Centrifugal Compressors for General Refinery Services, API 617—Applicability—Subparts D and I.

18. Heat Exchangers for General Refinery Service, API 660—Applicability—Subpart H.

19. Air-Cooled Heat Exchangers for General Refinery Services, API 661—Applicability—Subpart H.

20. Recommended Practice for Protection Against Ignitions Arising Out of Static, Lightning, and Stray Currents, API RP 2003—Applicability—Subpart D.

21. Recommended Rules for Design and Construction of Large, Welded, Low Pressure Storage Tanks, API 620—Applicability—Subparts F and K (incorporated §§ 193.529(a), 193.1027(b), 193.1033, and 193.1033(a)).

V 42 162 AUG 22 77 UM

(ITEMS 22–25, AMERICAN NATIONAL STANDARDS INSTITUTE, INC. (ANSI))

22. Steel Pipe Flanges, Flanged Valves, and Fittings, ANSI B16.5—Applicability—Subpart D.

23. Power Piping, ANSI B31.1—Applicability—Subpart D.

24. Fuel Gas Piping, ANSI B31.2—Applicability—Subpart D.

25. Petroleum Refinery Piping, ANSI B31.3—Applicability—Subparts C, D, and K (incorporated §§ 193.307(e)(1), 193.307(3)(2), and 193.1025(b)).

(Items 26–32, American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code)

26. Section II, Part A, Ferrous Materials—Applicability—Subpart C.

27. Section II, Part B, Nonferrous Materials—Applicability—Subpart C.

28. Section II, Part C, Welding Rods, Electrodes and Filler Metals—Applicability—Subparts C and K.

29. Section V, Nondestructive Examination—Applicability—Subpart K.

30. Section VIII, Division 1, Pressure Vessels—Applicability—Subparts D, F, H, and K (incorporated §§ 193.327, 193.529(b), 193.705, and 193.1025(c)).

31. Section VIII, Division 2, Alternative Rules, Pressure Vessels—Applicability—Subparts D, F, and K (incorporated §§ 193.327, 193.529(b), and 193.1025(c)).

32. Section IX, Welding and Brazing Qualifications—Applicability—Subpart K (incorporated § 193.1017(a)(1)).

33. Uniform Building Code—International Conference of Building Officials—Applicability—Subpart B (incorporated § 193.111(c)(1)).

(Items 34 & 35, American Insurance Association)

34. National Building Code—Applicability—Subpart B.

35. Fire Prevention Code—Applicability—Subparts B and N.

36. The BOAC Basic Building Code, Building Officials and Code Administrators International, Inc.—Applicability—Subparts B, F, K and reference other design and construction standards.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

SHIPPERS ADVISORY COMMITTEE MEETING

Public Meeting

Pursuant to the provisions of § 10(a)(2) of the Federal Advisory Committee Act (86 Stat. 770), notice is hereby given of a meeting of the Shippers Advisory Committee established under Marketing Order No. 905 (7 CFR Part 905). This order regulates the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida and is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The committee will meet in the A.B. Michael Auditorium of the Florida Citrus Mutual Building, 302 South Massachusetts Avenue, Lakeland, Florida, at 10:30 a.m., on September 8, 1977.

The meeting will be open to the public and a brief period will be set aside for public comments and questions. The agenda of the committee includes analysis of current information concerning market supply and demand factors, and consideration of recommendations for regulation of shipments of the named fruits.

The names of committee members, agenda, summary of the meeting and other information pertaining to the meeting may be obtained from Frank D. Trovillion, Manager, Growers Administrative Committee, P.O. Box R, Lakeland, Florida 33802; telephone 813-682-3103.

Dated: August 17, 1977.

WILLIAM T. MANLEY,
Acting Administrator.

Soil Conservation Service

MATE CREEK WATERSHED PROJECT, WEST VIRGINIA

Availability of Negative Declaration

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for work remaining to be done in the Mate Creek Watershed Project, Mingo County, West Virginia. Since the negative declaration was widely distributed to organizations and individuals prior to the publication of the Soil Conservation Service Guidelines issued August 8, 1977 (42 FR 40114 through 40118 inclusive), we have interpreted that our prior guidelines are appropriate.

The environmental assessment of this Federal action indicates that the project will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with the project. As a result of these findings, Mr. Craig M. Right, State Conservationists, Soil Conservation Service, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for watershed protection, flood prevention, and water oriented public recreation. The planned works of improvement remaining to be installed include conservation land treatment supplemented by three single purpose floodwater retarding structures, and one multiple purpose floodwater retarding and recreation structure with associated recreation facilities. The floodwater retarding structures, recreation facilities, and land treatment measures are independent of other measures from an engineering, economic, or environmental standpoint. The remaining channel work is not included in the negative declaration and is subject to other National Environmental Policy Act of 1969 documentation.

The negative declaration is being filed with the Council on Environmental Quality and copis are being sent to various Federal, State, and local agencies. The basic data developed during the environmental assessment is on file and may be reviewed by interested parties at the office of the Soil Conservation Service, Federal Building, 75 High Street, Morgantown, West Virginia 26505. A limited number of copies of the negative declaration is available from the same address to fill single copy requests.

No administrative action on implementation of the proposal will be taken until September 21, 1977.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program—Pub. L. 83-566, 16 USC 1001-1008.)

Dated August 12, 1977.

JAMES W. MITCHELL,
Director, Watersheds Division, Soil Conservation Service.

CIVIL AERONAUTICS BOARD

[Docket 29198]

ALASKA FARES INVESTIGATION

Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that a hearing in the above-entitled proceeding is assigned to be held on September 20, 1977, at 9:00 a.m. (local time), in Hearing Room C, 1875 Connecticut Avenue NW., Washington, D.C.

For details of the issues involved in this proceeding, interested persons are referred to the Prehearing Conference Report, served January 3, 1977, and other documents which are in the docket of this proceeding on file in the Docket Section of the Civil Aeronautics Board.

Dated at Washington, D.C. August 15, 1977.

STEPHEN J. GROSS,
Administrative Law Judge.

[FR Doc.77-24235 Filed 8-19-77;8:45 am]

[Order 77-8-70; Docket 29873]

DAETWYLER AIRFREIGHT CORP. (SWISS) d./b./a. INTERAMERICAN AIRFREIGHT CORP. (U.S.A.)

Order to Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 16th day of August 1977.

Daetwyler Airfreight Corp. (Swiss), d.b.a. Interamerican Airfreight Corp. (U.S.A.), (Airfreight), is the holder of a foreign air carrier permit[1] authorizing it to engage in the indirect air transportation of property from any point or points within the United States to any point or points outside the United States.

By application filed on October 4, 1976, Airfreight requests renewal of its foreign air carrier permit for a period of five years.[2] On March 30, 1977, Airfreight

[1] By Order E-21914, approved March 16, 1965, a foreign indirect air carrier permit was issued to Willy Peter Daetwyler (Switzerland) d.b.a. Interamerican Airfreight Co. (U.S.A.). By Order 71-10-114, served October 28, 1971, the permit was renewed for a five year period. In Order 75-3-104, the Board authorized a name change and a transfer of permits to the instant applicant.

[2] The applicant's current permit expired on October 23, 1976, and the applicant is now operating pursuant to section 9(b) of the Administrative Procedures Act.

Pursuant to section 801 of the Act, a copy of the application has been forwarded to the President.

V 42 162 AUG 22 77 UM V

filed a Petition for an Order to Show Cause why its application should not be granted. The applicant states that it is a Swiss citizen; that all of its stock is owned by Swiss citizens; and that neither the government of Switzerland nor any other government has any interest, beneficial or otherwise, in the applicant nor exercises any control over it. Airfreight also claims that it is an ongoing, profitable enterprise meeting a public need. No answers to the application or the petition have been received.

Upon consideration of the foregoing and the Board's prior findings concerning the renewal of Airfreight's (and the predecessor's) authority, the Board has tentatively determined to renew the carrier's permit for a period of five years.

The Board tentatively finds:

1. That Airfreight is substantially owned and effectively controlled by nationals of Switzerland;

2. That it is in the public interest to renew the foreign air carrier permit of Daetwyler Airfreight Corp. (Swiss), d.b.a. Interamerican Airfreight Corp. (U.S.A.), authorizing the carrier to engage in the indirect air transportation of property from any point or points in the United States to any point or points outside the United States;

3. That the public interest requires that the exercise of the privileges granted by the permit shall be subject to the terms, conditions, and limitations contained in the specimen form of permit attached to this order, those set forth below in paragraphs a, b, c, and d, and to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board:

(a) The holder, with respect to the use of aircraft, shall be subject to the provisions of sections 296.21, 296.22, and 296.41 of the Board's Economic Regulations, or as amended;

(b) The holder shall comply with the insurance coverage provisions of section 296.52 of the Board's Economic Regulations, or as amended, except that it shall not be necessary for the holder to provide public liability insurance for its operation outside th United States;

(c) In using the authority granted herein (1) the name Daetwyler Airfreight Corp. (Swiss) d.b.a. Interamerican Airfreight Corp. (U.S.A.) shall appear on all of the holders advertising, airwaybills, stationery and the like; (2) the above name will always be used in its entirety; and (3) the name Daetwyler Airfreight Corp. (Swiss) shall be displayed at least as prominently as the name Interamerican Airfreight Corp. (U.S.A.);

(d) The holder shall comply with the applicable record retention provisions of Part 249B and with section 9 of Part 244 of the Board's Economic Regulations, and shall file such other reports regarding the activities authorized by its permit, or activities reasonably related thereto, as the Board may from time to time require.

4. That Daetwyler Airfreight Corp. (Swiss) d.b.a. Interamercian Airfreight Corp. (U.S.A.) is fit, willing, and able properly to perform the above-described foreign air transportation, and to conform to the provisions of the Act and the rules, regulations, and requirements of the Board thereunder;

5. That an evidentiary hearing is not required in the public interest; and

6. That the renewal of the applicant's permit is not a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, and will not be inconsistent with the policy objectives of the Energy Policy and Conservation Act of 1975 (EPACA).[3]

Accordingly, it is ordered, that: 1. All interested persons are directed to show cause why the Board should not issue an order making final the tentative findings and conclusions, and why the foreign air carrier permit issued to Daetwyler Airfreight Corp. (Swiss) d.b.a. Interamerican Airfreight Corp. (U.S.A.), by Order 75-3-104 should not, subject to the approval of the President pursuant to section 801 of the Act, be renewed for a period of five years;

2. Any interested person having objection to the issuance, without hearing, of an order making final the tentative findings and conclusions stated here shall file a statement of objections supported by evidence within 21 days after the adoption of this order. If an evidentiary hearing is requested the objector should state in detail why such hearing is considered necessary and what relevant and material facts he would expect to establish through such hearing which cannot be established in written pleadings;

3. If timely and properly supported objections are filed, further consideration will be accorded the matters and issues raised by the objections before further action is taken by the Board.[4]

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived, and the Board may proceed to enter an order in accordance with the tentative findings and conclusions set forth here;

5. Copies of this order shall be served upon Daetwyler Airfreight Corp. (Swiss) d.b.a. Interamerican Airfreight Corp. (U.S.A.), and the Ambassador of Switzerland in Washington, D.C.

This order will be published in the FEDERAL REGISTER and will be transmitted to the President.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

PERMIT TO FOREIGN INDIRECT AIR CARRIER
(AS AMENDED)

DAETWYLER AIRFREIGHT CORP. (SWISS) d.b.a. INTERAMERICAN AIRFREIGHT CORP. (U.S.A.) is hereby authorized, subject to the provisions hereinafter set forth, the provisions of the Federal Aviation Act of 1958, and the orders, rules, and regulations issued thereunder, to engage indirectly in foreign air transportation of property from any point or points in the United States to any point or points outside the United States.

This permit shall be subject to all applicable provisions of any treaty, convention, or agreement affecting the right to engage in indirect air transportation of property now in effect, or that may become effective during the period this permit remains in effect, to which the United States and Switzerland shall be parties.

This permit shall be subject to the condition that in the event that any practice develops which the Board regards as inimical to sound economic conditions, the holder and the Board will consult with respect thereto and will use their best efforts to agree upon modifications thereof satisfactory to the Board and the holder.

The exercise of the privileges granted hereby shall be subject to the terms, conditions and limitations set forth in Order ------ dated ---------- and to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

By accepting this permit the holder waives any right it may possess to assert any defense of sovereign immunity from suit in any action or proceeding instituted against the holder in any court or other tribunal in the United States (or its territories or possessions) based upon any claim arising out of operations by the holder under this permit.

The holder shall comply with the applicable record retention provisions of Part 249B and with section 9 of Part 244 of the Board's Economic Regulations, and shall file such other reports regarding the activities authorized by its permit, or activities reasonably related thereto, as the Board may from time to time require.

This permit shall become effective on ---------- and shall terminate five years thereafter: *Provided, however*, that if during said period the operation of the foreign air transportation herein authorized becomes the subject of any treaty, convention, or agreement to which the United States and Switzerland are or shall beccome parties, then and in that event this permit shall continue in effect during the period provided in such treaty, convention, or agreement.

In witness whereof, the Civil Aeronautics Board has caused this permit to be executed by the Secretary of the Board, and the seal of the Board to be affixed hereto, on the -- day of ----------

———, ———,
Secretary.

[FR Doc.77-24238 Filed 8-19-77;8:45 am]

[Order 77-8-68; Docket 30236]

UNITED AIR LINES, INC.

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 16th day of August 1977.

On December 20, 1976, United Air Lines filed an application, pursuant to Subpart N of Part 302 of the Board's Procedural Regulations, for amendment of its certificate of public convenience and necessity for Route 1 so as to permit it to provide nonstop service between Cleveland, Ohio, and San Diego, California. United currently possesses one-stop authority in the market. American Airlines filed a statement requesting dismissal of the application.[1] By Order 77-2-100, February 22, 1977, the Board found that United's application was not in compliance with the substantive requirements of Subpart N, and directed the carrier to submit revised exhibits in support of its application.[2]

On April 12, 1977 United filed a supplement to its application, and submitted additional supporting exhibits. American filed a supplemental statement requesting dismissal. United filed a reply, together with a motion to file an unauthorized document. Revised exhibits were submitted with the reply. American filed a reply to United's reply, together with a motion for leave to file an otherwise unauthorized document.[3]

Upon consideration of the above pleadings, we have determined that United's application is now in compliance with the provisions of Subpart N, and is appropriate for processing under it. Accordingly, we shall order further proceedings with respect to United's application pursuant to sections 302.1406–1410 of the Board's Procedural Regulations.

Accordingly, it is ordered, That: 1. The application of United Air Lines, Inc., in Docket 30236, be set for further proceedings pursuant to Rules 1406–1410 of the Board's Procedural Regulations; and

2. The motions of United Air Lines, Inc., and American Airlines, Inc., to file an unauthorized document, be granted.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-24237 Filed 8-19-77;8:45 am]

[Order 77-8-66; Docket 30904]

ALASKA AIRLINES ET AL.

Petition for Prior Board Approval to Hold Joint Air Carrier Discussions on Matters Relating to the Transportation of the Handicapped; Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 16th day of August 1977.

Certain certificated route air carriers filed a petition on May 19, 1977, requesting Board approval for all air carriers to hold joint discussions relating to the air transportation of handicapped persons.[1] The carriers request that the discussion authority be granted for a sixty day period from the date of the Board's order. The carriers state that discussion authority is necessary due to the issuance of new and revised regulations by the Federal Aviation Administration (FAA) and the Department of Health, Education and Welfare (HEW), relating to handicapped persons.

The FAA regulations, effective May 16, 1977, amended Title 14 of the Code of Federal Regulations, Parts 121, 123, and 135 (42 FR 18392, April 7, 1977) and require the carriers to establish procedures for the on-line and interline carriage of handicapped persons.

The HEW regulations, effective June 3, 1977, added Part 84 to Title 45 of the Code of Federal Regulations (42 FR 22676, May 4, 1977) and require equality of treatment for all handicapped persons in all programs funded by HEW and other U.S. government agencies.

The carriers state that the adoption of procedures pursuant to the new FAA regulations which are appropriate for each individual carrier will not present any particular problem. However, due to the carriers' fleet mix, the same cannot be said of interline transfer and handling procedures. The carriers state that it is therefore of vital importance for the carriers to discuss interline procedures and to facilitate adoption of uniform joint, procedures relating to the air transportation of handicapped persons.[2] The carriers state that the HEW regulations signal that every effort must be made to provide safe and equal air transportation to handicapped persons.

Upon consideration of the petition, and all other relevant matters, it is clear that authorization of these discussions should result in improved procedures for the transportation of handicapped persons and thus is in the public interest. Therefore the Board will approve the request.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 412, and 414 thereof,

It is ordered, That: 1. The petition of certain certificated air carriers to authorize joint carrier discussions is approved and all air carriers are authorized to engage in joint discussions with respect to implementing procedures relating to the air transportation of handicapped persons for a period of sixty days from the date of this order, subject to the conditions that:

(a) Such discussions shall not include any matters which directly or indirectly affect the fares, rates, or charges paid by the consumer;

(b) An agenda of matters to be discussed shall be filed with the Board in this docket at least 15 calendar days in advance with respect to any meeting called pursuant to this order; [3] and

(c) Any interested persons may advise the carriers that they are interested in these discussions, and all meeting notices, agendas, minutes, and any agreements reached shall be mailed to such persons with notices to include an invitation to submit comments on the agenda matters, and/or to request appointments for personal appearances at the carriers' meetings;

2. The Board reserves the right to have one or more observers in attendance at all meetings of the carriers;

3. Complete and accurate minutes shall be kept of all meetings, and a true copy thereof filed with the Board's Docket Section not later than 15 days after the conclusion of each meeting;

4. Any agreement or agreements reached as a result of such discussions shall be filed with the Board in accordance with section 412 of the Act and approved by the Board prior to being placed into effect; and

5. This order shall be served upon all U.S. air carriers.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

REPUBLIC NATIONAL BANK OF DALLAS

Approval of Applicant as Trustee

Notice is hereby given that Republic National Bank of Dallas, whose mailing address is P.O. Box 2964, Dallas, Tex., has been approved as Trustee pursuant to Pub. L. 89-346 and 46 CFR 221.21-221.30.

[1] American has unrestricted authority in the Cleveland-San Diego market.

[2] United was also directed to submit revised exhibits in support of its Subpart N applications in Dockets 30167 (Pittsburgh-Denver) and 30291 (Columbus/Dayton-Denver). This order pertains only to United's application in Docket 30236.

[3] We will grant the motions of United and American.

[1] Alaska Airlines, Inc., Allegheny Airlines, Inc., American Airlines, Inc., Braniff Airways, Inc., Continental Air Lines, Inc., Frontier Airlines, Inc., National Airlines, Inc., Northwest Airlines, Inc., Ozark Air Lines, Inc., Piedmont Aviation, Inc., Southern Airways, Inc., Texas International Airlines, Inc., Trans World Airlines, Inc., United Air Lines, Inc., Western Air Lines, Inc., and Wien Air Alaska, Inc.

[2] The FAA also issued an Advisory Circular, AC No. 120-32, dated March 25, 1977, predicated on the comments and hearings conducted in FAA Docket No. 12881. The circular suggests additional measures which may assist air carriers in the safe transportation of handicapped persons. The carriers also request authority to discuss the circular to facilitate uniformity in the adoption of the suggestions contained in the circular.

[3] If the air carriers so desire, they may appoint a secretary to represent them for the purposes of preparing meeting notices, agendas, minutes of meetings, and the filing of agreements.

V 42 162 AUG 22 77 UM

Dated: August 17, 1977.

By order of the Assistant Secretary of Commerce for Maritime Affairs.

JAMES S. DAWSON, Jr.,
Secretary.

CONSTRUCTION OF ONE SELF-PROPELLED ROLL-ON/ROLL-OFF BARGE VESSEL MA DESIGN C2-MTR-125a FOR CUMBERLAND SHIPPING CO., INC.

Computation of Foreign Cost

Notice is hereby given of the intent of the Maritime Subsidy Board pursuant to the provisions of Section 501(a) of the Merchant Marine Act, 1936, as amended, to compute the estimated foreign cost of the construction of one self-propelled, roll-on/roll-off barge vessel, MA Design C2-MTR-125a, for Cumberland Shipping Co., Inc.

Any person, firm or corporation having any interest (within the meaning of Section 501(a)) in such computations may file written statements by the close of business on September 15, 1977, with the Secretary, Maritime Subsidy Board, Maritime Administration, Room 3099B, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20230.

Dated: August 17, 1977.

By Order of the Maritime Subsidy Board, Martime Administration.

JAMES S. DAWSON, Jr.,
Secretary.

[FR Doc.77-24261 Filed 8-19-77;8:45 am]

[Docket No. S-568]

EQUITY CARRIERS, INC.

Application

Notice is hereby given that Equity Carriers, Inc., 227 Park Avenue, New York, New York 10017, has filed an application with the Maritime Subsidy Board (Board) pusuant to Title VI (46 U.S.C. 1171-1183) of the Merchant Marine Act, 1936, as amended (the Act), dated August 9, 1977, for a long-term Operating Differential Subsidy Agreement to aid in the operation of five new dry cargo bulk carrier type vessels of approximately 37,000 deadweight tons, in the world-wide carriage of dry bulk cargoes, excluding cargo subject to the presently existing cargo preference statutes of the United States, including, but not limited to, 10 U.S.C. § 2631, 46 U.S.C. § 1241 and 15 U.S.C. § 616a, unless the agencies administering such statutes determine that the cargoes involved would be otherwise waived to, or allocated for, foreign flag carriage. This application supersedes an earlier application by Falcon Cargo Ships, Inc.

Any person having an interest in the granting of the application and who would contest a finding of the Board that the service now provided by vessels of U.S. registry for the world-wide carriage of dry bulk cargoes in the foreign oceanborne commerce of the United States is inadequate, must on or before September 6, 1977, notify the Board's Secretary, in writing, of his interest and of his position, and file a petition for leave to intervene in accordance with the Board's rules of practice and procedure (46 C.F.R. Part 201). Each statement of interest and petition to intervene shall state whether a hearing is requested under section 605(c) of the Act and, with as much specificity as possible, the facts that the intervenor would undertake to prove at such a hearing.

In the event a hearing under section 605(c) of the Act is ordered to be held with respect to the subject application, the purpose of such hearing will be to receive evidence relevant to whether the service already provided by vessels of U.S. registry for world-wide movement of dry bulk cargoes in the foreign oceanborne commerce of the United States is inadequate, and whether in the accomplishment of the purposes and policy of the Act, additional vessels should be operated thereon.

If no request for a hearing and petition for leave to intervene is received within the specified time, or if the Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Board will take such action as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS).)

So ordered by the Maritime Subsidy Board, Maritime Administration.

Dated: August 17, 1977.

JAMES S. DAWSON, Jr.,
Secretary.

National Bureau of Standards

I/O CHANNEL INTERFACE

Proposed Federal Information Processing Standard

Under the provisions of Public Law 89-306 and Executive Order 11717, the Secretary of Commerce is authorized to establish uniform Federal Automatic Data Processing (ADP) Standards. The proposed standard for I/O Channel Interface is being recommended for Federal use. This proposed standard is a revision of the proposal orighnally published in the Federal Register of December 30, 1976 (41 FR 56877), and takes into account comments received from the public and private sectors based on the earlier notice. Significant changes have been made in this revision to more explicitly reflect the Government's intent to promote the competitive consideration by Federal agencies of alternative sources of supply of I/O peripheral subsystems. These changes are reflected in the expansion of the Explanation and Applicability sections, deletion of the Exception section, and revision of the Implementation and Waivers sections.

Prior to the submission of this proposal to the Secretary of Commerce for approval as a Federal standard, it is essential to assure that proper consideration is given to the needs and views of the public, state and local governments, and manufacturers. In view of the changes outlined above, it is considered appropriate once again to solicit such views.

This proposed standard is the first of a family of I/O interface standards. NBS has also proposed adoption of an accompanying channel level power control interface standard in the FEDERAL REGISTER of March 4, 1977 (42 FR 12452) and subsequent correction of March 25, 1977 (42 FR 16169). NBS intends to propose the adoption of at least one operational specification standard, also to accompany this proposed I/O channel interface standard, in fiscal year 1978.

The technical specifications contained in this proposed standard were developed under the auspices of the American National Standards Institute, Technical Subcommittee X3T9, and have been published in ANSI document number X3T9/600, Rev. 2, "Draft Proposed American National Standard Specifications for I/O Channel Interface."

The proposed Federal Information Processing Standard contains two basic sections: (1) An announcement section which provides information concerning the applicability and implementation of the standard and (2) a specification section which defines the technical parameters of the standard. Only the announcement section is provided in this notice.

Interested parties may obtain copies of the specification section from and submit their comments to the Associate Director for ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234. Comments to be considered must be received on or before October 21, 1977.

Dated: August 17, 1977.

ERNEST AMBLER,
Acting Director.

FEDERAL INFORMATION PROCESSING STANDARDS PUBLICATION ------

(Date)

ANNOUNCING THE STANDARD FOR I/O CHANNEL INTERFACE

Federal Information Processing Standards Publications are issued by the National Bureau of Standards pursuant to the Federal Property and Administrative Services Act of 1949, as amended, Public Law 89-306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 Code of Federal Regulations (CFR).

Name of Standard. I/O Channel Interface (FIPS PUB ------).

Category of Standard. Hardware Standard, Interface.

Explanation. This standard is one of a family that defines the functional, electrical, and mechanical interface specifications for attaching computer peripheral devices through their control units to the ADP system. This standard does not include definitions of other interface parameters, such as power control and operational specifications, that may be needed to achieve full plug-to-plug interchangeability at the I/O channel interface level; these other specifications as well as standards for other interfaces are presently being developed and will be considered for future adoption as Federal Information Processing Standards.

The Government's intent in employing this I/O Channel Interface standard is to minimize the cost of satisfying its data processing requirements through increasing its available alternative sources of supply for I/O peripheral subsystems, both at the time of initial system acquisition and when a system is modified through augmentation or replacement of I/O perpheral subsystems.

In the acquisition of ADP systems and components, Federal agencies shall cite this standard to specify the interface for attaching I/O peripheral subsystems as a part of ADP systems.

Approving Authority. Secretary of Commerce.

Maintenance Agency. Department of Commerce, National Bureau of Standards (Institute for Computer Sciences and Technology).

Cross Index. American National Standards Institute document X3T9/600, Rev. 2, Draft Proposed American National Standard Specifications for I/O Channel Interface.

Applicability. This Federal Information Processing Standard for the I/O Channel Interface is applicable to the acquisition of all Automatic Data Processing (ADP) systems by the Federal Government except those minicomputer, microcomputer and other small scale systems which are specifically excluded by the National Bureau of Standards (NBS). A list of such excluded systems will be developed and maintained by NBS and will be periodically distributed to all Federal agencies and be publicly available upon request.

Specifically, this standard is applicable to:

(1) *New Systems or Replacement of Systems.* Whenever a new or replacement ADP system is acquired by the Government the system shall support, at a minimum, one interface conforming to this standard for the connection of I/O peripheral subsystems. The required number of such interfaces may be increased up to a maximum of four for each system acquisition. All such interfaces shall be specified as separate mandatory options, the cost of which will be considered in the evaluation conducted as a part of the system or system component selection process.

Verification of the operation of these interfaces in conformance with this standard, through demonstration or other means acceptable to the Government, shall be provided prior to the Government's commitment to acquire the system.

In selecting from among acquisition alternatives so as to satisfy the Government's data processing requirements at least cost, the Government may initially acquire a system that does not include any interfaces conforming to this standard, providing that the Government obtains contractual assurance that the required number of interfaces conforming to this standard can and will be supplied at any time during the designated life of the system at specified cost to the Government.

(2) *Modification of Systems.* Whenever an ADP system that was acquired on or after the effective date of this standard is being modified through addition or replacement of I/O peripheral subsystems, acquisition alternatives that comply with this standard shall be considered competitively with other alternatives, so as to meet the Government's data processing requirements at least cost. Acquisition alternatives considered shall include those available through exercising the contractual options for interfaces conforming to this standard which were established at the time of initial system acquisition.

Specifications. This standard incorporates by reference the technical specifications of ANSI document X3T9 600, Rev. 2, affixed.

Implementation. The provisions of this standard are effective ninety days after date of publication. All applicable equipment ordered on or after the effective date, or for which formal procurement action has not already been initiated by that date, must conform to the provisions of this standard unless a waiver has been granted in accordance with the procedure described elsewhere in this publication.

Regulations concerning the specific use of this standard in Federal procurements will be issued by the General Services Administration to be a part of the Federal Property Management Regulations.

This standard shall be subject to review by NBS within five years after its effective date, taking into account technological trends and other factors, to determine whether the standard should be reaffirmed, revised, or withdrawn.

Waivers. Heads of agencies are permitted to waive the requirements stated in this publication. However, such waivers shall be coordinated in advance with NBS. These should be addressed to the Associate Director for ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234. They should describe the nature of the waiver and set forth the reasons therefor. The supporting documentation should include:

a. Factors considered by the head of the agency in authorizing the waiver.

b. Detailed technical specifications of the hardware and software components for which the waiver is required.

c. Possible recommendations for improvement or additional development of computer peripheral interface standards.

Thirty days should be allowed for review and response by NBS. However, the final decision for approving the waiver is the responsibility of the agency head.

Where to Obtain Copies. Copies of this publication are for sale by the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161. When ordering, refer to Federal Information Processing Standards Publication ------ (NBSFIPSPUB------), title, and Accession Number. When microfiche is desired, this should be specified. Payment may be made by check, money order, or deposit account.

National Oceanic and Atmospheric Administration

COD FISHING

Closing of the Commercial Directed Fishery For Cod in Areas Other Than the Gulf of Maine

Notice is hereby given pursuant to 50 CFR 651.8(a)(2) that the Director, National Marine Fisheries Service, has determined that United States vessels fishing in areas other than the Gulf of Maine have reached the accumulative and estimated prospective 20,000 metric ton commercial quota of Cod for 1977. The quota is described in § 651.3 of the FEDERAL REGISTER published on June 10, 1977, page 29877.

This 20,000 metric ton quota was originally assigned solely to United States vessels. However, the United States-Canadian Reciprocal Fisheries Agreement, signed into law by the President on July 26, 1977, allocated 3,350 metric tons of this quota to Canadian fishing vessels. Accordingly, the United States quota was reduced by this Act to 16,650 metric tons. Canada announced closure of its directed cod fishery in this area as well as within its own waters on August 9. Canada harvested 2,430 metric tons of its 3,350 metric ton quota in our zone, reserving the remaining 920 metric tons for by-catch.

I hereby announce that the season for taking the commercial catch of Cod in areas other than the Gulf of Maine in a directed fishery by persons and vessels subject to the jurisdiction of the United States will terminate on August 22, 1977, this restriction will remain in effect until 0001 hours, local time, January 1, 1978.

During such time as the directed fishery is closed no person or vessel in the commercial fishery shall land more than 5,510 pounds (2.5 metric tons) or 10 percent by weight of all other fish on board, per trip, whichever is greater of Cod taken in areas other than the Gulf of Maine.

Issued at Washington, D.C., and dated August 16, 1977.

JOSEPH W. SLAVIN,
Acting Associate Director,
National Marine Fisheries Service.

USAF SCIENTIFIC ADVISORY BOARD

Meeting

AUGUST 10, 1977.

The USAF Scientific Advisory Board Aeromedical-Biosciences Panel will hold a meeting on September 27, 1977 from 8:30 a.m. to 4:30 p.m. at Aerospace Medical Division, Brooks AFB, TX.

The Panel will review the USAF plans to monitor and modify, where possible, the risk factors identified with heart attacks.

The meeting will be open to the public.

For further information, contact the Scientific Advisory Board Secretariat at 202-697-4648.

FRANKIE S. ESTEP,
Air Force Federal Register,
Liaison Officer, Directorate of Administration.

NEBRASKA

Intent to Disapprove the State Plan for the Certification of Pesticide Applicators

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136 et seq.) and the implementing regulations of 40 CFR Part 171, require each State desiring to certify pesticide applicators to submit a plan to the U.S. Environmental Protection Agency (EPA) for its certification program. On June 28, 1977, the Honorable J. James Exon, Governor of the State of Nebraska, submitted a State Plan for the Certification of Pesticide Applicators of Restricted Use Pesticides to the Environmental Protection Agency for approval. On July 29, 1977, Charles V. Wright, then Acting EPA Regional Administrator, informed Governor Exon of his intent to disapprove the Nebraska State Plan on the basis that the State does not have adequate statutory and regulatory authority as required by Section 4(a) of FIFRA, as amended, and 40 CFR 171.7.

The entire plan, together with all attached appendices and related documents (except for sample examinations), may be examined during normal business hours at the following locations:

Nebraska Department of Agriculture, 301 Centennial Mall South, 4th Floor, Lincoln, Nebraska 68509.

EPA—Region VII, Pesticides Branch, Air and Hazardous Materials Division, Room 110, 1735 Baltimore, Kansas City, Missouri 64108.

EPA—Office of Pesticide Programs, Operations Division, Regional Support Branch, Room 2709, Waterside Mall, 401 M Street SW., Washington, D.C. 20460.

The Acting Regional Administrator's letter of July 29, 1977, to Governor Exon stated in part:

There are many legal deficiencies in the plan. This letter does not contain an exhaustive listing of all elements which must be complied with before it can be approved. The following are the more significant requirements which must be met:

1. Section 4(a)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, requires that a State plan for certification of pesticide applicators contain satisfactory assurances that the State agency designated by the Governor for administration of the pesticide program, "has or will have the legal authority * * * to carry out the plan." The minimum legal authorities so required are specified at 40 CFR 171.7(b)(1)(iii), and are addressed individually in the following comments:

a. Title 40 CFR 171.7(b)(1)(iii)(A) requires that the plan indicate by citation to specific laws and/or regulations, whether enacted and promulgated or pending, the

"Provisions for and listing of the acts which constitute grounds for denying, suspending, and revoking certification of applicators, and for assessing criminal and/or civil penalties. Such grounds should include, at a minimum, misuse of a pesticide and falsification of any records required to be maintained by the certified applicator."

The State has no expressed statutory or regulatory authority to deny a certification on the grounds of pesticide misuse and falsification of records, or, as the plan itself indicates on page 6, to suspend or revoke certification under any conditions.

b. Title 40 CFR 171.7(b)(1)(iii)(D) requires the State to have legal

"Provisions making it unlawful for persons other than certified applicators or persons working under their direct supervision to use restricted use pesticides".

As the plan indicates on page 7, the Nebraska statutes contain no specific prohibition against the use of restricted use pesticides by noncertified applicators.

c. Title 40 CFR 171.7(b)(1)(iii)(E) requires the State to have legal

"Provisions requiring certified commercial applicators to keep and maintain for the period of at least two years routine operational records containing information on kinds, amounts, uses, dates, and places of application of restricted use pesticides; and for ensuring that such records will be available to appropriate State officials".

As the Nebraska State Plan indicates on page 7, no such legal authority exists.

2. Section 4(a)(2)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, requires "that the State agency will make such reports to the Administrator in such form and containing such information as the Administrator may from time to time require." Title 40 CFR 171.7(d)(1) and (2) itemize the minimum acceptable data the reports must contain.

The plan indicates on page 10 that under existing legislation there are no provisions requiring or authorizing reports from the lead agency or the cooperating agencies to the Administrator of the Environmental Protection Agency.

3. Section 4(a)(2)(E) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, requires the State Plan to "contain satisfactory assurances that State standards for the certification of applicators of pesticides conform with standards prescribed by the Administrator." The standards are set forth in Title 40 CFR 171.1—171.6.

As stated in the "Opinion of the Department Legal Counsel," page 4 of the Nebraska State Plan, and in Section 2-2615 of the Nebraska Statute, a private applicator shall not be required "to attend any training session or to take any examination to establish competency in the use of any pesticide. If such private applicator has not received any prior instruction, he shall at the time of purchasing any restricted use pesticide complete a certificate stating that he is knowledgeable in the use and application of such pesticide." This method of determining competency does not meet the federal standards stated in the previous paragraph.

On August 5, 1977, Governor Exon requested a hearing to review the basis of this proposed disapproval in accordance with Section 4(b) of FIFRA, as amended. Notice is hereby given of the intent of the Regional Administrator, EPA Region VII, to disapprove this plan and to hold a public hearing in accordance with Governor Exon's request. The hearing will be held in the West Ballroom of the Radisson Cornhusker Hotel, 301 South 13th Street, Lincoln, Nebraska 68508, on September 27, 1977, at 9 a.m. Although the hearing will be transcribed, it is for the gathering of public information only and not adversary in nature. No witnesses will be sworn or cross-examined.

All interested persons are invited to attend and testify, or to submit written comments on the Regional Administrator's intent to disapprove the Nebraska State Plan to the Chief, Pesticides Branch, Region VII, U.S. Environmental Protection Agency, 1735 Baltimore, Kansas City, Missouri 64108. The comment period will remain open until seven (7) days after date of the hearing. All written comments filed pursuant to this notice will be available for public inspection at the above-mentioned EPA Region VII location between 8:30 a.m. and 3:30 p.m., Monday through Friday.

CHARLES V. WRIGHT,
Acting Regional Administrator, Environmental Protection Agency, Region VII.

FEDERAL MARITIME COMMISSION

[License No. 1289]

BRIE INTERNATIONAL

Order of Revocation

By letter dated July 15, 1977, Mrs. Betty R. Irby, Brie International, P.O. Box 19735 AMF, Columbus, OH 43219 was advised by the Federal Maritime

Commission that Independent Ocean Freight Forwarder License No. 1289 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before August 14, 1977.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

Brie International has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised) Section 5.01 (c) dated June 30, 1975;

It is ordered, That Independent Ocean Freight Forwarder License No. 1289 issued to Brie International be returned to the Commission for cancellation.

It is further ordered, That Independent Ocean Freight Forwarder License No. 1289 be and is hereby revoked effective August 14, 1977.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Brie International.

LEROY F. FULLER,
Director, Bureau of Certification and Licensing.

COMPAGNIE GENERALE MARITIME AND NAVALE ET COMMERCIALE HAVRAISE PENINSULAIRE

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 12, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Mr. Charles DiMaria, French Line, Compagnie Generale, Maritime, 25 Broadway, New York, N.Y. 10004.

Agreement No. 10308, between Compagnie Generale Maritime and Navale Et Commerciale Havraise Peninsulaire, covers the establishment of a ratemaking arrangement in conjunction with a rationalization of sailing by the parties in the trade, eastbound and westbound, between United States Atlantic and Gulf ports and ports in the Red Sea, Gulf of Aden and Arabian/Persian Gulf, excluding Karachi. The arrangement is to expire December 31, 1982, unless sooner terminated by written notice given by one party to the other.

By Order of the Federal Maritime Commission.

Dated: August 17, 1977.

JOSEPH C. POLKING,
Acting Secretary.

[Docket Nos. G-15791 and CI77-367]

SUN OIL CO.

Application for Abandonment Authorization [1]

AUGUST 15, 1977.

Take notice that the Applicant listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said applications should on or before August 23, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time herein, if the Commission on its own review of the matter finds that an abandonment is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be necessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. CS77-644, et al.]

Applications for "Small Producer" Certificates [1]

AUGUST 15, 1977.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

None.

Board of Governors of the Federal Reserve System, August 15, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-24178 Filed 8-19-77;8:45 am]

MANCHESTER FINANCIAL CORP.

Order Approving Acquisition of Bank

Manchester Financial Corp., St. Louis, Missouri, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3) to acquire all of the voting shares, less directors' qualifying shares, of Manchester Bank West County, Maryland Heights, Missouri ("Bank"), a proposed de novo bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received including those of the Plaza Bank of West Port, St. Louis, Missouri ("Plaza Bank"), and of the Missouri Association of Community Organizations for Reform Now, in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant controls two banks with total deposits of $140.9 million, representing approximately 0.7 percent of the total deposits in commercial banks in Missouri.[1] Since the application involves the acquisition of a proposed de novo bank, consummation of the proposal would not immediately increase Applicant's share of commercial bank deposits in Missouri.

[1] All deposit data are as of December 31, 1976.

V 42 162 AUG 22 77 UM

Bank is to be located in the St. Louis banking market,[2] the same market in which Applicant's two existing subsidiary banks are located. Applicant is the thirteenth largest banking organization in the St. Louis banking market, with 1.7 percent of total deposits in commercial banks in the market. Applicant's share in this banking market would not change initially as a result of approval. The proposed site of Bank is Maryland Heights, a suburban area in west St. Louis County, with the closest banking office of any subsidiary of Applicant[3] located approximately 17 miles southeast of Bank. The expected primary service area ("PSA") of Bank does not include any portion of the PSA's of Applicant's subsidiary banks, although the subsidiaries currently do derive some business from Bank's expected PSA. One other bank, Plaza Bank ($38.2 million in deposits), is located in Bank's PSA and seven other banks (none of them subsidiaries of Applicant) are located within six miles of Bank. Since Bank is a de novo bank, there will be no elimination of existing or potential competition. There would appear to be, therefore, no adverse competitive effects that would derive from consummation of this proposal.

The financial and managerial resources and future prospects of Applicant and its subsidiary banks are regarded as satisfactory. Bank, as a proposed de novo bank, has no financial or operating history; however, its prospects as a subsidiary of Applicant appear favorable.

Establishment of Bank would provide an additional source of banking service to the community. Bank would offer a full range of banking services, including data processing, commercial and consumer loans, construction and real estate loans, and savings plans. Bank will have access to Applicant's financial and managerial resources and the capability of selling loan participations in excess of $1,000,000 to Applicant's subsidiary banks, thereby meeting the larger credit needs of the community.

The Board has received comments in opposition to the proposal that relate to convenience and needs factors. Plaza Bank, the only other commercial bank located in Bank's projected primary service area, suggests that the growth of the proposed service area has leveled off since 1970 and that, therefore, the area cannot support a de novo bank at the present time. In support of this, Plaza Bank submitted economic statistics that forecast slower rates of growth for the proposed service area of the new bank by 1980.

Bank will be located in the St. Louis County portion of the St. Louis banking market. This area has been one of the fastest growing counties in the St. Louis Standard Metropolitan Statistical Area ("SMSA"). During the 1960–70 decade, the population of St. Louis County increased 35.3 percent relative to an increase of 11.2 percent for the St. Louis SMSA and 8.0 percent for the State.[4]

For the period 1970–75, the population of St. Louis County increased approximately 3.9 percent relative to a 1.8 percent increase for the population of the State. St. Louis County is projected to grow an additional 3.8 percent in population by 1980.

The population growth of the proposed PSA of Bank exceeded that of St. Louis County from 1960 to 1975. For example, population for the PSA increased 168.3 percent (12,300 to 33,000) from 1960 to 1970 and an additional 30.3 percent (33,000 to 43,000) from 1970 to 1975. As Plaza Bank suggests, it may be difficult for this area to maintain this high rate of population growth in future years; however, there is nothing in the record to indicate that this area will not continue to experience growth or that the area is unable to support a new bank.

Bank will be located in a new shopping center, one mile west of the largest industrial district in northwest St. Louis County. It is estimated that there are approximately 1,100 firms in the PSA, employing 17,000 persons. In addition, a multifaceted business, retail, and entertainment complex lies within the PSA. There are no local conditions apparent at this time that would adversely affect the future of Bank.

From 1970 to 1976, total deposits increased 78.1 percent for the banks in St. Louis County relative to 56.5 percent deposit growth for all the banks in the SMSA and 66.6 percent for the State. In addition, Plaza Bank moved to its present location in April, 1975, presumably finding that relocation, which is near the site of Bank and within Bank's PSA, to be responsive to a need for banking services in that area. From June, 1975 to December, 1976 in this new location, Plaza Bank's deposit base increased substantially and at a greater rate than the aggregate deposit growth of all banks in St. Louis County. In the Board's view, this area can support an additional bank and the Board, therefore, agrees with the Missouri Commissioner of Banking that the formation of a new bank in this area would significantly enhance the convenience and serve the needs of the community.

The Board has received the views of the Missouri Association of Community Organizations for Reform Now ("ACORN") relating to the convenience and needs of the communities to be served. ACORN asserts that Applicant's larger subsidiary bank, Manchester Bank of St. Louis, St. Louis, Missouri ("Manchester Bank", total deposits of $126.6 million) follows a practice of disinvestment in the city of St. Louis. Specifically, ACORN alleges that in 1975, the Manchester Bank made only 11 mortgage loans in the entire City of St. Louis, totalling $78,000 or 7.6 percent of the total mortgage dollars lent by Manchester Bank, while "three wealthy suburbs received $539,000 in mortgage loans or 52.8 percent of the 1975 total."

ACORN further alleges that during the period from January to June, 1976, Manchester Bank made 20 home mortgage loans totalling $889,000, only four of which were made in the city, totalling $51,000, or less than 6 per cent of the total. From July to December of 1976, $851,100 in mortgage loans were made by Manchester Bank, nine of which (comprising 13 per cent of the total dollars) were made within the city, according to ACORN. Yet, during the year only two mortgage loans totalling $10,500 were made in "the Manchester Tower Grove area" in which Manchester Bank is located, according to ACORN.

Finally, ACORN asserts that from July to December of 1976, Manchester Bank made 100 home improvement loans totalling $216,433 and that only two of these loans—totalling $8,976—were made in the Bank's immediate area. ACORN urges the Board to consider the alleged community disinvestment practices of Manchester Bank in its decision on this application.

Applicant has responded to ACORN's assertions by citing Manchester Bank's "extensive involvement in recent years in efforts to redevelop areas of the City of St. Louis, including the area immediately surrounding the Bank * * *."

In evaluating ACORN's comments, it is significant that it relates to only one type of banking service. An examination of one service alone does not produce an accurate view of a bank's overall ability to meet the convenience and needs of its community. ACORN focuses primarily upon the origination of residential real estate loans, and ignores the many other types of services and loans offered by Manchester Bank. As of December 31, 1976, 11.5 per cent ($7.7 million) and 1.0 per cent ($0.7 million) of Manchester Bank's total loan portfolio were loans secured by mortgages on 1–4 family residential properties and home improvement loans, respectively. It appears from the record that Manchester Bank emphasizes loans to businesses, that is, commercial real estate loans ($8.7 million, 12.9 per cent of total loans) and commercial and industrial loans ($36.8 million, 54.5 per cent of total loans) over residential mortgage loans. The balance of Manchester Bank's loans are in the consumer area (approximately $13.6 million, 20.1 per cent). As the Board has indicated on previous occasions, commercial banks are multiproduct firms that offer a broad range of services to the community. As the Board has previously stated:

"Bank managements should and do have a range of discretion as to the types of loans they will make and the degree of risk they will assume." AS&T may reasonably choose to minimize or to emphasize a particular type of lending, and it would not be appropriate to assess AS&T's performance in satisfying the convenience and needs of the community by focusing on only two of the many services it offers.[5]

To evaluate a bank's performance with respect to serving the convenience and needs of the community solely on the basis of only one of the services a bank may offer overlooks entirely the interests of the many other customers a bank may serve through a broad range of services denominated as "commercial banking." For instance, it appears that Manchester Bank has invested more funds in redevelopment bonds than its total mortgage lending volume during the July to December 1976 period cited by ACORN. These bonds, issued by the Planned Industrial Expansion Authority of the City of St. Louis, Missouri, are earmarked for commercial development in the very area as to which ACORN has alleged disinvestment. Instead of this focus on a limited area, the Board looks to the aggregate of all the commercial banking services provided by a bank in evaluating what weight should be accorded the convenience and needs considerations in connection with a particular application.

In this case, the data submitted to the Board by ACORN, when considered in the context of Manchester Bank's aggregate investment and loan portfolio and the variety of other services offered by that institution, do not, in the Board's judgment, establish probable cause to believe that Manchester Bank has failed to serve the needs of the community in which it operates, nor that Bank, as a subsidiary of Applicant, will not be in a position to serve the convenience and needs of the community in which it will be operating.

Finally, Plaza Bank has argued here that the method of Bank's incorporation represents a violation of a provision of Missouri State law[6] that should prevent the Board from approving the proposal. Plaza's argument rests on two premises: (1) That the Board is required to consider issues of State law such as that presented by this proposal in deciding whether to approve or deny the subject application; and (2) that the chartering of Bank was invalid under § 362.015 of the Statutes of Missouri.[7]

[2] The St. Louis banking market includes all of the city of St. Louis and St. Louis County, portions of St. Charles and Jefferson Counties in Missouri, and portions of Madison and St. Claire Counties in Illinois.

[3] The National Bank of Affton, Affton, Missouri.

[4] All population data are from the Bureau of the Census. Population projections are from the St. Louis Chapter, American Statistical Association.

[5] Board's Order of February 19, 1976 approving the application of American Security Corporation, to acquire the successor by merger to American Security and Trust Company, both of Washington, D.C., 62 Fed. Res. Bull. 255, 258 (1976), citing the Board's Order of November 19, 1975, approving the acquisition and merger applications of Marine Midland Bank, Inc., Buffalo, New York, 61 Fed. Res. Bull. 890, 893 (1975).

[6] MO. ANN. STAT. § 362.015 (Vernon 1968).

[7] Section 362.015 of the Statutes of Missouri (MO. ANN. STAT. § 362.015 (Vernon 1968)) provides that "any five or more persons who shall have associated themselves by articles of agreement in writing, as provided by law, for the purpose of establishing a bank or trust company may be incorporated under any name or title designating such business." This provision has been interpreted by Missouri State courts as prohibiting a corporation from acting as the principal named incorporator of a bank. *Mark Twain Cape Girardeau Bank v. State Banking Board*, 528 S.W. 2d 443 (MO. App. 1975); *Mark Twain Bancshares, Inc., v. Kostman*, 541 S.W. 2d (MO. App. 1975). Plaza Bank contends that the five individual incorporators of Bank (who presently serve in the capacity of officers and/or directors in Applicant and/or Applicant's subsidiary banks) are not "persons" within the meaning of § 362.015 because, Plaza Bank argues, the individuals are acting in the capacity of agents of Applicant and a corporation should not be able to do indirectly what it is prohibited from doing directly.

[8] 379 U.S. 411 (1965).

[9] Id. at 419.

[10] See Intermountain Bankshares Co., 61 Fed. Res. Bull. 442 (1975) (West Virginia statute arguably prohibiting the formation of bank holding companies in the State); Northwest Bancorporation, 38 FR 21530 (1973) (Iowa statute restricting acquisition of Iowa Bank by out-of-state bank holding companies); and Valley View Bancshares, Inc., 61 Fed. Res. Bull. 676 (1975) (Kansas statute prohibiting formation of multi-bank holding companies).

Pursuant to the Supreme Court's holding in Whitney National Bank of Jefferson Parish v. Bank of New Orleans and Trust Company,[8] the Board may "not approve a holding company arrangement involving the organization and opening of a new bank if the opening of the bank, by reason of its ownership by a bank holding company, would be prohibited by a valid state law."[9]

The Whitney case involved a bank holding company acquisition of a new bank that, the plaintiff contended, would in actuality function as a branch bank in a State in which branch banking was prohibited by State law. Thus, it was asserted, Board approval of an application to acquire such a bank would have enabled the bank holding company to enter into a de facto branch banking arrangement that was prohibited by State law and, in effect, would have constituted Board approval of unlawful conduct. Since the holding in Whitney, the Board has resolved issues of State law where they directly pertain to the question of whether the acquisition of a bank by a bank holding company would result in a violation of State law.[10] In the facts prsented by the instant application, however, the violation, if any, of Missouri law occurred upon the issuance of the charter for Bank by the Missouri Commissioner of Finance. Approval of the instant application would constitute an approval of Applicant's acquisition of shares of Bank, not approval of the chartering of Bank. Thus, the Board, by approving the instant application, would not approve assertedly unlawful conduct.

The Board has never presumed to review the incorporation or chartering procedures defined by State statutes and administered by State banking officials. Instead, the Board merely requires evidence of the issuance of the necessary charter or its conditional or preliminary approval and solicits the comments of the appropriate banking authority.[11] Here, Bank's charter has been granted by the Missouri Finance Commissioner and, absent a judicial determination to the contrary, the Board presumes that the charter was granted lawfully. Since the effectiveness of the chartering action has not been stayed, the pending litigation in the Missouri State courts does not act as a bar to the Board's action on this application.[12]

Based on the foregoing and the facts of record, the Board concludes that there would be no adverse competitive effects resulting from consummation of the proposal and that considerations relating to banking factors and convenience and needs of the community to be served are consistent with approval of the application. It is the Board's judgment that the proposed acquisition is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, and (c) Manchester Bank of West County, Maryland Heights, Missouri, shall be opened for business not later than 6 months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of St. Louis, pursuant to delegated authority.

By order of the Board of Governors,[13] effective August 15, 1977.

ROBERT E. MATTHEWS,
Assistance Secretary of the Board.

[FR Doc.77-24176 Filed 8-19-77;8:45 am]

[11] The Board's practice of not examining the validity of State banking charters is consistent with Missouri State law which provides that the exclusive proceeding by which competing banks may challenge a bank charter is by appealing the issuance of that charter in State court, pursuant to §§ 361.094 and 361.095, Missouri Statutes.

[12] Plaza Bank has challenged the charter in several State Administrative and judicial actions, some of which are still pending; however, to date the Bank's charter has not been stayed. The Board's approval, of course, does not preclude Plaza Bank from continuing to pursue its remedies in the Missouri State courts.

[13] Voting for this action: Governors Wallich, Coldwell, Jackson, Partee and Lilly. Absent and not voting: Chairman Burns and Governor Gardner.

ROYAL TRUSTCO LIMITED

Formation of Bank Holding Company

Royal Trustco Limited, Ottawa, Ontario, Canada, has applied for the Board's approval under § 3(a)(1) of the

V 42162 AUG 22 77 UM V

Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company through acquisition of all the voting shares of Royal Trust Bank Corp., Miami, Florida, a bank holding company. The factors that are considered in acting on the application are set forth in §3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than September 12, 1977.

Board of Governors of the Federal Reserve System, August 15, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following request for clearance of reports intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on August 16, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed CFTC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before September 9, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street, NW.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

COMMODITY FUTURES TRADING COMMISSION

The CFTC requests clearance of two new voluntary single-time questionnaires: one to be sent to all commodity trading advisors registered with the Commission, Form CTA-Q-1; and the other to be sent to all registered commodity pool operators; Form CPO-Q-1. The questionnaires are intended to aid the CFTC in obtaining more information about these registrants, particularly their operating policies and relationships with clients, subscribers and participants. The replies will prove helpful to the Commission in carrying out its rulemaking authority in these areas. Among other things, the Commission hopes to be able to assess from the replies the additional workload that may be imposed upon commodity trading advisors and pool operators by the regulations which the Commission proposed on February 15, 1977 (42 FR 9266 and 9278).

CFTC estimates the questionnaires will be mailed to the approximately 850 commodity trading advisors and 500 commodity pool operators currently registered with the Commission. CFTC believes that most of the information requested will be readily available to the respondents from their normal management reports and records and that reporting burden will average 8 hours per response.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

[Federal Property Management Regs.; Temporary Reg. F-437]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent in conjunction with the Administrator of General Services the interests of the executive agencies of the Federal Government in a telecommunications rate proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Alaska Public Utilities Commission involving the application of RCA Alaska Communications, Inc. for interim and permanent increases in its rates and charges for telecommunications service. The authority delegated to the Secretary of Defense shall be exercised concurrently with the Administrator of General Services.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

Dated August 8, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

Meeting

The Federal Council on the Aging was established by the 1973 amendments to the Older Americans Act of 1965 (Pub. L. 93-29) for the purpose of advising the President, the Secretary of Health, Education, and Welfare, the Commissioner on Aging, and the Congress on matters relating to the special needs of older Americans.

Notice is hereby given pursuant to Pub. L. 92-463 that the Federal Council on the Aging will meet on September 14, 15, and 16, 1977, Wednesday, Thursday, and Friday, from 9:30 a.m. to 5 p.m. each day in the Snow Room 5051, HEW-North Building, 330 Independence Ave. SW., Washington, D.C. 20201. The agenda will consist of: Position on Energy/Weather Crisis and the Elderly; Impact of President's Proposals for Welfare Reform; Review of FCA Study of Assets; Review of Background Paper on National Health Policy for the Elderly; Review of Evaluation of Federal Council on the Aging; Review of FCA Project on Frail Elderly; Status of Council Studies on Health Manpower and Minority Elderly; Position on Mandatory Retirement; FCA Policy on Endorsement of Activities of Non-Governmental Organizations and Prospective FCA Program Developments.

This meeting will be open for public observation.

Further information on the Council may be obtained from: Cleonice Tavani, Executive Director, Federal Council on the Aging, Washington, D.C. 20201. telephone: 202-245-0441.

Dated: August 16, 1977.

CLEONICE TAVANI,
Executive Director, Federal Council on the Aging.

Office of Education

NATIONAL ADVISORY COUNCIL ON VOCATIONAL EDUCATION

Meeting

AGENCY: National Avisory Council on Vocational Education.

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of forthcoming meetings of the National Advisory Council on Vocational Education. It also describes the functions of the Council. Notice of these meetings is required under the Federal Advisory Committee Act (5 U.S.C. Appendix 1, 10(a)(a)). This document is intended to notify the general public of their opportunity to attend.

DATES: Visitation by the Council and Staff to five selected sites of vocational-technical education in the Chicago area on September 22, 1977 from 8:30 a.m. to 5 p.m. Meeting of the National Advisory Council on Vocational Education on September 23, 1977 from 8:30 a.m. to 4 p.m.

ADDRESS: Hyatt Regency O'Hare, 9300 Bryn Mawr, Rosemont, Ill.

FOR FURTHER INFORMATION CONTACT:

Virginia Solt, NACVE Staff, 425 13th Street NW., Suite 412, Washington, D.C. 20004, 202-376-8873.

The National Advisory Council on Vocational Education is established under Section 104 of the Vocational Education Amendments of 1968, Pub. L. 90-576. The Council is directed to:

(A) Advise the Commissioner concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation of vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to the Congress; and

(C) Conduct independent evaluations of programs carried out under this title and publish and distribute the results thereof

The meeting on September 23, 1977 will be open to the public from 8:30 a.m. to 4 p.m. This meeting will be held at the Hyatt Regency O'Hare Hotel, Rosemont, Ill.

The proposed meeting of the National Advisory Council on Vocational Education on September 23, 1977 includes:

Reports of the Chairman and Executive Director.
Welcome to guests.
Approval of August Minutes
Review of Year-end Budget
Committee/Task Force Reports
Energy Report.
Budget Discussion.
Mechanism for Reviewing State Plans and Annual Evaluation Reports.
Planning for meeting at AVA Convention.

Records shall be kept of all Council proceedings and shall be available 14 days after the meeting for public inspection at the office of the National Advisory Council on Vocational Education, located at 425 13th Street NW., Suite 412, Washington, D.C. 20004.

Signed at Washington, D.C., on August 17, 1977.

REGINALD E. PETTY,
Executive Director, National Advisory Council on Vocational Education.

PINPOINT DISASTER ASSISTANCE

Claosing Closing for Receipt of Applications

Correction

In FR Doc. 77-23547 appearing at page 41327 in the issue for Tuesday, August 16, 1977 in the third column, second paragraph, 5th line, the word "• • • application • • •" should have read "• • • publication • • •".

Office of Human Development

RESEARCH AND DEMONSTRATIONS IN VOCATIONAL REHABILITATION

Extension of Deadline for Grant Application

The Rehabilitation Services Administration, Office of Human Development, announces that it is extending the due date for receipt of applications under its Rehabilitation Research and Demonstration Program. New and competing extension applications will now be accepted until September 15, 1977 for the following funding priority area: (1) Universe of Needs. Objective: To review current research efforts on conceptualization of disability based on functional limitations; categorize current efforts; identify approaches which have the greatest promise for assisting in the planning and delivery of vocational rehabilitation services; and prioritize gaps in research so that future efforts may address them.

Funding Priority: Priority will be given to those applications which address the above objective in terms of: Functional limitations: State of the Art Review (A-3). (A conference of investigators who are researching functional limitations will be organized as a part of the project effort.)

The program was originally announced in the FEDERAL REGISTER, Vol. 42, No. 93, 42 FR 24331, Friday, May 13, 1977, as Program Announcement Number 13627-772.

Application kits which contain the prescribed forms, the project description and information for the application may be obtained by making a request, containing the funding priority and number, to: Division of Grants and Contract Management, Office of Human Development, Room 1427, Mary E. Switzer Building, 330 "C" Street SW., Washington, D.C. 20201, Attention: (13627-772).

(Catalog of Federal Domestic Assistance Program Number: 13.627 Rehabilitation Research and Demonstration.)

Dated: August 15, 1977.

JOSEPH MOTTOLA,
Acting Commissioner of Rehabilitation Services.

Approved: August 16, 1977.

ARABELLA MARTINEZ,
Assistant Secretary for Human Development.

Office of the Secretary

COMMENTS ON COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

Pursuant to Section 406(g)(2)(B), General Education Provisions Act, notice is hereby given as follows:

The U.S. Office of Education, and the Office for Civil Rights have proposed col-

lections of information and data acquisition activities which will request information from educational agencies or institutions.

The purpose of publishing this notice in the FEDERAL REGISTER is to comply with paragraph (g)(2)(B) of the "Control of Paperwork" amendment which provides that each educational agency or institution subject to a request under the collection of information and data acquistion activity and their representative organizations shall have an opportunity, during a 30-day period before the transmittal of the request to the Director of the Office of Management and Budget, to comment to the Administrator of the National Center for Education Statistics on the collection of information and data acquisition activity.

These data acquisition activities are subject to review by the HEW Education Data Acquisition Council and the Office of Management and Budget.

Descriptions of the proposed collections of information and data acquisition activities follow below.

Written comments on the proposed activities are invited. Comments should refer to the specific sponsoring agency and form number and must be received on or before September 21, 1977, and should be addressed to Administrator, National Center for Education Statistics, Attention: Manager, Information Acquisition, Planning, and Utilization, Room 3001, 400 Maryland Avenue SW., Washington, D.C. 20202.

Further information may be obtained from Elizabeth M. Proctor of the National Center for Education Statistics, 202-245-1022.

Dated: August 17, 1977.

IRIS GARFIELD,
Administrator, National Center for Education Statistics.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. TITLE OF PROPOSED ACTIVITY

Application for Grant Under Teacher Corps Programs.

2. AGENCY/BUREAU/OFFICE

U.S. Office of Education, Immediate Office of the Commissioner, Teacher Corps.

3. AGENCY FORM NUMBER

OE Form 298.

4. LEGISLATIVE AUTHORITY FOR THIS ACTIVITY

Sec. 511. The purpose of this subpart is to strengthen the educational opportunities available to children in areas having concentrations of low-income families and to encourage colleges and universities to broaden their programs of teacher preparation and to encourage institutions of higher education and local educational agencies to improve programs of training and retraining for teachers and teacher aides. • • •

Sec. 512. In order to carry out the purposes of this subpart, there is hereby established in the Office of Education a Teacher Corps.

Sec. 513. (a) For the purpose of carrying out this subpart, the Commissioner is authorized to • • • enter into arrangements, through grants or contracts, with institutions of higher education or local educational agencies • • • State educational agencies. • • •" (Pub. L. 89-329, 20 U.S.C. 1101, 1102, 1103.)

5. VOLUNTARY/OBLIGATORY NATURE OF RESPONSE

Required to obtain or maintain benefits.

6. HOW INFORMATION TO BE COLLECTED WILL BE USED

Information collected will be used to make awards to eligible applicants.

7. DATA ACQUISITION PLAN

a. Method of collection: Mail.
b. Time of collection: Spring.
c. Frequency: Annually.

8. RESPONDENTS

a. Type: College and Universities.
b. Number: 250.
c. Estimated average man-hours per respondent: 20.
a. Type: Local Education Agencies.
b. Number: 250.
c. Estimated average man-hours per respondent: 20.
a. Type: State Education Agencies.
b. Number: 250.
c. Estimated average man-hour per respondent: 20.

9. INFORMATION TO BE COLLECTED

All respondents will be required to provide information requested on the standard non-construction application for Federal assistance. Special emphasis will be given in the program narrative to the identification of local needs and how they relate to strengthening educational opportunities available to children from low-income families and broadening programs of teacher preparation; clearly stated principal and subordinate project objectives; collaborative development of the proposal; reference to staffing and facilities; and the methods of evaluating and documenting the project.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. TITLE OF PROPOSED ACTIVITY

Evaluation of ESEA Title I Programs for Institutionalized Neglected or Delinquent Children.

2. AGENCY/BUREAU/OFFICE

U.S. Office of Education, Office of Planning, Budgeting and Evaluation.

3. AGENCY FORM NUMBERS

OE 518-1 through -7.

4. LEGISLATIVE AUTHORITY FOR THIS ACTIVITY

"Sec. 151.(a) The Commissioner shall provide for independent evaluations which describe and measure the impact of programs and projects under this title." . . . (Pub. L. 93-380; 20 USC 241o.)

5. VOLUNTARY/OBLIGATORY NATURE OF RESPONSE

Voluntary.

6. HOW INFORMATION TO BE COLLECTED

The information will be used to guide management decisions about program operations and to determine the need for legislative changes.

7. DATA ACQUISITION PLAN

a. Method of collection: Interview.
b. Time of collection: Winter, 1977-78.
c. Frequency: Single time.

8. RESPONDENTS

a. Type: Directors of State correctional facilities.
b. Number: 40.
c. Estimated average man-hours per respondent: 0.50.
a. Type: Education program administrator in State correctional facilities.
b. Number: 40.
c. Estimated average man-hours per respondent: 1.25.
a. Type: Fiscal officers in State correctional facilities.
b. Number: 40.
c. Estimated average man-hours per respondent: 1.0.
a. Type: Teachers in State correctional facilities.
b. Number: 147.
c. Estimated average man-hours per respondent: 2.5.
a. Type: Students in State correctional facilities.
b. Number: 2200.
c. Estimated average man-hours per respondent: 5.5.

9. INFORMATION TO BE COLLECTED

Respondent type: Directors of State correctional facilities.

Characteristics of facility staff: numbers per role and turnover.

Residents: number by race, age, length-of-stay.

Respondent type: Education program administrator.

Characteristics of facility education program: numbers of students in different programs, staffing of programs, and relative importance of each.

Respondent type: Fiscal officers in State correctional facilities.

Expenditures from difference sources: Federal and State by different programs.

Respondent type: Teachers in State correctional facilities.

Characteristics of educational approaches, techniques and grouping practices.

Student receipt of services; in various subject matters in groupings, with equipment.

Teacher background and attitudes: education, experience, preferred practices.

Respondent type: Students in state correctional facilities.

Data on background, length of time in institution, reason.

Data on school experience, preferred subjects, progress.

Data on achievement levels in reading and mathematics.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. TITLE OF PROPOSED ACTIVITY

Supplemental information for local education agency grants under the Emergency School Aid Act. (Annual pre-grant clearance review.)

2. AGENCY/BUREAU/OFFICE

Office of the Secretary, Office for Civil Rights.

3. AGENCY FORM NUMBERS

OS/CR 532-1; 532-2.

4. LEGISLATIVE AUTHORITY FOR THIS ACTIVITY

The provisions of the Emergency School Aid Act require in Section 710 that:

"Any local educational agency desiring to receive assistance under this title for any fiscal year shall submit to the Assistant Secretary an application therefore for that fiscal year at such time in such form, and containing such information as the Assistant Secretary shall require by regulation . . ."

The introduction to the regulation of this Act in the FEDERAL REGISTER (Tuesday, February 6, 1973, p. 3452) states that:

"Federal financial assistance provided pursuant to the Emergency School Aid Act is subject to the regulation in 45 CFR Part 80, issued by the Secretary of Health, Education, and Welfare and approved by the President, to effectuate the provisions of section 601 of the Civil Rights Act of 1964 (42 U.S.C. 2000d)...."

Pursuant to the record keeping requirements for enforcement of Title VI of the Civil Rights Act of 1964, the pertinent regulation (Section 80.6(b)) says:

"• • • Each recipient shall keep such records and submit to the responsible Department official or his/her designee timely, complete, and accurate compliance reports at such time, and in such form and containing such information, as the responsible Department official or his/her designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part"• • •

Section 13 (k) of the Emergency School Aid Act's implementing regulation (45 CFR Part 185) includes under the application provisions for any fiscal year, the following reports and information:

"An assurance that the applicant will submit such reports containing such information in such form as the Secretary or the Assistant Secretary may require in order to carry out their functions under the Act . . ."

Subpart (3) of Section 13(k) further specifies:

"Reports and records required to be kept and made available to the Assistant Secretary under this paragraph shall include information as to the matters set out in 185.43 (Limitations on Eligibility) and 185.44 (Waiver of Ineligibility), including but not limited to:

• • • (iii) Records relating to assignment of children to or within classes and to any ability grouping practiced by the applicant, as such grouping is defined in 185.43(c) (Classroom segregation); and (iv) Records relating to the practices or procedures referred to in 185.43(d), including specific information as to disciplinary sanctions (corporal punishment, suspension, expulsion, and the like) imposed upon minority and nonminority group children in every school operated by the applicant."

The Associate Commissioner for Equal Educational Programs, in conjunction with the Office for Civil Rights, to whom OE has delegated its compliance responsibilities under ESAA, has determined that there must be current data to make a determination of eligibility for ESAA each year.

5. VOLUNTARY/OBLIGATORY NATURE OF RESPONSE

Required to obtain benefits.

6. HOW INFORMATION COLLECTED WILL BE USED

Each application for a LEA grant under the Emergency School Aid Act will be subject to an OCR pre-grant clearance review.

A. *School language services.*—The difference between the number of students who need language-related programs and the number who actually receive such services identifies potential problems in this area.

B. *Discipline and assignment to programs or classrooms.*—Racial assignment or treatment patterns which differ in a significant manner from that which would be statistically expected are indicators of potential exception children, special education and gifted programs, as well as assignment to regular classrooms, either over- or under-inclusion of various groups is an indicator of a possible compliance problem. The racial/ethnic enrollment in the school generally provides the norm against which the discipline and assignment information is compared. In special education, however, some programs draw their students from a broader area than the regular school attendance area. In such cases, the school district enrollment figures serve as the norm for the comparisons.

7. DATA ACQUISITION PLAN

a. Method of collection: Mail.
b. Time of collection: January.
c. Frequency: Biennially.

8. RESPONDENTS

a. Type: Local education agencies
b. Number: Approximately 700 districts.
c. Estimated average man-hours per respondent: .25.

a. Type: Public elementary and secondary schools.
b. Number: Approximately 10,500 schools in the LEA's.
c. Estimated average man-hours per respondent: 5.

9. INFORMATION TO BE COLLECTED

Applicants for local educational agency (LEA) grants, including basic grants, pilot projects, bilingual projects, emergency special projects, territories, special arts, special student concerns projects, magnet schools and University/Business Cooperation projects, and neutral site planning projects are required to submit, in addition to the OE 116-1 form, the following information for each school broken down into the official racial/ethnic categories:

a. The enrollment;
b. The number of pupils who use or speak a language other than English more frequently than English;
c. The number of pupils who are provided services related to their limited English speaking ability;
d. The presence of special education programs and their attendance area;
e. The number of pupils who were suspended for various periods of time as well as the number expelled, administered corporal punishment, referred to court or juvenile authorities, and referred to alternative education programs as a formal disciplinary measure during the preceding year;
f. The number of pupils participating in programs for the educable mentally retarded, trainable mentally retarded, seriously emotionally disturbed, specific learning disabled and gifted or talented; and
g. The number of pupils in a sample of eighteen classrooms.

National Institute of Education

PANEL FOR THE REVIEW OF LABORATORY AND CENTER OPERATIONS

Notice of Establishment

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463), the National Institute of Education announces the chartering by the Secretary, HEW, of the Panel for the Review of Laboratory and Center Operations.

Designation: Panel for the Review of Laboratory and Center Operations.

Purpose: The Panel will assist the Director in the assessment of the plans and capabilities of the educational laboratories and research and development centers funded by the Institute.

Authority: Section 405(f)(3) of the General Education Provisions Act, as amended by Section 403 of the Education Amendments of 1976, 20 USC 1221e(f)(3).

Dated: August 16, 1977.

JOHN CHRISTENSEN,
Acting Director

[FR Doc.77-24242 Filed 8-19-77;8:45 am]

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ES 14330]

FLORIDA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

The Fish and Wildlife Service, U.S. Department of the Interior, filed application ES 14330 on September 3, 1974, for withdrawal of the following described lands in Lee County, Florida:

TALLAHASSEE MERIDIAN

T. 44 S., R. 21 E.,
Sec. 6: lot 4;
Sec. 7: lot 10.

Containing an aggregate of 57.87 acres.

The applicant desires to preserve the wildlife habitat and estuarine environment of these contiguous lots on Punta Blanca Island by including them in the J. N. "Ding" Darling National Wildlife Refuge.

A notice of proposed withdrawal was previously published as FR Document No. 76-20093 in 41 FR 28808 on July 13, 1976.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2754) notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request with the undersigned officer of the Bureau of Land Management on or before September 24, 1977.

If a public hearing is scheduled, a notice will be published in the FEDERAL REGISTER giving the time and place of such hearing. All previous comments of record concerning the proposed withdrawal will be considered in making a final determination on the application. In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned officer of the Bureau of Land Management on or before September 24, 1977.

The above-described land is temporarily segregated from all forms of appropriation under the public land laws. Current administrative jurisdiction over the segregated land will not be affected by the temporary segregation. In accordance with Section 204(g) of the aforementioned Act of October 21, 1976, the segregative effect of the pending withdrawal will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

V 42 16 2 AUG 22 77 UM V

All communications in connection with this proposed withdrawal should be addressed to the Director, Eastern States, Bureau of Land Management, 7981 Eastern Avenue, Silver Spring, Maryland 20910.

LOWELL J. UDY,
Director, Eastern States.

Fish and Wildlife Service

ENDANGERED SPECIES PERMIT

Receipt of Request for Amendment

A permit authorizing certain work of the Patuxent Center's Endangered Wildlife Research Program was not included in the Endangered Species Permit and/or Amendment Nos. 1, 2, 3, 4, and 5 when issued. This proposed Amendment No. 6 would update and correct our permit.

A notice containing the application for the permit was published in the FEDERAL REGISTER on August 4, 1975 (40 FR 32766–68–69–70–71), soliciting public comments for a period of 30 days.

A notice of the issuance of the permit was published on March 9, 1976 (41 10103–04).

Under date of July 8, 1977, the Patuxent Wildlife Research Center submitted a request for changes in the conditions of this permit. Published herewith is a copy of the request for changes which will be considered as an amendment to this permit. This request is being considered pursuant to § 13.23, Title 50 Code of Federal Regulations (See 39 FR 1162).

JULY 8, 1977.

To: Chief, Federal Wildlife Permit Office.
From: Director, Patuxent Wildlife Research Center.
Subject: Amendment No. 6 to Permit No. PRT 8–86–B–C.

The Attachment represents our justification for the issuance of Amendment No. 6 to authorize continuation of intensive studies of the Yellow-shouldered Blackbird, a species of the Family Icteridae, which has recently been classified as endangered by our Service. Because we have instructed our biologist in Puerto Rico to suspend those research activities for which this Amendment is proposed, and which will continue to result in the loss of meaningful information until resumption of the studies can be approved, your earliest possible attention to this request will be appreciated.

LUCILLE F. STICKEL.

PATUXENT WILDLIFE RESEARCH CENTER
ENDANGERED SPECIES PERMIT APPLICATION

ATTACHMENT

17.22 (a). (1) Common and scientific name of the species sought to be covered:

Yellow-shouldered blackbird (*Agelaius xanthomus*). Number, age, and sex: as many of various age and both sexes as can be studied, captured, and banded. Activities sought to be authorized in continuation of this study, initiated before species was assigned endangerment status, include:

(a) County breeding populations, and assess productivity of yellow-shouldered blackbirds on Puerto Rico and adjacent islands and cays and factors influencing productivity.

(b) Collect non-viable eggs and dead young in numbers as present for postmortem examination and other warranted studies.

(c) Live-trap adults wiah standard blackbird traps equipped with food and water and mark birds with standard USFWS aluminum bands and color bands (color-coding as approved by the Bird Banding Laboratory).

(d) Retrieve carcasses of yellow-shouldered blackbirds found dead in order to study them for disease and to analyze them for residues of environmental contaminants.

(e) Transport or ship eggs, carcasses, and body tissues from their point of collection to the Patuxent Wildlife Research Center, or to other appropriate laboratories.

(f) Hold eggshells, skins, skulls, and body parts at the Puerto Rico Field Station.

(2) The Wildlife sought to be covered is in the wild. There will be no collection of yellow-shouldered blackbird specimens other than salvage of dead birds or non-viable eggs for chemical analysis.

(3) Banding of yellow-shouldered blackbirds will be accomplished in standard blackbird decoy traps containing food and water and tended at least twice daily. Such traps, which are operated with minimal risk to the bird, will also be used to capture and control shiny cowbirds which parasitize the nests of this endangered blackbird. Any captured blackbirds will be examined, banded, color-marked, if warranted, and released unharmed to the wild.

(4) Not applicable.

(5) No live birds or viable eggs will be taken. Samples that are salvaged for study will be maintained at the Patuxent Wildlife Research Center, Laurel, Maryland, at the Puerto Rico Field Station at Palmer, Puerto Rico, or sent to the National Fish and Wildlife Laboratory, Smithsonian Institute, Washington, D.C., or sent to contract laboratories for chemical analysis.

(6) See (2) above.

(7) This permit is necessary to continue certain activities in investigations of the factors which have caused endangerment of the yellow-shouldered blackbird and which are likely to prevent its restoration to safer status in Puerto Rico and adjacent islands and cays. Nest parasitism by the shiny cowbird, as with the brown-headed cowbird's parasitism of Kirtland's warbler nests, is a severe depressant on productivity of this blackbird; control of the shiny cowbird may be necessary where nearly all blackbird nests in some localities are now being parasitized. In the few areas where cowbird presence is low or non-existent, especially in offshore cays, blackbird nesting success is good. Our biologist has been studying this species for the past two years before it was classified as endangered and he is well-qualified to continue this study.

Activities will be carried out as follows:

(a) As time from his studies of the endangered Puerto Rican parrot and other endangered species permit, the biologist and assistants will visit the blackbird populations to make observations of blackbird numbers, sex ratios, breeding behavior, territorial defence, blackbird/cowbird relations, and use of various artificial nest structures by blackbirds and cowbirds in order to develop structural designs which will be attractive and useful to blackbirds but unattractive to cowbirds. He and his assistants will check for health problems, trap and band blackbirds and cowbirds to reveal territory size, relation between feeding and breeding areas, roost sites, nest-site preferences, optimum breeding densities, predators of nests, eggs, young, and adult birds, nesting success, egg and nest loss and cause of loss, feeding habits through the seasons, and attempt to complete delineation of critical habitat for the yellow-shouldered blackbird.

(b) Some blackbird tissues and egg contents will be destroyed during the analysis and necropsies. Others, as well as skins, skulls, and eggshells will be maintained in collections for future study.

In keeping with the spirit of the Endangered Species Act of 1973 this notice is being published to allow public comment on the request for an amendment. Interested persons may comment on this amendment by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 8–86–B,C. Please refer to this number when submitting comments. All relevant comments received on or before September 21, 1977, will be considered.

Dated: August 17, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch,
Federal Wildlife Permit Office.

DEPARTMENT OF JUSTICE

Antitrust Division

UNITED STATES v. ALAMEDA COUNTY VETERINARY MEDICAL ASSOCIATION

Proposed Consent Judgment and Competitive Impact Statement Thereon

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b) through (h), that a proposed consent judgment and a competitive impact statement as set out below have been filed with the United States District Court for the Northern District of California in Civil No. 75-2398-CBR, *United States* v. *Alameda County Veterinary Medical Association*.

The complaint in this case alleges that an association of veterinarians and its members have conspired to fix fees for veterinary services. The proposed judgment prohibits the defendant and its members from having any agreement or understanding to fix fees for veterinary services. The judgment also prohibits the defendant from punishing or discouraging its members from accepting referrals from animal welfare organizations for low cost spay and neutering operations.

Public comment is invited on or before October 15, 1977. Such comments and responses thereto will be published in the FEDERAL REGISTER and filed with the Court. Comments should be directed to Anthony E. Desmond, Chief, Antitrust Division, U.S. Department of Justice, 450 Golden Gate Avenue, Box 36046, San Francisco, California 94102.

Dated: August 8, 1977.

CHARLES F. B. MCALEER,
Assistant Chief, Judgments and Judgment Enforcement Section.

UNITED STATES DISTRICT COURT, NORTHERN DISTRICT OF CALIFORNIA

United States of America, Plaintiff, v. *Alameda County Veterinary Medical Association,* Defendant.

Civil No. 75-2398-CBR.
Filed: August 8, 1977.

STIPULATION

It is stipulated by and between the undersigned parties, plaintiff United States of America, and defendant, Alameda County Veterinary Medical Association, by their respective attorneys, that:

1. The parties consent that a final judgment in the form hereto attached may be filed and entered by the Court upon the motion of either party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16) and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent which it may do at any time before the entry of the proposed final judgment by serving notice thereof on defendant and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to plaintiff and defendant in this or any other proceeding.

Dated: August 8, 1977.

For the plaintiff: John H. Shenefield, Acting Assistant Attorney General; William E. Swope, Charles F. B. McAleer, Anthony E. Desmond, Christopher S. Crook, Stephen F. Sonnett, Attorneys, Department of Justice.

For the defendant: Sullivan Jones & Archer, Hallidie Building, 130 Sutter Street, San Francisco, Calif. 94104, Richard J. Archer, Attorney for Defendant.

UNITED STATES DISTRICT COURT, NORTHERN DISTRICT OF CALIFORNIA

United States of America, Plaintiff, v. *Alameda County Veterinary Medical Association,* Defendant.

Civil No. 75-2398-CBR.
Filed: August 8, 1977.

FINAL JUDGMENT

Plaintiff, United States of America, having filed its complaint herein on November 14, 1975 and defendant, Alameda County Veterinary Medical Association, having appeared by its counsel, and both parties by their respective attorneys having consented to the making and entry of this Final Judgment without admission by any party in respect to any issue;

Now, therefore, before any testimony has been taken herein, without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby Ordered, Adjudged and Decreed, as follows:

I

This Court has jurisdiction over the subject matter of this action and the parties hereto. The complaint states claims upon which relief may be granted against the defendant under Section 1 of the Sherman Act.

II

As used in this Final Judgment:

(A) "Person" shall mean any individual, partnership, firm, association, corporation or other business or legal entity;

(B) "Defendant" means the defendant Alameda County Veterinary Medical Association;

(C) "Fee" or "Fees" means any fee, price charge, markup, quotation, discount, or other compensation for any veterinary service or drug or combination of veterinary services and drugs;

(D) "Fee Schedule" means any list of veterinary services showing a fee, range of fees, or method of computing fees for such services;

(E) "Fee Survey" means the results of a survey of fees charged by veterinarians for particular services and lists tabulating or summarizing the results of such surveys;

(F) "Animal welfare agency" means any nonprofit organization which acts to refer animal owners to veterinarians for veterinary services.

III

The provisions of this Final Judgment shall apply to the defendant and to each of its officers, directors, agents, employees, successors and assigns, and to all persons in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise.

IV

Defendant is enjoined and restrained from directly or indirectly:

(A) Fixing, establishing, maintaining, or stabilizing any fee for veterinary services;

(B) Advocating, suggesting, urging, advising, inducing or recommending that any veterinarian adhere to or otherwise base his or her fees on any particular fee, fee schedule or fee survey;

(C) Conducting, publishing, or distributing any fee survey or fee schedule which relates to fees or ranges of fees for services;

(D) Adopting, formulating, adhering to, maintaining, enforcing, suggesting, disseminating, or claiming any rights under any bylaw, rule, statement of policy, resolution, canon of ethics, plan or program which discourages, hinders, limits, prevents or prohibits any veterinarian from accepting or agreeing to accept referrals from animal welfare agencies for veterinary services at ordinary, reduced or discounted fees;

(E) Making any individual contact, devising or putting into effect any procedure, or taking any disciplinary action with reference to any member because of the fees charged or person from whom said member accepts referrals.

V

Nothing in paragraph IV of this Final Judgment shall be construed to prevent:

(A) The Association from negotiating on behalf of its members concerning the fee prescribed by a governmental agency for rabies vaccinations or rabies clinics;

(B) The Animal Care Foundation operated by the Association from accepting donation pledges representing an amount of veterinary services, supplies and drugs, or from accepting a donating member's valuation of such veterinary services rendered, including supplies and drugs, to be deducted from the member's pledge; provided that said valuation must be determined by the donating member independently, without consultation with the Association; and provided further that information concerning fees received by said Foundation shall not be disseminated to other veterinarians;

(C) The Association's Ethics Committee from considering complaints of members' clients, provided that the Ethics Committee may not consider, recommend or suggest a specific fee for veterinary services in any case. With regard to any fee charged for veterinary services, the Ethics Committee's action shall be limited to a recommendation to the member and the client that they consult further regarding the matter, and the Ethics Committee shall not consider the matter further. In any such case, the Ethics Committee shall make and retain for five years a written summary of the proceedings setting forth the name of the complainant, the name of the veterinarian, a concise statement of the complaint and of the veterinarian's response and any action taken by the Committee. Said summary shall not mention the amount of any fee involved; or

(D) The Association from sponsoring programs or disseminating materials advising veterinarians generally regarding the economics of practice. Such programs and materials may discuss factors veterinarians consider in setting their fees independently; provided that no such program or materials use or suggest amounts, ranges of figures, markups, margins or other percentage figures or any other quantification to be applied to such factors, and provided further that no such programs or materials may incorporate, refer or relate to any fee survey or fee schedule, or any other information which would tend to stabilize fees.

VI

Defendant is ordered and directed:

(A) Within sixty (60) days from the entry of this Final Judgment, to send a copy of this Final Judgment together with a letter identical in text to that attached to this Final Judgment as Appendix A, to each member and to cause the publication of this Final Judgment in defendant's newsletter.

(B) To serve a copy of this Final Judgment together with a letter identical in text to that attached to this Final Judgment as Appendix A, upon all of its future members at such time as they become members.

(C) To direct its members to return to defendant all fee schedules and fee surveys distributed or mailed to members by defendant and to mail or deliver to plaintiff all fee schedules and fee surveys received from members in response thereto.

(E) To file with this Court and serve upon the plaintiff within sixty (60) days after the date of entry of this Final Judgment an affidavit as to the fact and manner of compliance with subsections (A) and (C) of this Section VI.

VII

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

(A) Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to a defendant made to its principal office, be permitted:

(1) Access during office hours of such defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of such defendant, who may have counsel present, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of such defendant and without restraint or interference from it, to interview officers, employees and agents of such defendant, who may have counsel present, regarding any such matters.

(B) Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to a defendant's principal office, such defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

No information or documents obtained by the means provided in this Section VII shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law. If at the time information or documents are furnished by a defendant to plaintiff, such defendant represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and said defendant marks each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then 10 days notice shall be given by plaintiff to such defendant prior to divulging such material in any legal proceeding (other than a Grand Jury proceeding) to which that defendant is not a party.

VIII

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance therewith, and for the punishment of violations thereof.

IX

Entry of this Final Judgment is in the public interest.

Dated: --------

United States District Judge

APPENDIX A

Re: Final Judgment in *United States* v. *Alameda County Veterinary Medical Association*, Civil No. 75-2398 CBR

DEAR SIR: Enclosed herewith is a copy of a Final Judgment entered --------, 1977 in *United States* v. *Alameda County Veterinary Medical Association*, Civil No. 75-2398 CBR. The terms of the Final Judgment require that a copy of the Judgment as well as this letter be sent to you. You should read the terms of the Final Judgment carefully and note that you, as an individual, under certain circumstances are bound by its provisions. The purpose of this letter is to help you understand those provisions.

The essence and intent of the Final Judgment is that the Alameda County Veterinary Medical Association may not in any way prepare, publish, adopt, sponsor, or distribute any minimum, recommended, suggested, or advisory fee schedule or fee survey. The principal purpose of the Judgment is to prohibit the association and its members from engaging in fee activity of any sort except as specifically permitted by subsections (A), (B), (C), and (D) of Section V of the Judgment. Under the law and this decree, you or your veterinary hospital must set your own veterinary fees independently without consultation or agreement with the Association or with any other veterinarians.

The Judgment also prohibits the Association and its members from agreeing on a rule of ethics or policy which inhibits you from deciding to accept referrals from animal welfare agencies for veterinary services at reduced fees. You must decide independently whether to accept such referrals.

The Association is required to collect all fee schedules, results of fee surveys, and similar documents (including copies thereof) you may have received from the Association. Accordingly, you are instructed to return any such fee schedules to the secretary of the association within seven (7) days of your receipt of this letter.

UNITED STATES DISTRICT COURT,
NORTHERN DISTRICT OF CALIFORNIA

United States of America, plaintiff, v. Alameda County Veterinary Medical Association, defendant Civil No. 75-2398-CBR; filed: August 8, 1977.

COMPETITIVE IMPACT STATEMENT

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act [15 U.S.C. § 16(b)], the United States hereby submits this Competitive Impact Statement relating to the proposed Consent Judgment submitted for entry in this civil antitrust proceeding.

I. NATURE OF THE PROCEEDING

On November 14, 1975, the United States filed a Civil Complaint under Section 4 of the Sherman Act (15 U.S.C. § 4) alleging that defendant, Alameda County Veterinary Medical Association (ALVMA), violated Section 1 of the Sherman Act (15 U.S.C. § 1). The complaint alleges that ALVMA and its coconspirator members of ALVMA combined and conspired to restrain trade and commerce in the fees charged for veterinary services, including the use of anesthetics, antibiotics, vaccines, and other drugs and surgical supplies in violation of § 1 of the Sherman Act.

In its complaint, the Government requested that the defendant and its members be enjoined from continuing or renewing the agreement or any other similar agreement and that the defendant furnish any final judgment to its members. The relief which the Government requested has been obtained in the Final Judgment.

Entry by the Court of the Proposed Consent Judgment will terminate the action except that the Court will retain jurisdiction over the matter for possible further proceedings which might be required to interpret, modify or enforce the judgment or to punish alleged violation of any of the provisions of the judgment.

II. DESCRIPTION OF PRACTICES INVOLVED IN THE ALLEGED VIOLATION

The defendant ALVMA is a non-profit corporation having its principal place of business in Oakland, California. It is an association of doctors of veterinary medicine en-

V 42 162 AUG 22 77 UM

gaged in the business of providing veterinary services. The complaint alleges that the defendant and co-conspirators engaged in a conspiracy to raise, fix, stabilize and maintain the fees charged by members of ALVMA for providing veterinary services.

The Government was prepared to show at trial that the conspiracy alleged was carried out in several ways. Under the auspices of ALVMA, meetings were held at which fee schedules were adopted. These schedules were then published and followed by members of ALVMA. These fee schedules established minimum suggested prices to be charged by the veterinarian for the services described on the fee schedule. The defendant also conducted fee surveys and published the results of such surveys showing a range of suggested fees.

The government was also prepared to show at trial that ALVMA hindered efforts of some veterinarians who desired to accept referrals from animal welfare agencies for low cost spay and neutering operations. This was done through formal resolutions of ALVMA calling participation in such a low cost spay or neuter operation an unethical practice.

III. EXPLANATION OF THE PROPOSED CONSENT JUDGMENT

The United States and the defendant have agreed that the consent judgment, in a form negotiated by the parties, may be entered by the court at any time after compliance with the Antitrust Procedures and Penalties Act. The proposed Judgment provides there has been no admission by either party with respect to any issue of fact or law. Under the provisions of Section 2(e) of the Antitrust Procedures and Penalties Act, entry of the judgment by the court is conditioned upon a determination of the court that the proposed judgment is in the public interest.

A. *Prohibited Conduct.*—The proposed judgment applies to ALVMA and its directors, agents and employees. Other persons, including ALVMA members are also subject to the terms of the judgment when they are in concert with ALVMA and have notice of the judgment.

The judgment prohibits the defendant, under penalty of contempt of court, from fixing, establishing or stabilizing fees for veterinary services. The defendant is enjoined from urging, recommending or suggesting that any of its members use or adhere to any fee schedule or fee survey, and is restrained from conducting, publishing, or distributing any survey or study relating to fees or ranges of fees charged for veterinary services.

The second major effect of the proposed final judgment is to prevent the defendant ALVMA and its members from discouraging or punishing ALVMA members for providing veterinary services of any type at lower than their normal rates. The defendant is specifically enjoined and restrained from formulating, maintaining, enforcing, suggesting or disseminating any rule, by-law, canon of ethics or statement of policy of ALVMA which would prohibit or limit the right of any ALVMA member to set any fees for veterinary services in accordance with his or her own business judgment. In addition, ALVMA is restrained from contacting or punishing any member because of his fees or because of the person from whom he accepts referrals.

B. *Exemptions.*—There are three significant exemptions from the prohibitory provisions of this decree which are discussed below.

1. V Nothing in Paragraph IV of this Final Judgment shall be construed to prevent: (A) The Association from negotiating on behalf of its members concerning the fee prescribed by a governmental agency for rabies vaccinations or rabies clinics.

This exemption is primarily intended to allow ALVMA to negotiate with the State of California concerning costs of State mandated rabies control programs. Alameda County is a rabies area within the meaning of state law (California Health and Safety Code § 1901.2). The state code requires that dogs in rabies areas must be vaccinated with a canine anti-rabies vaccine. Further, it is the duty of each city and county in a rabies area to arrange for dog vaccinations at clinics operated by veterinary associations. Such vaccinations must be provided for no more than their actual cost. (California Health & Safety Code § 1920). The California State Deparment of Health is charged with responsibility for supervision of these rabies code provisions. The Department of Health determines the "actual cost" to be charged by the state mandated rabies clinics. This exemption V (A) allows the association to continue to apply to and negotiate with the Department of Health concerning its decision in setting the "actual cost" to be charged for rabies vaccinations at the state mandated clinics.

A secondary purpose of this exemption is to allow the ALVMA to continue to contract with local governments to vaccinate dogs in their pounds. According to attorneys for ALVMA, on occasion, city governments within Alameda County have contracted for a period of time with ALVMA to vaccinate dogs in pounds of such local governments. This provision would allow ALVMA to continue to offer this vaccination service to local governments who want the ALVMA to administer rabies vaccinations.

2. V Nothing in Paragraph IV of this Final Judgment shall be construed to prevent: (B) The Animal Care Foundation operated by the Association from accepting donation pledges representing an amount of veterinary services, supplies and drugs, or from accepting a donating member's valuation of such veterinary services rendered, including supplies and drugs, to be deducted from the member's pledge; provided that said valuation must be determined by the donating member independently, without consultation with the Association; and provided further that information concerning fees received by said Foundation shall not be disseminated to other veterinarians.

For many years, ALVMA has operated a non-profit corporation to provide care for animals of people on welfare or social security. This corporation, the Animal Care Foundation, is funded by a pledge of $1,000 worth of drugs and services by participating members of ALVMA. A qualified applicant is directed to a participating veterinarian. After caring for the animal, the veterinarian informs the Foundation of the value of the drugs and services provided which is to be deducted from that member's pledge. This provision V (B) allows the Foundation to continue its operations under its present system with the proviso that the veterinarian independently determine the value of the services provided for the Foundation. This provision further provides that the Foundation keep secret any information it receives concerning fees charged by individual veterinarians by requiring that the Foundation shall not disseminate any such information on fees to other veterinarians.

3. The exemption in V (C) allows the Ethics Committee of ALVMA to continue to receive complaints from members clients.

V. Nothing in Paragraph IV of this Final Judgment shall be construed to prevent: (C) The Association's Ethics Committee from considering complaints of members' clients, provided that the Ethics Committee may not consider, recommend or suggest a specific fee for veterinary services in any case. With regard to any fee charged for veterinary services, the Ethics Committee's action shall be limited to a recommendation to the member and the client that they consult further regarding the matter, and the Ethics Committee shall not consider the matter further. In any such case, the Ethics Committee shall make and retain for five years a written summary of the proceedings setting for the name of the complainant, the name of the veterinarian, a concise statement of the complaint and of the veterinarian's response and any action taken by the Committee. Said summary shall not mention the amount of any fee involved.

The evidence gathered in this case during discovery proceedings and otherwise indicates that most client complaints concern the quality of service provided by the veterinarian. On rare occasion in the past the client's complaint also included an allegation that the veterinarian's fee was excessive. The past practice of the Ethics Committee has been to encourage the veterinarian involved to have further discussions with the complaining party. No evidence has been discovered which would suggest that the Ethics Committee has been involved in anti-competitive practices such as suggesting appropriate fees to veterinarians. This exemption V (C) allows the ALVMA's Ethics Committee to continue to receive member's clients complaints as before with several protective limitations:

1. The Ethics Committee cannot consider, recommend or suggest a specific fee for veterinary services in any matter before it;

2. The only action the Ethics Committee can take in response to a complaint is to recommend that the veterinarians and the client consult further;

3. A written summary of any such proceeding will be made and retained for five years and the summary shall not mention any specific fees involved in the complaint hearing.

Exemption V (D) allows ALVMA to continue to sponsor and disseminate information concerning the economics of doing business. Counsel for the ALVMA have expressed concern that the proposed Final Judgment prohibits traditional seminars offered to veterinarians on how to run a business. This exemption allows the continued sponsoring of such programs and dissemination of general information with the proviso that no such information or program quantify or suggest appropriate figures or mathematical formulas for a veterinarian to employ in his business. It is further provided that such programs or materials may not refer to or incorporate any fee schedules of fee surveys.

C. Effect of the Proposed Judgment on Competition.—The provisions of the Final Judgment should serve to increase competition (1) by removing and prohibiting, under penalty of contempt of court, unreasonable restraints imposed by ALVMA upon its members with respect to the amount of money charged for veterinary services and (2) by removing any prohibitions implied or expressed against ALVMA members accepting referrals from animal welfare agencies for veterinary services at reduced or discounted fees.

The relief encompassed in the proposed Final Judgment is aimed at preventing any recurrence of the activities alleged in the complaint. Such alleged activities interfere with the normal interplay of competitive forces in the marketplace and accordingly result in artificially determined price levels. The prohibitory language of the judgment will insure that individual members of the ALVMA are the sole judges of their pricing policies.

IV. ALTERNATIVE RELIEF CONSIDERED

During the negotiating process leading to the proposed Final Judgment provisions substantially similar to those contained in the

proposed judgment were considered. The only proposal which was significantly modified was exemption V (C) concerning the Ethics Committee. The original proposal which was considered and rejected by the Government would have allowed the Ethics Committee to hear and resolve fee complaints. This provision has been modified to the present V (C) which allows the ALVMA to continue its previous complaint procedures while ensuring that the complaint procedures will not be a vehicle for reaching fee agreements.

V. REMEDIES AVAILABLE TO POTENTIAL PRIVATE LITIGANTS

Any potential private plaintiff who might have been damaged by the alleged violations will retain the same right to sue for monetary damages and any other legal and equitable remedies which they would have had were the Final Judgment not entered. Entry of the proposed consent judgment in this proceeding will neither impair nor assist the bringing of any such private antitrust actions. Under the provisions of Section 5(a) of the Clayton Act (15 U.S.C. Section 16(a)) this consent judgment has no prima facie effect in any subsequent private lawsuits which may be brought against this defendant.

VI. PROCEDURES AVAILABLE FOR MODIFICATION OF THE PROPOSED JUDGMENT

As provided by the Procedures and Penalties Act, any person believing that the proposed consent judgment should be modified may submit written comments to Anthony E. Desmond, Department of Justice, Antitrust Division, San Francisco, California 94102, within the 60-day period provided by the Act. These comments and the responses to them will be filed with the court and published in the FEDERAL REGISTER. All comments will be given due consideration by the Department of Justice which remains free to withdraw its consent to the proposed consent judgment at any time prior to its entry if it should determine that some modification of it is necessary. The proposed judgment provides that the court retains jurisdiction over this action and the parties may apply to the court for such orders as may be necessary or appropriate for modification of it.

VII. DOCUMENTS DETERMINATIVE IN FORMULATING THE JUDGMENT

No materials and documents of the type described in Section (b) of the Antitrust Procedures and Penalties Act [15 U.S.C. § 16(b)] as being determinative in formulating the proposed judgment were considered in formulating this proposed judgment. Therefore, none is being filed with this competitive impact statement.

Dated: August 8, 1977.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-251]

FLORIDA POWER AND LIGHT CO.

Corrective Order

In the matter of Florida Power and Light Company, Turkey Point Plant Unit No. 4.

On August 3, 1977, the Nuclear Regulatory Commission issued an Order for Modification of License in the captioned matter. Said Order contained two errors in Section III, Provision 3 and 4. This Corrective Order will rectify such error.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50, it is ordered that facility operating license No. DPR-44 is hereby amended by revising provisions 3 and 4 of Section III of the Order for Modification of License, in the captioned matter, dated August 3, 1977, to read as follows:

3. The concentration of radioiodine in the primary coliant shall be limited to 1 microcurie/gram during normal operation and to 30 microcuries/gram during power transients as defined in the Safety Evaluation.

4. Reactor operation shall be terminated and Nuclear Regulatory Commission approval shall be obtained prior to resuming operation if primary to secondary leakage attributable to the denting phenomena is detected in 2 or more tubes per plant during any 20 day period.

For the Nuclear Regulatory Commission.

Dated in Bethesda, Maryland this 11th day of August 1977.

EDSON G. CASE,
Acting Director, Office of Nuclear Reactor Regulation.

[FR Doc.77-23958 Filed 8-19-77;8:45 a.m.]

[Docket No. 50-333]

POWER AUTHORITY OF THE STATE OF NEW YORK

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 26 to Facility Operating License No. DPR-59, issued to the Power Authority of the State of New York (the licensee), which revised Technical Specifications for operation of the James A. FitzPatrick Nuclear Power Plant (the facility) located in Oswego County, New York. The amendment is effective as of its date of issuance.

The amendment changes the Technical Specifications to require periodic surveillance of the recirculation pump discharge valves and the associated bypass valves.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not invove a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment submitted by letter dated September 2, 1976, (2) Amendment No. 26 to License No. DPR-59, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Oswego County Office Building, 46 E. Bridge Street, Oswego, New York.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 8th day of August 1977.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc.77-23960 Filed 8-19-77; 8:45 am]

[Docket Nos. 50-346A, 50-500A, 50-501A, 50-440A, and 50-441A]

TOLEDO EDISON CO. ET AL.

Oral Argument

In the matter of the Toledo Edison Company and the Cleveland Electric Illuminating Company, (Davis-Besse Nuclear Power Station, Units 1, 2, and 3), and the Cleveland Electric Illuminating Company, et al., (Perry Nuclear Power Plant, Units 1 and 2).

Notice is hereby given that, in accordance with the Appeal Board's order of August 12, 1977, the date of the oral argument on the appeals from the Licensing Board's January 6, 1977 initial decision in this antitrust proceeding has been changed. That argument is now calendared for 10 a.m. on Monday, September 19, 1977 in the Nuclear Regulatory Commission's Public Hearing Room, 5th floor, East-West Towers, 4350 East West Highway, Bethesda, Maryland.

For the Atomic Safety and Licensing Appeal Board.

Dated: August 12, 1977.

MARGARET E. DU FLO,
Secretary to the Appeal Board.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used

V 42162 AUG 22 77 UM V

by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 3.42, "Emergency Planning for Fuel Cycle Facilities and Plants Licensed Under 10 CFR Parts 50 and 70," provides guidance for developing emergency plans for fuel cycle facilities and plants.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 3.42 will, however, be particularly useful in evaluating the need for an early revision if received by October 17, 1977.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Maryland this 11th day of August 1977.

For the Nuclear Regulatory Commission.

RAY G. SMITH,
Acting Director, Office of Standards Development.

[Docket Nos. 50-295 and 50-304]

COMMONWEALTH EDISON CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 29 and 26 to Facility Operating Licenses Nos. DPR-39 and DPR-48 issued to Commonwealth Edison Company (the licensee) which revised Technical Specifications for operation of the Zion Station Units Nos. 1 and 2, located in Zion, Illinois. The amendments are effective as of the date of issuance.

These amendments establish surveillance testing requirements for the main stream isolation bypass valves.

The application for these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated June 21, 1976, as supplemented January 31, 1977, (2) Amendments Nos. 29 and 26 to Licenses Nos. DPR-39 and DPR-48, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555 and at the Waukegan Public Library, 128 North County Street, Waukegan, Illinois 60685. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 10th day of August 1977.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.131, "Qualification Tests of Electric Cables, Field Splices, and Connections for Light-Water-Cooled Nuclear Power Plants," describes a method acceptable to the NRC staff for complying with the Commission's regulations with regard to qualification testing of electric cables, field splices, and connections for service in light-water-cooled nuclear power plants to ensure that the cables, field splices, and connections can perform their safety-related functions. This guide endorses IEEE Std 383-1974, "IEEE Standard for Type Test of Class IE Electric Cables, Field Splices, and Connections for Nuclear Power Generating Stations."

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 1.131 will, however, be particularly useful in evaluating the need for an early revision if received by October 20, 1977.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Document Control. ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON REACTOR SAFETY RESEARCH

Meeting

In accordance with the purposes of Sections 29 and 128b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the ACRS Subcommittee on Reactor Safety Research will hold an open meeting on September 7, 1977 in Room 1046, 1717 H St. NW., Washington, D.C. 20555. Proposed legislation includes provisions that the ACRS provide a yearly report to Congress on reactor safety research. The first such report is to be submitted by December 31, 1977. The purpose of this meeting is to discuss the status of the review of reactor safety research to identify areas that need to be reviewed but are not included in the review plans, and to establish a format for the report.

The agenda for subject meeting shall be as follows:

WEDNESDAY, SEPTEMBER 7, 1977

6:00 P.M. UNTIL CONCLUSION OF BUSINESS

The Subcommittee will meet in open Executive Session, with any of its consultants who may be present, to conduct the above review. Practical considerations may dictate alterations in the above agenda.

The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the radiological safety area.

With respect to public participation in the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than August 31, 1977 to Mr. Thomas G. McCreless, ACRS, NRC, Washington, D.C. 20555, will normally be received in time to be considered at this meeting.

(b) Persons desiring to make an oral statement at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Subcommitte will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on September 6, 1977 to the Office of the Executive Director of the Committee (telephone 202-634-1374, Attn: Mr. Thomas G. McCreless) between 8:15 a.m. and 5:00 p.m., EDT.

(d) Questions may be propounded only by members of the Subcommittee, its consultants, and Staff.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will be allowed while the meeting is in session at the discretion of the Chairman to a degree that is not disruptive to the meeting. When use of such equipment is permitted, appropriate measures will be taken to protect proprietary or privileged information which may be in documents, folders, etc. being used during the meeting. Recordings will be permited only during those sessions of the meeting when a transcript is being kept.

(f) A copy of the transcript of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection on or after September 14, and December 7, 1977, respectively, at the NRC Public Document Room, 1717 H Street NW., Washington, D.C. 20555.

Copies may be obtained upon payment of appropriate charges.

Dated: August 17, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc.77-24160 Filed 8-19-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS WORKING GROUP NO. 6 OF THE SUBCOMMITTEE ON REACTOR SAFETY RESEARCH

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), Working Group No. 6 of the ACRS Subcommittee on Reactor Safety Research will hold an open meeting on September 7, 1977 in Room 1046, 1717 H Sts. NW., Washington, D.C. 20555. The purpose of this meeting is to continue the review of risk assessment research programs being conducted by the NRC Staff and others.

The agenda for subject meeting shall be as follows:

WEDNESDAY, SEPTEMBER 7, 1977

8:30 A.M. UNTIL CONCLUSION OF BUSINESS

The Working Group may meet in Executive Session, with any of its consultants who may be present, to explore their preliminary opinions regarding matters which should be considered in order to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Working Group will meet to hear presentations by representatives of the NRC Staff and their consultants, and will hold discussions with these groups pertinent to this review.

At the conclusion of this session, the Working Group may caucus in to determine whether the matters identified in the initial session have been adequately covered.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Working Group is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the radiological safety area.

With respect to public participation in the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing a readily reproducible copy to the Working Group at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than August 31, 1977 to Mr. Robert L. Wright, Jr., ACRS, NRC, Washington, D.C. 20555, will normally be received in time to be considered at this meeting.

(b) Persons desiring to make an oral statement at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Working Group will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on September 6, 1977 to the Office of the Executive Director of the Committee (telephone 202/634-1919, Attn: Mr. Robert L. Wright, Jr.) between 8:15 a.m. and 5:00 p.m. EDT.

(d) Questions may be propounded only by members of the Working Group, its consultants, and the Staff.

V 42162 AUG 22 77 UM

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will be allowed while the meeting is in session at the discretion of the Chairman to a degree that is not disruptive to the meeting. When use of such equipment is permitted, appropriate measures will be taken to protect proprietary or privileged information which may be in documents, folders, etc. being used during the meeting. Recordings of the proceedings will be permitted only during those sessions when a transcript is being kept.

(f) A copy of the transcript of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection on or after September 14, and December 7, 1977, respectively, at the NRC Public Document Room, 1717 H Street NW., Washington, D.C. 20555.

Copies may be obtained upon payment of appropriate charges.

Dated: August 17, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc.77-24161 Filed 8-19-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS, SUBCOMMITTEE ON REGULATORY ACTIVITIES

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the ACRS Subcommittee on Regulatory Activities will hold an open meeting on September 7, 1977 in Room 1062, 1717 H St. NW., Washington, D.C. 20555.

The agenda for subject meeting shall be as follows:

WEDNESDAY, SEPTEMBER 7, 1977

8:45 A.M.–10:30 A.M.

A. The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to the following: (1) Regulatory Guide 1.33, Revision 2, "Quality Assurance Program Requirements (Operation tinent to the following: (1) Regulatory Guide 1.33, Revision 2, "Quality Assurance Program Requirements (Operation)"

(2) Regulatory Guide 1.72, "Spray Pond Plastic Piping"

(3) Regulatory Guide 1.43, "Control of Stainless Steel Weld Cladding of Low Alloy Steel Components"

10:30 A.M. UNTIL THE CONCLUSION OF BUSINESS

B. The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to activities which affect the current licensing process on reactor operations, including those related to the NRC Standardized Plant Review Process and the policies by which it is implemented.

Other matters which may be of a predecisional nature relevant to reactor operation or licensing activities may be discussed following this session.

Practical consideration may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

With respect to public participation in the meeting, the following requirements shall apply: (A) Persons wishing to submit written statements regarding Regulatory Guides 1.33, 1.72, and 1.43 may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Such comments shall be based upon documents on file and available for public inspection at the NRC Public Document Room, 1717 H St. NW., Washington, DC 20555.

Persons desiring to mail written eomments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than August 31, 1977 to Mr. G. R. Quittschreiber, ACRS, NRC, Washington, D.C. 20555. will normally be received in time to be considered at this meeting.

(B) Persons desiring to make an oral statement at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Subcommittee will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(C) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on September 6, 1977 to the Office of the Executive Director of the Committee (telephone 202-634-1374, Attn: Mr. G. R. Quittschreiber) between 8:15 a.m. and 5 p.m., edt.

(D) Questions may be propounded only by members of the Subcommittee, its consultants, and Staff

(E) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will be allowed while the meeting is in session at the discretion of the Chairman to a degree that is not disruptive to the meeting. When use of such equipment is permitted, appropriate measures will be taken to protect proprietary or privileged information which may be in documents, folders, etc. being used during the meeting. Recordings of the proceedings will be permitted only during those sessions when a transcript is being kept.

(F) A copy of the transcript of the portion(s) of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555 on or after September 14, 1977, and December 7, 1977, respectively.

Copies may be obtained upon payment of appropriate charges.

Dated: August 17, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[Docket No. 50-318]

BALTIMORE GAS AND ELECTRIC CO.

Proposed Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-69 issued to the Baltimore Gas and Electric Company (the licensee) for operation of the Calvert Cliffs Nuclear Power Plant Unit No. 2 (the facility), a pressurized water reactor located in Calvert County, Maryland, and currently authorized to operate at power levels up to 2560 MWt.

In accordance with the licensee's application for a license amendment dated July 13, 1977, the amendment would authorize operation of the facility at 2700 MWt in lieu of the current licensed level of 2560 MWt.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By September 21, 1977, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of Section 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and Section 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to James A. Biddison, Jr., General Counsel, Gas and Electric Building, Charles Center, Baltimore, Maryland 21203, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate full in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for amendment dated July 13, 1977. The application is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555 and at the Calvert County Library, Prince Frederick, Maryland 20678.

Dated at Bethesda, Maryland, this 12th day of August, 1977.

For The Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.77-24248 Filed 8-19-77;8:45 am]

[Docket No. 50-315]

INDIANA & MICHIGAN ELECTRIC CO. AND INDIANA & MICHIGAN POWER CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 20 to Facility Operating License No. DPR-58, issued to Indiana & Michigan Electric Company and Indiana & Michigan Power Company (the licensees), which revised the Technical Specifications for operation of the Donald C. Cook Nuclear Plant Unit No. 1 (the facility), located in Berrien County, Michigan. The amendment is effective as of the date of its issuance.

The amendment revised Technical Specification Table 3.7-4 to renumber the safety related hydraulic shock suppressors (snubbers) and add an additional snubber and to alter Figure 6.2-2 to delete the position of Assistant Plant Manager and remove the senior reactor operator license designator from the Technical Supervisor position.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the March 22 and July 8, 1977 letters of application for amendment, (2) Amendment No. 20 to License No. DPR-58, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this fifth day of August, 1977.

For the Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.77-24249 Filed 8-19-77;8:45 am]

[Docket No. 50-298]

NEBRASKA PUBLIC POWER DISTRICT

Consideration of Proposed Modification to Facility Spent Fuel Storage Pool

The Nuclear Regulatory Commission (the Commission) is considering the approval of a modification to the spent fuel storage pool of the Cooper Nuclear Station (the facility), a boiling water reactor located in Nemaha County, Nebraska, and currently authorized for operation at power levels up to 2381 MWt.

The proposed modification being considered involves replacement of the existing racks in the spent fuel storage pool of the facility with racks of a design capable of accommodating up to 2366 fuel assemblies in accordance with the licensee's request dated July 22, 1977. The existing racks have a capacity for storage of 740 fuel assemblies.

If it is later determined that the modification requires changes to the facility Technical Specifications, a license amendment would be issued along with approval of the modification.

Prior to approval of the proposed modification and any license amendment, if necessary, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By September 21, 1977, the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the approval of the modification to the subject facility spent fuel storage pool. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of Section 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER Notice and Section 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Gene Watson, Attorney, Barlow, Watson & Johnson, P.O. Box 81686, Lincoln, Nebraska 68501, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has the right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

V 42 162 AUG 22 77 UM A V

For further details with respect to this action, see the licensee's proposal dated July 22, 1977, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Dated at Bethesda, Maryland, this 16th day of August 1977.

For The Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc 77-24305 Filed 8-19-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS NUCLEAR REGULATORY COMMISSION

Notice of Meeting

In accordance with the purposes of Sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards will hold a meeting on September 8–10, 1977, in Room 1046, 1717 H Street NW., Washington, D.C.

The agenda for the subject meeting will be as follows:

THURSDAY, SEPTEMBER 8, 1977

8:30 a.m.–9:15 a.m.: Executive Session (Open)—The Committee will hear and discuss the report of the ACRS Chairman regarding miscellaneous matters relating to ACRS activities.

The Committee will also hear and discuss the report of the ACRS Subcommittee and consultants who may be present related to review of the request for a preapplication site review for the San Joaquin Nuclear Project. Portions of this session will be closed to discuss Proprietary Information applicable to this project.

9:15 a.m.–12 Noon: San Joaquin Nuclear Project (Open)—The Committee will hear presentations and hold discussions with representatives of the NRC Staff and the Applicant related to the request for a preliminary review of the site for the San Joaquin Nuclear Project. Portions of this session will be closed if necessary to discuss Proprietary Information applicable to this project.

1 p.m.–1:30 p.m.: Executive Session (Open)—The Committee will hear and discuss the report of the ACRS Subcommittee and consultants who may be present related to the seismic and geologic features of the Skagit Nuclear Power Project. Portions of this session will be closed if necessary to discuss Proprietary Information applicable to this project.

1:30 p.m.–4 p.m.: Skagit Nuclear Power Project (Open)—The Committee will hear presentations by and hold discussions with representatives of the NRC Staff and the Applicant related to the seismic and geologic aspects of the Skagit Nuclear Power Project. Portions of this session will be closed if required to discuss Proprietary Information related to this facility.

4 p.m.–6 p.m.: Executive Session (Open)—The Committee will hear and discuss the report of the ACRS Subcommittee on Regulatory Activities including proposed Regulatory Guides.

The Committee will also discuss its proposed periodic report to the Nuclear Regulatory Commission on ACRS activities, follow-up action regarding ACRS recommendations and requests, and priorities for resolution of generic items applicable to the Shearon Harris Nuclear Power Plant. A portion of this session will be closed to discuss matters involved in NRC adjudicatory proceedings.

FRIDAY SEPTEMBER 9, 1977

8:30 a.m.–9:30 a.m.: Meeting with NRC Executive Director for Operations (Open)—The Committee will meet with the Executive Director for Operations to discuss items related to the regulatory process including the NRC Technical Assistance Program and resolution of outstanding generic issues.

9:30 a.m.–10:30 a.m.: Meeting with Commissioners (Open) The Committe will meet with the Commissioners to discuss ACRS activities during the period of June-July-August 1977 and ACRS activities related to review of fast breeder reactors and fuel fabrication plants.

10:30 a.m.–12:30 p.m. and 1:30 p.m.– 3:30 p.m.: Meeting with the NRC staff (Open)—The Committee will hear presentations and hold discussions with members of the NRC Staff regarding recent operating experience at nuclear facilities, recent licensing actions, generic matters related to reactor licensing, and the future schedule for ACRS activities. This discussion will include:

Performance of vibration and loose parts monitors in nuclear facilities.

Inservice inspection requirements for hydraulic and mechanical pipe snubbers.

Probably of occurrence of the Design Basis Flood.

Control room habitability following an accident.

Future schedule and anticipated ACRS activities.

3:30 p.m.–4 p.m.: Executive Session (Open)—The Committee will hear and discuss the report of the ACRS Subcommittee and consultants who may be present regarding proposed revisions to 10 CFR Part 50, Appendix K, ECCS Evaluation Models.

4 p.m.–5:30 p.m.: Meeting with NRC Staff (Open)—The Committee will hear presentations from and hold discussions with representatives of the NRC Staff, its consultants and contractors regarding proposed revisions to the Code of Federal Regulations (10 CFR), Part 50, Appendix K, ECCS Evaluation Models and review of fuel damage limits for nuclear reactors.

5:30 p.m.–6:30 p.m.: Executive Session (Open/Closed)—The Committee will discuss proposed reports to the Nuclear Regulatory Commission on the Skagit Nuclear Power Project and the San Joaquin Nuclear Project. Portions of this session will be closed as required to protect Proprietary Information and matters involved in NRC adjudicatory proceedings.

SATURDAY, SEPTEMBER 10, 1977

8:30 a.m.–10:30 p.m. and 1 p.m.–2:30 p.m.: Executive Session (Open/Closed)—The Committee will continue preparation of its reports to the NRC on matters discussed during this meeting. Portions of this session will be closed as required to protect Proprietary Information and matters involved in NRC adjudicatory proceedings.

10:30 a.m.–12 Noon and 2:30 p.m.–4 p.m.: Executive Session (Open)—The Committee will hear and discuss the reports of ACRS Subcommittees, Working Groups and Members related to ACRS activities and the NRC regulatory process including the reactor safety research program, transportation of radioactive materials, management of radioactive waste and physical protection of nuclear facilities. Portions of this session will be closed if required to protect Proprietary Information and National Security Information applicable to specific nuclear facilities.

The Committee will also discuss ACRS policy and practices including resolution of generic matters related to light-water reactors, and review of proposed changes at licensed facilities.

I have determined in accordance with Subsection 10(d) of Public Law 92-463 that it is necessary to close portions of the meeeting as noted above to protect Proprietary Information (5 U.S.C. 552b.(c)(4)), to preserve the confidentiality of information related to safeguarding of special nuclear material and the physical protection of nuclear facilities (5 U.S.C. 552b.(c)(1)(4)). The portions of the meeting during which the ACRS comments on matters involved in adjudication are prepared will be held in closed session pursuant to exemption (10) of 5 U.S.C. 552b.(c). Separation of factual information from information considered exempt from disclosure under exemptions (1), (4), and (10) of 5 U.S.C. 552b.(c) during these portions of the meeting is not considered practical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Committee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business, including provisions to carry over an incompleted session from one to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally deal with matters pertaining to environmental impacts outside the radiological safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by providing a readily reproducible copy to the Committee at the beginning of the meeting. Comments should be limited to safety related areas within the Commitee's purview. Persons desiring to mail writtten comments may do so by mailing a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than August 31, 1977, to the Executive Director, Advisory Committee on Reactor Safeguards, Nuclear Regulatory Commission, Washington, D.C. 20555 will normally be received in time to be

considered at this meeting. Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555 and at the following Public Document Rooms:

SKAGIT NUCLEAR PROJECT

Sedro Wooley Library, 802 Ball Avenue, Sedro Wooley, WA 98294.

SAN JOAQUIN NUCLEAR PROJECT

Kern County Library, 1315 Truxtun Avenue, Bakersfield, CA 93301.

SHEARON HARRIS NUCLEAR POWER PLANT

Wake County Public Library, 104 Fayetteville Street, Raleigh, NC 27601.

(b) Those persons wishing to make oral statements regarding agenda items at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements in safety-related areas within the Committee's purview at an appropriate time chosen by the Chairman of the Committee.

(c) Further information regarding topics to be discussed, whether the meeting or portions of the meeting have been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted therefor, can be obtained by a prepaid telephone call on September 7, 1977 to the Office of the Executive Director of the Committee (Telephone: 202–634–1371) between 8:15 a.m. and 5 p.m., Eastern Time. It should be noted that the above schedule is tentative, based on the anticipated availability of related information, etc. It may be necessary to reschedule items to accommodate required changes. The ACRS Executive Director will be prepared to describe these changes on September 7, 1977.

(d) Questions may be asked only by members of the Committee, its consultants and staff.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will be allowed while the meeting is in session at the discretion of the Chairman to a degree that is not diruptive of the meeting. When use of such equipment is permitted, appropriate measures will be taken to protect proprietary or privileged information which may be in documents, folders, etc. being used during the meeting. Recordings of the proceedings will be permitted only during those open sessions when a transcript is being kept.

(f) Persons with agreements or orders permitting access to proprietary information other than safeguards information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed. The Executive Director of the ACRS should be informed of such an agreement at least 3 days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of this agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to the Executive Director at the beginning of the meeting.

(g) A copy of the transcript of the open portion(s) of the meeting where factual information is presented will be available for inspection during the following workday at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Copies of the minutes of the meeting will be made available for inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C., on or after December 9, 1977. Copies may be obtained upon payment of appropriate charges.

Dated: August 19, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Notice of Proposed Meetings

In order to provide advance information regarding proposed meetings of the ACRS Subcommittees and Working Groups and of the full Committee, the following preliminary schedule is being published. This preliminary schedule reflects the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published in the FEDERAL REGISTER on July 25, 1977, page 37885. Those meetings which are definitely scheduled have had, or will have, an individual notice published in the FEDERAL REGISTER approximately 15 days (or more) prior to the meeting. Those Subcommittee and Working Group meetings for which it is anticipated that there will be a portion or all of the meeting open to the public are indicated by an asterisk (*). It is expected that the sessions of the full Committee meeting designated by an asterisk (*) will be open in whole or in part to the public. Information as to whether a meeting has been firmly scheduled, cancelled or rescheduled, or whether changes have been made in the agenda for the September 8–10, 1977 ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone 202–634–1374, Attention: Mary E. Vanderholt) between 8:15 a.m. and 5 p.m., EDT.

SUBCOMMITTEE AND WORKING GROUP MEETINGS

**Transportation of Radioactive Materials*, August 23, 1977, New York, N.Y. The Working Group will be briefed on Sandia Laboratories Interim Report, "Generic Environmental Assessment on Transportation of Radioactive Material Near and Through a Large, Densely Populated Area." Notice of this meeting was published in the FEDERAL REGISTER on August 1, 1977, page 38947.

**Working Group No. 1 of the Reactor Safety Research Subcommittee*, August 30, 1977, Washington, D.C. (Re Fire Protection, Research, etc.) Postponed indefinitely.

**Atlantic Generating Station*, August 31, 1977, Atlantic City, N.J. The Subcommittee will continue its review of this project. Notice of this meeting was published in the FEDERAL REGISTER on August 15, page 41193.

**San Joaquin Nuclear Project, Skagit Nuclear Project, and Seismic Activities*, September 1–2, 1977, San Francisco, Calif. The Subcommittees will hold a joint meeting to review matters relating to the geology, seismology, and hydrology of the proposed San Joaquin site; to review matters relating to the evaluation of the 1872 Wenatachee earthquake; and to review matters relating to the geology and seismology of the proposed Skagit site. Notice of this meeting was published in the FEDERAL REGISTER on August 15, 1977, page 41194.

**Regulatory Activities*, September 7, 1977, Washington, D.C. The Subcommittee will review working papers, future Regulatory Guides, and changes to existing Regulatory Guides; also, it will discuss pertinent activities which affect the current licensing process and or reactor operations. Notice of this meeting appears elsewhere in this issue.

**Working Group No. 6 of the Reactor Safety Research Subcommittee*, September 7, 1977, Washington, D.C. The Working Group will meet to continue its review of programs and plans for risk assessment research being conducted by the NRC Staff. Notice of this meeting appears elsewhere in this issue.

**Reactor Safety Research Subcommittee*, September 7, 1977, Washington, D.C. The Subcommittee will meet at 6 p.m. in an open Executive Session to discuss the status of the review of reactor safety research, to identify areas that need to be reviewed but are not included in current review plans, and to establish a format for the report to Congress required in proposed legislation. Notice of this meeting appears elsewhere in this issue.

***Working Group No. 1 of the Reactor Safety Research Subcommittee*, September 14–15, 1977, Oak Ridge, Tenn. The Working Group will meet to review various water reactor safety research programs relating to systems engineering and analytical development.

**McGuire Nuclear Station*, September 20, 1977, Washington, D.C. Postponed indefinitely.

***Working Group No. 5 of the Reactor Safety Research Subcommittee*, September 20, 1977, Washington, D.C. The Working Group will meet to review the various research activities in support of fuel cycle development, including health and environmental aspects and safeguard special nuclear materials.

**Greene County Nuclear Power Plant*, September 21–22, 1977, Albany, N.Y. The Subcommittee will meet to review the applica-

V42162 AUG 22 77 UM

tion of the Power Authority of the State of New York for a permit to construct the Greene County Nuclear Power Plant.

Pilgrim Nuclear Station, Unit No. 2, September 22, 1977, Boston, Mass. The Subcommittee will meet to continue its review of the application of the Boston Edison Company for a permit to construct Unit No. 2 of the Pilgrim Nuclear Station.

Working Group No. 2 of the Reactor Safety Research Subcommittee and Reactor Fuel Subcommittee, September 22–23, 1977, San Francisco, Calif. The Working Group and Subcommittee will hold a joint meeting to discuss water reactor safety research and development pertaining to fuel behavior and materials and metallurgy, and to discuss improved fuel concepts for boiling water reactors.

Working Group No. 4 of the Reactor Safety Research Subcommittee, September 28–29, 1977, Washington, D.C. The Working Group will meet to review the NRC sponsored research on advanced reactor technology.

Floating Nuclear Plant, September 29, 1977, Denver, Colo. The Subcommittee will meet to continue its review of the generic liquid pathway study.

Regulatory Activities, October 5, 1977, Washington, D.C. The Subcommittee will review working papers, future Regulatory Guides, and changes to existing Regulatory Guides; also, it will discuss pertinent activities which affect the current licensing process and/or reactor operations.

Atlantic Generating Station, October 21, 1977, Washington, D.C. The Subcommittee will meet to continue its review of the application of Public Service Electric and Gas Company of New Jersey for a permit to construct the Atlantic Generating Station.

Fluid/Hydraulic Dynamic Effects, October 26, 1977, Portland, Oreg. The Subcommittee will meet to continue the discussion on the effects of blowdown forces on reactor vessel supports.

Pebble Springs Nuclear Plant, Units 1 and 2, October 27, 1977 (Tentative) Portland, Oreg. The Subcommittee will meet to continue its review of the application of the Portland General Electric Company for a permit to construct the Pebble Springs Nuclear Plant, Units 1 and 2.

Yellow Creek Nuclear Power Plant, October 28, 1977, Cornith, Miss. The Subcommittee will meet to review the application of the Tennessee Valley Authority for a permit to construct the Yellow Creek Nuclear Power Plant.

Resolution of Generic Items, November 1, 1977, Washington, D.C. The Subcommittee will meet to review the current status of generic issues identified in "Status of Generic Items Relating to Light Water Reactors: Report No. 5," dated February 24, 1977.

D. C. Cook Nuclear Plant, Unit 2, December 3, 1977, Benton Harbor, Mich. The Subcommittee will meet to review the application of the Indiana and Michigan Power Company for a permit to operate D. C. Cook Nuclear Plant, Unit 2.

FULL ACRS MEETINGS

SEPTEMBER 8–10, 1977

Agenda

A. *San Joaquin Nuclear Project—Partial site review.

B. *Skagit Nuclear Project—Construction permit.

C. *Proposed Revision of 10 CFR Part 50, Appendix K, ECCS Evaluation Models.

OCTOBER 6–8, 1977

Agenda to be announced.

Dated: August 19, 1977.

JOHN C. HOYLE,
Advisory Committe,
Management Officer.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

NON-RUBBER FOOTWEAR

Paragraph (1) below sets forth the texts of letters exchanged between the Acting Special Representative for Trade Negotiations and representatives of the Governments of the Republics of China and Korea, respectively, concerning the Agreements between the United States and those two countries regarding international trade in non-rubber footwear. These letter add to the Agreements an Agreed Minute intended to allow certain non-rubber footwear, with respect to which interpretations differed as to the correct date of export, to be entered and counted against relevant import ceilings during the initial period of the Agreements.

Paragraph (2) below sets forth the text of letters from the Acting Special Trade Representative to the Commissioner of Customs, directing that the terms of the Agreed Minutes be implemented, and providing certain guidance with respect to such implementation.

Paragraph (3) below specifies the changes that are to be made in Part 2 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202), in order to embody in the Tariff Schedules the changes made by the Agreed Minutes contained in the letters set forth at paragraph (1). In accordance with Proclamation 4510, of June 22, 1977, these changes will be effective August 22, 1977.

Paragraph (4) below sets forth the text of a letter of July 22, 1977, from the Special Trade Representative to the Commissioner of Customs, amending the description of an export visa that was given previously, and directing that Customs permit entry of non-rubber footwear articles without an export visa wherever requested to do so in writing by the Embassy of the Republic of China. A similar directive was given to the Commissioner of Customs with respect to requests from the Embassy of Korea, in a letter from the Special Trade Representative that was published in the FEDERAL REGISTER of June 24, 1977 (42 FR 32443).

1. *Letters Exchanged Between the Acting Special Trade Representative and Representatives of the Governments of the Republics of China and Korea.*

THE SPECIAL REPRESENTATIVE
FOR TRADE NEGOTIATIONS,
Washington, D.C., August 4, 1977.

HIS EXCELLENCY JAMES C. H. SHEN,
Ambassador of the Republic of China,
2311 Massachusetts Avenue NW.,
Washington, D.C. 20008.

EXCELLENCY: I have the honor to refer to the agreement between the Government of the Republic of China and the Government of the United States of America regarding exports from the Republic of China of non-rubber footwear, hereinafter referred to as the "Agreement".

Pursuant to discussions that have been held between representatives of our two Governments, I hereby propose to add the following paragraph as Agreed Minute No. 7 of the Agreement:

"7. For the initial period of the Agreement, paragraph 2(c) shall be administered as follows: all non-rubber footwear articles exported from the Republic of China on or after June 28, 1977, will be denied importation for consumption by the Government of the United States of America unless such articles have been issued an export visa by the Government of the Republic of China, or unless the Government of the United States of America determines that any such articles that were not issued visas were exported on carriers that (i) were loaded with such footwear articles prior to June 28, 1977; (ii) departed from the Republic of China prior to July 6, 1977; and (iii) were entered, or withdrawn from warehouse for consumption in the United States prior to September 1, 1977."

In addition, it is my understanding that the Government of the Republic of China will issue export visas, or otherwise authorize entry, for all non-rubber footwear articles that were exported to the United States on carriers that were loaded with such articles prior to June 28, 1977, but that are not determined by the Government of the United States to have departed the Republic of China prior to July 6, 1977.

We further understand that, in accordance with the Agreement, the Government of the Republic of China has not permitted non-rubber footwear articles to be exported on or after June 28, 1977, without issuance of export visas covering such articles. We have been assured that the Government of the Republic of China will, to the fullest extent possible, assist representatives of the Government of the United States of America in verifying information needed to implement Agreed Minute No. 7 of the Agreement as added by this exchange of letters.

It is understood that all non-rubber footwear articles that are imported without an export visa, pursuant to Agreed Minute No. 7 of the Agreement as added by this exchange of letters, will be counted in accordance with paragraph 2(d)(ii) of the Agreement as if such articles were exported prior to June 28, 1977.

It is further understood that, without prejudice to its own laws and regulations, the Government of the Republic of China recognizes that the Government of the United States of America will, consistent with its laws and regulations, in the future consider non-rubber footwear articles to be exported on the actual date that the articles finally depart the country of exportation for the United States.

I would appreciate your confirming that the proposal to add Agreed Minute No. 7 of the Agreement, and the other points covered in this letter, are acceptable to your Government.

With best wishes, I am,
Sincerely,

WILLIAM B. KELLY, JR.,
Acting Special Representative
for Trade Negotiations.

Embassy of the Republic of China,
Washington, D.C., August 5, 1977.

EXCELLENCY: I have the honor to refer to Your Excellency's letter of August 4, 1977 proposing to add a paragraph as Agreed Minute No. 7 of the Agreement between the Government of the Republic of China and the Government of the United States of America regarding Exports from the Republic of China of Non-rubber Footwear as follows:

"7. For the initial period of the Agreement, paragraph 2(c) shall be administered as follows: All non-rubber footwear articles exported from the Republic of China on or after June 28, 1977, will be denied importation for consumption by the Government of the United States of America unless such articles have been issued an export visa by the Government of the Republic of China, or unless the Government of the United States of America determines that any such articles that were not issued visas were exported on carriers that (i) were loaded with such footwear articles prior to June 28, 1977; (ii) departed from the Republic of China prior to July 6, 1977; and (iii) were entered, or withdrawn from warehouse for consumption in the United States prior to September 1, 1977."

I have the honor to confirm on behalf of the Government of the Republic of China that the addition to the Agreed Minutes of the Agreement referred to above is acceptable.

I further have the honor to confirm that the Government of the Republic of China will issue export visas, or otherwise authorize entry for all non-rubber footwear articles that were exported to the United States on carriers that were loaded with such articles prior to June 28, 1977, but that are not determined by the Government of the United States of America to have departed the Republic of China prior to July 6, 1977.

I also wish to confirm that your understandings as stated in paragraphs 4, 5, and 6 of your letter are correct.

With best wishes, I am,
Sincerely yours,

JAMES C. H. SHEN,
Ambassador of the
Republic of China.

HIS EXCELLENCY
WILLIAM B. KELLEY, JR.,
Acting Special Representative
for Trade Negotiations,
Washington, D.C. 20506.

THE SPECIAL REPRESENTATIVE
FOR TRADE NEGOTIATIONS,
Washington, D.C., August 4, 1977.

MINISTER YOONSAE YANG,
Embassy of the Republic of Korea,
2320 Massachusetts Avenue NW.,
Washington, D.C. 20008.

DEAR MR. MINISTER: I have the honor to refer to the agreement between the Government of the Republic of Korea and the Government of the United States of America regarding exports from the Republic of Korea of non-rubber footwear, hereinafter referred to as the "Agreement".

Pursuant to discussions that have been held between representatives of our two Governments, I hereby propose to add the following paragraph as Agreed Minute No. 5 of the Agreement:

"5. For the initial period of the Agreement, paragraph 2(c) shall be administered as follows: all non-rubber footwear articles exported from the Republic of Korea on or after June 28, 1977, will be denied importation for consumption by the Government of the United States of America unless such articles have been issued an export visa by the Government of the Republic of Korea, or unless the Government of the United States of America determines that any such articles that were not issued visas were exported on carriers that: (i) were loaded with such footwear articles prior to June 28, 1977; (ii) departed from the Republic of Korea prior to July 6, 1977; and (iii) were entered, or withdrawn from warehouse for consumption in the United States prior to September 1, 1977."

In addition, it is my understanding that the Government of the Republic of Korea will issue export visas, or otherwise authorize entry, for all non-rubber footwear articles that were exported to the United States on carriers that were loaded with such articles prior to June 28, 1977, but that are not determined by the Government of the United States to have departed the Republic of Korea prior to July 6, 1977.

We further understand that, in accordance with the Agreement, the Government of the Republic of Korea has not permitted non-rubber footwear articles to be exported on or after June 28, 1977, without issuance of export visas covering such articles. We have been assured that the Government of the Republic of Korea will, to the fullest extent possible, assist representatives of the Government of the United States of America in verifying information needed to implement Agreed Minute No. 5 of the Agreement as added by this exchange of letters.

It is understood that all non-rubber footwear articles that are imported without an export visa, pursuant to Agreed Minute No. 5 of the Agreement as added by this exchange of letters, will be counted in accordance with paragraph 2(d)(ii) of the Agreement as if such articles were exported prior to June 28, 1977.

It is further understood that, without prejudice to its own laws and regulations, the Government of the Republic of Korea recognizes that the Government of the United States of America will, consistent with its laws and regulations, in the future consider non-rubber footwear articles to be exported on the actual date that the articles finally depart the country of exportation for the United States.

I would appreciate your confirming that the proposal to add Agreed Minute No. 5 of the Agreement, and the other points covered in this letter, are acceptable to your Government.

With best wishes, I am,
Sincerely,

WILLIAM B. KELLY, JR.,
Acting Special Representative
for Trade Negotiations.

EMBASSY OF THE REPUBLIC OF KOREA,
Washington, D.C., August 4, 1977.

WILLIAM B. KELLY, JR.,
Acting Special Representative for
Trade Negotiations,
Washington, D.C.

DEAR SIR: I have the honor to acknowledge receipt of your note of today's date which reads as follows:

"I have the honor to refer to the agreement between the Government of the Republic of Korea and the Government of the United States of America regarding exports from the Republic of Korea of non-rubber footwear, hereinafter referred to as the 'Agreement'.

"Pursuant to discussions that have been held between representatives of our two Governments, I hereby propose to add the following paragraph as Agreed Minute No. 5 of the Agreement:

"5. For the initial period of the Agreement, paragraph 2(c) shall be administered as follows: all non-rubber footwear articles exported from the Republic of Korea on or after June 28, 1977, will be denied importation for consumption by the Government of the United States of America unless such articles have been issued an export visa by the Government of the Republic of Korea, or unless the Government of the United States of America determines that any such articles that were not issued visas were exported on carriers that: (i) were loaded with such footwear articles prior to June 28, 1977; (ii) departed from the Republic of Korea prior to July 6, 1977; and (iii) were entered, or withdrawn from warehouse for consumption in the United States prior to September 1, 1977."

In addition, it is my understanding that the Government of the Republic of Korea will issue export visas, or otherwise authorize entry, for all non-rubber footwear articles that were exported to the United States on carriers that were loaded with such articles prior to June 28, 1977, but that are not determined by the Government of the United States to have departed the Republic of Korea prior to July 6, 1977.

We further understand that, in accordance with the Agreement, the Government of the Republic of Korea will not permitted non-rubber footwear articles to be exported on or after June 28, 1977, without issuance of export visas covering such articles. We have been assured that the Government of the Republic of Korea will, to the fullest extent possible, assist representatives of the Government of the United States of America in verifying information needed to implement Agreed Minute No. 5 of the Agreement as added by this exchange of letters.

"It is understood that all non-rubber footwear articles that are imported without an export visa, pursuant to Agreed Minute No. 5 of the Agreement as added by this exchange of letters, will be counted in accordance with paragraph 2(d)(ii) of the Agreement as if such articles were exported prior to June 28, 1977.

"It is further understood that, without prejudice to its own laws and regulations, the Government of the Republic of Korea recognizes that the Government of the United States of America will, consistent with its laws and regulations, in the future consider non-rubber footwear articles to be exported on the actual date that the articles finally depart the country of exportation for the United States.

"I would appreciate your confirming that the proposal to add Agreed Minute No. 5 of the Agreement, and the other points covered in this letter, are acceptable to your Government".

I have further the honor to confirm that the proposal contained in your note is acceptable to the Government of the Republic of Korea.

Accept, Sir, the renewed assurances of my highest consideration.

Sincerely Yours,

YOONSAE YANG,
Minister.

2. *Letters from the Acting Special Trade Representative to the Commissioner of Customs Regarding Implementation of the New Agreed Minutes.*

THE SPECIAL REPRESENTATIVE
FOR TRADE NEGOTIATIONS,
Washington, D.C., August 5, 1977.

V 42162 AUG 22 77 UM

Mr. ROBERT CHASEN,
Commissioner,
U.S. Customs Service,
Department of the Treasury,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: We have exchanged letters of August 4, 1977, with the representatives of the Governments of the Republic of China and Korea, concerning the orderly marketing agreements on non-rubber footwear concluded between each of those Governments and the Government of the United States of America. These letters state, in pertinent part; as follows:

(Applicable to the Agreement with the Republic of China.)

"• • • add the following paragraph as Agreed Minute No. 7 of the Agreement:

"7. For the initial period of the Agreement, paragraph 2(c) shall be administered as follows: all non-rubber footwear articles exported from the Republic of China on or after June 28, 1977, will be denied importation for consumption by the Government of the United States of America unless such articles have been issued an export visa by the Government of the Republic of China, or unless the Government of the United States of America determines that any such articles that were not issued visas were exported on carriers that (i) were loaded with such footwear articles prior to June 28, 1977; (ii) departed from the Republic of China prior to July 6, 1977; and (iii) were entered, or withdrawn from warehouse for consumption in the United States prior to September 1, 1977."

(Applicable to the Agreement with the Republic of Korea.)

"• • • add the following paragraph as Agreed Minute No. 5 of the Agreement:

"5. For the initial period of the Agreement, paragraph 2(c) shall be administered as follows: all non-rubber footwear articles exported from the Republic of Korea on or after June 28, 1977, will be denied importation for consumption by the Government of the United States of America unless such articles have been issued an export visa by the Government of the Republic of Korea, or unless the Government of the United States of America determines that any such articles that were not issued visas were exported on carriers that: (i) were loaded with such footwear articles prior to June 28, 1977; (ii) departed from the Republic of Korea prior to July 6, 1977; and (iii) were entered, or withdrawn from warehouse for consumption in the United States prior to September 1, 1977."

Pursuant to the authority delegated by operative paragraph (6) of Proclamation 4510 of June 22, 1977, you are directed to implement immediately the provisions quoted above by allowing entry, or withdrawal from warehouse for consumption of non-rubber footwear articles (as defined in the Agreements) that meet the criteria specified in the Agreed Minutes quoted above. You are directed to utilize the date shown on the bill of lading in determining whether those criteria are met. In the absence of a bill of lading or a legible date on a bill of lading, and in the absence of evidence to the contrary, you are authorized to presume that non-rubber footwear articles were loaded prior to June 28, 1977, taking into account the following assurances that have been received from the Governments of the Republics of China and Korea:

"• • • the Government(s) of the (Republics of China and Korea have) not permitted non-rubber footwear articles to be exported on or after June 28, 1977, without issuance of export visas covering such articles. The Government(s) of the (Republics of China and Korea) will, to the fullest extent possible, assist representatives of the Government of the United States of America in verifying information needed to implement (the) Agreed Minute(s) • • • ."

This letter will be published in the FEDERAL REGISTER.

Sincerely,

WILLIAM B. KELLY, JR.,
Acting Special Representative for Trade Negotiations.

Mr. ROBERT CHASEN,
Commissioner,
U.S. Customs Service,
Department of the Treasury,
Washington, D.C. 20229.

AUGUST 6, 1977.

DEAR MR. COMMISSIONER: My letter to you of August 5, 1977 set forth the text of an Agreed Minute (the "Agreed Minute") that had been added to the orderly marketing agreements on non-rubber footwear concluded between the Government of the United States of America and the Governments of the Republics of China and Korea (the "Agreements"). My letter asked that you begin immediately to implement the Agreed Minute by allowing entry, or withdrawal from warehouse for consumption of non-rubber footwear articles that met the criteria specified therein.

You are hereby directed to count all non-rubber footwear articles that are entered pursuant to the Agreed Minute in accordance with paragraph 2(d)(ii) of the Agreements, as if such articles were exported prior to June 28, 1977.

This letter will be published in the FEDERAL REGISTER. In addition, pursuant to operative paragraph (5) of Proclamation 4510 of June 22, 1977, appropriate changes in Part 2 of the Appendix to the Tariff Schedules of the United States will be published in the FEDERAL REGISTER.

Sincerely,

GEZA FEKETEKUTY,
Acting Special Representative for Trade Negotiations.

Mr. ROBERT CHASEN,
Commissioner,
U.S. Customs Service,
Department of the Treasury,
Washington, D.C. 20229.

AUGUST 12, 1977.

DEAR MR. CHASEN: Reference is made to Mr. Kelly's letter to you of August 5, 1977, in which he reported that we had added the following paragraph as an Agreed Minute to the orderly marketing agreements on non-rubber footwear with the Republics of China and Korea:

"For the initial period of the Agreement, paragraph 2(c) shall be administered as follows: all non-rubber footwear articles exported from the Republics of China or Korea on or after June 28, 1977, will be denied importation for consumption by the Government of the United States of America unless such articles have been issued an export visa by the Governments of the Republics of China or Korea, or unless the Government of the United States of America determines that any such articles that were not issued visas were exported on carriers that (i) were loaded with such footwear articles prior to June 28, 1977; (ii) departed from the Republic of China prior to July 6, 1977; and (iii) were entered, or withdrawn from warehouse for consumption in the United States prior to September 1, 1977."

Pursuant to the authority delegated by operative paragraph (6) of Proclamation 4510 of June 22, 1977, and in order to carry out the Agreements as amended by the Agreed Minute quoted above, you are directed to consider the criterion that non-rubber footwear was "exported on [a] carrier[s] that • • • departed from the [Republic of China or Korea] prior to July 6, 1977" as having been fulfilled if non-rubber footwear physically departed by ship from the Republic of China or Korea prior to July 6, 1977, regardless of whether such footwear was on board a ship that subsequently returned to one of those countries. Any non-rubber footwear entered, or withdrawn from warehouse for consumption as a result of this directive should be counted in accordance with paragraph 2(d)(ii) of the orderly marketing agreements.

This letter will be published in the FEDERAL REGISTER.

Sincerely,

GEZA FEKETEKUTY,
Acting Special Representative for Trade Negotiations.

3. *Changes to be Made in Part 2 of the Appendix to the Tariff Schedules of the United States.*

Headnote 3(b) of subpart A, part 2 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is modified by deleting the period at the end thereof, substituting a comma therefor, and adding the following: "or unless the appropriate official of the U.S. Customs Service determines that any such footwear that was not issued a visa—

(i) Was exported on a carrier that was loaded with such footwear prior to June 28, 1977;

(ii) Departed the foreign country involved on such carrier prior to July 6, 1977; and

(iii) Was entered prior to September 1, 1977."

4. *Letter from the Special Trade Representative to the Commissioner of Customs Regarding Description of Import Visas and Requests from the Embassy of the Republic of China.*

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

JULY 22, 1977.

DEAR MR. COMMISSIONER: I would like to draw your attention to Presidential Proclamation 4510, of June 22, 1977, implementing import relief on non-rubber footwear, and to my letter to you of June 21, 1977, containing certain instructions with respect to the administration of such import relief.

The first sentence of the third paragraph of my letter described the export visa to be used by the Republics of China and Korea with respect to footwear exports as "An original stamp on the special customs invoice • • •". I would like to amend this description of the export visa to read as follows: "The export visa shall be an original stamp on the invoice (special customs invoice, or successor document, or commercial invoice when such form is used) • • •".

In addition, importers of shipments from the Republic of China whose shipments are denied entry because they are not accompanied by a visa or because of a discrepancy between the actual merchandise and the category indicated on the visa may seek assistance from the Commercial Attache, Embassy of the Republic of China, 2311 Massachusetts Avenue NW., Washington, D.C. 20008, telephone number NO 7-9000. You are directed to permit entry into the United States for consumption and withdrawal from warehouse for consumption of designated shipments of footwear produced or manufactured in the Republic of China and exported to the United States, notwithstanding that the designated shipment or shipments do not meet the visa requirements set forth in my letter of June 21, whenever requested to do so in writing the Embassy of China. Such shipments shall be charged against the appropriate restraint level.

This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT S. STRAUSS.

RICHARD R. RIVERS,
Acting Special Representative for Trade Negotiations.

RAILROAD RETIREMENT BOARD

RAILROAD RETIREMENT SUPPLEMENTAL ANNUITY PROGRAM

Determination of Quarterly Rate of Excise Tax

In accordance with directions in Section 3221(c) of the Railroad Retirement Tax Act (26 U.S.C. § 3221(c)), the Railroad Retirement Board has determined that the excise tax imposed by such Section 3221(c) on every employer, with respect to having individuals in his employ, for each man-hour for which compensation is paid by such employer for services rendered to him during the quarter beginning October 1, 1977, shall be at the rate of twelve and one-half cents.

In accordance with directions in Section 15(a) of the Railroad Retirement Act of 1974, the Railroad Retirement Board has determined that for the quarter beginning October 1, 1977, 15 percent of the taxes collected under Sections 3211(b) and 3221(c) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Account and 85 percent of the taxes collected under such Sections 3211(b) and 3221(c) plus one hundred percent of the taxes collected under Section 3221(d) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Supplemental Account.

Dated: August 15, 1977.

By Authority of the Board.

R. F. BUTLER,
Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 20140; (70-6043)]

CENTRAL POWER AND LIGHT CO.

Proposed Issue and Sale of First Mortgage Bonds at Competitive Bidding

AUGUST 16, 1977.

Notice is hereby given that Central Power and Light Company, ("CP&L") P.O. Box 2121, Corpus Christi, Texas 78403, an electric utility subsidiary of Central and South West Corporation, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(a) and 7 of the Act and Rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

CP&L proposes to issue and sell, pursuant to the competitive bidding requirements of Rule 50 under the Act, $75,000,000 principal amount of its First Mortgage Bonds, Series O, to be dated October 1, 1977 and to mature October 1, 2007 ("Bonds").

The annual interest rate and the redemption prices of the Bonds, and the price to be paid to CP&L therefor (which will not be less than 99% nor more than 102.75%), will be determined through competitive bidding. The Bonds will have refunding protection until October 1, 1982.

The Bonds will be issued under and secured by the CP&L Indenture, dated November 1, 1943, under which The First National Bank of Chicago and R. R. Manchester are Trustees, as previously amended ("Indenture"), and to be further amended by a proposed supplemental indenture to be dated October 1, 1977 ("Supplemental Indenture").

CP&L States that the Supplemental Indenture amends various computations under the Indenture. The first of these amendments deletes the requirement that there be deducted, in computing net earnings for the purpose of determining the ability of CP&L to issue additional bonds, an amount aggregating not less than 15% of gross operating revenues on account of "maintenance and repairs and as charges or provisions for depreciation, retirements, renewals and replacements, and/or amortization" and replaces it with a requirement that there be deducted "as charges or provisions for depreciation, retirements, renewals and replacements and/or amortization" amounts aggregating a "required percentage" of CP&L's depreciable bondable property. It is stated by CP&L that the required percentage will presently be set at 3.2% of the arithmetical average of the amount of its depreciable bondable property during the calendar period. The amended provision would allow adoption of a different percentage by Commission order, issued after notice and opportunity for hearing, if the Commission finds that 3.2% is no longer appropriate.

The second Indenture computation which is proposed to be amended is that relating to the satisfaction of the renewal fund covenant. The Supplemental Indenture would delete the equivalent 15% revenue based maintenance deduction and leave the depreciable property based deduction increased to 3.2% from its present 2¼%.

The Supplemental Indenture also makes a related change from the pattern of previous supplemental indentures with respect to the limitation on dividends on common stock. The Supplemental Indenture provides that in the computation of available retained earnings in future periods while the Bonds are outstanding, there be deducted an annual provision for depreciation at least equal to the "required percentage" of average depreciable property, rather than, as in the case of supplemental indentures respecting previous series of bonds, the greater of such amount or 15% of operating revenues after deducting costs of purchased power.

CP&L states that inasmuch as the Indenture lacks bondholder consent provisions with respect to series created prior to June 1, 1974, the amendments on earnings coverage and renewal fund computations could probably not be made effective until June 1, 2004.

CP&L states, as its reason for effecting the amendments, that the inflation of operating revenues due primarily to the recovery of greatly increased fuel costs through fuel adjustment clauses has made it clear that deductions based on operating revenues bear no logical relationship to protecting bond-holder interests and that deductions based instead on utility plant are more appropriate.

CP&L states that proceeds to be derived from the sale of the Bonds (exclusive of accrued interest and after deducing expenses of issue) will be used towards future construction and fuel exploration and development expenditures and to repay short-term borrowings incurred or expected to be incurred to finance construction expenditures. Approximately $38,000,000 of short-term borrowings are expected to be out standing as of October 6, 1977, the planned date of issuance of the Bonds. CP&L states that no funds generated from the Bonds nor any of the borrowings retired thereby will be or have been utilized to pay the cost of facilities which would not be needed to provide service to its customers if it were not part of the Central and South West System. CP&L further states that no expenditures will be made by it for the construction or acquisition of any facility not so needed prior to the time all funds covered by this Declaration have been expended. In addition, CP&L states that, for the purposes of the foregoing representation, it is assumed that none of the facilities, construction or acquisition of which would be part of any proposal forming the subject of the proceedings in Central and South West Corporation, et al. (Admin. Proce. File No. 3-4591), would be needed to provide service to customers of CP&L if it were not part of the Central and South West System.

It is stated that the construction and fuel exploration and development expenditures of CP&L for the years 1977 through 1979 are estimated at $223,667,000, $254,699,000 and $215,771,000 respectively. Approximately $68,554,000 of the 1977 estimated total had been expended at June 30, 1977.

It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction. The fees and expenses to be incurred in connection with the proposed transaction are estimated at $160,000 including $26,000 in legal fees and $15,000 in accountants fees.

V 42 162 AUG 22 77 UMI

Notice is further given that any interested person may, not later than September 12, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, and reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-24250 Filed 8-19-77;8:45 am]

MIDWEST STOCK EXCHANGE, INC.

Application for Unlisted Trading Privileges and of Opportunity for Hearing

AUGUST 16, 1977.

The Midwest Stock Exchange, Inc. has filed an application with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the security of the company as set forth below, which security is listed and registered on one or more other national securities exchanges:

The Lehman Corp. (Maryland), Common Stock—$1 Par Value, File No. 7 4976.

Upon receipt of a request, on or before September 1, 1977 from any interested person, the Commission will determine whether the application with respect to the company named shall be set down for hearing. Any such request should state briefly the title of the security in which he is interested, the nature of the interest of the person making the request, and the position he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on the said application by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549 not later than the date specified. If no one requests a hearing with respect to the particular application, such application will be determined by order of the Commission on the basis of the facts stated therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-13861; SR-NASD-77-11]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Filing of Proposed Rule Change by the National Association of Securities Dealers, Inc., and Order Approving Proposed Rule Change

AUGUST 15, 1977.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act"), as amended by Pub. L. No. 94-29, § 16 (June 4, 1975), notice is hereby given that on June 14, 1977, the National Association of Securities Dealers, Inc. (the "NASD"), 1735 K Street, NW., Washington, D.C. 20006, filed with the Commission copies of a proposal to adopt a policy relating to Section 9 of the NASD's Code of Arbitration Procedure. That proposal, as modified by an amendment submitted on July 20, 1977 (the "Proposal"), is to adopt a resolution providing that all persons serving on the NASD's Arbitration panels be paid an honorarium of $50 for each hearing session in which they participate while in the performance of their duties.

Interested persons are invited to submit written data, views and arguments concerning the Proposal on or before September 21, 1977. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-NASD-77-11.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of the filing will also be available at the principal office of the NASD.

The Commission finds that the Proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered national securities associations and, in particular, the requirements of Section 15A and the Act and the rules and regulations thereunder.

The Commission finds good cause for approving the Proposal prior to the thirtieth day after the date of publication of notice of filing thereof. It appears that such approval would have an immediate positive impact respecting the resolution of controversies subject to the NASD's arbitration process. In addition, the policy which the NASD has proposed to adopt is similar to currently effective policies of various national securities exchanges.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the Proposal be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 13846; File No. SR-NASD-77-1]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Withdrawal of Proposed Rule Change

AUGUST 10, 1977.

The National Association of Securities Dealers, Inc. ("NASD"), by letter dated June 10, 1977, has withdrawn from Commission consideration a proposed rule change (the "Proposal") set forth in the above-referenced filing submitted pursuant to Section 19(b) of the Securities Exchange Act of 1934 (15 U.S.C. § 78s(b)) and Rule 19b-4 thereunder (17 CFR 240.19b-4).[1]

The Proposal was to amend Section 4 of the NASD's Code of Arbitration Procedure by adding a new subsection (b) which outlined procedures affecting public-member controversies in amounts not exceeding $500.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

DEPARTMENT OF STATE

Agency for International Development

PROVISION OF PESTICIDES TO SAHEL REGION OF AFRICA

Intent To Waive Certain Requirements

AGENCY: Agency for International Development.

ACTION: Notice of Intent to Waive Certain Requirements for Provision of Pesticides to the Sahel Region of Africa.

SUMMARY: The Agency for International Development intends to waive certain requirements for provision of pesticides as set forth in Interim Pesticide Procedures, the "Interim Regulations" published in the FEDERAL REGISTER on January 7, 1976 (41 FR 1297). This waiver will be made pursuant to Section (a) of the regulations.

[1] SR-NASD-77-1 was filed on January 3, 1977. Notice of submission of the Proposal was given in Securities Exchange Act Release No. 13137 (January 5, 1977), 11 SEC Docket 1361 (January 18, 1977), and the terms of substance of the Proposal were published at 42 FR 2735 (January 18, 1977).

DATES: Comments on this proposed action must be received on or before September 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. Frederick Whittemore, Room 413F, Rosslyn Plaza, Arlington, Virginia 20523, (703) 235-1497.

Mail address, Office of Agriculture, AID, Department of State, Washington, D.C. 20523.

SUPPLEMENTARY INFORMATION: The following table sets for the the pesticides, the crops on which they will be used, and the primary pests of those crops in the Sahelian countries:

Crop	Pesticide	Pests
Maize	Diazinon, endosulfan, malathion, trichlorfon	*Heliothis armigera*—corn ear worm. *Sesamia calamistis*—stem borer. *Sesamia botanephaga*—stem borer. *Chilo orichal—cocichella*—shoot worm or bud worm. *Busseola fusca*—stem borer.
Cowpeas	Diazinon	*Acanthomia horrida*—plant bug. *Acanthomia lomentoscollis*—plant bug. *Helopeltis schoutendeni*—plant bug. *Taeniothrips sjostedti*—thrips. *Cirgus sp.*—leaf-feeding beetle. *Mylabris sp.*—leaf-feeding beetle.
Groundnuts.	Diazinon, malathion, trichlorfon	*Spodoptera littoralis*—leaf worm. *Alcidodes dentipes*—weevil. *Systates spp.*—weevil. *Heliothis armigera*—leaf worm. *Marasa testualis*—stem borer.
Rice	Malathion	*Charlocnema pulla*—beetle. *Sesselia pusilla*—beetle. *Trichispa sericea*—Africa rice hispa. *Diopsis thoracica*—stalk-eyed borer. *Chilopartellus spp.*—maize borer.
Sorghum	Diazinon, dimethoate, lindane, malathion	*Busseola spp.*—stem borers. *Sesamia spp.*—stem borers. *Atherigona sp.*—sorghum shoot fly. *Masalia species*—leaf feeding caterpillars.
Millet	Same as sorghum	Same as sorghum.
Wasteland	Fenitrothion	Desert locust. African migratory locust. Grasshoppers.

BACKGROUND: A.I.D. has, since 1972, participated with other international donors in providing financial assistance to the Office for Special Relief Operations of the Food and Agriculture Organization of the United Nations ("FAO"). This Office was established in that year in response to the non-availability of basic food crops to persons living in the Sahelian zone of certain sub-Saharan countries which had reached a crisis stage. Drought had decimated herds of grazing and domestic animals in the more northern areas of these countries and had forced the human population there to migrate south. Although some production of basic food crops was still possible in these more southerly areas of the affected countries, the annual production of essential food crops had reached an alarmingly low level by 1972 as is shown in the following tables:

Annual production estimates in 1,000 metric tons of Millet in Chad, Niger, Upper Volta, Mali, Senegal, Mauritania, and the Gambia, 1971-1976

1971	1972	1973	1974	1975	1976
2,774	2,111	2,100	2,870	2,785	3,131

Annual production estimates in 1,000 metric tons of other basic food crops in Niger, Senegal, and Upper Volta, 1971-1976

	1971	1972	1973	1974	1975	1976
Sorghum	846	779	699	1,067	1,105	1,116
Maize	205	154	188	209	200	211
Rice	422	289	312	365	416	413
Peanuts (groundnuts)	(1)	(1)	1,076	1,501	1,616	(1)

[1] Not available.

Faced with these extreme conditions of famine, starvation, and death, the international donor community provided food aid to the affected groups in the quantities shown in the following table:

Metric tons of food aid to Sahelian countries 1972-73 to 1975-76

1972-73	1973-74	1974-75	1975-76
471,000	137,747	389,352	131,912

Although drought conditions began to ease somewhat in 1973, and some food crops could again be grown in the more arid areas, severe pest outbreaks, particularly of grasshoppers, soon began to occur and, by 1974, heavy losses were being experienced. For example, farmers attempting to grow crops in flood recession areas of Mauritania, Mali and Senegal were forced to reseed two and sometimes three times, thus causing an estimated production loss of 30 to 60 percent. In Chad, Niger, Northern Cameron, Benin (formerly Dahomey), Togo, Upper Volta, Senegal and Mauritania, 75 to 80 percent of the millet crop was destroyed over several hundred thousand hectares. In Mali alone, 200,000 hectares, representing 16 percent of the total land under millet cultivation, suffered 80 to 100 percent losses. This represented a food crop loss of between 77,000 and 96,000 metric tons.

To ameliorate these conditions and to enable the affected countries to become at least partially self-sufficient in basic food crops, the international donor community, including A.I.D., initiated under the leadership of FAO a program to supply pesticides to be prepositioned in the affected countries and to be used for the protection of basic food crops in the event of pest outbreaks.

Value of pesticides (in millions of U.S. dollars) provided to Sahelian countries for use in the crop years 1973-74 to 1976-77

1973-74	1974-75	1975-76	1976-77
0.7	3.2	1.8	2.7

A long-term assistance program to the countries of the Sahel region is now being formulated through the FAO, including projects to strengthen the national plant protection services of the countries involved and to develop integrated pest management programs for basic food crops. Thus the FAO emergency food crop protection program should end with the present fiscal year.

RELATIONSHIP TO A.I.D. INTERIM PESTICIDE PROCEDURES: Although A.I.D.'s contributions to the Sahelian relief operations in previous years were made prior to the entry into force of the A.I.D. Interim Pesticide Procedures, the fiscal year 1977 contribution is subject to them. The Procedures provide that A.I.D. will not provide pesticides that have not been registered by the Environmental Protection Agency ("EPA") for the specific uses for which procurement is intended. Such registered use involve both the crop and the target (pest) vector. A.I.D. may, however, provide assistance for procurement and use of unregistered pesticides if they are to be used on crops and associated vectors not grown or found in the United States and if the determination is made by the Administrator that the benefits to be derived from their use outweigh potential adverse effects and no preferable alternatives are available.

A.I.D. has identified a number of crop/pest/pesticide combinations under the Grant which meet the needs of the Sahelian countries as identified by the respective national directors of plant protection services and endorsed by FAO. It has been determined that procurement and use of these pesticides come within the approval authority of the Administrator because the target pests are not found in the United States. In addition, the Administrator has determined that the benefits of the procurement and use of these pesticides outweigh the potential adverse effects and that no preferable alternatives are available.

BASES FOR DETERMINATIONS: The bases for these determinations are as follows: 1. *Control of pests attacking sorghum, maize, rice, groundnuts and cowpeas.*

The pesticides to be provided for use on sorghum, maize, rice, groundnuts and compeas are registered with the EPA for use on those corps. However, the primary pests against which the pesticides will be used in the Sahel region do not appear on the EPA registered labels, and therefore, these pesticides cannot be considered to be registered with EPA for this use. The pests to be controlled are not

V 42 162 AUG 22 77 UMI

found in the United States. The kinds of pests against which a pesticide is used does not affect the degree of safety to man and the environment involved in the use of the pesticide,[1] provided that the rate and frequency of application remain the same. Safety to man and the environment is primarily affected by the interaction of the pesticide and the specific corp on which it is used. Therefore, EPA registration of the above-named pesticides for use on the indicated crops is strong evidence that the use of these pesticides will not lead to adverse effects when used in accordance with the instructions on the EPA-approved label.

2. *Control of pests attacking millet.* The pesticides diazinon, dimethoate, lindane and malathion are being approved for use under the Grant on millet against the pests indicated with respect to sorghum. These pests are not vectors found in the United States. Although there are EPA registered pesticides for use on stored millet, none are available for use on growing millet because it is not a crop grown commercially in the United States for human consmption, although small amounts are produced for animal feed. Millet is a staple human food in the Sahel. The pesticides selected for use on millet are the same as those registered with the EPA for use on sorghum because these corps are essentially similar, both being small grains which are generally husked and cooked before consumption. These pesticides have been used successfully for the control of millet pests in the Sahel, and there is no evidence that their use has caused adverse effects on either man or the environment.

3. *Control of locusts and grasshoppers.* The pesticide fenitrothion has been selected for use on wasteland areas against the Desert Locust, the African Migratory Locust and local species of grasshoppers. None of these pests are found in the United States. The effective control of locusts and grasshoppers is based upon the use of pesticides in their breeding areas located in non-cropped lands, thereby minimizing their impact on agricultural crops and also the contamination of cropped lands by the pesticide. Although the Desert Locust and the African Migratory Locust have not caused general probelms in the Sahelian countries in recent years, they continue to be found in the dispersed or solitary phase and the threat of population build-up and their entering into the gregarious migratory phase is ever present. Furthermore, local species of grasshoppers have caused extensive crop losses in the Sahelian zone in recent years, and their depredations are expected to continue absent the use of the pesticide necessary for their control.

In the past, the pesticide dieldrin was used extensively in Africa for the control of locusts and grasshoppers. In response to environmental concerns expressed by the United States and certain other donors, extensive research has been underway for over 15 years to find more environmentally acceptable pesticides. The most acceptable substitute for dieldrin found to date is fenitrothion which has been used widely in Africa in recent years for control of these pests.

The pesticides fenitrothion, malathion, dimethoate, diazinon and lindane have been provided under the FAO program in the Sahel since 1975, and there is no evidence of any adverse effects resulting from their use.

These determinations have been made in consultation with the EPA. This publication constitutes notice of the impending approval of these determinations by the A.I.D. Administrator.

Dated: August 17, 1977.

GOLER T. BUTCHER,
Assistant Administrator for Africa.

ADVISORY COMMITTEE ON THE LAW OF THE SEA

Closed Meeting

In accordance with section 10(d) of the Federal Advisory Committee Act (P.L. 92-463), as amended by P.L. 94-409 section 5(c), notice is hereby given that the Advisory Committee on the Law of the Sea will meet in closed session on Friday, September 9, 1977. The meeting will convene 9:00 a.m. in the Dean Acheson Conference Room (West Auditorium), U.S. Department of State, 22nd and C Streets NW., Washington, D.C.

The purpose of the meeting is to discuss the informational composite negotiating text emanating from the Sixth Session of the Third United Nations Conference on the Law of the Sea and policy options regarding the Conference. During the session, proposals classified under the provisions of Executive Order 11652 will be discussed.

The discussion will involve substantive policy proposals under review in the NSC Policy Review Committee relating to issues which the United States will be negotiating with selected foreign delegation members during the coming intersessional period. The proposals are exempt under section (c) (1) of 5 USC 552b, and are required to be withheld from disclosure in the public interest.

The proposals cover such subjects as our overall posture towards the LOS Conference, the nature of a deep seabeds mining regime and proposed deep seabed mining legislation, and other related topics involving U.S. national security matters. Premature disclosure of the proposals could adversely affect our foreign relations interest and jeopardize the negotiations.

The Advisory Committee on the Law of the Sea represents a broad cross-section of industries, professions, academic disciplines and other public groups. As such, it will comprehensively review the proposals which will come before the Conference.

Dated: August 11, 1977.

F. S. M. HODSOLL,
Director,
Office of the Law of the Sea.

[Public Notice CM-7, 102]

SHIPPING COORDINATING COMMITTEE SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The working group on ship design and equipment of the Subcommittee on Safety of Life at Sea concerned with nuclear ships will hold an open meeting at 9:30 a.m. on Tuesday, September 13, 1977, in Room 8236 of the Department of Transportation, 400 Seventh Street SW., Washington, D.C.

The purpose of this meeting will be to discuss the proposed IMCO Code of Safety for Nuclear Merchant Ships and to prepare comments on the eight draft chapters for submission to IMCO.

Requests for further information on the meeting should be directed to CDR. John Deck III, United States Coast Guard (G-MMT-4), Washington, D.C. 20590. He may be reached by telephone on (area code 202) 426-2197.

The Chairman will entertain comments from the public as time permits.

Dated August 11, 1977.

CARL TAYLOR, Jr.,
Acting Director,
Office of Maritime Affairs.

[Public Notice CM-7, 101]

STUDY GROUP 5 OF THE U.S. NATIONAL COMMITTEE OF THE INTERNATIONAL TELEGRAPH AND TELEPHONE CONSULTATIVE COMMITTEE (CCITT)

Notice of Meeting

The Department of State announces that Study Group 5 of the U.S. CCITT National Committee will meet on September 15, 1977, at 10 a.m. in Room B841 of the Department of Commerce, 14th Street NW (between E Street and Constitution Avenue), Washington, D.C. This Study Group deals with matters in telecommunications relating to the development of the international digital data transmission services.

The agenda for the September 15 meeting will include consideration of the following:

1. Approval of draft Provisional Recommendations as recommended by CCITT Study Group VII. (CCITT Circular Letter No. 35).

2. Consideration of U.S. contributions to the December 1977 Working Party meeting of CCITT Study Group XVII and to the April 1978 meeting of Study Group VII.

3. Other business.

All participants are requested to use the main entrance to the Department of Commerce on 14th Street NW. Members of the general public who desire to attend the meeting on September 15 will be admitted up to the limit of the meeting room.

Dated: August 15, 1977.

ARTHUR L. FREEMAN,
Chairman,
U.S. National Committee.

[1] This is explicitly recognized in EPA Pesticide Enforcement Policy Statement No. 5.

SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The working group on subdivision and stability of the Subcommittee on Safety of Life at Sea, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting at 10 a.m. on Tuesday, September 13, 1977, in Room 8238 of the Department of Transportation, 400 Seventh Street NW., Washington, D.C.

The purpose of the meeting will be to review documents for the 21st session of the IMCO Subcommittee on Subdivision, Stability and Load Lines. The items for discussion are:

Stability of ships in ballast condition.

Damage stability of offshore supply vessels.

Load line requirements for mobile offshore drilling units.

Harmonization of the subdivision and stability requirements of various codes and conventions.

Requests for further information on the meeting should be directed to Mr. Edward H. Middleton, United States Coast Guard, 202-426-2170.

The Chairman will entertain comments from the public as time permits.

Dated: August 12, 1977.

CARL TAYLOR, Jr.,
Acting Director, Office of Maritime Affairs.

CHEMICAL TRANSPORTATION INDUSTRY ADVISORY COMMITTEE, SUBCOMMITTEE ON SHIPS' STORES

Open Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 1) notice is hereby given of a meeting of the Chemical Transportation Industry Advisory Subcommittee on Ships' Stores to be held on September 7, 1977, beginning at 9:30 a.m. in Room 8334, Nassif Building, 400 7th Street SW., Washington, D.C. 20590.

At this meeting, the areas of interest, concern, and responsibility of the Subcommittee and the format for revising the regulations for ships' stores will be established.

The agenda for this meeting is as follows:

1. Call to Order.
2. Opening Remarks.
3. Subcommittee Status Report.
4. Committee Comments and Recommendations.
5. Any Other Business Brought Before the Committee.
6. Adjournment.

Attendance is open to the interested public. It is requested that all knowledgeable, interested parties provide advice and assistance to this Subcommittee at this meeting. The Chairman will invite members of the public to present statements at the meeting. Information may be obtained from Captain C. E. Mathieu, Commandant (G-MHM/83), U.S. Coast Guard, Washington, D.C. 20590, 202-426-2306. Any members of the public may present a written statement to the Subcommittee at any time.

Dated: August 18, 1977.

H. G. LYONS,
Captain, U.S. Coast Guard, Acting Chief, Office of Merchant Marine Safety.

Federal Railroad Administration

[BS-AP-No 1288]

CONSOLIDATED RAIL CORP.

Hearing

The Consolidated Rail Corporation (Conrail) has petitioned the Federal Railroad Administration seeking approval of a proposed modification of the signal system currently installed on its trackage between Columbus and Bradford in the State of Ohio. The proposed modification would involve the removal of automatic cab signal equipment installed on approximately 83 miles of

V 42 162 AUG 22 77 UM V

trackage between Columbus and Bradford.

The Railroad Safety Board has decided to hold a public hearing on this proposal before entering its final decision in this proceeding. Accordingly, a public hearing is hereby set for 10 a.m. on September 20, 1977 in Room 235 of the Federal Building, which is located at 850 Marconi Boulevard in Columbus, Ohio.

The hearing will be an informal one and will be conducted in accordance with the provisions of section 211.25 of the Federal Railroad Administration, Rules of Practice (49 CFR Part 211). A representative designated by the Railroad Safety Board will conduct this hearing.

The hearing will not be an adversary proceeding and, therefore, there will be no cross-examination of persons presenting statements. The representative of the Railroad Safety Board will make an opening statement outlining the scope of the hearing and will provide interested persons with an opportunity to make statements or rebuttal statements. Additional procedures, if necessary, for the conduct of the hearing will be announced at the start of the hearing.

This notice is issued under the authority of Section 25 of the Interstate Commerce Act; 49 U.S.C. 26; and § 149 (g) of the regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(g).

Issued in Washington, D.C. on August 15, 1977.

DONALD W. BENNETT,
Chairman,
Railroad Safety Board.

[FR Doc.77-24179 Filed 9-19-77;8:45 am]

DEPARTMENT OF THE TREASURY

Monetary Offices

FINANCIAL RECORDKEEPING AND REPORTING OF CURRENCY AND FOREIGN TRANSACTIONS

Modification of Reporting Requirement

Notice is hereby given that, pursuant to the authority contained in Sections 241 and 242 of the Currency and Foreign Transactions Reporting Act, 84 Stat. 1124, and 31 CFR § 103.46, and the authority contained in section 6001 of the Internal Revenue Code of 1954, persons having a financial interest in 25 or more foreign financial accounts who are required to file a Form 4683 (Information Return on Foreign Bank, Securities and Other Financial Accounts) with their federal income tax returns in 1977 will be permitted to follow a modified filing procedure, as follows:

A person who has a financial interest in 25 or more foreign financial accounts should note that fact on Part II of the Form 4683 that he files; he is not required to provide the information requested in Part II of the form. He is, however, still subject to the provisions in instruction K, which require him, when requested by the Internal Revenue Service, to provide such information concerning each account as may be necessary to determine his federal income tax liability.

This modification in filing procedure is designed to minimize the practical difficulties of reporting a large volume of detailed information concerning a large number of accounts by taxpayers with extensive international interests, while insuring that the purpose and objectives of the statute are carried out.

Dated: August 15, 1977.

BETTE B. ANDERSON,
Under Secretary.
JEROME KURTZ,
Commissioner of Internal Revenue.

INTERSTATE COMMERCE COMMISSION

[Notice No. 462]

ASSIGNMENT OF HEARINGS

AUGUST 17, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 142797 Sub 1, Fulton Oregon Air, Inc. now being assigned November 1, 1977 (3 days) at Salem, Oreg., in a hearing room to be later designated.

MC-C-9455 Freeport Fast Freight, Inc., et al v. Clairmont Transfer Company now being assigned November 8, 1977 (2 days) at Chicago, Ill., in a hearing room to be later designated.

MC 65697 Sub 52, Theaters Service Co., Inc. now being assigned October 3, 1977 (2 weeks) for prehearing conference at Atlanta, Ga. and November 28, 1977 (2 weeks) for continued prehearing conference at Atlanta, Ga., in hearing rooms to be later designated.

MC 83835 Sub 142, Wales Transportation, Inc. now being assigned October 11, 1977 (1 day) at Dallas, Tex., and will be held in Room 5A15-17, Federal Building, 1100 Commerce Street.

MC 142945 (Sub-No. 1), Glenn Brothers Meat Company, now being assigned November 1, 1977, at Chicago, Ill. (2 days), in a hearing room to be later designated.

MC 93840 (Sub-No. 24), W. W. Gless, DBA Gless Bros., MC 115651 (Sub-No. 27), Kaney Transportation, Inc., MC 119702 (Sub-No. 49), Stahly Cartage Co., MC 124411 (Sub-No. 11), Sully Transport, Inc.

MC 126539 (Sub-No. 26), Katuin Bros., Inc. and MC 142716 C & L Trucking, Inc., now being assigned for November 3, 1977 (2 days), at Chicago, Ill., in a hearing room to be later designated.

MC 103993 (Sub-No. 879), Morgan Drive Away, Inc., now being assigned November 7, 1977 (2 days), at Chicago, Ill., in a hearing room to be later designated.

MC 128370 (Sub-No. 22), Redlehs Interstate, Inc., now being assigned November 9, 1977, at Chicago, Ill. (3 days), in a hearing room to be later designated.

MC 142664 Sub 2, Import Dealers Service Corp. now assigned September 12, 1977 at Los Angeles, Calif. is cancelled, application dismissed.

AB 14 Sub No. 2 Northwestern Pacific Railroad Company Abandonment Between Detour and San Rafael in Marin County, Calif., now assigned September 13, 1977 at San Rafael, Calif., will be held in Counsel Chamber, First Floor, City Hall, 1400 5th Ave.

MC 113678 Sub No. 659 Curtis, Inc. now being assigned September 26, 1977 (1 week) for hearing in San Francisco, Calif., in a hearing room to be later designated.

MC 141158, Ronald Dean Clinkenbeard Common Carrier Application now asisgned September 14, 1977 at Los Angeles, Calif., is cancelled, application dismissed.

MC 117604 (Sub-No. 11), Meadors Freight Line, Inc., now assigned September 12, 1977, at Atlanta, Ga., is postponed indefinitely.

MC 5470 Sub 121, Tajon, Inc. now assigned October 11, 1977 at Dallas, Tex. is cancelled.

MC 139381, Spirit of '76 Overland Express, Inc. now assigned September 14, 1977 at Los Angeles, Calif. is being postponed indefinitely.

MC-F-13129, Kaw Transport Co.—Control—Royal Transport, Inc. now assigned September 19, 1977 at Kansas City, Missouri is being postponed indefinitely.

MC 63973 Sub 17, Kaler Freight Lines, Inc. now assigned September 19, 1977, at Des Moines, Iowa is being postponed to a date to be hereafter fixed.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 101TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 10, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 3854 (Sub-No. 37TA), filed July 25, 1977. Applicant: BURTON LINES, INC., 815 Ellis Rd., P.O. Box 11306, Durham Station, Durham, N.C. 27703. Applicant's representative: G. E. Martin, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Building, roofing and insulating boards and panels*, from the plant site of Johns-Manville Sales Corp., at or near Woodstock, Va., to points in Kentucky, for 180 days. Applicant has alo filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Johns Manville Sales Corp., 200 N. Main St., Manville, N.J. 08835. Send protests to: Archie W. Andrews, Dist. Supvr., Bureau of Operations, Interstate Commerce Commission, P.O. Box 26896, Raleigh, N.C. 27611.

No. MC 47912 (Sub-No. 4TA), filed July 27, 1977. Applicant: JONES TRANSFER LINES, INC., P.O. Box 217, Hartford, Wis. 53027. Applicant's representative: Michael S. Varda, 121 S. Pinckney St., Madison, Wis. 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), serving Allenton, Wis.: as an off-route point in connection with presently held regular route operations (present regular route is over U.S. Highway 41 from Milwaukee to junction Wis. Highway 60, west on Wis. Highway 67, thence over Wis. Highway 67 to Mayville, Wis.: and return over the same route), for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Kasten Manufacturing Corp., 536 Main St., Allenton, Wis. 53002. May Steel Corporation, Highway W. South Allenton, Wis. 53002. Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building, and Courthouse, 517 East Wisconsin Ave. Room 619, Milwaukee, Wis. 53202.

No. MC 100666 (Sub-No. 357TA), filed July 25, 1977. Applicant: MELTON TRUCK LINES, INC., P.O. Box 766, 1129 Grimmett Drive, Shreveport, La. 71107. Applicant's representative: Wilburn L. Williamson, Suite 280, National Foundation Life Center, 3535 N.W. 58th Street, Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plywood and composition board*, from the plantsite and warehouse facilities of Day Company in Randolph County, Ga., to points in and east of North Dakota, South Dakota, Nebraska, Colorado and New Mexico, for 180 days. Supporting shipper: Day Company, P.O. Drawer 429, Cuthbert, Ga. 31740. Send protests to: District Supervisor Ray C. Armstrong, Jr., 701 Loyola Avenue, 9038 Federal Bldg., New Orleans, La. 70113.

No. MC 105006 (Sub-No. 6TA), filed July 20, 1977. Applicant: L. L. SMITH TRUCKING, P.O. Box 566, Powell, Wyo. 82435. Applicant's representative: John P. Thompson, 450 Capitol Life Center, Denver, Colo. 80203. Authority sought to operate as *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Chemicals* in containers, drilling muds and drilling additives; (2) *bentonite*, (1) (a) between points in Nevada, New Mexico and Utah, and between points in Nevada, New Mexico and Utah on the one hand, and on the other hand points in Arizona, Colorado, Idaho, Montana, North Dakota and South Dakota and Wyoming (b) between points in Wyoming on the one hand and on the other hand points in Arizona and Idaho; (2) from the Wyoming to points in Nevada, New Mexico and Utah, for 180 days. Supporting shipper: There are 10 statements of support attached to the application, which may be examined at the Interstate Commerce Commission, in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Paul A. Naughton, District Supervisor, Interstate Commerce Commission, Room 105 Federal Bldg. and Courthouse, 111 South Wolcott, Casper, Wyo. 82601.

No. MC 106674 (Sub-No. 246TA), filed July 26, 1977. Applicant: SCHILLI MOTOR LINES, INC., P.O. Box 123, Remington, Ind. 47977. Applicant's representative: Jerry L. Johnson (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Insulation board* (except in bulk), from plantsite and warehouse facilities of the Johns-Manville Sales Corporation at or near Woodstock, Va., to points in Kentucky and Ohio, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: U.S. Gypsum Company, 101 S. Wacker Drive, Chicago, Ill. 60606. Send protests to: Vernon V. Coble, District Supervisor, Interstate Commerce Commission, 600 Federal Building, 911 Walnut Street, Kansas City, Mo. 64106.

No. MC 108461 (Sub-No. 127TA), filed July 26, 1977. Applicant: WHITFIELD TRANSPORTATION, INC., 821 East Pasadena, P.O. Box 7676, Phoenix, Ariz. 85012. Applicant's representative: William S. Richards, 48 Post Office Place, (P.O. Box 2465), Salt Lake City, Utah 84110. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities*, (except Class A and B explosives, commodities which because of their size or weight require special equipment, commodities in bulk and household goods as defined by the Commission) over regular routes, as follows. Between Yuma and Phoenix, Ariz. From Yuma, Ariz., over Interstate Highway 8 to Gila Bend, Ariz.; thence over U.S. Highway 80 to Phoenix, Ariz., and return over the same route, serving all intermediate points between Wellton and Phoenix, Ariz., and points within twenty-five (25) miles of Phoenix, Hyder, and Roll, Ariz., as off-route points. The above authority is to be joined with applicant's existing authority at Phoenix, Ariz., and to the authority of Haywood L. Washum, doing business as Los Angeles-Yuma Freight Lines, which said authority applicant is acquiring in a directly related Section 5 application. Additonally, applicant intends to interline at Phoenix, Ariz. and Yuma, Ariz., and to serve the Commercial Zones of all service points described in the above route, for 180 days. Supporting shippers: There are approximately (366) statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Andrew V. Baylor, District Supervisor, Interstate Commerce Commission, Room 2020 Federal Bldg., 230 N. First Avenue, Phoenix, Ariz. 85025.

No. MC 109692 (Sub-No. 46TA), filed July 27, 1977. Applicant: GRAIN BELT TRANSPORTATION COMPANY, 340 N. James Street, Kansas City, Mo. 66118. Applicant's representative: Warren H. Sapp, 4420 Madison Suite 230, Kansas City, Mo. 64111. Authority sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Gypsum, gypsum products, and building materials*, from the plantsite of the United States Gypsum Co., located at or near Southard, Okla., to points in Colorado, Illinois, Iowa, Kansas, Missouri and Nebraska, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: U.S. Gypsum Company, 101 S. Wacker Drive, Chicago, Ill. 60606. Send protests to: Vernon V. Coble, District Supervisor, Interstate Commerce Commission, 600 Federal Building, 911 Walnut Street, Kansas City, Mo. 64106.

No. MC 115311 (Sub-No. 234TA), filed July 19, 1977. Applicant: J & M TRANSPORTATION CO., INC., P.O. Box 488, Milledgeville, Ga. 31061. Applicant's representative: Paul M. Daniell, P.O. Box 872, Atlanta, Ga. 30301. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Composition board*, from the facilities of the United States Gypsum Company at

Greenville, Miss.; to Arkansas, Alabama, Georgia, Tennessee, Kentucky, Florida, Louisiana, North Carolina, South Carolina, Virginia, West Virginia and the District of Columbia, for 180 days. Supporting shipper: United States Gypsum Company, 101 S. Wacker Dr., Chicago, Ill. 60606. Send protests to: Sara K. Davis, Transportation Assistant, Bureau of Operations, Interstate Commerce Commission, 1252 W. Peachtree St., N.W., Room 546, Atlanta, Ga. 30309.

No. MC 116200 (Sub-No. 14TA), filed July 15, 1977. Applicant: UNITED PARCEL SERVICE, INC., 643 West 43rd St., New York, N.Y. 10036. Applicant's representative: S. Harrison Kahn, 733 Investment Bldg., 1511 K St. NW., Washington, D.C. 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except those those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between all points and places in Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, West Virginia, and the District of Columbia, subject to the following restrictions: (A) service is restricted to packages originating at, or destined to, the premises of the Catalog Distribution Facility of J. C. Penney Company, Inc., Lenexa, Kans.; having an immediately prior or subsequent movement by United Parcel Service, Inc. (an Ohio Corporation). (B) No service shall be rendered in the transportation of any package or article weighing more that 50 pounds or exceeding 108 inches in length and girth combined, and each package or article shall be considered as a separate and distinct shipment. (C) No service shall be provided in the transportation of packages or articles weighing in the aggregate more than 100 pounds from one consignor at one location to one consignee at one location on any one day. Small package delivery service between the premises of J. C. Penney's new Catalog Distribution Facility in Lenexa, Kans., and all points and places in the 48 contiguous States and the District of Columbia. Applicant and its affiliate will interline at points in Pennsylvania, West Virginia and Virginia, within ten miles of the Pennsylvania-Ohio, the West Virginia-Ohio, the West Virginia-Kentucky, the Virginia-Kentucky, the Virginia-Tennessee and the Virginia-North Carolina State lines. Applicant is under common control with United Parcel Service, Inc. (Ohio), St. Charles, Ill.; Docket Nos. 115495 and MC 13426 and Subs thereunder. Applicant is in compliance with pertinent statutory requirements relating to common control and management, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: J. C. Penney Company, Inc., 1301 Ave of the Americas, New York, N.Y. 10019. Send protests to: Maria B. Kejss, Transportation Assistant, 25 Federal Plaza, New York, N.Y. 10007.

No. MC 117439 (Sub-No. 52TA), filed July 27, 1977. Applicant: BULK TRANSPORT, INC., P.O. Box 1429 (5500 Fla. Blvd.), Baton Rouge, La. 70821. Applicant's representative: John Schwab, P.O. Box 3036 (617 N. Blvd.), Baton Rouge, La. 70821. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Drilling mud*, in bulk, from points in Louisiana to points in Georgia, Florida, Mississippi, and Alabama, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: There are approximately (3) statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: District Supervisor Ray C. Armstrong, Jr., 701 Loyola Avenue, 9038 Federal Building, New Orleans, La. 70113.

No. MC 117551 (Sub-No. 10TA), filed July 15, 1977. Applicant: NEWS & FILM SERVICE, INC., 745 Lipan, Denver, Colo. 80204. Applicant's representative: John H. Lewis, 1659 Grant St. Building, Denver, Colo. 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Books, and magazines*, and (2) *newspapers*, the transportation of which is otherwise exempt from economic regulation pursuant to Section 203(b)(7) of the Act, in mixed loads with books and magazines. (a) Between Denver, Colo.; and Worland, Wyo.; serving all intermediate points in Wyoming on I-25 and U.S. Highway 16, from Denver, Colo., to Buffalo, Wyoming via I-25, thence via U.S. Highway 16 from Buffalo, Wyoming to Worland, Wyo.; and return over the same route, with the right to use U.S. Highway 20 between Worland, Wyo.; and Casper, Wyo.; as an alternate route for operating convenience only. (b) Between Denver, Colo., and Rock Springs, Wyo.; serving all intermediate points on I-80 between Laramie, Wyo.; and Rock Springs, Wyo., including Laramie and Rock Springs, from Denver, Colo.; via I-25 to its junction with Colorado Highway 14, thence via Colorado Highway 14 to its junction with U.S. Highway 287, thence via U.S. Highway 287 to its junction with I-80, thence via I-80 to Rock Springs, Wyo.; and return over the same route. (c) Between Denver, Colo., and North Platte, Nebr., from Denver, Colo.; via I-76 to its junction with I-80, thence via Nebraska Highway 70 to North Platte, and return over the same route. (d) Between Denver, Colo.; and Scottsbluff, Nebr., from Denver, Colo., via I-25 to its junction with I-80, thence via I-80 to its junction with Nebraska Highway 71, thence via Nebraska Highway 71 to Scottsbluff and return over the same route, with the right to use U.S. Highway 26 from Scottsbluff to Nebraska Highway 70, thence via Nebraska Highway 70 to its junction with I-80, thence via I-80 to its junction with I-76 to Denver as an alternate route for operating convenience only, for 180 days. Supporting shipper: There are approximately 10 statements of support attached to the application, which may be examined at the Interstate Commerce Commission, in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Roger L. Buchanan, District Supervisor, Interstate Commerce Commission, 492 U.S. Customs House, 721 19th St. Denver, Colo. 80202.

No. MC 119493 (Sub-No. 155TA), filed July 22, 1977. Applicant: MONKEM COMPANY, INC., P.O. Box 1196, West 20th St., Joplin, Mo. 64801. Applicant's representative: Lawrence Kloeppel, P.O. Box 1196, West 20th St., Joplin, Mo. 64801. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal feed*, from Kansas City, Kans., to all points in Oklahoma and Texas, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Strongheart Products, Inc. 300 S. 55th St., Kansas City, Kans. 66110. Send protests to: John V. Barry, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 600 Federal Building, 911 Walnut St., Kansas City, Mo. 64106.

No. MC 119988 (Sub-No. 120TA), filed July 20, 1977. Applicant: GREAT WESTERN TRUCKING CO., INC., Highway 103 East, P.O. Box 1384, Lufkin, Tex. 75901. Applicant's representative: Clayte Binion, 1108 Continental Life Bldg., Fort Worth, Tex. 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Treated lumber mill products*, from points in Jefferson County, Ark., to points in Texas, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Dixie Wood Preserving Co., P.O. Box 7807, Pine Bluff, Ark. 71601. Send protests to: District Supervisor Mensing, 8610 Federal Bldg., 515 Rusk, Houston, Tex. 77002.

No. MC 119988 (Sub-No. 121TA), filed July 20, 1977. Applicant: GREAT WESTERN TRUCKING CO., INC., Highway 103 East, P.O. Box 1384, Lufkin, Tex. 75901. Applicant's representative: Clayte Binion, 1108 Continental Life Bldg., Fort Worth, Tex. 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber and lumber mill products*, from the plantsites of W. S. Fox & Sons, Inc. and Arkansas Oak Flooring Co., located at Pine Bluff, Ark., and Sheridan, Ark., to points in Texas, for 180 days. Supporting shipper: Arkansas Oak Flg. Co. and W. S. Fox & Sons, Inc., P.O. Box 7227, Pine Bluff, Ark. 71611. Send protests to: John F. Mensing, District Supervisor, 8610 Federal Bldg., 515 Rusk, Houston, Tex. 77002.

No. MC 119991 (Sub-No. 16TA), filed July 27, 1977. Applicant: YOUNG TRANSPORT, INC., P.O. Box 3, Logansport, Ind. 46947. Applicant's representative: Warren C. Moberly, 777 Chamber of Commerce Building, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Aluminum ingots, aluminum scrap, aluminum sheet metal, aluminum plate and aluminum foil*, (a) between the plantsites of Alcan Aluminum Division of Alcan Service, Inc., at or near Oswego, N.Y.; Warren, Ohio, and Fairmont, W. Va., (b) from such plantsites to points in the States of Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Carolina, Ohio, Oklahoma, South Carolina, Tennessee, Texas and Wisconsin, for 180 days. Supporting shipper: Alcan Service Division of Alcan Aluminum Corp., 100 Erieview Plaza, Cleveland, Ohio 44114. Send protests to: J. H. Gray, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 343 West Wayne St., Suite 113, Fort Wayne, Ind. 46802.

No. MC 121802 (Sub-No. 1TA), filed July 26, 1977. Applicant: W-K WAREHOUSE & DELIVERY SERVICE, INC., 9 Briarwood, P.O. Box 7, Crystal City, Mo. 63019. Applicant's representative: Berverly J. Greenley, Suite 700, 230 South Bemiston, St. Louis, Mo. 63105. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, except commodities in bulk, (1) to, from and between all points and places located within the territory or area specified by law and the Missouri Public Service Commission, as to the St. Louis Commercial Zone; and (2) to, from and between all points and places within five (5) miles on either side of Interstate 55 between the intersection of that highway and the circumference line of the said Commercial Zone and the junction of Interstate 55 and Missouri State Highway 32 (herein referred to as "five (5) mile strip") and (3) to, from and between all points and places on the one hand in said Commercial zone and all points and places on the other hand in said five (5) mile strip. This read correctly when it refers to the MO Public Service Commission definition of St. Louis Commercial Zone area rather than the ICC exempt area and it is the MO exempt area that is sought here to be certificated and not the ICC zone, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Furniture Town, Inc., 207 Truman Blvd., Crystal City, Mo. 63019. Tri-City Electric & Hardware Co., Inc., 529 Bailey Rd., Crystal City, Mo. 63019. River Cement Company, 9900 Clayton Rd., St. Louis, Mo. 63124. Combustion Engineering, Inc., P.O. Box 107, Hematite, Mo. 63047. Crystal Heating & Cooling Serv, Inc., 3 Cave Industrial Drive, Crystal City, Mo. 63019, Laiben Homes, Inc., 205 Truman Blvd. Crystal City, Mo. 63019. Send protests to: District Superviser J. P. Werthmann, Interstate Commerce Commission, Bureau of Operations, Rm. 1465, 210 N. 12th St., St. Louis, Mo. 63101.

No. MC 125470 (Sub-No. 25TA), filed July 27, 1977. Applicant: MOORE'S TRANSFER, INC., P.O. Box 1151, Norfolk, Nebr. 68701. Applicant's representative: Gailyn L. Larsen, 521 South 14th Street, P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Carbonated beverages and bottles or cans*, from Ottumwa, Iowa, to points in Illinois, Kansas, Minnesota, Missouri, and North Dakota, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Gerald Brody, President, Chromalloy, Beverage Division, No. 4 Industrial Park, Ottumwa, Iowa 52501. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th Street, Omaha, Nebr. 68102.

No. MC 127303 (Sub-No. 25TA), filed July 27, 1977. Applicant: ZELLMER TRUCK LINES, P.O. Box 996, Granville, Ill. 61326. Applicant's representative: E. Stephen Heisley, 666 11th St. NW., No. 805, Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages, and related advertising materials, equipment* and *supplies*, from Milwaukee, Wis., to Omaha, Nebr., and Council Bluffs, Iowa, empty containers on return, (2) *malt beverages, and related advertising materials, equipment* and supplies from Peoria, Ill., to Omaha, Nebr., empty containers on return, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: K & K Distributing Co. Ronald L. Kiger, 925 S. 6th, Council Bluffs, Iowa. Send protests to: Transportation Assistant Patricia A. Roscoe, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 S. Dearborn St. Rm. 1386, Chicago, Ill. 60604.

No. MC 127550 (Sub-No. 4TA), filed July 25, 1977. Applicant: BOSCH TRUCKING COMPANY, INC., 5600 S. Washington St., Battonville Ill. 61607. Applicant's representative: Edward G. Bazelon, 39 S. La Salle St., Chicago, Ill. 60603. Authority sought to operate as a *contract carrier* by motor vehicle, over irregular routes, transporting: *Furnace pipe, elbows, duct work, register boots, register boxes, wall stack, gutters and rain carrying accessories, and materials, equipment and supplies* used in the manufacture and distribution of the aforenamed commodities, between the facilities of Champion Furnace Pipe Company located at Peoria, Ill., on the one hand, and on the other, points in Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, Ohio, Oklahoma, Tennessee, West Virginia and Wisconsin, under a continuing contract or contracts with Champion Furnace Pipe Company located at Peoria, Ill., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Champion Furnace Pipe Company, Fred Denney, Jr., Vice President and Plant Manager, P.O. Box 957, Peoria, Ill. 61653. Send protests to: Patricia A. Roscoe, Transportation Assistant, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 S. Dearborn St., Rm. 1386, Chicago, Ill. 60604.

No. MC 134404 (Sub-No. 36TA), filed July 22, 1977. Applicant: AMERICAN TRANS-FREIGHT, INC., P.O. Box 796, Manville, N.J. 08835. Applicant's representative: Eugene M. Malkin, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Steel bathtubs, lavatories, sinks, and parts and accessories thereto, and* (2) *plumbers fittings and supplies* from Salem, Ohio, to points in Michigan, Illinois, Indiana, New Jersey, West Virginia, and those points in Pennsylvania on and east of a line beginning at the West Virginia-Pennsylvania State Boundary Line, and extending along U.S. Highway 119 to Junction U.S. Highway 219, and thence along U.S. Highway 219 to the Pennsylvania-New York State Boundary Line, under a continuing contract or contracts with American Standard, Inc. of New Brunswick, N.J. for 180 days. Supporting shipper: American Standard Inc., Gregory J. Decker Manager, Rates, P.O. Box 2003, New Brunswick, N.J. 08903. Send protests to: Robert S. H. Vance, District Supervisor, Interstate Commerce Comission, 9 Clinton St., Newark, N.J. 07102

No. MC 135684 (Sub-No. 42TA) (Correction), filed June 30, 1977, published in the FEDERAL REGISTER issue of July 28, 1977, and republished as corrected this issue. Applicant: BASS TRANSPORTATION CO., INC., P.O. Box 391, Old Croton Road, Flemington, N.J. 08822. Applicant's representative: Herbert A. Dubin, Federal Bar Bldg. West, 1819 H Street NW., Suite 1030, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Salt and salt products*, except in bulk, from the facilities of Diamond Crystal Salt Co., at or near St. Clair, Mich., to Baltimore, Cambridge and Hunt Valley, Md.; Fall River and Wilmington, Mass., and points in New Jersey, New York and Pennsylvania, for 180 days. [Notice No. 104TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 16, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 2960 (Sub-No. 15TA), filed August 1, 1977. Applicant: ENGLAND TRANSPORTATION COMPANY OF TEXAS, INC., 2301 McKinney Street, Houston, Tex. 77023. Applicant's representative: D. Paul Stafford, Winkle and Wells, P.O. Box 45538, Dallas, Tex. 75245. [Notice No. 211]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission within 30 days after the date of this publication. Failure reasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-76997, filed July 5, 1977. Transferee: GEORGE WILLIAM SIGRIST, doing busines as SIGRIST TRUCKING COMPANY, 700 Homewood Drive, Pocomoke City, Md. 21851. Transferor: William C. Lankford, II, RFD No. 1, Pocomoke City, Md. 21851. Applicant's representative: Chester A. Zyblut, Attorney at Law, 366 Executive Building, 1030 Fifteenth Street NW., Washington, D.C. 20005. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in MC 127003 (Sub-No. 1), issued March 1, 1976, as follows: Feed, feed supplements, and grain products and grain in mixed shipments with feed from Seaford, Del. to the plant site of J. Miles Lankford, Inc. at or near Pocomoke City, Md.; and malt beverages from Williamsburg, Va. to Berlin and Salisbury, Md. Transferee is presently authorized to operate as a common carrier under Certificate No. MC 139702 (Sub-No. 2). Application has been filed for temporary authority under Section 210a(b).

No. MC-FC-77211, filed July 12, 1977. Transferee: BRIE LEASING CORPORATION, 6 Senate Place, Jersey City,

V 42 162 AUG 22 77 UM V

N.J. 07306. Transferor: Transloric Trucking Corp., 720 Tonnele Avenue, Jersey City, N.J. 07306. Applicant's representative: Mario F. Rolla, Attorney at Law, Ronayna, Hackeling and Rolla, One Penn Plaza, New York, N.Y. 10001. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in the Certificate No. MC 134085 (Sub-No. 3), issued January 31, 1973, as follows: Spaghetti and macaroni and products thereof, and equipment, materials and supplies used in the manufacture of such products between the facilities of A. Zerega Sons at or near Fairlawn, N.J., on the one hand, and, on the other, points in Nassau, Suffolk, Orange, Rockland, and Westchester Counties, N.Y.; New York, N.Y.; and Fairfield County, Conn. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77217, filed July 15, 1977. Transferee: R. JEFFREY & SONS, INC., P.O. Box C180, R.D. No. 1 Elysburg, Pa. 17824. Transferor: Robert A. Jeffrey, Doing Business As R. Jeffrey & Sons, P.O. Box C180, R.D. No. 1 Elysburg, Pa. 17824. Applicants' representative: John M. Musselman, 410 North Third Street, Harrisburg, Pa. 17108. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificates No. MC 124017, MC 124017 (Sub-No. 2) and MC 124017 (Sub-No. 5), issued may 25, 1962, March 30, 1973, and September 26, 1975, respectively, as follows: Coal from points within 15 miles of Shamokin, Pa., except Shamokin, to points in a described portion of New York; Coal from points in Schuylkill County, Pa., (except Morea, Pa., and except points within 15 miles of Shamokin, Pa.,) to points in a described portion of New York; and Coal from points in Columbia, Dauphin, Northumberland, Lackawanna, Luzerne, and Schuylkill Counties, Pa., to ports of entry on the United States-Canada Boundary line located in Michigan and New York. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77223, filed July 18, 1977. Transferee: C. NEAL CARSON, Doing Business As CARSON CARRIERS, 1400 South Peters Street, P.O. Box 50262, New Orleans, La. 70150. Transferor: England Transportation Company, Inc., 1400 South Peters Street, P.O. Box 50262, New Orleans, La. 70150. Applicants' representative: David G. Mcdonald, Macdonald & McInerny, 502, Solar Building, 1000 16th St., NW., Washington, D.C. 20036. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 57946 (Sub-No. 2), issued June 15, 1977, as follows: General commodities, with normal exceptions, over irregular routes between New Orleans, La., and points within 10 miles of the corporate limits of New Orleans, on the one hand, and, on the other, points in a described portion of Louisiana. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC–FC–77236, filed July 29, 1977. Transferee: JAMES WILLIAM ROLAND, d.b.a., ROLAND TRUCKING COMPANY, Box 86, Ashlawn Farm, Perryville, Md. 21903. Transferor: William Arthur James, 5815 Kirkwood Highway, Wilmington, Del. 19808. Applicants' representative: Charles E. Fenton, Attorney at Law, 10 Light Street, Baltimore, Md. 21202. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates No. MC 39331 and MC 39331 (Sub-No. 1), issued June 28, 1955 and November 23, 1954 respectively as follows: *Sand, stone,* and *amesite,* between points in Delaware County, Pa., on the one hand, and, on the other, points in that part of Delaware north of a line beginning at the Delaware-Maryland State line and extending east through Hartley, Dover, and Little Creek, Del., to the Delaware Bay, including the points named, and those in that part of New Jersey on and south of U.S. Highway 30. *Also such bulk commodities as sand, gravel, and cement,* between points in Delaware and Maryland within 15 miles of Newark, Del., including Newark. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77241, filed August 4, 1977. Transferee: KEIM TRANSPORTATION, INC., 420 N. 6th, Sabetha, Kans. 66534. Transferor: Bestwick, Inc., 213 S. 13th, Sabetha, Kans. 66534. Applicants' representative: Clyde N. Christey, Attorney at Law, 514 Capitol Federal Bldg., Topeka, Kans. 66603. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC 116879, issued February 3, 1975, as follows: *Condensed milk* and *condensed skim milk,* in bulk, in tank vehicles, and *powdered milk,* from Sabetha, Kans., to Omaha, Nebr., and St. Joseph and Kansas City, Mo.; and *Ice Cream bars, washing and cleaning compounds, sulphruic acid,* and *empty containers used in the transportation of powered milk,* from Omaha, Nebr., and St. Joseph and Kansas City, Mo., to Sabetha, Kans. *Condensed milk,* in bulk, between Sebetha, Kans., on the one hand, and, on the other, points in Missouri. Restriction: The operations authorized herein are limited to a transportation service to be performed, under a continuing contract, or contracts with Mid-America Dairymen, Inc. of Sabetha, Kans. Transferee is presently authorized to operate as a common carrier under Certificate No. MC 2095 and subs thereafter. Application has not been filed for temporary authority under Section 210 a(b).

No. MC–FC–77242, filed August 4, 1977. Transferee: BARNEY TRUCKING, INC., 198 North 3rd East, Salina, Utah 84654. Transferor: Glen M. Barney, doing business as Glen Barney & Sons, 198 North 3rd East, Salina, Utah 84654. Applicants' representative: D. Michael Jorgensen, P.O. Box 2465, Salt Lake City, Utah 84110. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificate No. MC 139832, Sub-1, issued October 20, 1976, as follows: Coal, in bulk, from points in Carbon, Emery, San Pete, and Sevier Counties, Utah to points in Arizona, California, Idaho, New Mexico, Nevada, Utah and Wyoming, with no transportation for compensation on return except as otherwise authorized. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 210(a)(b).

No. MC–FC–77245, filed August 4, 1977. Transferee: FRED L. BENDER AND OLINE BENDER, d.b.a., F & O TRUCKING, 20613th 91 Ave., S.E., Shohomish, Wash. 98290. Transferor: Robert B. Jones, P.O. Box 141, Lake Stevens, Wash. 98258. Applicants' representative: Fred and Oline Bender, 20613 91st Ave., SE., Shohomish, Wash. 98290. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 135900 Sub-1, issued March 8, 1973, as follows: Such commodities as are dealt in by surplus and discount stores, from the facilities of World Wide Distributor Association, Inc., at Seattle, Wash., to Portland, Salem, Medford, and Milton-Freewater, Oreg., and Moscow, Ind. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77246, filed August 4, 1977. Transferee: J. P. JENKS, INC., 1294 Madison Avenue, Painesville, Ohio 44077. Transferor: Jeffrey P. Jenks, doing business as Jenks Cartage Company, 1294 Madison Avenue, Painesville, Ohio 44077. Applicant's representative: Jeffrey P. Jencks, 1294 Madison Avenue, Painesville, Ohio 44077. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Permit No. MC 140146, issued July 15, 1976 as follows: Pre-cast concrete building supplies and equipment, materials, and supplies used in the manufacture of such commodities, between the facilities of Old Stone Products Inc., at or near Thompson, Ohio, on the one hand, and, on the other, points in Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maine, Massachusetts, Mississippi, Michigan, Minnesota, Nebraska, Maryland, New Jersey, New York, North Carolina, Oklahoma, Pennsylvania, Rhode Island, Virginia, West Virginia, Wisconsin, and the District of Columbia. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77250, filed July 29, 1977. Transferee: P AND S, INC., doing business as P AND S WRECKER SERVICE, 528 State Street, New Albany, Ind. 47150. Transferor: Preston L. Ford, doing business as Ford-Floyd Wrecker Service, 1015 South Preston, Louisville, Ky. 40203. Applicant's representative: John T. McGarvey, Attorney at Law, 521 West Market Street, Louisville, Ky. 40202. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 108970 (Sub-No. 1) issued November 20, 1972, as follows: Wrecked or disabled motor vehicles between Louisville, Ky., and points within 50 miles therof on the one hand, and, on the other, points in Kentucky, Indiana, Illinois, Ohio, and Tennessee. Transferee presently holds no authority from this Commission; application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–77254, filed August 8, 1977. Transferee: DEAN ROBINSON, Dysart, Iowa 52224. Transferor: Wieck's Fees and Livestock, Incorporated, Dysart, Iowa 52224. Applicant's representative: Kenneth F. Dudley, P.O. Box 279, Ottumwa, Iowa 52501. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 123856, MC 123856 (Sub-No. 1), and MC 123856 (Sub-No. 2) issued March 19, 1962, August 6, 1962, and July 21, 1967 respectively, as follows: Feed ingredients from Lasalle, Ill. to Ladora, Iowa; from Ladora, Iowa to Peoria, Ill., Ellis, S. Dak., Omaha, Nebr., St. Joseph, Mo., Muncie, Kans., Oklahoma City, Okla., Willmar, New Ulm, and Minneapolis, Minn.; dry feed ingredients from Ladora, Iowa to Fremont and Grand Island, Nebr. and between Ladora, Iowa, on the one hand, and, on the other, Hutchinson, Kans. and Ritman, Ohio; dry mineral feed ingredients from Ladora, Iowa to Salina, Kans., Kansas City, Mo., Madison, Wisc., Monmouth, Danville, and Quincy, Ill., Castleton, Ind., Williston, N. Dak., Akron, Ohio, Memphis, Tenn., and St. Clair, Mich. and from Maple Park, Ill., Hammond, Ind., and Memphis and Coving, Tenn. to Ladora, Iowa. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210(a)(b).

H. G. Homme, Jr.
Acting Secretary.

sunshine act meetings

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94–409), 5 U.S.C. 552b(e)(3).

CONTENTS

	Item
Commodity Futures Trading Commission	1, 2
Federal Power Commission	3
Federal Reserve System	4
Nuclear Regulatory Commission	5, 6
Securities and Exchange Commission	7

1

COMMODITY FUTURES TRADING COMMISSION.

TIME AND DATE: 10 a.m. August 23, 1977.

PLACE: 2033 K Street, N.W., Washington, D.C., 5th Floor Hearing Room.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

Withdrawals from Registration as Futures Commission Merchants. Portions closed to the public:

Enforcement Matters.

CONTACT PERSON FOR MORE INFORMATION:

Jane Stuckey, 254–6114.

[S–1143–77 Filed 8–10–77;10:00 am]

2

COMMODITY FUTURES TRADING COMMISSION.

TIME AND DATE: 11 AM, August 26, 1977.

PLACE: 2033 K Street NW., Washington, D.C., 8th Floor Hearing Room.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

Market Surveillance Meeting.

CONTACT PERSON FOR MORE INFORMATION:

Jane Stuckey, 254–6314.

[S–1144–77 Filed 8–18–77;10:00 am]

3

FEDERAL POWER COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: (pub. 8/18/77 42 FR 41729).

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: August 16, 1977, 2 p.m., August 18, 1977, 2 p.m.

CHANGE IN THE MEETING:

The following items have been added:

Item No., Docket No., and Company

11. Docket No. RP76–38, *Arizona Electric Power Cooperative, Inc.* and *the City of Wilcox, Arizona* v. *El Paso Natural Gas Company.*
12. Docket No. CI77–306, Transco Exploration Company.
13. Docket No. RP77–110, Alabama-Tennessee Natural Gas Company.
14. Docket No. CP77–106, Mississippi River Transmission Corporation. Docket No. CP77–131, Natural Gas Pipeline Company of America.

KENNETH F. PLUMB,
Secretary.

[S–1146–77 Filed 8–18–77;10:16 am]

4

FEDERAL RESERVE SYSTEM.

TIME AND DATE: 12 noon, Friday, August 26, 1977.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed statement to be presented to the Subcommittee on International Finance of the Senate Committee on Banking, Housing and Urban Affairs regarding international debt problems.
2. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board: (202) 452–3204.

Dated: August 17, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[S–1142–77 Filed 8–17–77;4:31 pm]

5

NUCLEAR REGULATORY COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Volume 42 No. 155 page 40808.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: Week of August 15, 1977.

CHANGES IN THE MEETINGS: Meetings for Wednesday, August 17 through Friday, August 19 have been revised as follows:

WEDNESDAY, AUGUST 17

9 a.m. Review of FY 1979 Budget (continued) (OPEN) (as announced).
1:30 p.m. Discussion of Recall/Preliminary Budget Markup (additional meeting) (CLOSED—Exemption 9).

THURSDAY, AUGUST 18

9 a.m. Review of FY 1979 Budget (continued) (OPEN) (additional meeting).
3:30 p.m. Budget Review—Recall of Offices/Preliminary Markup (Rescheduled from 9 a.m. 8/18) (OPEN/CLOSED to be determined).

FRIDAY, AUGUST 19

9 a.m. Review of FY 1979 Budget (continued) (OPEN) (additional meeting).

CONTACT FOR MORE INFORMATION:

Walter Magee (202) 634–1410.

Dated: August 16, 1977.

WALTER MAGEE,
Chief, Operaitons Branch, Office of the Secretary.

6

NUCLEAR REGULATORY COMMISSION:

TIME AND DATE: Week of August 22, 1977.

PLACE: Commissioners' Conference Room, 1717 H St. NW., Washington, D.C.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

TUESDAY, AUGUST 23

3 p.m. Discussion of Draft Administration Bill for Nuclear Plant Licensing Reform—(Exemption 9).

WEDENESDAY, AUGUST 24

2:30 p.m. (Approx.) Discussion of Draft Administration Bill for Nuclear Plant Licensing Reform—(Exemption 9).

CONTACT PERSON FOR MORE INFORMATION:

Walter Magee 202–634–1410.
Dated: August 16, 1977.

WALTER MAGEE,
Office of the Secretary.

7

SECURITIES AND EXCHANGE COMMISSION:

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR-40808, August 11, 1977.

PREVIOUS ANNOUNCED TIME AND DATE: August 18, 1977, 10 a.m.

CHANGES IN THE MEETING: There will be an additional item considered by the Commission at the open meeting scheduled for Thursday, August 18, 1977, at 10 a.m. The additional subject matter will be:

Consideration of a request by the National Association of Securities Dealers for a rebuttal period in the matter of an application filed by Pacific Stock Exchange Incorporated for unlisted trading privileges in the common stock of Pacific Resources, Inc.

The Commission will consider the following additional matters at the closed meeting scheduled for Thursday, August 18, 1977: Settlement of administrative proceedings. Consideration of request for stay. Formal order of investigation.

The discussion of the regulatory matter bearing enforcement implications, previously scheduled for the closed meeting on Thursday, August 18, 1977 has been rescheduled for the closed meeting on Wednesday, August 24, 1977 at 3 p.m.

Chairman Williams, Commissioners Loomis, Evans, and Pollock voted to approve the above changes and determined that no earlier notice thereof was possible.

Dated: August 17, 1977.

SECTION 8 NEW CONSTRUCTION AND SUBSTANTIAL REHABILITATION PROGRAM

Increase in Maximum Allowable Term for Certain Contracts

V 42 16 2
AUG 22 77
UM

Title 24—Housing and Urban Development

CHAPTER VIII—LOW-INCOME HOUSING, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket Nos. R-77-380 and R-77-387]

PART 880—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—NEW CONSTRUCTION

PART 881—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—SUBSTANTIAL REHABILITATION

Increase in Maximum Allowable Term for Certain Contracts

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, Department of Housing and Urban Development (HUD).

ACTION: Final rule.

SUMMARY: Section 101(c) of the Supplemental Housing Authorization Act of 1977, amended section 8(e)(1) of the U.S. Housing Act of 1937 to permit HUD to enter into contracts for assistance payments under the Section 8 program for terms of "three hundred and sixty months, except that such term may not exceed two hundred and forty months in the case of a project financed with assistance of a loan made by, or insured, guaranteed or intended for purchase by, the Federal Government, other than pursuant to Section 244 of the National Housing Act."

This amendment increases the maximum term permitted for Housing Assistance Payments Contracts and Annual Contributions Contracts from 20 years to 30 years for conventionally financed projects. The amendment did not change the maximum 40 year term available for projects owned by, or financed by a loan or loan guarantee from, a State or local agency.

The Section 8 New Construction and Substantial Rehabilitation Program Regulations are being amended to reflect this statutory change. In addition, several technical changes are being made to clarify the regulations and assure uniform interpretation between the regulations and the contract document forms on this subject. Since these amendments are based on a statutory amendment or are only technical clarifications, they are being made effective on publication.

EFFECTIVE DATE: August 22, 1977.

FOR FURTHER INFORMATION CONTACT:

April D. LeClair, Section 8 and Leased Housing Division, Office of Assisted Housing Development, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, 202-755-5380.

SUPPLEMENTARY INFORMATION: The Department has given serious consideration to the issue of the effective date of implementation of the provision for a 30-year term. The Department has determined to make the amendments effective on publication for projects for which a commitment for permanent financing was not secured before April 30, 1977, which is the date the Supplemental Housing Authorization Act of 1977 became law. The purpose of the amendment permitting a 30-year term for conventional financing is to encourage this type of financing. Projects for which financing was secured prior to the effective date of the Act were able to obtain financing without the 30-year term provisions, and there is no need to make the provision applicable to them.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours at the Office of the Rules Docket Clerk, Office of the Secretary, Room 5218, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410.

It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with Executive Order 11821.

Accordingly, 24 CFR, Parts 880 and 881 are revised as follows:

1. Paragraph (a) of Section 880.109 is revised, a new paragraph (b) is added and paragraphs (b), (c), and (d) are redesignated (c), (d), and (e), respectively, and are reprinted in their entirety as follows:

§ 880.109 Term of housing assistance payments contract.

(a) The Contract may be for an initial term of not more than five years, for any dwelling unit, renewable at the sole option of the Owner, for additional terms of not more than five years each, provided that the total Contract term for any dwelling unit, including all renewals, shall not exceed 20 years, where a conditional or unconditional commitment for permanent financing was secured by the Owner prior to April 30, 1977, or 30 years, where a conditional or unconditional commitment for permanent financing, based on a term of more than 20 but no more than 30 years, was secured on or after April 30, 1977, except as otherwise provided in this section.

(b) In the case of a Contract under which housing assistance payments are made with respect to a project not covered by paragraph (c) of this section which is financed with the assistance of a loan made by, or insured, guaranteed or intended for purchase by, the Federal Government, other than pursuant to Section 244 of the National Housing Act, the total Contract term, including all renewals, shall not exceed 20 years for any dwelling unit.

(c) In the case of a Contract under which housing assistance payments are made with respect to a project owned by, or financed by a loan or loan guarantee from, a State or local agency, the total Contract term may be equal to the term of such financing but may not exceed 40 years for any dwelling unit.

(d) In the case of mobile homes, the initial Contract term for any mobile home shall be for not more than five years, subject to renewal for additional terms of not more than five years each, as may be mutually agreed upon by the Owner and HUD or, in the case of a Private-Owner/PHA Project, by the Owner and the PHA with the approval of HUD; provided, that the total Contract term for any mobile home shall not exceed 20 years. For the purposes of this paragraph (d), the term "mobile home" means the original mobile home and any replacement(s), combined. In the case of any project under this paragraph (d), notwithstanding the maximum total allowable term per unit stated therein, a shorter term shall be determined by HUD where appropriate, taking into account the amount of the capital expenditures reasonably required for the project, the reasonable period and rate of amortization for the financing, and the approved rents to the Owner.

(e) If the project is completed in stages, the dates for the initial and the renewal terms shall be separately related to the units in each stage; provided, however, that the total Contract term for the units in all the stages, beginning with the effective date of the Contract with respect to the first stage, may not exceed the overall maximum term allowable for any one unit, plus two years.

2. § 881.109 (a) and (b) are revised and (c) is reprinted so as to read in its entirety as follows:

§ 881.109 Term of Housing Assistance Payments Contract.

(a) Where the estimated cost of the rehabilitation is less than 25 percent of the estimated value of the project after completion of the rehabilitation, the Contract may be for an initial term of not more than five years for any dwelling unit, renewable at the sole option of the Owner, for one or more additional terms of not more than five years each; provided, however, that the total Contract term, including all renewals, shall not exceed 10 years for any dwelling unit.

(b) Where the estimated cost of the rehabilitation is 25 percent or more of the estimated value of the project after completion of the rehabilitation, the Contract may be for an initial term of not more than five years for any dwelling unit, renewable at the sole option of the Owner, for additional terms of not more than five years each, for a total Contract term, including all renewals, which:

(1) Will cover the longest term of a single credit instrument covering: (i) The cost of rehabilitation; or

(ii) The existing indebtedness; or

(iii) The cost of rehabilitation and the refinancing of the existing indebtedness; or

(iv) The cost of rehabilitation and the acquisition of the property; and

(2) Will not exceed, for any dwelling unit: (i) 20 years, where a conditional or unconditional commitment for permanent financing was secured before April 30, 1977, except as otherwise provided in paragraph (b)(2)(iv) of this section; or

(ii) 20 years where the project is not covered by paragraph (b)(2)(iv) of this section and is financed with the assistance of a loan made by, or insured, guaranteed or intended for purchase by, the Federal Government other than pursuant to Section 244 of the National Housing Act; or

(iii) 30 years, where a conditional or unconditional commitment for permanent financing based on a term of more than 20 but no more than 30 years was secured on or after April 30, 1977, except as provided in paragraph (b)(2)(ii) or (iv) of this section; or

(iv) 40 years, where the project is owned by, or financed by a loan or loan guarantee from, a State or local agency.

(c) If the project is completed in stages, the dates for the initial and the renewal terms shall be separately related to the units in each stage; provided, however, that the total Contract term for the units in all stages, beginning with the effective date of the Contract with respect to the first stage, may not exceed the overall maximum term allowable for any one unit, plus two years.

(Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d)).)

Issued at Washington, D.C., August 12, 1977.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing, Federal Housing Commissioner.

PART III

ENDANGERED SPECIES SCIENTIFIC AUTHORITY

APPENDIX I SPECIMENS

Policy Statement

V 42 162 AUG 22 77 UM V

ENDANGERED SPECIES SCIENTIFIC AUTHORITY

POLICY ON IMPORT OF APPENDIX I SPECIMENS

AGENCY: Endangered Species Scientific Authority.

ACTION: Notice.

SUMMARY: This notice states general findings of the Endangered Species Scientific Authority on import of animals and plants included in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora. Import will be approved when the purpose is for an essential scientific use not detrimental to the survival of the species, or to enhance the propagation or survival of the species. Import of salvaged specimens will be be allowed for any bona fide scientific use, provided that the possibility of import neither directly nor indirectly contributed to the specimens' death or removal from the wild. Imports for other purposes will be disallowed if they can be reasonably expected to stimulate demand for wild plants or animals, or their parts or products, unless the evidence establishes that import is in the best interest of the species.

DATE: All interested persons are invited to comment on this notice. All comments received before October 24, 1977 will be considered in determining whether the policy should be revised.

ADDRESS: Comments should be addressed to the Executive Secretary, Endangered Species Scientific Authority, 18th and C Streets, N.W., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Dr. William Y. Brown, Executive Secretary, Endangered Species Scientific Authority, 18th and C Streets NW., Washington, D.C. 20240, 202-343-5687.

BACKGROUND

The Convention on International Trade in Endangered Species of Wild Fauna and Flora (TIAS 8249) requires the Convention parties to make certain scientific findings before trade is allowed in protected species of animals and plants included in Appendices to the Convention. "Appendix I" includes those species of animals and plants that are threatened with extinction and which are or may be affected by trade. "Appendix II" includes those species not necessarily now threatened with extinction but which may become so unless trade in them is subject to strict regulation. For both Appendix I and II species, member countries generally may allow export of specimens only if an official Scientific Authority of the country has found that the export will not be detrimental to the survival of the species involved and an official Management Authority has issued an export permit based upon that and other findings. Import of these specimens is authorized when they arrive at a receiving member country generally only if the specimens are accompanied by a Convention export permit, if sent from a member country, or substantially similar documentation if sent from a non-member country. In addition, an import permit is required for Appendix I specimens that do not qualify for special exceptions under the Convention, such as that for captive bred animals and cultivated plants. Before the issuance of import permits, the Management Authority must be satisfied, among other requirements, that specimens will not be used for primarily commercial purposes. In addition, the Scientific Authority of the importing country must have found that the import is for purposes not detrimental to the survival of the species.

There is an important difference between the finding of "not detrimental to the survival" that is required for export permits, and the finding of "for purposes not detrimental to the survival" that is required before issuance of Appendix I import permits by the receiving country. The basic biological fact-finding on Convention species is the responsibility of the exporting countries, where the species occur in the wild. That is the only biological assessment made for trade in Appendix II specimens, incorporated in the finding of "not detrimental to the survival" that is required before issuance of an export permit.

The "purposes not detrimental to the survival" finding that is required for Appendix I imports serves as a limitation and a safeguard on trade in these most threatened species. However, the finding does not require the importing country to replicate the basic biological fact-finding that is required of the exporting country. Inclusion of the word "purposes" indicates that the importing country's approach should differ and, in particular, that it should focus on the nature and quality of the activity in the importing country as it relates to species survival.

POLICY

Import of Appendix I specimens will be approved by the U.S. Endangered Species Scientific Authority (ESSA), subject to other Convention requirements and exceptions, when the purpose is for an essential scientific use not detrimental to the survival of the species, or to enhance the propagation or survival of the species. Use of Appendix I specimens for scientific purposes will be considered essential only if no alternative species are available and the number of specimens proposed is the minimum that will produce acceptable scientific results. Import of salvaged specimens will be allowed for any bona fide scientific use, provided that the possibility of import neither directly nor indirectly contributed to the specimens' death or removal from the wild. Because the Convention requires that import permits for Appendix I species be issued before export or re-export permits, the ESSA may give its counterpart in the exporting country any information relevant to the latter's evaluation of the export permit application. If an import permit is issued, this information will be transmitted through the U.S. Management Authority, together with a copy of the import permit. The United States will use this opportunity to encourage exporting countries, particularly those less experienced in conservation, to more fully comply with the scientific standards of the Convention and to accede to the Convention if not members. Approving import for the above purposes is consistent with the Convention, with the Endangered Species Act of 1973 (16 U.S.C. 1531-43), and with the general policy of the United States to simplify and standardize animal and plant trade regulation.

Import for purposes other than the above will be disallowed by the ESSA if the purposes can be reasonably expected to simulate demand for wild plants or animals or their parts or products, without generating countervailing benefits to the species. Examples of purposes included in this category are import for profit, amateur collecting, falconry, and trophies. Clear and convincing evidence of countervailing benefits must be presented before import for these purposes is allowed. On the other hand, import will be approved by the ESSA if the evidence establishes that is in the best interest of the species.

The Endangered Species Scientific Authority unanimously adopted this policy for Appendix I imports on August 2, 1977. The policy is subject to revision, as are all ESSA policies, on the basis of subsequent experience, public comment, and the development of a uniform international policy on the issue.

Dated: August 16, 1977.

WILLIAM Y. BROWN,
Executive Secretary, Endangered Species Scientific Authority.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected **$10.00** per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **$8.00** per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $ ____ for ____ subscription(s) to the publications checked below:

Title 3—The President

PROCLAMATION 4514

World Law Day, 1977

By the President of the United States of America

A Proclamation

The past twenty-five years have been marked by the unprecedented development of international law as nations have come to recognize that cooperation in international relations is the only alternative to chaos. This cooperation depends upon mutual respect, which in turn depends upon the development of legal norms upon which all parties can rely with confidence. These norms must be responsive to each nation's legitimate interests, must respect the feelings and beliefs of all peoples, and must foster a climate of justice and liberty in which each individual on this planet can achieve his or her full potential.

Representatives of the legal profession from every corner of the globe will gather in Manila during the week of August 21, 1977, under the auspices of the World Peace Through Law Center, to inaugurate the Eighth World Conference on World Peace Through Law. Together they will search for ways to further universal human liberty and security. Celebrations devoted to international legal protections for human rights will be held not only in Manila, but in more than one hundred countries. Accordingly, it is fitting that the United States join in this effort to focus the world's attention on the pressing need for continued vigilance in protecting fundamental rights and freedoms for all.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby designate Sunday, August 21, 1977, as World Law Day in the United States. I call upon all public and private officials and organizations, members of the legal profession, the clergy, educators, the communications media, and all men and women of good will to join with the peoples of the world on this day in reflecting on the importance of the rule of law in achieving world peace as well as justice, freedom and dignity for all.

IN WITNESS WHEREOF, I have hereunto set my hand this nineteenth day of August, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and second.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Environmental Protection Agency

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Legislative Specialist is excepted under Schedule C because it is confidential in nature. Also, the position of Legislative Affairs Specialist has been revoked under the automatic revocation system.

EFFECTIVE DATE: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3318(b)(6) is revoked and (b)(7) is added as set out below:

§ 213.3318 Environmental Protection Agency.

* * * * * *

(b) *Office of Legislation.* * * * (6) (Revoked). (7) One Legislative Specialist.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-24413 Filed 8-22-77;8:45 am]

PART 213—EXCEPTED SERVICE

Inter-American Foundation

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The position of Special Assistant to the President is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3320(a) is added as set out below:

§ 213.3320 Inter-American Foundation.

(a) One Special Assistant to the President.

(5 U.S.C. 3301, 3302; E.O. 19577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-24414 Filed 8-22-77;8:45 am]

PART 213—EXCEPTED SERVICE

State Department

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: One position of Special Assistant to the Coordinator for Human Rights and Humanitarian Affairs is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3304(a)(30) is added as set out below:

§ 213.3304 Department of State.

(a) *Office of the Secretary.* * * *

(30) Special Assistant to the Coordinator for Human Rights and Humanitarian Affairs.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-24412 Filed 8-22-77;8:45 am]

PART 213—EXCEPTED SERVICE

Agriculture Department

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This transfers the organizational coverage of three previously authorized excepted employment authorities which were for the Agricultural Marketing Service and the Animal and Plant Health Inspection Service to the newly-established Food Safety and Quality Service agency within the Department of Agriculture. These authorities except from the competitive service the position of Agricultural Commodity Graders (processed fruits and vegetables) and (poultry, dairy); and for positions of Food Inspectors and Veterinary Medical Officers for employment on an intermittent, temporary, or seasonal basis for not to exceed 1,280 hours a year. These exceptions are granted because it is impractical to competitively examine for these positions.

EFFECTIVE DATE: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3113 is amended to read as follows:

§ 213.3113 Department of Agriculture.

* * * * * *

(f) *Agricultural Marketing Service.* * * *

(5) [Revoked.]

(6) [Revoked.]

* * * * * *

(k) *Animal and Plant Health Inspection Service.* * * *

(3) [Revoked]

(l) *Food Safety and Quality Service.*

(1) Positions of agricultural commodity graders (processed fruits and vegetables), GS–9 and below, and of graders' aides (processed fruits and vegetables), GS–2–4; for temporary employment on a part-time or intermittent basis for not to exceed 1,280 hours a year.

(2) Temporary and intermittent positions of agricultural commodity graders (dairy) and agricultural commodity graders (poultry) at grade GS–9 and below. Employment under this authority may not exceed 1,280 hours a year.

(3) Positions of meat and poultry inspectors (veterinarians at GS–11 and below and nonveterinarians at appropriate grades below GS–11) for employment on a temporary, intermittent, or seasonal basis, not to exceed 1,280 hours a year.

Title 7—Agriculture

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—FOOD STAMP PROGRAM

[Amdt. No. 123]

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

Recipients of Supplemental Security Income Payments

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: According to the provisions of Pub. L. 93–233, recipients of Supplemental Security Income (SSI) payments are eligible for food stamp benefits except in two States. Pub. L. 95–59 extended the provisions of Pub. L. 93–233 until September 30, 1978. This regulation promulgates that extension.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Alberta Frost, State Agency Operations Branch, Food Stamp Division, Food and Nutrition Service, United States Department of Agriculture, 500 12th Street SW., Washington, D.C. 20250, 202–447–8360.

SUPPLEMENTARY INFORMATION: According to the provisions of Pub. L. 93–233, SSI recipients are currently eligible for food stamp benefits in all States but California and Massachusetts. These provisions of Pub. L. 93–233 expired June 30, 1977. Pub. L. 95–59 extends the present eligibility criteria for SSI households until September 30, 1978. This regulation changes the date for the expiration of food stamp regulations concerning SSI recipients to correspond with the extension mandated in Pub. L. 95–59.

It is the policy of this Department to give at least 30 days' notice for amendments to the regulations. However, because the regulations concerning SSI participation have expired and extension of that date is mandated by Pub. L. 95–59, it would be impracticable and unnecessary to give notice of proposed rulemaking with regard to this amendment.

Accordingly, paragraph (a) in § 271.10 of the Food Stamp Program regulations is amended to read as follows:

§ 271.10 Eligibility and certification of supplemental security income recipients.

(a) Notwithstanding any other provisions of this subchapter, recipients of Supplemental Security Income (SSI) payments shall be treated according to the provisions of this section for purposes of determining eligibility for and certification in the program. The provisions of this section will expire September 30, 1978, unless earlier rescinded or modified.

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

PART 301—DOMESTIC QUARANTINE NOTICES

Subpart—Witchweed

MISCELLANEOUS AMENDMENTS TO REGULATED AREAS

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: Based upon witchweed surveys, this document amends the supplemental regulation which lists regulated areas for purposes of the Federal Witchweed Quarantine by removing, adding, and extending to the list of suppressive regulated areas all or parts of certain counties in North Carolina and South Carolina.

EFFECTIVE DATE: August 18, 1977.

FOR FURTHER INFORMATION CONTACT:

H. I. Rainwater, Regulatory Support Staff, Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs, U.S. Department of Agriculture, Hyattsville, Md. 20782, 301–436–8247.

SUPPLEMENTARY INFORMATION: Witchweed, a parasitic plant which causes a dangerous disease of corn, sorghum, and other crops of the grass family, has been found in the United States only in parts of North Carolina and South Carolina. In these States areas have been designated as suppressive regulated areas and a witchweed eradication program is currently being undertaken.

Surveys conducted by the United States Department of Agriculture and State agencies of North Carolina and South Carolina establish that witchweed has spread or is likely to spread to certain areas beyond the outer perimeter of the previous suppressive regulated areas. Therefore, in order to prevent the spread of witchweed and because eradication of

witchweed is undertaken as an objective, suppressive regulated areas are extended in the following counties: Brunswick, Columbus, Duplin, Greene, Jones, Lenoir, Moore, Richmond, and Scotland in North Carolina, and Florence in South Carolina; and suppressive regulated areas are added in the previously nonregulated counties of Craven and Wilson in North Carolina. The surveys also establish that witchweed has been eradicated in Montgomery County, North Carolina, and parts of other counties in North Carolina. Therefore, all of Montgomery County is deleted from the list of suppressive regulated area. Also, parts of the following counties in North Carolina are deleted from the list of suppressive regulated areas: Columbus, Harnett, Johnston, Jones, Lenoir, Moore, Pender, Scotland, and Wayne.

Other changes are also made to reflect changes in ownership of certain properties and to make corrections in certain descriptions to more accurately describe the area regulated.

Accordingly, § 301.80–2a of the Witchweed Quarantine regulations (7 CFR 301.80–2a) is hereby amended as set forth below:

1. In § 301.80–2a relating to the State of North Carolina under suppressive area, the entire State is redescribed to read as follows:

§ 301.80–2a Regulated areas; suppressive and generally infested areas.

* * * * *

NORTH CAROLINA

(1) *Generally infested area. Robeson County.*—The entire county.

(2) *Suppressive area. Bladen County.*—The entire county.

Brunswick County. The Babson, N. L., farm located on the west side of State Secondary Road 1321 and 0.4 mile south of its junction with State Highway 130.

The Register, W. C., farm located on the south side of State Secondary Road 1147 and 0.3 mile east of the junction of said road and State Secondary Road 1143.

The Register, W. T., farm located on the west side of State Secondary Road 1151 and 0.4 mile south of its junction of State Secondary Road 1147.

The Smith, B. Coda, farm located on the west side of a dirt road and 0.6 mile north of its junction with State Secondary Road 1322, said junction being 0.1 mile west of the junction of State Secondary Road 1322 and State Secondary Road 1321.

Columbus County. That part of the county lying north and west of a line beginning at a point where State Highway 211 intersects the Bladen-Columbus County line, thence south along said Highway 211 to its intersection with State Secondary Road 1740, thence southwest and south along said State Secondary Road 1740 to its junction with U.S. Highways 74 and 76, thence west along said highways to its intersection with State Secondary Road 1001, thence south along said Road 1001 to its intersection with the Seaboard Coastline Railroad, thence west along said Railroad to its intersection with White Marsh Swamp, thence south along said swamp to its junction with Cypress Creek, thence southwest along said creek to its intersection with State Highway 130, thence northwest along said highway to its junction with State Secondary Road 1166, thence southwest along said road to its junction with State Secondary Road 1157, thence southwest along said road to its junction with U.S. Highway 701, thence south and west along said highway to its intersection with State Secondary Road 1314, thence west along said road to its junction with State Secondary Road 1346, thence southwest along said road to its junction with the North Carolina-South Carolina State line.

The Jacobs, Thomas, farm located 0.2 mile north of State Secondary Road 1847 and 1 mile southwest of the junction of said Road 1847 with State Secondary Road 1740.

The Long, J. M., farm located on the southwest side of State Secondary Road 1113 and 0.4 mile northwest of its junction with State Secondary Road 1108.

The McLamb, H. M., farm located on the southwest side of State Secondary Road 1113 and 0.5 mile northwest of its junction with State Secondary Road 1108.

The Owen, J. A., farm located on the southwest side of State Highway 87 and 0.3 mile southeast of the intersection of said Highway 87 with the Bladen-Columbus County line.

The Shaw, Archie, farm located 0.2 mile southeast of State Secondary Road 1864 and 0.5 mile southeast of the junction of said Road 1864 with State Secondary Road 1808.

The Shaw, Charles H., farm located 0.1 mile north of State Secondary Road 1847 and 0.9 mile northeast of the junction of said Road 1847 with State Secondary Road 1740.

The Shipman, C. S., farm located on the east side of State Secondary Road 1909 and 0.6 mile southeast of the junction of said Road 1909 with State Secondary Road 1908.

The Spivey, D. M., farm located in the northeast corner of the intersection of U.S. Highway 701 and Gum Swamp.

The Suggs, Lacy, farm located at the end of a dirt road 0.5 mile southeast of the junction of said road with State Secondary Road 1108, said junction being 0.7 mile northeast of the junction of State Secondary Road 1108 and State Secondary Road 1118.

Craven County. The Hawkins, Annie A., farm located on both sides of State Secondary Road 1263 and 1 mile east of the junction of said Road 1263 with State Secondary Road 1262.

Cumberland County. All of Cumberland County excluding the Fort Bragg Military Reservation, the area within the corporate limits of the city of Fayetteville, and the unincorporated communities of East Fayetteville and Bonnie Doone.

Duplin County. That area bounded by a line beginning at a point where State Secondary Road 1337 intersects the Duplin-Sampson County line, thence northeast along said road to its junction with State Highway 50, thence northwest along said highway to its junction with State Secondary Road 1355, thence northeast along said road to its junction with State Secondary Road 1332, thence northeast along said road to its junction with State Secondary Road 1304, thence southeast along said road to its intersection with Bear Swamp, thence east along said swamp to its junction with Goshen Swamp, thence southeast along said swamp to its intersection with State Secondary Road 1305, thence north along said road to its junction with State Secondary Road 1306, thence northwest along said road to its junction with State Highway 403, thence northeast along said highway to its junction with State Secondary Road 1368, thence south along said road to its junction with State Secondary Road 1367, thence southeast along said road to its junction with State Secondary Road 1365, thence northeast along said road to its junction with State Secondary Road 1004, thence southeast along said road to its junction with State Secondary Road 1503, thence northeast along said road to its intersection with State Secondary Road 1500, thence southeast along said road to its intersection with State Secondary Road 1505, thence south along said road to its junction with State Secondary Road 1004, thence southeast along said road to its intersection with Nahunga Creek, thence southwest along said creek to its intersection with State Secondary Road 1301, thence northwest along said road to its junction with State Secondary Road 1346, thence southwest along said road to its junction with State Secondary Road 1385, thence west along said road to its junction with State Highway 50, thence southeast along said highway to its junction with State Secondary Road 1900, thence southeast along said road to its junction with State Secondary Road 1003, thence east along said road to its junction with State Highway 11, thence south along said highway to its junction with State Secondary Road 1922, thence southwest along said road to its junction with State Secondary Road 1909, thence south along said road to its junction with State Secondary Road 1912, thence west along said road to its intersection with the Magnolia city limits, thence south, west, and north along said city limits to its intersection with State Secondary Road 1003, thence southwest along said road to its junction with State Secondary Road 1101, thence southeast along said road to its intersection with State Secondary Road 1102, thence southwest along said road to its junction with State Secondary Road 1126, thence west along said road to its intersection with State Secondary Road 1100, thence southeast along said road to its intersection with State Secondary Road 1102, thence south along said road to its junction with State Secondary Road 1129, thence southwest along said road to its intersection with State Secondary Road 1128, thence northwest along said road to its intersection with Duplin-Sampson County, thence north along said county line to the point of beginning.

The Beard, Mary Lou, farm located on both sides of State Secondary Road 1961 and 0.6 mile west of the intersection of said road and the Northeast Cape Fear River.

The Bostic, Jake, farm located on both sides of State Secondary Road 1961 and 0.5 mile west of the intersection of said road and the Northeast Cape Fear River.

The Bradshaw, Gene A., farm located on the south side of State Secondary Road 1321 and 0.8 mile west of the junction of said road with State Secondary Road 1302.

The Branch, Hall, farm located on the southeast side of State Highway 11 and 0.6 mile southwest of the junction of said highway and State Secondary Road 1004.

The Britt, Cornia, farm located on both sides of State Secondary Road 1545 and 0.5 mile east of the junction of said road and State Secondary Road 1564.

The Brock, Jack, farm located on both sides of State Secondary Road 1700 and 0.8 mile west of the intersection of said road and the Northeast Cape Fear River.

The Brown, Norman, farm located on the south side of State Secondary Road 1961 and 0.6 mile west of the intersection of said road and State Secondary Road 1962.

The Dail, Albert D., farm located on both sides of State Secondary Road 1524 and 0.1 mile north of the junction of said road and State Secondary Road 1525.

The Davis, Jimmie, farm located on the east side of State Highway 111 and the south side of State Secondary Road 1546.

The Davis, Wenzell, farm located on the south side of State Secondary Road 1560 and 0.3 mile south of the junction of said road and State Secondary Road 1537.

The Garner, S. C., farm located on the south side of State Secondary Road 1306 and 0.5 mile west of the junction of said road and State Secondary Road 1511.

V 42 163 AUG 23 77 UM

The Goodson, Emma, farm located on the south side of State Secondary Road 1501 and 0.3 mile west of the junction of said road and State Secondary Road 1505.

The Grady, E. C., farm located on both sides of State Secondary Road 1700 and 0.7 mile west of the intersection of said road and the Northeast Cape Fear River.

The Grady, Robert, farm located on the east side of State Secondary Road 1560 and the south side of State Secondary Road 1537.

The Grady, S. Leland, farm located on both sides of State Secondary Road 1700 and 0.6 mile west of the intersection of said road and the Northeast Cape Fear River.

The Green, Willie, farm located on both sides of State Secondary Road 1971, and 0.6 mile southwest of the junction of said road and State Highway 50.

The Hall, Raymond, farm located on both sides of State Secondary Road 1961 and 1.2 miles west of the intersection of said road and State Secondary Road 1962.

The Harper, Milo, farm located on the northwest side of State Secondary Road 1539 and 0.6 mile northeast of the junction of said road and State Secondary Road 1540.

The Herring Estate, Jeff, farm located on the north side of State Secondary Road 1545 and 0.6 mile east of the junction of said road and State Secondary Road 1564.

The Howard, Henry, farm located on the north side of State Secondary Road 1700 and 0.8 mile west of the intersection of said road and the Northeast Cape Fear River.

The Hussey Estate, M. W., farm located on the east side of State Secondary Road 1560 and 0.2 mile south of the junction of said road and State Secondary Road 1537.

The Johnson, C. M., farm located on the southwest side of State Secondary Road 1139 and 0.6 mile northwest of the junction of said road with State Secondary Road 1133.

The Johnson, Eldora, farm located on both sides of State Secondary Road 1123 and 1.2 miles west of the junction of said road and State Secondary Road 1103.

The Jones, Billy, farm located on both sides of State Secondary Road 1700 and 0.7 mile west of the intersection of said road and the Northeast Cape Fear River.

The Jones, H. A., farm located on the south side of State Secondary Road 1700 and 0.7 mile west of the intersection of said road and the Northeast Cape Fear River.

The Kalmar, J. N., farm located on the south side of State Highway 403 and 0.5 mile west of its junction with State Secondary Road 1304.

The Kennedy, Owen, farm located on the east side of State Secondary Road 1726 and the southeast side of State Secondary Road 1702.

The Kennedy, Sidney J., farm located on the east side of State Secondary Road 1718 and 0.2 mile south of the junction of said road and State Highway 41.

The King, W. R., farm located on the east side of State Secondary Road 1302 and 0.1 mile south of the junction of said road and State Secondary Road 1308.

The Kornegay, Ethyl, farm located 0.2 mile east of State Secondary Road 1501 and 0.6 mile south of the intersection of said road and State Secondary Road 1519.

The Kornegay Estate, Issac, located on the southwest side of State Secondary Road 1305 and 0.7 mile northwest of the junction of said road and State Secondary Road 1305.

The Lewis, Merle S., farm located on the east side of State Secondary Road 1004 and both sides of State Secondary Road 1508.

The Marshburn, Freeman J., farm located on both sides of State Secondary Road 1128 and 0.7 mile southeast of the intersection of said road and State Secondary Road 1129.

The Maxwell, Myra, farm located on the southeast side of State Secondary Road 1306 and the west side of State Secondary Road 1562.

The McCullen, Larry, farm located on the northeast side of State Highway 24 and 0.2 mile northwest of the junction of said highway and State Secondary Road 1904.

The McGowan, Woodell, farm located on the south side of State Secondary Road 1961 and 1.1 miles west of the intersection of said road and State Secondary Road 1962.

The Mercer, Cathleen, farm located on the south side of State Secondary Road 1703 and 1.1 miles east of the intersection of said road and State Secondary Road 1704.

The Mercer, Herbert C., farm located on the south side of State Secondary Road 1703 and 0.7 mile west of the junction of said road and State Secondary Road 1732.

The Norris, Maggie T., farm located on the south side of State Secondary Road 1700 and 1.4 mile east of the intersection of said road and State Secondary Road 1701.

The Outlaw, Bennie F., farm located on both sides of State Secondary Road 1524 and the north side of State Secondary Road 1525.

The Outlaw, Emma, farm located on the south side of State Secondary Road 1509 and 0.5 mile southwest of the junction of said road and State Secondary Road 1510.

The Parrott, Jr., Mrs. Frank, farm located on the south side of State Secondary Road 1703 and 0.3 mile east of the intersection of said road and State Secondary Road 1704.

The Pate, Robert Lee, farm located on both sides of State Secondary Road 1357 and 0.9 mile southwest of the junction of said road and State Secondary Road 1306.

The Powell, William F., farm located on both sides of State Secondary Road 1128 and 0.2 mile southeast of the intersection of said road and State Secondary Road 1129.

The Precythe, Harold, farm located on the east side of U.S. Highway 117 and 0.1 mile south of the junction of said highway and State Secondary Road 1354.

The Rivenbark, George W., farm located on the northwest side of State Secondary Road 1131 and 0.4 mile southwest of the junction of said road and State Secondary Road 1128.

The Rouse, Jim, farm located on both sides of State Secondary Road 1537 and 0.3 mile south of the junction of said road and State Secondary Road 1306.

The Rouse, Rouke, farm located on the north side of State Secondary Road 1537 and the west side of State Secondary Road 1538.

The Shepard, J. T., farm located on both sides of State Secondary Road 1732 and 0.2 mile north of the junction of said road and State Secondary Road 1703.

The Smith, R. J., farm located on the north side of State Highway 11 and 1.2 miles east of the junction of said highway and State Highway 111.

The Smith, Sallie P., farm located on the northeast side of State Highway 111 and 0.8 mile southeast of the Duplin-Wayne County line.

The Summerlin, D. C., farm located on the north side of State Secondary Road 1513 and 0.4 mile east of the junction of said road and State Secondary Road 1565.

The Summerlin, Oliver, farm located on the south side of State Highway 403 and 0.1 mile east of the corporate limits of the town of Faison.

The Sumner, India, farm located on the southwest side of State Highway 111 and 1.2 miles south of the intersection of said highway and State Secondary Road 1700.

The Thomas, J. R., farm located on the north side of State Secondary Road 1700 and 1.4 miles east of the intersection of said road and State Secondary Road 1701.

The Turner, Lumas, farm located on the south side of State Secondary Road 1703 and 0.8 mile west of the junction of said road and State Secondary Road 1732.

The Whaley, Bennie, farm located on the southeast side of State Secondary Road 1961 and 0.3 mile northeast of the junction of said road and State Secondary Road 1800.

The Whitman, Herman E., farm located on the south side of State Secondary Road 1300 and 0.1 mile west of the junction of said road and State Secondary Road 1381.

The Whitman, Herman E., farm located on the north side of State Secondary Road 1300 and 0.8 mile east of the intersection of said road and State Secondary Road 1301.

The Williams, McArthur, farm located on the south side of State Secondary Road 1961 and 1 mile west of the intersection of said road and State Secondary Road 1962.

The Wilson, Mammie, farm located on the east side of State Highway 111 and 1.0 mile south of the intersection of said highway and State Secondary Road 1700.

Greene County. That area bounded by a line beginning at a point where State Highway 102 intersects State Highway 123 and extending south along State Highway 123 to its intersection with Contentnea Creek, thence northwest along said creek to its junction with Panther Swamp. Thence northerly along said Panther Swamp to its intersection with U.S. Highway 13–258, thence easterly along said highway to the point of beginning.

The Carmon, James E., farm located on the east side of State Secondary Road 1004 and 0.4 mile south of its junction with North Carolina Highway 102.

The Murphrey, Edward, farm located on the east side of State Secondary Road 1004 and 0.3 mile south of its junction with State Highway 102.

Harnett County. That area bounded by a line beginning at a point where the Harnett-Lee County line and State Secondary Road 1209 intersect and extending southeast along said road to its junction with State Highway 27, thence east along said highway to its junction with State Secondary Road 1128, thence south along said road to its junction with State Secondary Road 1128, thence east along said road to its junction with State Highway 210, thence northeast along said highway to its junction with State Secondary Road 2030, thence southeast along said road to its junction with State Secondary Road 2031, thence south along said road to its intersection with the Harnett-Cumberland County line, thence west along said county line to its junction with the Harnett-Moore County line, thence northwest and northeast along the Moore-Harnett County line to its junction with the Moore-Harnett Lee County line, thence northeast along the Harnett-Lee County line to the point of beginning.

The Johnson, Sr., Jonah C., farm located at the junction of State Secondary Roads 1553 and 1555. The farm lies in the northeast portion of this junction.

Hoke County. The entire county excluding Fort Bragg Military Reservation.

Johnston County. That area bounded by a line beginning at a point where State Secondary Road 1116 and State Highway 50 intersect and extending southeast along said highway to its intersection with the Johnston-Sampson County line, thence west along said county line to its intersection with State Highway 242, thence north along said highway to its intersection with State Secondary Road 1116, thence east along said road to the point of beginning.

The Barefoot, Wade H., farm located on a farm road and 0.4 mile south of its junction with State Secondary Road 1144 and 0.4 mile west of the intersection of said road with State Secondary Road 1145.

The Blackman, Dewey, farm located on the south side of State Secondary Road 1146, and 0.4 mile east of the junction of said road with State Secondary Road 1145.

The Braswell, J. G., farm located on the east side of State Secondary Road 2519 and 0.4 mile north of the junction of State Secondary Roads 2519 and 2520.

The Davis, I. H., farm located on the southwest side of State Secondary Road 1197 and 0.1 mile southeast of the junction of said road with State Secondary Road 1198.

The Edwards, Archie, farm located on the south side of State Secondary Road 2542 and 0.6 mile south of the junction of said road with State Secondary Road 1007.

The Everett, Betty, farm located on the west side of State Secondary Road 2541 and 0.5 mile south of the junction of said road with State Secondary Road 1007.

The Everett, Betty, farm located on a farm road and 0.6 mile west of its junction with State Secondary Road 2541, said junction being 1.9 miles south of the junction of State Secondary Roads 2541 and 1007.

The Everett, Jaspar, farm located on a farm road and 0.5 mile west of its junction with State Secondary Road 2541, said junction being 1.9 miles south of the junction of State Secondary Roads 2541 and 1007.

The Hudson, Price, Estate farm located on a farm road and 0.4 mile north of its junction with State Secondary Road 1008, said junction being 0.8 mile northeast of the intersection of State Secondary Road 1008 with U.S. Highway 701.

The Johnson, Annie, farm located on the west side of State Secondary Road 1138 and 0.5 mile south of its junction with State Secondary Road 1144.

The Johnson, Wade, farm located on both sides of State Secondary Road 1144 and 0.2 mile west of the junction of said road with State Secondary Road 1138.

The Martin, Emitt, farm located on the east side of State Secondary Road 2519 and 0.3 mile north of the junction of State Secondary Roads 2519 and 2520.

The Martin, John L., farm located on the west side of State Secondary Road 1201 and 0.3 mile north of the junction of said road with State Secondary Road 1200.

The McArthur, Margaret, farm located on a farm road and 1.4 miles north of its junction with State Secondary Road 1199 and 0.9 mile west of the junction of said road with State Secondary Road 1008.

The Oliver, Mrs. Beulah, farm located on the southeast side of the junction of State Secondary Road 2540 with State Secondary Road 2372.

The Summerlin, Everett L., farm located on the north side of State Secondary Road 1008, and 0.6 mile west of the junction of said road with State Secondary Road 1199.

Jones County. The Franck, Mrs. Wilber, farm located on the south side of State Secondary Road 1116 and 1.9 miles west of junction of said road with State Secondary Road 1115.

The Greene, Earl F., farm located on both sides of State Secondary Road 1127 and 0.9 mile northwest of the junction of said road and State Highway 41.

The Greene Estate, L. T., farm located on the east side of State Secondary Road 1123 and 0.5 mile south of the junction of said road and State Secondary Road 1124.

The Simpson, Eugene T., farm located on the south side of State Secondary Road 1116 and 2.5 miles west of the junction of said road and State Secondary Road 1115.

The Simpson, W. W., farm located on the south side of State Secondary Road 1116 and 2.5 miles west of the junction of said road and State Secondary Road 1115.

Lenoir County. The Barber, Clarence, farm located on both sides of State Secondary Road 1301 with 0.2 mile northeast of its junction with State Secondary Road 1302.

The Braxton, Clyde, Estate located on both sides of State Secondary Road 1802 and 0.9 mile northeast of the junction of State Secondary Road 1802 and State Highway 11.

The Brown, Nannie H., farm located in the southwest junction of State Secondary Roads 1152 and 1309.

The Carr, Lillian, farm located on the southwest side of State Secondary Road 1524 and 0.1 mile south of its junction with State Secondary Road 1526.

The Carter, Ephrom, farm located on the south side of State Secondary Road 1116 and 1.5 miles east of its junction with State Highway 11.

The Elmore, Lucy H., No. 1, farm located on the south side of State Secondary Road 1324 and 0.2 mile west of its junction with State Secondary Road 1333.

The Foss, Reginal D., farm located on the north side of State Secondary Road 1316 and 0.6 mile northwest of its junction with State Secondary Road 1318.

The Hamilton, C. W., farm located on the southeast side of State Secondary Road 1802 and 1.2 miles northeast of its junction with State Highway 11.

The Herring, Ben D., No. 1, farm located on both sides of State Secondary Road 1330 and 0.2 mile west of the junction of State Secondary Roads 1330 and 1331.

The Herring, Ben D., No. 2, farm located on the west side of State Secondary Road 1310 and 0.3 mile south of its junction with State Secondary Road 1311.

The Herring, Jack A., farm located on the east side of State Secondary Road 1310 and 0.4 mile south of its junction with State Secondary Road 1311.

The Herring, Lewis R., No. 1, farm located on the south side of State Secondary Road 1324 and 0.3 mile west of its junction with State Secondary Road 1333.

The Herring, Lewis R., No. 2, farm located on the north side of State Secondary Road 1324 at the end of farm road located 0.2 mile east of junction of State Secondary Road 1333.

The Hill, Nannie T., farm located on the southeast side of State Highway 55 at its junction with State Secondary Road 1161.

The Howard, Clarence, farm located on the south side of State Secondary Road 1105 and 0.1 mile east of its intersection with State Secondary Road 1118.

The Jarman, F. R., farm located on the southeast side of State Secondary Road 1311 and 0.7 mile southwest of its junction with State Secondary Road 1318.

The Jones, Edward S., farm located on the west side of U.S. Highway 258 and 0.3 mile north of its junction with State Secondary Road 1116.

The Joyner Farms, Inc., farm located on both sides of State Secondary Road 1324 and 0.5 mile east of its junction with State Secondary Road 1335.

The Moody, Alton, farm located on the south side of State Highway 55 and 0.6 mile northeast of its junction with State Secondary Road 1161.

The Moye, Lenton G., farm located on the west side of State Secondary Road 1335 and 0.3 mile north of its junction with State Secondary Road 1324.

The Parrott Farms, Inc., farm located on the northwest side of State Secondary Road 1157 and 0.7 mile northwest of its intersection with State Highway 55.

The Rouse, Forrest, farm located on the northeast side of State Secondary Road 1143 and 2.9 miles northwest of its intersection with State Secondary Road 1154.

The Rouse, Jim W., farm located on the northeast side of State Secondary Road 1143 and 2.8 miles northwest of its intersection with State Secondary Road 1154.

The Rouse, Leon, farm located on both sides of State Secondary Road 1307 and 0.4 mile southwest of its junction with State Secondary Road 1324.

The Singleton, Ruby S., farm located on east side of State Secondary Road 1802 and 0.6 mile south of its junction with State Secondary Road 1801.

The Sutton, Albert F., farm located on the southwest side of State Road 1324 and 0.1 mile southeast of its junction with State Secondary Road 1327.

The Sutton, C. R., farm located on the east side of State Secondary Road 1152 and 0.2 mile north of its junction with State Secondary Road 1308.

The Sutton, George Hodges, No. 1, farm located in the southwest junction of State Secondary Roads 1324 and 1307.

The Sutton, Iris, farm located on the east side of State Secondary Road 1152 and 0.6 mile south of its junction with State Secondary Road 1324.

The Sutton, John W., farm located in the southeast junction of State Secondary Roads 1330 and 1333.

The Sutton, Kirby E., farm located on the south side of State Secondary Road 1308 at the end of farm road located 0.1 mile southwest of junction of State Secondary Roads 1308 and 1307.

The Sutton, M. L., farm located on the southeast side of State Secondary Road 1311 and 0.8 mile southwest of its junction with State Secondary Road 1318.

The Sutton, Nathan, farm located on the southeast side of State Secondary Road 1311 and 0.6 mile southwest of its junction with State Secondary Road 1318.

The Sutton, Norman, farm located on the northwest side of State Secondary Road 1308 at the end of farm road located 0.3 mile southwest of junction of State Secondary Roads 1308 and 1324.

The Sutton, Prentice, farm located on the south side of State Secondary Road 1508 and 0.3 mile southeast of its intersection with State Secondary Road 1327.

The Sutton, Woodrow W., farm located on the north side of State Secondary Road 1331 and 0.5 mile west of its junction with State Secondary Road 1333.

The Taylor, Heber farm located on the north side of State Secondary Road 1161 and 0.3 mile east of its junction with State Highway 55.

The Walters, H. F., farm located on both sides of State Secondary Road 1335 and 0.4 mile north of its junction with State Secondary Road 1324.

The Waters, Thomas, Estate located on both sides of State Secondary Road 1318 and 0.3 mile north of its junction with State Secondary Road 1317.

The Whitfield, Hubert, No. 1, farm located on the northwest side of State Highway 55 and 0.1 mile northeast of its junction with State Secondary Road 1161.

The Whitfield, Hubert, No. 2, farm located on the north side of State Secondary Road 1157 and 0.9 mile west of its junction with State Highway 55.

The Whitfield, Melvin, No. 2, farm located on the south side of State Secondary Road 1300 and 0.1 mile east of the junction of State Secondary Roads 1300 and 1158.

The Wood, C. W., farm located on the northwest side of State Secondary Road 1311 and 0.7 mile southwest of its junction with State Secondary Road 1318.

Moore County. The Bryant, R. E., farm located on both sides of State Secondary Road 1815 and 0.5 mile southwest of the junction of said road with U.S. Highway 15–501.

The Hardister, George K., farm located on the north side of Highway 211 and 1 mile west of the junction of said highway and State Secondary Road 2075.

The Hardy, N. W., farm located on both sides of State Secondary Road 2007 and 0.2

V 42 163 AUG 23 77 UM V

mile southeast of the junction of said road with State Secondary Road 2005.

The Laton, William A., farm located on the east side of State Secondary Road 1004 and 0.3 mile north of the intersection of said road with State Secondary Road 1113.

The Marks, E. M., farm located on the south side of State Secondary Road 2019 and 2.5 miles east of the junction of said road and State Secondary Road 2018.

The McLaurin, Hattie J., farm located on the north side of N.C. Highway 211 and 0.5 mile west of the junction of said highway with State Secondary Road 2075.

The McNeill, Lena Bell, farm located on the northwest side of State Secondary Road 2077 and 0.5 mile southwest of the junction of said road with State Highway 211.

The Thomas, Claude and Ted, farm located on the west side of State Secondary Road 1128 and 0.5 mile northwest of the junction of said road with State Secondary Road 1122.

Onslow County. The Bryant, Ira, farm located on the north side of State Secondary Road 1425, 0.8 mile west of its junction with State Secondary Road 1434.

The Henderson, Bill, farm located on the east side of State Secondary Road 1528 and on the north side of State Secondary Road 1518 at the junction of said roads.

The McAllister, Henry, farm located on both sides of State Secondary Road 1316 and 1 mile southwest of said road and its junction with State Secondary Road 1308.

The Melville, John, Sr., farm located on the east side of State Secondary Road 1434 and 0.4 mile south of its junction with State Secondary Road 1428.

Pender County. That area bounded by a line beginning at a point where State Secondary Road 1104 intersects the Pender-Bladen County line, and extending northeast along said county line to its junction with Black River, thence east along said river to its junction with Colvines Creek, thence north and northwest along said creek to its intersection with State Secondary Road 1201, thence east along said road to its intersection with the Atlantic Coast Line Railroad, thence southeast along said railroad to its intersection with State Secondary Road 1125, thence northeast along said road to its intersection with Moores Creek, thence northeast and northwest along said creek to its intersection with State Secondary Road 1128, thence northeast along said road to its junction with State Secondary Road 1216, thence east along said road to its intersection with U.S. Highway 421, thence southeast along said highway to its junction with State Secondary Road 1121, thence south along said road to its intersection with State Secondary Road 1125, thence east and south along said road to its junction with State Secondary Road 1121, thence southeast along said road to its intersection with State Secondary Road 1120, thence southwest along said road to its intersection with State Highway 210, thence southwest along said highway to its junction with State Secondary Road 1103, thence southeast along said road to its junction with State Secondary Road 1104, thence southwest and northwest along said road to the point of beginning.

That area bounded by a line beginning at a point where State Secondary Road 1517, junctions with U.S. Highway 117, and extending northwest along said highway to its intersection with State Secondary Road 1412, thence east along said road to its junction with State Secondary Road 1411, thence southwest along said road to its intersection with Pike Creek, thence southeast along said creek to its junction with the Northeast Cape Fear River, thence south along said river to its intersection with State Highway 210, thence southwest along said highway to its junction with State Secondary Road 1518, thence southeast along said road to its junction with State Secondary Road 1517, thence westerly along said road to the point of beginning.

The Armstrong, Willie, farm located 0.5 mile west of State Secondary Road 1408 and 0.3 mile south of the junction of said road with State Highway 210.

The Colvin, Alex, farm located on the northwest side of State Secondary Roard 1120 and 1.4 miles southwest of the intersection of said road and U.S. Highway 421.

The Kea, Leo, farm located 0.5 mile east of State Secondary Road 1105 and 1 mile southwest of the junction of said road and State Secondary Road 1104.

The Kea, Nora, farm located 0.1 mile west of the end of State Secondary Road 1108.

The McCallister, Mary K., farm located 0.2 mile east of State Secondary Road 1105 and 1 mile southwest of the junction of said road and State Secondary Road 1104.

The Stringfield Estate, John, located on the southwest side of State Secondary Road 1517 and 1.4 miles east of the junction of said road and U.S. Highway 117.

The Williams, John H., and Heirs, farm located on the east side of State Secondary Road 1520 and 2.7 miles north of the junction of said road and State Highway 210.

Richmond County. The Autry, J. H., farm located on the north side of State Secondary Road 1803 and 0.7 mile east of Osborne.

The Beck, Lacy A., farm located on both sides of State Secondary Road 1607 and 0.4 mile southeast of the intersection of said road and State Secondary Road 1608.

The Bethea, Queen, farm located on the northeast side of State Secondary Road 1803 and 0.4 mile southeast of the intersection of said road and State Secondary Road 1825.

The Chappell, Fred, Jr., located on the northwest side of N.C. Highway 177 and 0.5 mile northeast of the junction of said road and State Secondary Road 1607.

The Clinton, Bernice, farm located on the south side of State Secondary Road 1803 and 0.8 mile east of Osborne.

The David, Ethel, farm located on both sides of State Secondary Road 1803, on the west side of the intersection of said road with State Secondary Road 1825.

The Davis, Climon, farm located on the northwest side of N.C. Highway 38 and 0.5 mile northeast of the intersection of said road and State Secondary Road 1803.

The Davis, Katherine, farm located on the northeast side of State Secondary Road 1803 and 0.4 mile northwest of the intersection of said road and N.C. Highway 88.

The Dial, Dormic, farm located on the north side of State Secondary Road 1607 and 0.8 mile west of the intersection of said road and State Secondary Road 1608.

The Dumas, Elnora, farm located on the northeast side of State Secondary Road 1803 and 0.3 mile southeast of the intersection of said road and State Secondary Road 1825.

The Dumas, Reba, farm located on the northeast side of State Secondary Road 1803 and 0.3 mile northwest of said intersection of N.C. Highway 38.

The Dunn, Thomas, farm located on the northwest side of State Secondary Road 1802 and 0.3 mile southwest of the intersection of said road and State Secondary Road 1800.

The Elizhbugar, Charity, farm located on the northeast side of State Secondary Road 1003 and 2 miles northwest of its junction with State Secondary Road 1475.

The Hailey, Annie, farm located on the north side of State Secondary Road 1475 and 1.7 miles west of its junction with U.S. Highway 1.

The Hailey, Maria, farm located on the southwest side of State Secondary Road 1440 and 0.3 mile southeast of its junction with State Secondary Road 1433.

The Hamlet Gin & Supply Co. farm, located on both sides of State Secondary Road 1803 and on the east side of the intersection of said road and State Secondary Road 1825.

The Ingram, Rome, farm located on the southwest side of State Secondary Road 1003 and 1.8 miles northwest of its junction with State Secondary Road 1475.

The Jenkins, Dewey, farm located on a dirt road 0.2 mile southwest of its junction with State Secondary Road 1803, said junction being 0.8 mile east of Osborne.

The Jones, W. R., farm located on the south side of State Secondary Road 1607 and 0.8 mile west of the intersection of said road and State Secondary Road 1608.

The Little, John, farm located on the southeast side of State Secondary Road 1442 and at the junction of said road with State Secondary Road 1476.

The McDonald, Leonard, farm located on the north side of State Secondary Road 1607 and 0.9 mile west of the intersection of said road and State Secondary Road 1608.

The McLaurin, Meta, farm located on the southwest side of State Secondary Road 1803 and 0.3 mile southeast of the intersection of said road and State Secondary Road 1825.

The McNeill, Dalton, farm located on the southwest side of State Secondary Road 1003 and 1.9 miles northwest of its junction with State Secondary Road 1475.

The Mathews, Lizzie, farm located in the southwest quadrant of the intersection of State Secondary Road 1108 and 1971.

The Parker, Henry W., farm located on the southwest side of State Secondary Road 1486 and 1.3 miles northwest of its junction with U.S. Highway 1.

The Porter, Mrs. A. W., farm located on the northeast side of State Secondary Road 1999 and 1 mile east of the intersection of said road with U.S. Highway 1.

The Quick, Douglas, farm located in the northwest quadrant of the intersection of State Secondary Roads 1802 and 1800.

The Quick, Julius, farm located on the northeast side of State Secondary Road 1992 and 0.6 mile northeast of its junction with State Secondary Road 1994.

The Rush, Eli, farm located on the northwest side of State Secondary Road 1442 and 0.7 mile northeast of its junction with State Secondary Road 1489.

The Rush, James, farm located on the southeast side of State Secondary Road 1442 and 0.7 mile northeast of its junction with State Secondary Road 1489.

The Scholl, H. H., farm located on the southwest side of State Secondary Road 1805 and 0.3 mile southeast of its junction with State Secondary Road 1804.

The Smith, J. A., farm located on the southwest side of State Secondary Road 1805 and 0.5 mile northwest of its junction with N.C. Highway 381.

The Sorenzen, Gladys, farm located on the southwest side of State Secondary Road 1803 and 0.4 mile northwest of the intersection of said road and N.C. Highway 38.

The Standback, Tommy, farm located on the east side of U.S. Highway 220 and 0.6 mile northeast of its junction with State Secondary Road 1433.

The Steen, Willard, farm located on the southwest side of State Secondary Road 1803 and 0.2 mile southeast of the intersection of said road and State Secondary Road 1825.

The Strong, Marvin, farm located on the north side of State Secondary Road 1803 and 1.3 miles southwest of the intersection of said road and State Secondary Road 1825.

The Terry, Ruth, farm located on both sides of State Secondary Road 1442 and 0.2 mile northeast of its junction with State Secondary Road 1477.

The Terry, Tom, farm located on both sides of State Secondary Road 1442 and 0.3 mile northeast of its junction with State Secondary Road 1477.

The Terry, W. C., farm located on the west side of State Secondary Road 1424 at is junction with State Secondary Road 1507 at Roberdel, N.C.

The Thomas, Walter, farm located on both sides of U.S. Highway 220 and 0.4 mile northeast of its junction with State Secondary Road 1433.

The Thompson, Roger E., farm located in the northeast corner of the junction of State Secondary Road 1442 with State Secondary Road 1477.

The Waddell, A. M., farm located on both sides of U.S. Highway 1 and on both sides of State Secondary Road 1103 and on both sides of State Secondary Road 1971 at the intersection of said highway and said roads at Diggs.

The Wallace, Talley, farm located on both sides of State Secondary Road 1800 and 1.2 miles northwest of the intersection of said road and State Secondary Road 1802.

The Waters, Will, farm located on both sides of State Secondary Road 1623 and 0.4 mile southwest of its junction with State Secondary Road 1607.

The Watkins, John Q., farm located on the southeast side of State Secondary Road 1476 and 0.3 mile northeast of its junction with State Secondary Road 1442.

The Watkins, Mosby, farm located on both sides of State Secondary Road 1476 and 0.2 mile northeast of its junction with State Secondary Road 1442.

The York, Will, farm located on the northeast side of State Secondary Road 1803 and 0.4 mile northwest of the intersection of said road and N.C. Highway 38.

Sampson County. The entire county.

Scotland County. That area bounded by a line beginning at a point where U.S. Highway 15–401 intersects the North Carolina-South Carolina State line and extending northeast along said highway to its junction with U.S. Highways 15A–401A, thence north along said highway to its junction with U.S. Highway 501, thence north along said highway to its intersection with U.S. Highway 15–401, thence southwest along said highway to its intersection with State Secondary Road 1300, thence northwest along said road to its junction with State Secondary Road 1116, thence northwest along said road to its junction with State Secondary Road 1324, thence north along said road to its junction with State Secondary Road 1345, thence northwest along said road to its intersection with State Secondary Road 1341, thence northeast along said road to its junction with State Secondary Road 1328, thence north along said road to its intersection with the southern boundary of the Sandhills Game Management Area, thence east along said boundary to its intersection with U.S. Highway 15–501, thence north along said highway to its intersection with the Scotland-Hoke County line, thence southeast along said county line to the Scotland-Robeson County line, thence south and southwest along said county line to the North Carolina-South Carolina State line, thence northwest along said State line to the point of beginning, excluding the area within the corporate limits of the city of Laurinburg and the town of East Laurinburg.

The Bunch, Archie W., farm located at the intersection of State Secondary Roads 1323 and 1001.

The Butler, Luther, farm located on the south side of State Secondary Road 1154 and 0.2 mile east of the junction of said road with State Secondary Road 1155.

The Calhoun, L. E., farm located on the south side of State Highway 79 and 0.3 mile west of its junction with State Secondary Road 1118.

The Gibson, H. P., Estate farm located on the north side of State Highway 79 and 0.4 mile west of its junction of State Secondary Road 1118.

The King, J. Lloyd, farm located on the northwest side of State Secondary Road 1128 and 0.3 mile southwest of its junction with State Secondary Road 1101.

The Morgan, J. D., farm located on the east side of State Secondary Road 1346 and 0.5 mile north of the junction of said road with State Secondary Road 1343.

The Morgan, J. D., farm located on both sides of State Secondary Road 1345 and 0.1 mile northwest of its junction with State Secondary Road 1342.

The Newton, Peter F., farm located at the intersection of State Secondary Roads 1334, 1336, and 1345.

The Odoms, Hobson, farm located on both sides of State Secondary Road 1108 and 0.4 mile west of its junction with State Secondary Road 1100.

The Steele, J. D., farm located on both sides of State Secondary Road 1351 and 0.9 mile northwest of the junction of said road with State Secondary Road 1346.

Wayne County. That area bounded by a line beginning at a point where U.S. Highway 70 and State Secondary Road 1719 intersect and extending south along said road to its junction with State Secondary Road 1731, thence south along said road to its junction with State Highway 55, thence southwest and west along said highway to its intersection with State Secondary Road 1937, thence northerly on said road to its junction with State Secondary Road 1932, thence north on said road to its intersection with State Secondary Road 1932, thence easterly along said road to its junction with State Secondary Road 1915, thence east along a line projected from a point at the junction of State Secondary Roads 1120 and 1915 to the junction of said line with a point located at the junction of Sleepy Creek and Neuse River, thence east along the Neuse River to its intersection with State Highway 111, thence north along said highway to its junction with State Secondary Road 1726, thence northeast along said road to its intersection with State Secondary Road 1727, thence southeast along said road to its junction with State Secondary Road 1728, thence northeast along said road to its junction with U.S. Highway 70, thence southeast along said highway to the point of beginning.

The Barwick, George, farm located on the east side of State Secondary Road 1931 and 0.1 mile south of its junction with State Secondary Road 1930.

The Baucom, Howard, farm located on the east side of State Secondary Road 1932 and 0.2 mile north of its junction with State Secondary Road 1927.

The Brinson, Earl, farm located on the north side of State Secondary Road 1120 and 0.1 mile west of its intersection with State Secondary Road 1932.

The Brock, Odell, farm located on the north side of State Secondary Road 1210 and 0.3 mile east of its junction with State Secondary Road 1209.

The Carfaway, Ethel, farm located on the east side of State Secondary Road 1915 and 0.1 mile north of the junction of said road and State Secondary Road 1120.

The Casey, Emma E., farm located 7 miles east of Goldsboro on the north side of U.S. Highway 70 and 0.4 mile east of the junction of State Secondary Road 1721 and said highway.

The Daly, J. B., farm located on the west side of State Highway 111 and 0.6 mile south of the junction of said highway with State Secondary Road 1730.

The Dawson, L. A., farm located on the west side of State Highway 111 and 0.5 mile south of the junction of said highway and State Secondary Road 1730.

The Flowers, Willie, farm located on the north side of U.S. Highway 13 and 0.4 mile east of its junction with State Secondary Road 1207.

The Grady, Vernie C., farm located on the west side of State Secondary Road 1931 and 0.2 mile north of its intersection with State Secondary Road 1120.

The Grant, Maggie, Estate located on the west side of N.C. Highway 111 and 1.9 miles south of the junction of State Secondary Road 1730 with said highway.

The Grantham, Barfield, farm located on the west side of State Secondary Road 1931 and 0.4 mile north of its intersection with State Secondary Road 1120.

The Gray, Albert, farm located on the east side of State Secondary Road 1719 and 0.9 mile south of its intersection with U.S. Highway 70.

The Griffin, Birtie, farm located on the southeast side of State Highway 55 and 0.5 mile northeast of its intersection with State Highway 111.

The Griffin, McKinley, farm located on the north side of State Secondary Road 1737 and 0.2 mile east of its junction with State Secondary Road 1731.

The Griffin, Oliver H., farm located 0.6 mile north of Dudley and 0.2 mile west of U.S. Highway 117.

The Griffin, W. A., farm located on the northeast side of State Secondary Road 1731 and 0.6 mile north of its junction with State Secondary Road 1737.

The Gurley, Clara Lee, farm located on the south side of State Secondary Road 1330 and 0.1 mile west of the junction of said road and State Secondary Road 1332.

The Haggin, Joe, No. 1, farm located on the east side of State Secondary Road 1931 and 0.7 mile north of its intersection with State Secondary Road 1120.

The Haggin, Joe, No. 2, farm located on the east side of State Secondary Road 1931 and 1.1 miles northeast of its intersection with State Secondary Road 1120.

The Hall, Marvin, farm located on both sides of State Secondary Road 1932 and 0.3 mile south of its intersection with State Secondary Road 1120.

The Ham, George E., farm located southeast of Seymour Johnson Air Base on the south side of State Secondary Road 1909 and 0.7 mile west of the junction of said road with State Secondary Road 1910.

The Herring, Harmon, farm located on the south side of State Secondary Road 1734 and 0.4 mile east of its junction with State Secondary Road 1731.

The Herring, Thel, farm located on the west side of State Secondary Road 1711 and 0.4 mile north of its junction with U.S. Highway 70A.

The Hines, J. D., farm located on both sides of State Secondary Road 1236 and 0.8 mile east of the intersection of said road with State Highway 581.

The Hollaman, R. J., farm located on the northwest corner of State Secondary Road 1125 and 0.7 mile north of the junction of said road and State Secondary Road 1122.

The Humphrey, Josephine, farm located on east side of State Secondary Road 1932 and 0.2 mile north of its intersection with State Secondary Road 1120.

The Ivey, W. H., farm located on the south side of State Secondary Road 1734 and 0.3 mile east of its junction with State Secondary Road 1731.

The Johnson, J. R., farm located on the south side of State Secondary Road 1330 and

V 42 163 AUG 23 77 UM V

0.1 mile west of the junction of said road and State Secondary Road 1332.

The Lofton, Burt & Davis, King, farm located on the east side of State Secondary Road 1739 and 0.3 mile south of its junction with State Highway 55.

The McClenny, G. A., farm located on the south side of State Secondary Road 1007 and 0.1 mile west of the junction of said road with State Highway 581.

The McClenny, G. A., No. 2, farm located on both sides of State Secondary Road 1332 and 0.1 mile north of junction of said road and State Secondary Road 1330.

The Newsome, Paul, farm located on the east side of State Secondary Road 1719 and 1 mile south of its intersection with U.S. Highway 70.

The Oliver, Estella J., farm located on the west side of U.S. Highway 117 and 0.8 mile north of Brogden School.

The Oliver, H. H., farm located on the south side of State Secondary Road 1219 and 0.4 mile east of its junction with State Secondary Road 1218.

The Parker, Worth W., farm located on the west side of State Secondary Road 1130 and 1 mile south of the intersection of said road with U.S. Highway 13.

The Parks, Robert, farm located on the southeast side of State Secondary Road 1932 and 0.5 mile northeast of its intersection with State Secondary Road 1120.

The Perkins, Joe D., farm located on the northwest side of State Secondary Road 1711 and 0.2 mile southwest of the intersection of said road with U.S. Highway 70 Bypass.

The Raynor, A. B., farm located on the south side of U.S. Highway 13 and 0.1 mile east of its junction with State Secondary Road 1207.

The Raynor, Early, No. 1, farm located on the south side of U.S. Highway 13 and 0.3 mile east of its junction with State Secondary Road 1207.

The Raynor, Early, No. 2, farm located on the north side of State Secondary Road 1101 and 0.7 mile east of its intersection with State Secondary Road 1105.

The Raynor, Elester, farm located on the east side of State Secondary Road 1105 and 0.8 mile south of its intersection with U.S. Highway 13.

The Rogers, Charlie, farm located on both sides of State Secondary Road 1710 and 0.9 mile southwest of the junction of said road with U.S. Highway 70A.

The Smith, Alfred, farm located on the north side of State Secondary Road 1330 and 0.9 mile west of the junction of said road and North Carolina Highway 581.

The Smith, Arnold, farm located on the southeast side of State Secondary Road 1932 and 0.5 mile northeast of its intersection with State Secondary Road 1120.

The Smith, J. B., farm located in south junction of State Secondary Roads 1731 and 1734.

The Smith, Olivia, farm located on the southeast side of State Secondary Road 1122 and both sides of State Secondary Road 1124.

The Sutton, D. M., farm located on the east side of State Secondary Road 1731 and 0.9 mile north of the Neuse River.

The Tart, John, No. 1, farm located on the south side of U.S. Highway 13 and 0.7 mile east of its intersection with State Secondary Road 1105.

The Thornton, S. E., farm located on the southeast junction of State Secondary Roads 1210 and 1209.

The Turnage, W. H., farm located on the northwest side of State Secondary Road 1932 and 0.3 mile northeast of its junction with State Secondary Road 1927.

The Weaver, Luby W., farm located on both sides of State Secondary Road 1106 and 0.2 mile east of its junction with State Secondary Road 1101.

The Williams, Eddie, farm located on the north side of State Highway 581 and the east side of State Secondary Road 1236 at the junction of said roads.

The Wise, Ella, farm located on the south side of State Secondary Road 1208 and 1 mile west of its junction with State Secondary Road 1209.

Wilson County. The Eatmon, Ralph, farm located on both sides of State Secondary Road 1302 and 0.5 mile east of its intersection with State Secondary Road 1301.

2. In § 301.80–2a relating to the State of South Carolina under suppressive area, the description for Florence County is changed to add three properties in alphabetical order to read as follows:

SOUTH CAROLINA

(1) *Generally infested area.* None.
(2) *Suppressive area.*

* * * * *

Florence County.

* * * * *

The Georgia Pacific Paper Company farm located on the south side of a dirt road and 0.6 mile northeast of its junction with State Secondary Highway 461, said junction being 0.8 mile north of the intersection of State Secondary Highways 461 and 85.

* * * * *

The Poston, Charlton, farm located on the south side of U.S. Highway 378 and its junction with State Secondary Highway 596.

* * * * *

The Thompson, John D., farm located on the north side of State Secondary Highway 150 and 0.4 mile east of its junction with State Secondary Highway 460.

* * * * *

(Secs. 8, 9, 37 Stat. 318, as amended, sec. 106, 71 Stat. 33; (7 U.S.C. 161, 162, 150ee); 37 FR 28464, 28477; 38 FR 19141; 7 CFR 301.80–2.)

The Deputy Administrator of the Plant Protection and Quarantine Programs has determined that the witchweed has been found or there is reason to believe it is present in the civil divisions and parts of civil divisions listed above as regulated areas or that it is necessary to regulate such areas because of their proximity to witchweed infested localities. Further, the Deputy Administrator has found that facts exist as to the pest risk involved in the areas removed from the list of regulated areas which make it safe to relieve the requirements of the quarantine as provided herein. He has also determined that the areas designated as suppressive and generally infested areas are eligible for such designation under § 301.80–1, as amended.

The Deputy Administrator has also determined that each of the quarantined States, wherein only portions of the State have been designated as regulated areas, has adopted and is enforcing a quarantine or regulation which imposes restrictions on interstate movement of the regulated articles which are substantially the same as the restrictions on interstate movement of such articles imposed by the quarantine and regulations in this subpart, and that designation of less than the entire State as a regulated area will otherwise be adequate to prevent the interstate spread of witchweed. Therefore, such civil divisions and parts of civil divisions listed above are designated as witchweed regulated areas.

To the extent that this revision relieves certain restrictions presently imposed, it should be made effective promptly in order to be of maximum benefit to persons subject to the restrictions which are being relieved. To the extent that this revision imposes restrictions, that are necessary in order to prevent the spread of witchweed, they should be made effective promptly to accomplish their purpose in the public interest. Also, this action is based or surveys by the U.S. Department of Agriculture and State agencies of North Carolina and South Carolina, and it does not appear that additional information would be made available to the Department by public participation in rulemaking proceedings on this amendment.

Accordingly, it is found upon good cause under the administrative procedure provisions of 5 U.S.C. 553, that further notice and other public procedure with respect to this revision are unnecessary, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

NOTE.—The Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs, has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Done at Washington, D.C., this 18th day of August, 1977.

T. G. DARLING,
Acting Deputy Administrator, Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

PART 1427—COTTON

Subpart—1977 Crop Supplement to Cotton Loan Program Regulations

Correction

In FR Doc. 77-22618, appearing at page 40421 in the issue of Wednesday, August 10, 1977, make the following changes:

1. On page 40422, under the heading "Mississippi", in the column headed "City", the 14th to last entry should read, "Pontotoc".

2. On page 40422, under the heading "Missouri", in the column headed "City", the seventh entry should read, "Malden".

3. On page 40423, in the last portion of the table headed "Tennessee", in the column headed "City", the 14th entry should read, "Tahoka".

CHAPTER XXVIII—FOOD SAFETY AND QUALITY SERVICE (STANDARDS, INSPECTION, MARKETING PRACTICES) DEPARTMENT OF AGRICULTURE

PART 2851—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS (INSPECTION, CERTIFICATION, AND STANDARDS)

United States Standards for Grades of Mechanically Harvested American (Eastern Type) Grapes for Processing and Freezing[1]

AGENCY: Food safety and Quality Service, USDA.

ACTION: Final rule.

SUMMARY: This rule changes the title of the grade standards for mechanically harvested American (Eastern Type) grapes for processing and freezing to standards for grapes for processing and freezing. This change will permit all types of grapes for processing, handpicked or mechanically harvested, to be certified under these standards.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank W. Betz, Fresh Products Branch, Fruit and Vegetable Quality Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C., 202–447–2093.

SUPPLEMENTARY INFORMATION: On June 16, 1977 a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 30626) under Chapter I, Part 51 which has been changed to Chapter XXVIII, Part 2851 by a rule effective June 27, 1977 establishing a new chapter for the Food Safety and Quality Service in the Code of Federal Regulations. This proposed rule would permit all types (European, American and French hybrids) of grapes for processing, hand-picked or mechanically harvested, to be certified under the United States Standards for Grades of Mechanically Harvested American (Eastern Type) Grapes for Processing and Freezing by changing the title to United States Standards for Grades of Grapes for Processing and Freezing and revising § 2851.2150.

The United States Standards for Grades of Mechanically Harvested American (Eastern Type) Grapes for Processing and Freezing became effective May 15, 1975. In May of this year, the National Grape Cooperative Association, Inc. (NGCA) formally requested that the words "Mechanically Harvested" be deleted from the title of the standards. This would permit hand-picked as well as mechanically harvested grapes to be certified under the standards. This request was supported by Taylor Wine Co., Hammondsport, New York and Coca Cola Co., Geneva, Ohio.

Subsequent to the request from NGCA, it was suggested that the title of the standards be further changed by deleting the words "American (Eastern Type)". This change in addition to including hand-picked grapes would also permit all types (European, American and French hybrids) of grapes for processing and freezing to be certified under these standards. The Department and industry representatives agree that this amendment will make the standards more useful to industry.

Following publication of the proposal in the FEDERAL REGISTER copies were distributed to industry and other interested persons for comment. The period for comment ended on July 30, 1977 and no comments were received, therefore, the proposed amendment is hereby adopted without change and is set forth below.

It is hereby found that good cause exists for not postponing the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553), in that: (1) The 1977 harvesting season is already under way and it is in the interest of the industry that this amendment be made effective on September 1, 1977; and (2) no special preparation is required for compliance with the amendment on the part of members of the industry.

The Subpart—United States Standards for Grades of Mechanically Harvested American (Eastern Type) Grapes for Processing and Freezing is amended to read as follows:

Subpart—United States Standards for Grades of Grapes for Processing and Freezing

Section 2851.2150 General is revised to read as follows:

§ 2851.2150 General.

(a) These standards apply to all types of grapes, hand-picked or mechanically harvested, which are to be processed.

(b) The grade of a lot of grapes shall be determined on the basis of a composite sample.

(Agricultural Marketing Act of 1946, secs. 203, 205, 60 Stat. 1087, as amended, 1090 as amended; (7 U.S.C. 1622, 1624).)

NOTE.—The Food Safety and Quality Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: August 16, 1977.

ROBERT ANGELOTTI,
Administrator.

[FR Doc.77-24401 Filed 8-22-77;8:45 am]

[1] Compliance with provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug and Cosmetic Act, or with applicable State laws and regulations.

Title 9—Animals and Animal Products

CHAPTER III—FOOD SAFETY AND QUALITY SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—MANDATORY MEAT INSPECTION

PART 319—DEFINITIONS AND STANDARDS OF IDENTITY OR COMPOSITION

PART 325—TRANSPORTATION

Miscellaneous Amendments; Correction

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule, corrections.

SUMMARY: This document makes minor nonsubstantive changes in the Federal meat inspection regulations. These changes are necessary in order to correct an error and to reflect an organizational realignment in the Department of Agriculture.

EFFECTIVE DATE: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. W. J. Minor, Chief Staff Officer, Issuance Coordination Staff, Technical Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–6189.

SUPPLEMENTARY INFORMATION: The Federal meat inspection regulations (9 CFR Parts 319 and 325) are amended as follows:

§ 319.105 [Amended]

1. In § 319.105(a) (2) and (6), the reference to "§ 318.7(b)(4)" is changed to "§ 318.7(c)(4)."

§ 325.20 [Amended]

2. In § 325.20(d), the phrase "Animal and Plant Health Inspection Service" is amended to read "Food Safety and Quality Service." (Sec. 21, 34 Stat. 1260, as amended, (21 U.S.C. 621).)

These amendments make a minor correction and reflect an orginizational change in the Department. Therefore, it does not appear that additional relevant information would be made available by public participation in rulemaking proceedings on these amendments. Accordingly, it is found upon good cause under the administrative procedure provisions of 5 U.S.C. 553, that notice and other public procedure with respect to these amendments are impracticable and unnecessary, and good cause is found for making this amendment effective less FEDERAL REGISTER.

NOTE.—The Food Safety and Quality Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Done at Washington, D.C., on Aug. 17, 1977.

ROBERT ANGELOTTI,
Administrator, Food Safety and Quality Service.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. 8970–0]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Central California Lettuce Producers Cooperative Et Al.

AGENCY: Federal Trade Commission.

ACTION: Order of dismissal.

V 42 163 AUG 23 77 UM

SUMMARY: This order dismisses a complaint issued against a Salinas, Calif. nonprofit cooperative and 22 of its members for alleged price-fixing practices in the lettuce market, violative of antitrust law. The Commission ruled that the price-fixing practices were exempt from antitrust laws under a statute permitting producers of agricultural products to "act together in association * * * in collectively * * * marketing" their products.

DATES: Complaint issued June 10, 1974. Dismissal order issued July 25, 1977.[1]

FOR FURTHER INFORMATION CONTACT:

David I. Wilson, Federal Trade Commission, Bureau of Competition, 6th and Pennsylvania Ave. NW., Washington, D.C. 20580, 202–724–1276.

SUPPLEMENTARY INFORMATION: In the Matter of Central California Lettuce Producers Cooperative, a corporation; and Admiral Packing Co., a corporation; and Albert C. Hansen d/b/a Hansen Farms; and California Coastal Farms, Inc., a corporation; and Carl Joseph Maggio, Inc., a corporation; and D'arrigo Bros. Co. of California, a corporation; and Eckel Produce Co., a partnership; and Green Valley Produce Co-op, a corporation; and Growers Exchange, Inc., a corporation; and Harden Farms of California, a corporation; and J. R. Norton Co., a corporation; and Jack T. Baillie Co., Inc., a corporation; and Let-Us-Pack, a partnership; and Merit Packing Co., a corporation; and Merrill Farms, a corporation; and Pacific Lettuce, a corporation; and R. T. Englund Co., a partnership; and Royal Packing Co., a corporation; and Salinas Lettuce Farmers Cooperative, a corporation; and Salinas Marketing Cooperative, a corporation; and The Garin Co., a corporation; and United Brands Company, a corporation; and West Coast Farms, a partnership.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

The order of dismissal is as follows:

FINAL ORDER

This matter having been heard by the Commission upon the appeal of respondent from the administrative law judge's initial decision, and upon briefs and oral argument in support thereof and in opposition thereto, and the Commission, for the reasons stated in the accompanying opinion, having concluded that the administrative law judge's initial decision should be set aside and that the complaint should be dismissed:

It is ordered, That the administrative law judge's initial decision be, and it hereby is, set aside.

It is further ordered, That the complaint be, and it hereby is, dismissed.

By the Commission. Chairman Pertschuk did not participate.

CAROL M. THOMAS,
Secretary.

Title 17—Commodity and Securities Exchanges

[Release No. SAB–15]

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

PART 211—INTERPRETATIVE RELEASES RELATING TO ACCOUNTING MATTERS

Subpart B—Staff Accounting Bulletins

ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Accounting Bulletin.

SUMMARY: This interpretation describes the practices to be followed by Commission staff in connection with reporting of allowance for funds used during construction on financial statements of public utilities. It results from the issuance of Order No. 561 by the Federal Power Commission which amended related parts of its uniform systems of accounts for public utilities and natural gas companies. It is expected that this interpretation will clarify the presentation of the allowance for funds used during construction in statements to be filed with this Commission.

EFFECTIVE DATE: August 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Lawrence J. Bloch, Office of the Chief Accountant, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, 202–755–1182.

SUPPLEMENTARY INFORMATION: The statements in the Bulletin are not rules or interpretations of the Commission nor are they published as bearing the Commission's official approval; they represent interpretations and practices followed by the Division of Corporation Finance and Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 11, 1977.

STAFF ACCOUNTING BULLETIN No. 15

The staff hereby revises Topic 10F of Staff Accounting Bulletin No. 1 on the subject of AFC Credits by the issuance of Staff Accounting Bulletin No. 15. The facts, question and interpretive response of Topic 10F originally published in Staff Accounting Bulletin No. 1 are deleted and replaced by Staff Accounting Bulletin No. 15.

TOPIC 10: MISCELLANEOUS DISCLOSURE

F. ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION

Facts. In February 1977, the Federal Power Commission issued Order No. 561 amending its Uniform Systems of Accounts for Public Utilities and Licensees (18 CFR Chapter I, Subchapter C) and for Natural Gas Companies (18 CFR Chapter I, Subchapter F) (42 FR 9161, February 15, 1977) to provide a uniform formula for determining the maximum rates to be used in computing the "allowance for funds used during construction" (AFC credits). Concurrently the FPC amended its report forms to divide the AFC credits into two components related to the source of the funds from which the credits are derived, "borrowed funds" (long-term and short-term debt) and "other funds" (preferred and common stock). The borrowed funds component is to be presented on the statement of income as a credit in the interest charges section, and the other funds component is to be included as part of other income. The amended statement of changes in financial position excludes the other funds component of AFC credits from funds provided from operations and also from funds applied to construction and plant expenditures. The amendments to the uniform systems of accounts relating to the formula for computing the maximum rates were made effective as of January 1, 1977, and the amendments to the report forms were ordered effective for the reporting year 1977.

Prior to this amendment, AFC credits have been reported in one amount as a part of other income. The staff has generally required the amount to be cross references to a note which (1) describes the nature and basis of the item, including the interest rate and source of funds assumptions, (2) indicates as a percentage of net income the amount of the AFC credit attributable to the common stock equity portion and (3) discloses whether AFC credits related to borrowed funds are based on a before or after tax effect.

Question. In view of the changes in FPC reporting requirements how should AFC credits be presented in income statements filed under the Securities Acts?

Interpretive Response. Income statements for periods beginning on or after January 1, 1977, should present the AFC credits appropriately divided between other income and as a credit in the interest charges section.

If practicable, income statements for periods ending prior to January 1, 1977, should be reclassified to reflect the new presentation. If the pre-1977 statements are not reclassified, a note should briefly explain why registrant believes reclassification is not appropriate.

Statements covering a twelve-month period ending on an interim month end during 1977 should reflect this new presentation for the entire twelve-month period if practicable. However, if prior periods are not to be reclassified, statements for such twelve-month periods must present AFC credits recognized subsequent to January 1, 1977, in accordance with the new presentation and AFC credits recognized prior to that date as other income.

Because of the lack of comparability between the amount of the AFC credit reported as other income under the former presentation and the amount to be reported under the new presentation, amounts for periods prior to January 1, 1977, which have not been reclassified shall be reported on a separate line from amounts for periods subsequent to that date.

An explanatory note similar to the one outlined under the "Facts" above should be given. In view of the two-part reporting of AFC credits under the new presentation, however, the second item of information relating to the amount of the credit attributable to common stock equity need not be given in connection with statements for periods beginning on or after January 1, 1977 or for statements for periods ending prior to that date which have been reclassified to reflect the new presentation.

On statements covering a twelve-month period ending on an interim month-end during 1977, which reflect the new presentation for the entire period, information concerning the portion of the AFC credit attributable to common stock equity need not be given; however, statements for such periods on which AFC credits for the 1976 months have not been reclassified must give information concerning credits attributable to common stock equity for the portion of the period which was not reclassified.

On statements of changes in financial position, at least the other funds component of the AFC credits should be excluded from funds provided from operations and from funds applied to construction and plant expenditures as provided in the amended FPC forms. The total amount of AFC credits may be excluded if deemed appropriate by the registrant.

[FR Doc.77-24337 Filed 8-22-77;8:45 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER D—DRUGS FOR HUMAN USE

[Docket No. 75N–0051]

PART 320—BIOAVAILABILITY AND BIOEQUIVALENCE REQUIREMENTS

Addition to Drug List and Clarification of Waiver Provision

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the bioavailability regulations to add certain parenteral drug products that were inadvertently omitted from the list of drug products with known or potential bioequivalence problems, and to clarify the provision under which FDA will waive the requirement for evidence of in vivo bioavailability.

EFFECTIVE DATE: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Marilyn L. Watson, Bureau of Drugs (HFD–30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301–443–6490.

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs issued final regulations in the FEDERAL REGISTER of January 7, 1977 (42 FR 1638), regarding methods and procedures for in vivo testing to determine the bioavailability of drug products. Section 320.22(c) of the regulations listed specific drug products with known or potential bioequivalence problems. Certain types of parenteral drug products that were listed in the preamble of the proposed bioavailability / bioequivalence regulations that were published in the FEDERAL REGISTER of June 20, 1975 (40 FR 26164) as having known or potential bioequivalence problems were inadvertently omitted from the list in the final regulations. They were phenytoin sodium powder for injection and parenteral drug products in suspension form. The Commissioner is therefore amending § 320.22(c) to include those parenteral drug products.

Section 320.22 provides that, under certain specified circumstances, applicants for new drug applications (NDA's) or abbreviated new drug applications (ANDA's) may request the Food and Drug Administration to waive the requirement for submission of evidence of in vivo bioavailability. Paragraph (c) of that section provides that the Commissioner will waive such requirements for certain products that had been determined at the time the regulation was promulgated to be effective for at least one indication as announced in a Drug Efficacy Study Implementation (DESI) notice.

The Commissioner believes that further clarification of the status of drugs in the DESI program is needed. Many DESI notices have included a bioavailability requirement as a condition for NDA or ANDA approval. At the time of publishing the proposed bioequivalence regulations (June 20, 1975), FDA had reviewed all of the products evaluated in a DESI notice as effective for at least one indication and had determined that except for specific drug products listed in the preamble of the proposal there was no present evidence that the DESI products had a known or potential bioequivalence problem. Thus, the waiver provision of § 320.22(c) is intended to supersede any DESI notice bioavailability requirements for those products that were not listed in paragraph (c).

The Commissioner advises that the requirements for the submission of evidence demonstrating the in vivo bioavailability of a parenteral drug product will be waived if the product (1) is determined in a DESI notice to be effective for at least one indication or is identical in both active and inactive ingredient formulation to such drug product as currently approved in a new drug application, and (2) is neither a suspension nor any other form of a parenteral drug product added to § 320.22(c). A manufacturer of an identical drug product must, however, submit evidence that his product is identical in formulation to the parenteral drug product listed in a published DESI notice before the agency will grant such a waiver. A waiver will not necessarily be granted if the product is related to or similar to, but not identical to, the DESI product. The Commissioner advises that variations in formulations of parenteral drug products may affect in vivo preformance and thereby raise questions regarding their bioavailability. Clinical evidence may, therefore, be needed to determine this.

It should be understood that at the time of the review identifying certain effective drug products as having known or suspected bioequivalence problems, other drugs that were subject to the DESI review had not been determined to be effective for any indication. Some have subsequently been the subject of a DESI notice announcing such a determination. Others are likely to be the subject of future DESI notices that evaluate the drug products for the first time as effective. Because these drug products were not in the previous review for bioequivalence problems, they undergo such an evaluation when they are determined to be effective for at least one indication. For those for which there is an actual or potential bioequivalence problem, the DESI notice sets forth a bioavailability requirement as a condition for NDA, ANDA, or supplemental NDA approval. Therefore, the waiver provision of § 320.22(c) does not apply to drug products first announced as effective in DESI notices published after January 7, 1977, if the DESI notice specifies a bioavailability requirement. Section 320.22(c) is amended herein to make this clear. The Commissioner points out that in the future any drug product subject to the DESI review that is determined to be effective for at least one indication and to have an actual or potential bioequivalence problem will be added to § 320.22(c) at the next periodic update of that section. Any bioavailability/bioequivalence requirement established for such a drug product will be applicable to holders of approved NDA's as well as applicants submitting NDA's (or ANDA's) for the first time.

Because this amendment is necessary to correct an omission of data in, and clarify portions of, the final regulation, the Commissioner finds, for good cause, that notice and public procedure are not required for its promulgation. It imposes no additional burden on the regulated industry.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(p), 501, 502, 505, 701(a), 52 Stat. 1041–1042 as amended, 1049–1053 as amended, 1055 (21 U.S.C. 321(p), 351, 352, 355, 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), Subpart B of Part 320 is amended in § 320.22 by redesignating paragraph (c) as paragraph (c)(1) and adding new paragraph (c) (2) and (3) to read as follows:

§ 320.22 Criteria for waiver of evidence of in vivo bioavailability.

* * * * *

(c)(1) * * *

(2) The Food and Drug Administration shall waive the requirement for the submission of evidence demonstrating the in vivo bioavailability of a parenteral drug product that is determined to be effective for at least one indication in a Drug Efficacy Study Implementation notice or that, upon submission of evidence, is shown to be identical in both active and inactive ingredient formulation to that drug as currently approved in a new drug application, if the drug product is not one of the following:

V 42163 AUG 23 77 UM

PARENTERAL DRUGS

A drug in suspension form. Phenytoin sodium powder for injection.

(3) A waiver shall not be granted for a drug product for which an initial determination that the drug product is effective for one or more indications is published after January 7, 1977, in a Drug Efficacy Study Implementation notice stating that the drug is subject to a bioavailability requirement.

• • • • •

Effective date: This amendment shall be effective August 23, 1977.

(Secs. 201(p), 501, 502, 505, 701(a), 52 Stat. 1041–1042 as amended, 1049–1053 as amended, 1055 (21 U.S.C. 321(p), 351, 352, 355, 371 (a)).)

Dated: August 16, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Styrylpyridinium, Diethylcarbamazine Tablets

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This rule amends the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by American Cynamid Co. providing for use of a higher potency tablet for deworming dogs.

EFFECTIVE DATE: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Henry C. Hewitt, Bureau of Veterinary Medicine (HFV–112), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301–443–3430.

SUPPLEMENTARY INFORMATION: In accordance with section 512(i) of the Federal Food, Drug, and Cosmetic Act, Part 520 of the animal drug regulations is amended to reflect approval of supplemental NADA (96–031V) filed by American Cyanamid Co., P.O. Box 400, Princeton, N.J. 08540.

In accordance with the freedom of information regulations and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness data and information submitted to support approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFC–20), Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, between the hours of 9 a.m. and 4 p.m., Monday through Friday, except on Federal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), § 520.2160 is amended by revising paragraphs (b) and (d)(2) to read as follows:

§ 520.2160 Styrylpyridinium, diethylcarbamazine tablets.

• • • • •

(b) *Specifications.* Each tablet contains 50 milligrams of styrylpyridinium chloride and 60 milligrams of diethylcarbamazine citrate, or 125 milligrams of styrylpyridinium chloride and 150 milligrams of diethylcarbamazine citrate.

• • • • •

(d) • • •

(2) Administer orally, intact or pulverized and mixed in feed, at one tablet (50- and 60-milligram dosage) per 20 pounds of body weight per day, or one tablet (125- and 150-milligram dosage) per 50 pounds of body weight per day.

• • • • •

Effective date: August 23, 1977.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b (i)).)

Dated: August 15, 1977.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI 3211]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Suspension of Community Eligibility

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to list communities where the sale of flood insurance as authorized under the National Flood Insurance Program will be suspended because of noncompliance with the program regulations.

DATES: The last date that appears in the fourth column is the effective date of the suspension of the sale of flood insurance.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program and insurance is purchased. Accordingly, for communities listed under this part such restriction exists as of the effective date of suspension because insurance, which is required cannot be purchased.

Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities suspended in this notice no longer meet that statutory requirement for compliance with program regulations (24 CFR Part 1909 et seq.). Accordingly, the communities are suspended on the effective date in the list below.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 533(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community.

The entry reads as follows:

§ 1914.6 List of eligible communities.

State	County	Location	Effective date of authorization of sale of flood insurance for area	Hazard area identified	Community No.
•	•	•	•	•	•
California	Shasta	Anderson, city of	Nov. 21, 1973, emergency; Sept. 1, 1977, regular; Sept. 15, 1977, suspended.	June 14, 1974 Dec. 20, 1974	060039-A

[Docket No. FI 3213]

PART 1914—COMMUNITIES ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to list those communities where the sale of flood insurance is authorized under the National Flood Insurance Program.

Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the State.

DATES: The date that appears in the fourth column of the table is the effective date of authorization for the sale of flood insurance.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified for at least one year by the Secretary of Housing and Urban Development. The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction except as authorized by Section 202(b) of the Act, as amended, unless the community has entered the program. Accordingly, for communities listed under this part no such restriction exists, although insurance, if required, must be purchased.

V 42 163 AUG 23 77 UM

The addresses of the National Flood Insurers Association servicing companies, where flood insurance policies can be obtained, are published at § 1912.5 (24 CFR Part 1912).

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified for at least one year by the Secretary of Housing and Urban Development. The requirement applies to all identified special flood hazard areas within the United States, and no financial assistance can legally be provided for acquisition or construction except as authorized by Section 202(b) of the Act, as amended, unless the community has entered the program. Accordingly, for communities listed under this part no such restriction exists, although insurance, if required, must be purchased.

The addresses of the National Flood Insurers Association servicing companies, where flood insurance policies can be obtained, are published at § 1912.5 (24 CFR Part 1912).

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

[Docket No. FI-3216]

PART 1914—COMMUNITIES ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to list those communities where the sale of flood insurance is authorized under the National Flood Insurance Program.

Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the State.

DATES: The date that appears in the fourth column of the table is the effective date of authorization for the sale of flood insurance.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator,
Office of Flood Insurance, 202-755-581
or Toll Free Line 800-424-8872,
Room 5270,
451 Seventh Street, SW.,
Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93-234) requires the purchase of flood insurance as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified for at least one year by the Secretary of Housing and Urban Development. The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction except as authorized by Section 202(b) of the Act, as amended, unless the community has entered the program. Accordingly, for communities

listed under this part no such restriction exists, although insurance, if required, must be purchased.

The addresses of the National Flood Insurers Association Servicing companies, where flood insurance policies can be obtained, are published at § 1912.7 (24 CFR Part 1912).

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

[Docket No. FI3217]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Suspension of Community Eligibility

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to list communities where the sale of flood insurance as authorized under the National Flood Insurance Program will be suspended because of noncompliance with the program regulations.

DATES: The last date that appears in the fourth column is the effective date of the suspension of the sale of flood insurance.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93-234) requires the purchase of flood insurance as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirtment applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program and insurance is purchased. Accordingly, for communities listed under this part such restriction exists as of the effective date of suspension because insurance, which is required, cannot be purchased.

Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities suspended in this notice no longer meet that statutory requirement for compliance with program regulations (24 CFR Part 1909 et seq.). Accordingly, the communities are suspended on the effective date in the list below.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community.

The entry reads as follows:

V 42 163 AUG 23 77 UM V

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7501]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Minimum Vesting Standards and Certain Plans Covering Subsidiary Corporation Employees

AGENCY: Internal Revenue Service, Terasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to vesting standards and certain plans covering subsidiary corporation employees. Changes in the applicable tax law were made by the Revenue Act of 1964, the Tax Reform Act of 1969 and the Employee Retirement Income Security Act of 1974. These regulations provide necessary guidance to the public for compliance with the law and affect employees covered by qualified retirement plans.

DATE: The regulations have varying effective dates. Most of the effective date rules are dependent upon the time when a retirement plan came into existence. For plans in existence on January 1, 1974, the regulations under the Employee Retirement Income Security Act of 1974 are effective for plan years beginning after December 31, 1975. For plans not in existence on January 1, 1974, the regulations are effective for plan years beginning after September 2, 1974.

FOR FURTHER INFORMATION CONTACT:

Richard J. Wickersham of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) 202-566-3289).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On March 6, 1975, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 406 and 407 of the Internal Revenue Code of 1954, 40 FR 10476. The amendments were proposed to conform the regulations to section 220 of the Revenue Act of 1964 (78 Stat. 58) and section 515(c) (2) and (3) of the Tax Reform Act of 1969 (83 Stat. 645, 646). A public hearing was neither requested nor held on these regulations.

On November 5, 1975, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 411 of the Internal Revenue Code of 1954, 40 FR 51445. The amendments were proposed to conform the regulations to section 1012(a) of the Employee Retirement Income Security Act of 1974 (88 Stat. 901) (hereinafter referred to as the "Act").

STATUTORY PROVISIONS

Sections 406 and 407 of the Code allow qualified plans of domestic corporations to cover citizens of the United States who are employees of their foreign subsidiaries or their domestic subsidiaries engaged in business outside the United States if certain requirements are satisfied.

Sections 401(a)(19) and 411 of the Code prescribe minimum vesting standards which are qualification requirements for pension, stock bonus, or profit-sharing plans (and their related trusts) described in section 401(a), 403(a), 405 of the Code. These new vesting standards impose various requirements on plans. Among the principal requirements are the manner in which plans must provide vesting for employees in their plan benefits and how these plan benefits must be determined for employees.

Some regulations prescribed by the Secretary of Labor are applicable for purposes of applying the vesting rules of section 411.

EFFECTIVE DATES

Section 1.411(a)-2, relating to the effective dates of section 411, has been clarified by the addition of a new paragraph (f) to provide that the new requirements are not applicable to certain separated employees.

DIFFERENT SCHEDULES

Section 1.411(a)-3, relating to vesting in employer-derived benefits, is revised to make it clear that plans can satisfy, under certain conditions, different statutory vesting schedules for different employee groups.

FORFEITURES

Section 1.411(a)-4 provides rules relating to permissible forfeitures, suspensions, etc. of vested rights.

The rules have been changed to make it clear that a multiemployer plan does not violate the vesting rules by disregarding accrued benefits to the extent that section 414(f) of the Code permits a forfeiture.

In the case of a plan integrated with Social Security, plan benefits may decrease prior to an employee's retirement or separation because of increasing Social Security benefits. The rules have been changed to make it clear that this is not a prohibited forfeiture.

Paragraph (b)(1) provides a general rule for an exception to the nonforfeitability requirements by reason of the death of an employee. This rule has been revised to provide that benefits derived from employee contributions are not treated as being forfeitable solely because payments received under an annuity option are less than such benefits.

SERVICE FOR VESTING

Section 1.411 (a)-5, relating to service which counts toward the vesting percentage, has been expanded to clarify what service can be disregarded under break in service rules in effect prior to the effective date of the Act.

DEFINITIONS AND SPECIAL RULES

Section 1.411 (a)-7, relating to definitions and special rules, has been modified in several respects.

The definition of "accrued benefit" in paragraph (a)(1) has been modified to provide that the term does not include ancillary benefits not directly related to retirement benefits. Ancillary benefits would include, for example, payment of medical expenses (or insurance premiums for such expenses) and life insurance benefits payable as a lump sum.

The definition of "normal retirement benefit" in paragraph (c) has been revised to make it clear that a plan's computation of its early retirement benefit can take into account the effect of integration with social security or similar laws occurring subsequent to early retirement age.

Paragraph (d), relating to certain distributions and cash-out rules, has been modified to consolidate in one paragraph the rules on cash-outs from a defined contribution plan. In the proposed regulations these rules were scattered among several sections of the regulations.

CHANGES IN VESTING SCHEDULES

Section 1.411(a)-8, relating to changes in vesting schedules, has been revised to make it clear that a plan does not have to provide for an election of a former vesting schedule where an employee cannot be disadvantaged by a plan amendment. Guidance has also been given as to what is meant by "a change in the vesting schedule."

ACCRUED BENEFITS

Section 1.411 (b)-1, relating to accrued benefit requirements, has been modified to make it clear that a plan can compute accrued benefits under more than one formula provided that the aggregate benefits satisfy one of three statutory methods. Furthermore, the final regulations provide that a plan is not precluded from satisfying these requirements by separately testing accrued benefits for different employee classifications.

Paragraph (e) (pertaining to separate accounting) has been revised to provide clarification as to the accounting rules which are required of defined contribution plans.

Paragraph (f), relating to the determination of a year of participation, has been revised to provide that these rules are inapplicable to a defined contribution plan.

ALLOCATIONS

Section 1.411 (c)-1, relating to allocating benefits between employer and employee contributions, has been modified to provide that actuarial adjustments, to benefits are not required because of suspension of benefits described in section 203(a)(3)(B) of the Act and section 411(a)(3)(B) of the Code.

TERMINATIONS

Section 1.411 (d)-2, relating to required vesting on plan terminations, etc., has been revised to clarify the interrelationship between certain Code requirements and certain title IV provisions of the Act.

Paragraph (e) has been clarified to provide that the rule pertaining to vesting upon early plan termination under Code section 411 (d) (2) and (3), present under pre-Act law, takes precedence over other rules, including those in section 4044 of the Act. This provision indicates that the Interal Revenue Service can require forfeitures to preclude prohibited discrimination when there is an early plan termination.

SPECIAL RULES

Section 1.411 (d)-3, relating to other special rules, has been revised. First, the class year plan rules of paragraph (a) have been clarified to provide that certain distribution rules, in § 1.411 (a)-7 (d) of the final regulations, are applicable to these plans and are to be applied in a special manner. Second, the prohibition against accrued benefit decreases rules of paragraph (b) have been revised to identify more specifically the types of amendments which are proscribed.

WITHDRAWAL AND DELETION OF SECTIONS MERELY REPRODUCING STATUTORY MATERIAL

As part of the effort to reduce the bulk of the Code of Federal Regulations, those sections of the proposed regulations which merely reproduced various provisions of the Internal Revenue Code are withdrawn.

For the same reason several such sections are deleted from the Code of Federal Regulations by this document.

DRAFTING INFORMATION

The principal author of these regulations was Richard J. Wickersham of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly—1. The following sections of the proposed regulations are withdrawn:

(a) Section 1.406, as set forth in the appendix to the March 6, 1975, notice of proposed rulemaking and as modified in paragraph 5 of the appendix to the November 5, 1975, notice of proposed rulemaking.

(b) Section 1.407, as set forth in the appendix to the March 6, 1975, notice of proposed rulemaking and as modified in paragraph 7 of the appendix to the November 5, 1975, notice of proposed rulemaking.

(c) Sections 1.411 (a), 1.411 (b), 1.411 (c), 1.411 (d), and 1.411 (e), all as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rulemaking.

(d) Section 1.413, as set forth in paragraph 10 of the appendix to the November 5, 1975, notice of proposed rulemaking.

2. The amendments to 26 CFR Part 1 as proposed are hereby adopted, subject to the changes indicated below.

PARAGRAPH 1. Sections 1.401, 1.401(a) and 1.401(b) are deleted.

PAR. 2. Section 1.401(a)-19 as set forth in paragraph 2 of the appendix to the November 5, 1976, notice of proposed

V 42 163 AUG 23 77 UM

rule making is amended by adding a new sentence at the end of paragraph (b)(2), by revising paragraph (b)(3) and by adding a paragraph (c) to read as set forth below.

PAR. 3. Sections 1.404(a), 1.404(b), 1.404(c), 1.404(d) and 1.404(e) are deleted.

PAR. 4. Section 1.404(a)–8 as set forth in paragraph 4 of the appendix to the November 5, 1975, notice of proposed rule making is changed by revising subparagraphs (2) and (3)(ii)(B) of paragraph (a) to read as set forth below.

PAR. 5. Section 1.406–1 as set forth in the appendix to the March 6, 1975, notice of proposed rule making is changed by revising paragraphs (b)(2), (c)(1) and (2)(i), (d) and (e)(2) to read as set forth below.

PAR. 6. Section 1.407–1, as set forth in the appendix to the March 6, 1975, notice of proposed rule making is changed by revising paragraphs (b)(2), (c)(1) and (2)(i), (d) and (e)(2) to read as set forth below.

PAR. 7. Section 1.411(a)–1, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rule making is changed by adding a new paragraph (d) at the end thereof to read as set forth below.

PAR. 8. Section 1.411(a)–2, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rule making, is changed by adding a new paragraph (f) at the end thereof to read as set forth below.

PAR. 9. Section 1.411(a)–3, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rule making, is changed by revising subparagraph (2) of paragraph (a) to read as set forth below.

PAR. 10. Section 1.411(a)–4, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rule making, is changed by revising paragraph (a), by revising subparagraphs (1) and (4) of paragraph (b), by deleting subparagraphs (5) and (6) of paragraph (b), and by adding new paragraphs (b)(5) and (6). These revised and added provisions are set forth below.

PAR. 11. Section 1.411(a)–5, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rule making is amended by revising paragraph (b)(1)(iii) and (2), the second sentence in subdivision (ii) and subdivisions (iii) and (iv) (B) and (C) of paragraph (b)(3), paragraph (b)(6), and paragraph (c) to read as set forth below.

PAR. 12. Section 1.411(a)–6, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rulemaking is changed by striking out "—(A) General rule" and deleting subdivisions (B) and (C) in paragraph (c)(1)(ii), by adding a new sentence following the first sentence in paragraph (c)(1)(iii), and by adding a new sentence following the first sentence in paragraph (c)(2). The added provisions are set forth below.

PAR. 13. Section 1.411(a)–7, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rulemaking, is changed by adding two new sentences immediately after subdivision (ii) of paragraph (a)(1), by adding two new sentences immediately after subdivision (ii)(B) of paragraph (b)(1), by adding a new subdivision (iii) to paragraph (c)(2), by revising subparagraphs (3), (4) and (5) of paragraph (c), and by revising paragraph (d). These amended and added provisions are set forth below.

PAR. 14. Section 1.411(a)–8, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rulemaking, is changed by revising so much of paragraph (a) as follows subparagraph (2), by revising subparagraphs (1) and (3) and adding a new subparagraph (6) to paragraph (b), and by adding a new paragraph (c). These revised and added provisions are set forth below.

PAR. 15. Section 1.411(a)–9, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rulemaking, is changed by adding a second sentence to paragraph (b) to read as set forth below.

PAR. 16. Section 1.411(b)–1, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rule making is changed by revising paragraphs (a)(1), (d)(3), (e)(1) and (2) and (f)(1) to read as set forth below.

PAR. 17. Section 1.411(c)–1, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rule making, is changed by revising the last sentence of subparagraph (2) of paragraph (b), by adding a new sentence at the end of subparagraph (4) of paragraph (c), by revising so much of paragraph (d) as precedes subparagraph (1), by revising paragraph (e)(2), and by adding a new paragraph (f). These revised and added provisions read as set forth below.

PAR. 18. Section 1.411(d)–2, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rule making, is changed by adding a new sentence at the end of paragraph (a)(2)(i), by revising paragraphs (a)(2)(ii) and (b), by adding a new sentence at the end of paragraph (c)(2), and by revising paragraph (e). These revised and added provisions read as set forth below:

PAR. 19. Section 1.411(d)–3, as set forth in paragraph 9 of the appendix to the November 5, 1975, notice of proposed rule making, is revised as set forth below:

PAR. 20. Section 1.413–1, as set forth in paragraph 10 of the appendix to the November 5, 1975, of the notice of proposed rule making, is revised by striking out "§ 210 of" in the last sentence of paragraph (e), as set forth below.

PAR. 21. Section 1.413–2, as set forth in paragraph 10 of the appendix to the November 5, 1975, notice of proposed rule making, is revised by striking out "§ 210 of" in the last sentence of paragraph (d), as set forth below.

PAR. 22. Section 1.801 is deleted.

PAR. 23. Section 1.805 is deleted.

(Secs. 411, 7805, Internal Revenue Code of 1954 (88 Stat. 901, 68A Stat. 917; 26 U.S.C. 411 and 7805))

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved:

LAURENCE N. WOODWORTH,
Assistant Secretary of the Treasury.

§§ 1.401(a) and 1.401(b) [Deleted]

1. Sections 1.401, 1.401(a) and 1.401(b) are deleted.

2. The following new section is added immediately before § 1.401–1:

§ 1.401–0 Scope and definitions.

(a) *In general.* Sections 1.401 through 1.401–14 (inclusive) reflect the provisions of section 401 prior to amendment by the Employee Retirement Income Security Act of 1974. The sections following § 1.401–14 and preceding § 1.402(a) (hereafter referred to in this section as the "Post-ERISA Regulations") reflect the provisions of section 401 after amendment by such Act.

(b) *Definitions.* For purposes of the Post-ERISA regulations—

(1) *Qualified plan.* The term "qualified plan" means a plan which satisfies the requirements of section 401(a).

(2) *Qualified trust.* The term "qualified trust" means a trust which satisfies the requirements of section 401(a).

3. The following new section is added immediately after § 1.401(a)–19:

§ 1.401(a)–19 Nonforfeitability in case of certain withdrawals.

(a) *Application of section.* Section 401(a)(19) and this section apply to a plan to which section 411(a) applies. (See section 411(e) and § 1.411(a)–2 for applicability of section 411).

(b) *Prohibited forfeitures*—(1) *General rule.* A plan to which this section applies is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if, under such plan, any part of a participant's accrued benefit derived from employer contributions is forfeitable solely because a benefit derived from the participant's contributions under the plan is voluntarily withdrawn by him after he has become a 50 percent vested participant.

(2) *50 percent vested participant.* For purposes of subparagraph (1) of this paragraph, a participant is a 50 percent vested participant when he has a nonforfeitable right (within the meaning of section 411 and the regulations thereunder) to at least 50 percent of his accrued benefit derived from employer contributions. Whether or not a participant is 50 percent vested shall be determined by the ratio of the participant's total nonforfeitable employer-derived accrued benefit under the plan to his total employer-derived accrued benefit under the plan.

(3) *Certain forfeitures.* Paragraph (b)(1) of this section does not apply in the case of a forfeiture permitted by section 411(a)(3)(D)(iii) and § 1.411(a)–7(d)(3) (relating to forfeitures of certain benefits accrued before September 2, 1974).

(c) *Supersession.* Section 11.401(a)–(19) of the Temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 is superseded by this section.

§§ 1.404(a), 1.404(b), 1.404(c), 1.404(d) and 1.404(e) [Deleted]

4. Sections 1.404(a), 1.404(b), 1.404(c), 1.404(d) and 1.404(e) are deleted.

5. Section 1.404(a)–8 is amended to read as follows:

§ 1.404(a)–8 Contributions of employer under an employees' annuity plan which meets the requirements of section 401(a); application of section 404(a)(2).

(a) If contributions are paid by an employer under an annuity plan for employees and the general conditions and limitations applicable to deductions for such contributions are satisfied (see § 1.404(a)–1), the contributions are deductible under section 404(a)(2) if the further conditions provided therein are satisfied. For the meaning of "annuity plan" as used here, see § 1.404(a)–3. In order that contributions by the employer may be deducted under section 404(a)(2), all of the following conditions must be satisfied:

(1) The contributions must be paid toward the purchase of retirement annuities (or for disability, severance, insurance, survivorship benefits incidental and directly related to such annuities, or medical benefits described in section 401(h) as defined in paragraph (a) of § 1.404(h)–1) under an annuity plan for the exclusive benefit of the employer's employees or their beneficiaries.

(2) The contributions must be paid in a taxable year of the employer which ends with or within a year of the plan for which it meets the applicable requirements set forth in section 401(a)(3), (4), (5), (6), (7), (8), (11), (12), (13), (14), (15), (16), and (19). In the case of a plan which covers a self-employed individual, the contributions must be paid in a taxable year of the employer which ends with or within a year of the plan for which it also meets the requirements of section 401(a)(9), (10), (17), and (18) and of section 401(d) (other than paragraph (1)). In the case of a plan which covers a shareholder-employee within the meaning of section 1379(d), the contributions must be paid in a taxable year of the employer which ends with or within a year of the plan for which it also meets the requirements of section 401(a)(17) and (18). See section 401(a) and the regulations thereunder for the requirements and the applicable effective dates of the respective paragraphs set forth in section 401(a). Any contributions of an employer which are paid in a taxable year of the employer ending with or within a year of the plan for which it meets the applicable requirements of section 401 may be carried over and deducted in a succeeding taxable year of the employer in accordance with section 404(a)(1)(D), whether or not such succeeding taxable year ends with or within a taxable year of the plan for which it meets the requirements set out in section 401(a) and (d). See section 401(b) and the regulations thereunder for special rules allowing certain plan amendments to be given retroactive effect. See section 404(a)(6) for a special rule for determining the time when a contribution is deemed to have been made.

(3) There must be a definite written arrangement between the employer and the insurer that refunds of premiums, if any, shall be applied within the taxable year of the employer in which received or within the next succeeding taxable year toward the purchase of retirement annuities (or for disability, severance, insurance, survivorship benefits incidental and directly related to such annuities, or medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401(h)–1) under the plan. For the purpose of this condition, "refunds of premiums" means payments by the insurer on account of credits such as dividends, experience rating credits, or surrender or cancellation credits. The arrangement may be in the form of contract provisions or written directions of the employer or partly in one form and partly in another. This condition will be considered satisfied where—

(i) All credits are applied regularly, as they are determined, toward the premiums next due under the contracts before any further employer contributions are so applied, and

(ii) Under the arrangement,

(A) No refund of premiums may be made during continuance of the plan unless applied as aforesaid, and

(B) If refunds of premiums may be made after discontinuance or termination, whichever is applicable, of the plan on account of surrenders or cancellations before all retirement annuities provided under the plan with respect to service before its discontinuance or termination have been purchased, such refunds will be applied in the taxable year of the employer in which received, or in the next succeeding taxable year, to purchase retirement annuities for employees by a procedure which does not contravene the conditions of section 401(a)(4). If the plan also includes medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401(h)–1, any refund of premiums attributable to such benefits must, in accordance with these rules, be applied toward the purchase of medical benefits described in section 401(h).

(4) Any amounts described in subparagraph (3) of this paragraph which are attributable to contributions on behalf of a self-employed individual must be applied toward the purchase of retirement benefits. Amounts which are so applied are not contributions and thus are not taken into consideration in determining—

(i) The amount deductible with respect to contributions on his behalf, nor

(ii) In the case of an owner-employee, the maximum amount of contributions that may be made on his behalf.

(b) Where the above conditions are satisfied, the amounts deductible under section 404(a)(2) are governed by the limitations provided in section 404(a)(1). See §§ 1.404(a)–3 to 1.404(a)–7, inclusive.

6. Section 1.406–1 is added to read as follows:

§ 1.406–1 Treatment of certain employees of foreign subsidiaries as employees of the domestic corporation.

(a) *Scope*—(1) *General rule.* For purposes of applying the rules in part 1 of subchapter D of chapter 1 of subtitle A of the Code and the regulations thereunder with respect to a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), of a domestic corporation, an individual who is a citizen of the United States and who is an employee of a foreign subsidiary (as defined in section 3121(l)(8) and the regulations thereunder) of such domestic corporation shall be treated as an employee of such domestic corporation if the requirements of paragraph (b) of this section are satisfied.

(2) *Cross references.* For rules relating to nondiscrimination requirements and the determination of compensation, see paragraph (c) of this section. For rules under which termination of the status of an individual as an employee of the domestic corporation in certain instances will not be considered as separation from service for certain purposes, see paragraph (d) of this section. For rules regarding deductibility of contributions, see paragraph (e) of this section. For rules regarding treatment of such individual as an employee of the domestic corporation under related provisions, see paragraph (f) of this section.

(b) *Application of this section*—(1) *Requirements.* This section shall apply and the employee of the foreign subsidiary shall be treated as an employee of domestic corporation for the purposes set forth in paragraph (a)(1) of this section only if each of the following requirements is satisfied:

(i) The domestic corporation must have entered into an agreement under section 3121(l) to provide social security coverage which applies to the foreign subsidiary of which such individual is an employee and which has not been terminated under section 3121(l)(3) or (4).

(ii) The plan, referred to in paragraph (a)(1) of this section, must expressly provide for contributions or benefits for individuals who are citizens of the United States and who are employees of one or more of its foreign subsidiaries to which an agreement entered into by such domestic corporation under section 3121(l) applies. The plan must apply to all of the foreign subsidiaries to which such agreement applies.

(iii) Contributions under a funded plan of deferred compensation (whether or not a plan described in section 401(a), 403(a), or 405(a)) must not be provided by any other person with respect to the remuneration paid to such individual by the foreign subsidiary.

V 42 163 AUG 23 77 UM

(2) *Supplementary rules.* Subparagraph (1)(ii) of this paragraph does not modify the requirements for qualification of a plan described in section 401(a), 403(a), or 405(a) and the regulations thereunder. It is not necessary that the plan provide benefits or contributions for all United States citizens who are employees of such foreign subsidiaries. If the plan is amended to cover individuals who are employees by reason of paragraph (a)(1) of this section, the plan will not qualify unless it meets the coverage requirements of section 410(b)(1) (section 401(a)(3), as in effect on September 1, 1974, for plan years to which section 410 does not apply; see § 1.410(a)-2 for the effective dates of section 410) and the nondiscrimination requirements of section 401(a)(4). In addition, the administrative rules contained in § 1.401(a)-3(e) (relating to the determination of the contributions or benefits provided by the employer under the Social Security Act) will also apply for purposes of determining whether the plan meets the requirements of section 401. For purposes of subparagraph (1)(iii) of this paragraph, contributions will not be considered as provided under a funded plan merely because the foreign subsidiary is required under the laws of the foreign jurisdiction to pay social insurance taxes or to make similar payments with respect to the wages paid to the employee.

(c) *Special rules*—(1) *Nondiscrimination requirements.* For purposes of applying sections 401(a)(4) and 410(b)(1)(B) (section 401(a)(3)(B), as in effect on September 1, 1974, for plan years to which section 410 does not apply) and the regulations thereunder (relating to nondiscrimination concerning benefits and contributions and coverage of employees) with respect to an employee of the foreign subsidiary who is treated as an employee of the domestic corporation under paragraph (a)(1) of this section—

(i) If the employee is an officer, shareholder, or (with respect to plan years to which section 410 does not apply) person whose principal duties consist in supervising the work of other employees of the foreign subsidiary of the domestic corporation, he shall be treated as having such capacity with respect to the domestic corporation; and

(ii) The determination as to whether the employee is a highly compensated employee shall be made by comparing his total compensation (determined under subparagraph (2) of this paragraph) with the compensation of all the employees of the domestic corporation (including individuals treated as employees of the domestic corporation pursuant to section 406 and this section).

(2) *Determination of compensation.* For purposes of applying section 401(a)(5) and the regulations thereunder, relating to classifications that will not be considered discriminatory, with respect to an employee of the foreign subsidiary who is treated as an employee of the domestic corporation under paragraph (a)(1) of this section—

(i) The total compensation of the employee shall be the remuneration of the employee from the foreign subsidiary (including any allowances that are paid to the employee because of his employment in a foreign country) which would constitute his total compensation if his services had been performed for the domestic corporation;

(ii) The basic or regular rate of compensation of the employee shall be determined for the employee in the same manner as it is determined under section 401 for other employees of the domestic corporation; and

(iii) The amount paid by the domestic corporation which is equivalent to the tax imposed with respect to the employee by section 3101 (relating to the tax on employees under the Federal Insurance Contributions Act) shall be treated as having been paid by the employee and shall be included in his compensation.

(d) *Termination of status as deemed employee not to be treated as separation from service for purposes of capital gain provisions and limitation of tax.* For purposes of applying the rules, relating to the treatment of certain distributions which are made after an employee's separation from service, set forth in section 72(n) as in effect on September 1, 1974 (with respect to taxable years ending after December 31, 1969, and to which section 402(e) does not apply), and in sections 402(a)(2) and (e) and 403(a)(2) (with respect to distributions or payments made after December 31, 1973, and in taxable years beginning after December 31, 1973) with respect to an employee of a foreign subsidiary who is treated as an employee of a domestic corporation under paragraph (a)(1) of this section, the employee shall not be considered as separated from the service of the domestic corporation solely by reason of the occurrence of any one or more of the following events:

(1) The termination, under the provisions of section 3121(l), of the agreement entered into by the domestic corporation under that section which covers the employment of the employee;

(2) The employee's becoming an employee of another foreign subsidiary of the domestic corporation with respect to which such agreement does not apply,

(3) The employee's ceasing to be an employee of the foreign subsidiary by reason of which employment he was treated as an employee of such domestic corporation, if he becomes an employee of another corporation controlled by such domestic corporation; or

(4) The termination of the provision of the plan described in paragraph (b)(1)(ii) of this section, for coverage of United States citizens who are employees of foreign subsidiaries covered by an agreement under section 3121(l).

For purposes of subparagraph (3) of this paragraph, a corporation is considered to be controlled by a domestic corporation if such domestic corporation owns directly or indirectly more than 50 percent of the voting stock of the corporation.

(e) *Deductibility of contributions*—(1) *In general.* For purposes of applying sections 404 and 405(c) with respect to the deduction for contributions made to or under a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), by a domestic corporation, or by another corporation which is entitled to deduct its contributions under section 404(a)(3)(B), on behalf of an employee of a foreign subsidiary treated as an employee of the domestic corporation under paragraph (a)(1) of this section—

(i) Except as provided in subdivision (ii) of this subparagraph, no deduction shall be allowed to such domestic corporation or to any other corporation which would otherwise be entitled to deduct its contributions on behalf of such employee under one of such sections;

(ii) There shall be allowed as a deduction from the gross income of the foreign subsidiary which is effectively connected with the conduct of a trade or business within the United States (within the meaning of section 882 and the regulations thereunder) an amount which is allocable and apportionable to such gross income under the rules of § 1.861-8 and which in no event may exceed the amount which (but for subdivision (i) of this subparagraph) would be deductible under section 404 or section 405(c) by the domestic corporation if the individual were an employee of the domestic corporation and if his compensation were paid by the domestic corporation; and

(iii) Any reference to compensation shall be considered to be a reference to the total compensation of such individual (determined by applying paragraph (c)(2) of this section).

(2) *Year of deduction.* Any amount deductible by the foreign subsidiary under section 406(d) and this paragraph shall be deductible for its taxable year with or within which ends the taxable year of the domestic corporation for which the contribution was made.

(3) *Special rules.* Whether contributions to a plan on behalf of an employee of the foreign subsidiary who is treated as an employee of the domestic corporation under paragraph (a)(1) of this section, or whether forfeitures with regard to such employee, will require an inclusion in the income of the domestic corporation or an adjustment in the basis of its stock in the foreign subsidiary, shall be determined in accordance with the rules of general application of subtitle A of chapter 1 of the Code (relating to income taxes). For example, an unreimbursed contribution by the domestic corporation to a plan which meets the requirements of section 401(a) will be treated, to the extent each employee's rights to the contribution are nonforfeitable, as a contribution of capital to the foreign subsidiary to the extent that such contributions are made on behalf of the employees of such subsidiary.

(f) *Treatment as an employee of the domestic corporation under related provisions.* An individual who is treated as an employee of a domestic corporation under paragraph (a)(1) of this section shall also be treated as an employee of such domestic corporation, with respect to the plan having the provision described in paragraph (b)(1)(ii) of this section, for purposes of applying section 72(d) (relating to employees' annuities), section 72(f) (relating to special rules for computing employees' contributions), section 101(b) (relating to employees' death benefits), section 2039 (relating to annuities), and section 2517 (relating to certain annuities under qualified plans) and the regulations thereunder.

(g) *Nonexempt trust.* If the plan of the domestic corporation is a qualified plan described under section 401(a), the fact that a trust which forms a part of such plan is not exempt from tax under section 501(a) shall not affect the treatment of an employee of a foreign subsidiary as an employee of a domestic corporation under section 406(a) and paragraph (a)(1) of this section.

7. Section 1.407-1 is added to read as follows:

§ 1.407-1 Treatment of certain employees of domestic subsidiaries engaged in business outside the United States as employees of the domestic parent corporation.

(a) *Scope*—(1) *General rule.* For purposes of applying the rules in part 1 of subchapter D of chapter 1 of subtitle A of the Code and the regulations thereunder with respect to a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), of a domestic parent corporation (as defined in paragraph (b)(3)(ii) of this section), an individual who is a citizen of the United States and who is an employee of a domestic subsidiary (as defined in paragraph (b)(3)(i) of this section) of such domestic parent corporation shall be treated as an employee of such domestic parent corporation if the requirements of paragraph (b) of this section are satisfied.

(2) *Cross-references.* For rules relating to nondiscrimination requirements and the determination of compensation, see paragraph (c) of this section. For rules under which termination of the status of an individual as an employee of the domestic parent corporation in certain instances will not be considered as separation from service for certain purposes, see paragraph (d) of this section. For rules regarding deductibility of contributions, see paragraph (e) of this section. For rules regarding treatment of such individual as an employee of the domestic parent corporation under related provisions, see paragraph (f) of this section.

(b) *Application of this section*—(1) *Requirements.* This section shall apply and the employee of the domestic subsidiary shall be treated as an employee of the domestic parent corporation for the purposes set forth in paragraph (a)(1) of this section only if each of the following requirements is satisfied:

(i) The plan, referred to in paragraph (a)(1) of this section, must expressly provide for contributions or benefits for individuals who are citizens of the United States and who are employees of one or more of the domestic subsidiaries of the domestic parent corporation. The plan must apply to every domestic subsidiary.

(ii) Contributions under a funded plan of deferred compensation (whether or not a plan described in section 401(a), 403(a), or 405(a)) must not be provided by any other person with respect to the remuneration paid to such individual by the domestic subsidiary.

(2) *Supplementary rules.* Subparagraph (1)(i) of this paragraph does not modify the requirements for qualification of a plan described in section 401(a), 403(a), or 405(a) and the regulations thereunder. It is not necessary that the plan provide benefits or contributions for all United States citizens who are employees of such domestic subsidiaries. If the plan is amended to cover individuals who are employees by reason of paragraph (a)(1) of this section, the plan will not qualify unless it meets the coverage requirements of section 410(b)(1) (section 401(a)(3), as in effect on September 1, 1974, for plan years to which section 410 does not apply; see § 1.410(a)-2 for the effective dates of section 410), and the nondiscrimination requirements of section 410(a)(4). The administrative rules contained in § 1.401(a)-3(e) (relating to the determination of the contributions or benefits provided by the employer under the Social Security Act) will also apply for purposes of determining whether the plan meets the requirements of section 401. For purposes of subparagraph (1)(ii) of this paragraph, contributions will not be considered as provided under a funded plan merely because the domestic subsidiary employer pays the tax imposed by section 3111 (relating to tax on employers under the Federal Insurance Contributions Act) with respect to such employee or is required under the laws of a foreign jurisdiction to pay social insurance taxes or to make similar payments with respect to the wages paid to the employee.

(3) *Definitions*—(i) *Domestic subsidiary.* For purposes of this section, a corporation shall be treated as a domestic subsidiary for any taxable year only if each of the following requirements is satisfied:

(A) It is a domestic corporation 80 percent or more of the outstanding voting stock of which is owned by another domestic corporation;

(B) 95 percent of more of its gross income for the three-year period immediately preceding the close of its taxable year which ends on or before the close of the taxable year of such other domestic corporation (or for such part of such period during which it was in existence) was derived from sources without the United States, determined pursuant to sections 861 through 864 and the regulations thereunder; and

(C) 90 percent or more of its gross income for such period (or such part) was derived from the active conduct of a trade or business.

If for the period (or part thereof) referred to in (B) and (C) of this subdivision such corporation has no gross income, the provisions of (B) and (C) shall be treated as satisfied if it is reasonable to anticipate that, with respect to the first taxable year thereafter for which such corporation has gross income, such provisions will be satisfied.

(ii) *Domestic parent corporation.* The domestic parent corporation of any domestic subsidiary is the domestic corporation which owns 80 percent or more of the outstanding voting stock of such domestic subsidiary.

(c) *Special rules*—(1) *Nondiscrimination requirements.* For purposes of applying sections 401(a)(4) and 410(b)(1)(B) (section 401(a)(3)(B), as in effect on September 1, 1974, for plan years to which section 410 does not apply) and the regulations thereunder (relating to nondiscrimination concerning benefits and contributions and coverage of employees) with respect to an employee of the domestic subsidiary who is treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section—

(i) If the employee is an officer, shareholder, or (with respect to plan years to which section 410 does not apply) a person whose principal duties consist in supervising the work of other employes of the domestic subsidiary of the domestic parent corporation, he shall be treated as having such capacity with respect to the domestic parent corporation; and

(ii) The determination as to whether the employee is a highly compensated employee shall be made by comparing his total compensation (determined under subparagraph (2) of this paragraph with the compensation of all the employees of the domestic parent corporation (including individuals treated as employees of the domestic parent corporation pursuant to section 407 and this section).

(2) *Determination of compensation.* For purposes of applying section 401(a)(5) and the regulations thereunder, relating to classifications that will not be considered discriminatory, with respect to an employee of the domestic subsidiary who is treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section—

(i) The sum of the total compensation of the employee shall be the remuneration of the employee from the domestic subsidiary (including any allowances that are paid to the employee because of his employment in a foreign country) which would constitute his total compensation if his services had been performed for such domestic parent corporation; and

(ii) The basic or regular rate of compensation of the employee shall be determined for the employee in the same manner as it is determined under section 401 for other employees of the domestic parent corporation.

(d) *Termination of status as deemed employee not to be treated as separation from service for purposes of capital gain provisions and limitation of tax.* For purposes of applying the rules, relating to

V 42 163 AUG 23 77 UM

treatment of certain distributions which are made after an employee's separation from service, set forth in section 72(n) as in effect on September 1, 1974 (with respect to taxable years ending after December 31, 1969, and to which section 402(e) does not apply), and in sections 402(a)(2) and (e) and 403(a)(2) (with respect to distributions or payments made after December 31, 1973, and in taxable years beginning after December 31, 1973) with respect to an employee of a domestic subsidiary who is treated as an employee of a domestic parent corporation under paragraph (a)(1) of this section, the employee shall not be considered as separated from the service of the domestic parent corporation solely by reason of the occurrence of any one or more of the following events:

(1) The fact that the corporation of which such individual is an employee ceases, for any taxable year, to be a domestic subsidiary within the meaning of paragraph (b)(3)(i) of this section;

(2) The employee's ceasing to be an employee of the domestic subsidiary of such domestic parent corporation, if he becomes an employee of another corporation controlled by such domestic parent corporation; or

(3) The termination of the provision of the plan described in paragraph (b)(1)(i) of this section, requiring coverage of United States citizens who are employees of domestic subsidiaries of the domestic parent corporation.

For purposes of subparagraph (2) of this paragraph, a corporation is considered to be controlled by a domestic parent corporation if the domestic parent corporation owns directly or indirectly more than 50 percent of the voting stock of the corporation.

(e) *Deductibility of contributions*—(1) *In general.* For purposes of applying sections 404 and 405(c) with respect to the deduction for contributions made to or under a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), by a domestic parent corporation, or by another corporation which is entitled to deduct its contributions under section 404(a)(3)(B), on behalf of an employee of a domestic subsidiary treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section—

(i) Except as provided in subdivision (ii) of this subparagraph, no deduction shall be allowed to the domestic parent corporation which would otherwise be entitled to deduct its contributions on behalf of such employee under one of such sections;

(ii) There shall be allowed as a deduction to the domestic subsidiary of which such individual is an employee an amount equal to the amount which (but for subdivision (i) of this subparagraph) would be deductible under section 404 or section 405(c) by the domestic parent corporation if the individual were an employee of the domestic parent corporation and if his compensation were paid by the domestic corporation; and

(iii) Any reference to compensation shall be considered to be a reference to the total compensation of such individual (determined by applying paragraph (c)(2) of this section).

(2) *Year of deduction.* Any amount deductible by the domestic subsidiary under section 407(d) and this paragraph shall be deductible for its taxable year with or within which ends the taxable year of the domestic parent corporation for which the contribution was made.

(3) *Special rules.* Whether contributions to a plan on behalf of an employee of the domestic subsidiary who is treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section, or whether forfeitures with regard to such employee, will require an inclusion in the income of the domestic parent corporation or an adjustment in the basis of its stock in the domestic subsidiary, shall be determined in accordance with the rules of general application of subtitle A of chapter 1 of the Code (relating to income taxes). For an example, an unreimbursed contribution by the domestic parent corporation to a plan which meets the requirements of section 401(a) will be treated, to the extent each employee's rights to the contribution are nonforfeitable, as a contribution of capital to the domestic subsidiary to the extent that such contributions are made on behalf of the employees of such subsidiary.

(f) *Treatment as an employee of the domestic parent corporation under related provisions.* An individual who is treated as an employee of a domestic parent corporation under paragraph (a)(1) of this section shall also be treated as an employee of such domestic corporation, with respect to the plan having the provision described in paragraph (b)(1)(i) of this section, for purposes of applying section 72(d) (relating to special rules for computing employees' contributions), section 72(f) (relating to special rules for computing employees' contributions), section 101(b) (relating to employees' death benefits), section 2039 (relating to annuities), and section 2517 (relating to certain annuities under qualified plans) and the regulations thereunder.

(g) *Nonexempt trust.* If the plan of the domestic parent corporation is a qualified plan described under section 401(a), the fact that a trust which forms a part of such plan is not exempt from tax under section 501(a) shall not affect the treatment of an employee of a domestic subsidiary as an employee of a domestic parent corporation under section 407(a) and paragraph (a)(1) of this section.

8. Sections 1.411(a)-1 through 1.411(a)-9 are added to read as follows:

§ 1.411(a)-1 Minimum vesting standards; general rules.

(a) *In general.* A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless—

(1) The plan provides that an employee's right to his normal retirement benefit (see § 1.411(a)-7(c)) is nonforfeitable (see § 1.411(a)-4) upon and after the attainment of normal retirement age (see § 1.411(a)-7(b)),

(2) The plan provides that an employee's rights in his accrued benefit derived from his own contributions (see § 1.411(c)-1) are nonforfeitable at all times, and

(3) The plan satisfies the requirements of—

(A) Section 411(a)(2) and § 1.411(a)-3 (relating to vesting in accrued benefit derived from employer contributions), and

(B) In the case of a defined benefit plan, section 411(b)(1) and § 1.411(b)-1 (relating to accrued benefit).

(b) *Organization of regulations relating to minimum vesting standards*—(1) *General rules.* This section prescribes general rules relating to the minimum vesting standards provided by section 411.

(2) *Effective dates.* Section 1.411(a)-2 provides rules under section 1017 of the Employee Retirement Income Security Act of 1974 relating to effective dates under section 411.

(3) *Employer contributions.* Section 1.411(a)-3 provides rules under section 411(a)(2) relating to vesting in employer-derived accrued benefits.

(4) *Certain forfeitures.* Section 1.411(a)-4 provides rules under section 411(a)(3) relating to certain permitted forfeitures, suspensions, etc. under qualified plans.

(5) *Nonforfeitable percentage.* Section 1.411(a)-5 provides rules under section 411(a)(4) relating to service included in the determination of an employee's nonforfeitable percentage under section 411(a)(2) and § 1.411(a)-3.

(6) *Years of service; break in service.* Section 1.411(a)-6 provides rules under section 411(a)(5) and (6) of the Internal Revenue Code of 1954 relating to years of service and breaks in service. Rules prescribed by the Secretary of Labor, relating to years of service and breaks in service under part 2 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 are provided under 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(7) *Definitions and special rules.* Section 1.411(a)-7 provides definitions and special rules under section 411(a)(7), (8), and (9), for purposes of section 411 and the regulations thereunder.

(8) *Changes in vesting schedule.* Section 1.411(a)-8 provides rules under section 411(a)(10) relating to changes in the vesting schedule of a plan.

(9) *Breaks in service.* Section 1.411(a)-9 provides special rules relating to breaks in service.

(10) *Accrued benefits.* See § 1.411(b)-1 for rules under section 411(b) relating to accrued benefit requirements under defined benefit plans.

(11) *Allocation of accrued benefits.* See § 1.411(c)-1 for rules under section 411(c) relating to allocation of accrued benefits between employer and employee contributions.

(12) *Discrimination, etc.* See § 1.411(d)-1 for rules relating to the coordination of section 411 with section 401(a)(4) (relating to discrimination) and other rules under section 411(d).

(c) *Application of standards to certain plans*—(1) *General rule.* Except as provided in subparagraph (2) of this paragraph, section 411 does not apply to—

(i) A governmental plan (within the meaning of section 414(d) and the regulations thereunder),

(ii) A church plan (within the meaning of section 414(e) and the regulations thereunder) which has not made the election provided by section 410(d) and the regulations thereunder,

(iii) A plan which has not provided for employer contributions at any time after September 2, 1974, and

(iv) A plan established and maintained by a society, order, or association described in section 501(c)(8) or (9), if no part of the contributions to or under such plan are made by employers of participants in such plan.

(2) *Vesting requirements.* A plan described in subparagraph (1) of this paragraph shall, for purposes of section 401(a), be treated as meeting the requirements of section 411 if such plan meets the vesting requirements resulting from the application of section 401(a)(4) and section 401(a)(7) as in effect on September 1, 1974.

(d) *Supersession.* Sections 11.411(a)-1 through 11.411(d)-3, inclusive, of the Temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 are superseded by this section and §§ 1.411(a)-2 through 1.411(d)-3.

§ 1.411(a)-2 Effective dates.

(a) *Plan not in existence on January 1, 1974.* Under section 1017(a) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was not in existence on January 1, 1974, section 411 and the regulations thereunder apply for plan years beginning after September 2, 1974. See paragraph (c) of this section for time plan is considered in existence.

(b) *Plans in existence on January 1, 1974.* Under section 1017(b) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was in existence on January 1, 1974, section 411 and the regulations thereunder apply for plan years beginning after December 31, 1975. See paragraph (c) of this section for time plan is considered to be in existence.

(c) *Time of plan existence*—(1) *General rule.* For purposes of this section, a plan is considered to be in existence on a particular day if—

(i) The plan on or before that day was reduced to writing and adopted by the employer (including, in the case of a corporate employer, formal approval by the employer's board of directors and, if required, shareholders), even though no amounts had been contributed under the plan as of such day, and

(ii) The plan was not terminated on or before that day

For example, if a plan was adopted on January 2, 1974, effective as of January 1, 1974, the plan is not considered to have been in existence on January 1, 1974, because it was not both adopted and in writing on January 1, 1974.

(2) *Collectively-bargained plan.* Notwithstanding paragraph (c)(1) of this section, a plan described in section 413(a), relating to a plan maintained pursuant to a collective-bargaining agreement, is considered to be in existence on a particular day if—

(i) On or before that day there is a legally enforceable agreement to establish such a plan signed by the employer, and

(ii) The employer contributions to be made to the plan are set forth in the agreement.

(3) *Special rule.* If a plan is considered to be in existence under subparagraph (1) of this paragraph, any other plan with which such existing plan is merged or consolidated shall also be considered to be in existence on such date.

(d) *Existing plans under collective bargaining agreements.* For a special effective date rule for certain plans maintained pursuant to a collective bargaining agreement, see section 1017(c)(1) of the Employee Retirement Income Security Act of 1974 (88 Stat. 932).

(e) *Certain existing plans may elect new provisions.* The plan administrator may elect to have the provisions of the Code relating to participation, vesting, funding, and form of benefit apply to a selected plan year. See § 1.410(a)-2(d) for rules relating to such an election.

(f) *Application of rules.* The requirements of section 411 do not apply to employees who separate from service with the employer prior to the first plan year to which such requirements apply and who never return to service with the employer in a plan year to which section 411 applies.

§ 1.411(a)-3 Vesting in employer-derived benefits.

(a) *In general*—(1) *Alternative requirements.* A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan satisfies the requirements of section 411(a)(2) and this section. A plan satisfies the requirements of this section if it satisfies the requirements of paragraph (b), (c), or (d) of this section.

(2) *Composite arrangements.* A plan will not be considered to satisfy the requirements of paragraph (b), (c), or (d) of this section unless it satisfies all requirements of a particular one of such paragraphs with respect to all of an employee's years of service. A plan which, for example, satisfies the requirements of paragraph (b) (but not (c) or (d)) for an employee's first 9 years of service and satisfies the requirements of paragraph (c) (but not (b)) for all of his remaining years of service, does not satisfy the requirements of this section. A plan is not precluded from satisfying the requirement of one such paragraph with respect to one group of employees and another such paragraph with respect to another group provided that the groups are not so structured as to evade the requirements of this paragraph. For example, if plan A provides that employees who commence participation before age 30 are subect to the "rule of 45" vesting schedule and employees who commence participation after age 30 are subject to the full vesting after 10 years schedule, plan A would be so structured as to evade the requirements of this paragraph.

(3) *Plan amendments.* A plan which satifies the requirements of a particular one of such paragraphs for each of an employee's years of service and which is amended so that, as amended, it satisfies the requirements of another such paragraph for all such years of service, satisfies the requirements of this section even though, as amended, it does not satisfy the requirements of the paragraph which were satisfied prior to the amendment. See § 1.411(a)-8 for rules relating to employee election where the vesting schedule is amended.

(b) *10-year vesting.* A plan satisfies the requirements of section 411(a)(2)(A) and this paragraph if an employee who has completed 10 years of service has a nonforfeitable right to 100 percent of his accrued benefit derived from employer contributions.

(c) *5- to 15-year vesting.* A plan satisfies the requirements of section 411(a)(2)(B) and this paragraph if an employee who has completed at least 5 years of service has a nonforfeitable right to a percentage of his accrued benefit derived from employer contribution which percentage is not less than the nonforeitable percentage determined under the following table:

Completed years of service	*Nonforfeitable percentage*
5	25
6	30
7	35
8	40
9	45
10	50
11	60
12	70
13	80
14	90
15 or more	100

(d) *Rule of 45.* A plan satisfies the requirements of section 411(a)(2)(C) and this paragraph if an employee is entitled to the greater of the two percentages determined under paragraph (d)(1) or (2) of this section.

(1) *Age and service test.* An employee who is not separated from the service, who has completed at least 5 years of service, and with respect to whom the sum of his age and years of service equals or exceeds 45, has a nonforfeitable right to a percentage of his accrued benefit derived from employer contributions which is not less than the nonforfeitable percentage corresponding to his number of completed years of service or to the sum of his age and completed years of service (whichever percentage is the lesser) determined under the following table:

Completed years of service	Sum of age and service	Nonforfeitable percentage
5	45 or 46	50
6	47 or 48	60
7	49 or 50	70
8	51 or 52	80
9	53 or 54	90
10 or more	55 or more	100

(2) *Service test.* An employee who has completed at least 10 years of service has a nonforfeitable right to a percentage of his accrued benefit derived from employer contributions determined under the following table:

Completed years of service	Nonforfeitable percentage
10	50
11	60
12	70
13	80
14	90
15	100

(3) *Computation of age.* For purposes of subparagraph (1) of this paragraph, the age of an employee is his age on his last birthday.

(e) *Examples.* The rules provided by this section are illustrated by the following examples:

Example (1). Plan B provides that each employee's rights to his employer-derived accrued benefit are nonforfeitable as follows:

Completed years of service	Nonforfeitable percentage
2 or less	0
3	30
4	35
5	40
6	45
7	50
8	55
9	60
10	65
11	70
12	75
13	80
14	85
15	100

Plan B does not satisfy the requirements of paragraph (c) of this section (relating to 5–15-year vesting) because the nonforfeitable percentage provided by the plan after completion of 14 years of service (85 percent) is less than the percentage required by paragraph (c) of this section at that time (90 percent). The fact that the nonforfeitable percentage provided by the plan for years prior to the 13th year of service is greater than the percentage required under paragraph (c) of this section is immaterial. The plan fails to satisfy the requirements of paragraph (c) of this section even if it is demonstrated that the value of the vesting provided by the plan to the employee is at least equal to the value of the vesting rate required by that paragraph.

Example (2). Plan C provides for plan participation after the completion of 1 year of service. The plan provides that each employee's rights to his employer-derived accrued benefit are 100 percent nonforfeitable after 10 years of plan participation rather than service. The plan does not satisfy the requirements of paragraph (b) of this section because, under the plan, an employee obtains a 100 percent nonforfeitable right to his employer-derived accrued benefit only after completion of more than 10 years of service.

Example (3). Plan D provides that each employee's rights to his employer-derived accrued benefit are nonforfeitable in accordance with the following schedule:

Completed years of service	Nonforfeitable percentage
0–9	0
10	50
11	60
12	70
13	80
14	90
15	100

The plan does not satisfy the requirements of paragraph (b) of this section after the 9th year of service. It does not satisfy the requirements of paragraph (c) of this section for years prior to the 10th year of service. It does not satisfy the requirements of paragraph (d)(1) of this section for any year of service prior to the 10th year. The plan does not satisfy the requirements of this section because it does not satisfy the requirements of a particular one of the three paragraphs for each of an employee's years of service.

Example (4). Plan G provides that each employee's rights to his employer-derived accrued benefit are 100 percent nonforfeitable upon completion of 5 years of service. The plan satisfies the requirements of paragraphs (b), (c), and (d) of this section and, because it satisfies the requirements of at least one of such paragraphs for all of an employee's years of service, it satisfies the requirements of this section.

§ 1.411(a)–4 Forfeitures, suspensions, etc.

(a) *Nonforfeitability.* Certain rights in an accrued benefit must be nonforfeitable to satisfy the requirements of section 411(a). This section defines the term "nonforfeitable" for purposes of these requirements. For purposes of section 411 and the regulations thereunder, a right to an accrued benefit is considered to be nonforfeitable at a particular time if, at that time and thereafter, it is an unconditional right. Except as provided by paragraph (b) of this section, a right which, at a particular time, is conditioned under the plan upon a subsequent event, subsequent performance, or subsequent forbearance which will cause the loss of such right is a forfeitable right at that time. Certain adjustments to plan benefits such as adjustments in excess of reasonable actuarial reductions, can result in rights being forfeitable. Rights which are conditioned upon a sufficiency of plan assets in the event of a termination or partial termination are considered to be forfeitable because of such condition. However, a plan does not violate the nonforfeitability requirements merely because in the event of a termination an employee does not have any recourse toward satisfaction of his nonforfeitable benefits from other than the plan assets or the Pension Benefit Guaranty Corporation. Furthermore, nonforfeitable rights are not considered to be forfeitable by reason of the fact that they may be reduced to take into account benefits which are provided under the Social Security Act or under any other Federal or State law and which are taken into account in determining plan benefits. To the extent that rights are not required to be nonforfeitable to satisfy the minimum vesting standards, or the nondiscrimination requirements of section 401(a)(4), they may be forfeited without regard to the limitations on forfeitability required by this section. The right of an employee to repurchase his accrued benefit for example under section 411(a)(3)(D), is an example of a right which is required to satisfy such standards. Accordingly, such a right is subject to the limitations on forfeitability. Rights which are required to be prospectively nonforfeitable under the vesting standards are nonforfeitable and may not be forfeited until it is determined that such rights are, in fact, in excess of the vesting standards. Thus, employees have a right to vest in the accrued benefits if they continue in employment of employers maintaining the plan unless a forfeitable event recognized by section 411 occurs. For example, if a plan covered employees in Division A of Corporation X under a plan utilizing a 10-year-100 percent vesting schedule, the plan could not forfeit employees' rights on account of their moving to service in Division B of Corporation X prior to completion of 10 years of service even though employees are not vested at that time.

(b) *Special rules.* For purposes of paragraph (a) of this section a right is not treated as forfeitable—

(1) *Death.* (i) *General rule.* In the case of a participant's right to his employer-derived accrued benefit, merely because such accrued benefit is forfeitable by the participant to the extent it has not been paid or distributed to him prior to his death. This subparagraph shall not apply to a benefit which must be paid to a survivor in order to satisfy the requirements of section 401(a)(11).

(ii) *Employee contributions.* A participant's right in his accrued benefit derived from his own contributions must be nonforfeitable at all times. Such a right is not treated as forfeitable merely because, after commencement of annuity or pension payments in a benefit form provided under the plan, the participant dies without receiving payments equal in amount to his nonforfeitable accrued benefit derived from his contributions determined at the time of commencement.

(2) *Suspension of benefits upon reemployment of retiree.* In the case of certain suspensions of benefits under section 411(a)(3)(B), see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(3) *Retroactive plan amendment.* In the case of a participant's right to his employer-derived accrued benefit, merely because such benefit is subject to reduction to the extent provided by a plan amendment described in section 412(c)(8) and the regulations thereunder, which amendment is given retrocative effect in accordance with such section.

(4) *Other forfeiture rules.*—(i) *Withdrawal of mandatory contributions.* For rules allowing forfeitures on account of the withdrawal of mandatory contributions, see § 1.411(a)–7(d)(2) and (3).

(ii) *Class year plans.* For forfeiture rules pertaining to class year plans, see § 1.411(d)–3(b).

(iii) *Additional requirements.* For additional requirements relating to nonforfeitability of benefits in the event of a withdrawal by the employee, see section 401(a)(19) and § 1.401(a)–19.

(5) *Multiemployer plan.* In the case of a multiemployer plan described in section 414(f), merely because an employee's accrued benefit which results from service with an employer before such employer was required to contribute to the plan is forfeitable on account of the cessation of contributions by the employer of the employee. This subparagraph shall not apply to an employee's accrued benefit with respect to an employer which accrued under a plan maintained by that employer prior to the adoption by that employer of the multiemployer plan.

(6) *Lost beneficiary; escheat.* In the case of a benefit which is payable, merely because the benefit is forfeitable on account of the inability to find the participant or beneficiary to whom payment is due, provided that the plan provides for reinstatement of the benefit if a claim is made by the participant or beneficiary for the forfeited benefit. In addition, a benefit which is lost by reason of escheat under applicable state law is not treated as a forfeiture.

(c) *Examples.* The rules of this section are illustrated by the following examples:

Example (1). Corporation A's plan provides that an employee is fully vested in his employer-derived accrued benefit after completion of 5 years of service. The plan also provides that, if an employee works for a competitor he forfeits his rights in the plan. Such provision could result in the forfeiture of an employee's rights which are required to be nonforfeitable under section 411 and therefore the plan would not satisfy the requirements of section 411. If the plan limited the forfeiture to employees who completed less than 10 years of service, the plan would not fail to satisfy the requirements of section 411 because the forfeitures under this provision are limited to rights which are in excess of the minimum required to be nonforfeitable under section 411(a)(2)(A).

Example (2). Plan B provides that if an employee does not apply for benefits within 5 years after the attainment of normal retirement age, the employee loses his plan benefits. Such a plan provision could result in forfeiture of an employee's rights which are required to be nonforfeitable under section 411 and, therefore, the plan would not satisfy the requirements of section 411.

§ 1.411(a)–5 Service included in determination of nonforfeitable percentage.

(a) *In general.* Under section 411(a)(4), for purposes of determining the nonforfeitable percentage of an employee's right to his employer-derived accrued benefit under section 411(a)(2) and § 1.411(a)–3, all of an employee's years of service with an employer or employers maintaining the plan shall be taken into account except that years of service described in paragraph (b) of this section may be disregarded.

(b) *Certain service.* For purposes of paragraph (a) of this section, the following years of service may be disregarded:

(1) *Service before age 22.* (i) In the case of a plan which satisfies the requirements of section 411(a)(2)(A) or (B) (relating to 10-year vesting and 5–15-year vesting, respectively), a year of service completed by an employee before he attains age 22.

(ii) In the case of a plan which does not satisfy the requirements of section 411(a)(2)(A) or (B), a year of service completed by an employee before he attains age 22 if the employee is not a participant (for purposes of section 410) in the plan at any time during such year.

(iii) For purposes of this subparagraph in the case of a plan utilizing computation periods, service during a computation period described in section 411(a)(5)(A) within which the employee attains age 22 may not be disregarded. In the case of a plan utilizing the elapsed time method described in Department of Labor regulations, service on or after the date on which the employee attains age 22 may not be disregarded.

(2) *Contributory plans.* In the case of a plan utilizing computation periods, a year of service completed by an employee under a plan which requires mandatory contributions (within the meaning of section 411(c)(2)(C) and § 1.411(c)–1(c)(4)) to be made by the employee for such year, if the employee does not participate for such year solely because of his failure to make all mandatory contributions to the plan for such year. If the employee contributes any part of the mandatory contributions for the year, such year may not be excluded by reason of this subparagraph. In the case of a plan utilizing the elapsed time method described in Department of Labor regulations, the service which may be disregarded is the period with respect to which the mandatory contribution is not made.

(3) *Plan not maintained.*—(i) *In general.* An employee's years of service with an employer during any period for which the employer did not maintain the plan or a predecessor plan may be disregarded for purposes of section 411(a)(2). Paragraph (b)(3)(ii) of this section provides rules regarding the period prior to the adoption of a plan. Paragraph (b)(3)(iii) of this section provides rules regarding the period after the termination of a plan. Paragraph (b)(3)(iv) of this section provides rules regarding employers who have certain relationships with other employers maintaining the plan.

(ii) *Period prior to adoption.* The period for which a plan is not maintained by an employer includes the period before the plan was established. For purposes of this subdivision, a plan is established on the first day of the plan year in which the plan is adopted even though the plan is adopted after such first day. Except as provided in paragraph (b)(3)(iv) of this section if an employer adopts a plan which has previously been established by another employer or group of employers, the plan is not maintained by the adopting employer prior to the first day of the plan year in which the plan is adopted by the adopting employer. In the case of a transfer of assets or liabilities (including a merger or consolidation) involving two plans maintained by a single employer, the successor (or transferee) plan is treated as if it was established at the same time as the date of the establishment of the earliest component plan. In the case of a plan merger, consolidation, or transfer of plan assets or liabilities involving plans of two or more employers, the successor plan is treated as if it were established on each of the separate dates on which such component plan was established for the employees of each employer. Thus, for example, if employer A establishes a plan January 1, 1970, and employer B establishes a plan January 1, 1980, and the plans were subsequently merged, then the merged plan would be treated as if it were in existence on January 1, 1970, with respect to A's employees and as if it were in existence on January 1, 1980, with respect to B's employees.

(iii) *Period after termination or withdrawal.* The period for which a plan is not maintained by an employer includes the period after the plan is terminated. For purposes of this section, a plan is terminated at the date there is a termination of the plan within the meaning of section 411(d)(3)(A) and the regulations thereunder. Notwithstanding the preceding sentence, if contributions to or under a plan are made after termination, the plan is treated as being maintained until such contributions cease, whether or not accruals are made after such termination. If, after termination of a plan in circumstances under which the employer may be liable to the Pension Benefit Guaranty Corporation under section 4062 of the Act, employer contributions are made to or under the plan to fund benefits accrued at the time of termination, such contributions shall, for purposes of this paragraph, be deemed to be payments in satisfaction of employer liability to such Corporation rather than contributions to or under the plan. In the case of a plan maintained by more than one employer, the period for which the plan is not maintained by the withdrawing employer includes the period after the withdrawal from the plan.

(iv) *Certain employers.* For purposes of this subparagraph—

(A) *Predecessor employers.* Service with a predecessor employer who maintained the plan of the current employer is treated as service with such current employer (see section 414(a)(1) and the regulations thereunder), and certain service with a predecessor employer who did not maintain the plan of the current employer is treated as service with the current employer (see section 414(a)(2) and the regulations thereunder).

(B) *Related employers.* Service with an employer is treated as service for certain related employers for the period during which the employers are related. These related employers include members of a controlled group of corporations (within the meaning of section 1563(a), determined without regard to subsections (a)(4) and

V 42 163 AUG 23 77 UM

(e)(3)(C) thereof) and trades or businesses (whether or not incorporated) which are under common control (see section 414 (b) and (c) and 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(C) *Plan maintained by more than one employer.* Service with an employer who maintains a plan is treated as service for each other employer who maintains that plan for the period during which the employers are maintaining the plan (see section 413 (b)(4) and (c)(3) and 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(v) *Predecessor plan*—(A) *General rule.* In the case of an employee who was covered by a predecessor plan, the time the successor of such plan is maintained for such employee includes the time the predecessor plan was maintained if, as of the later of the time the predecessor plan is terminated or the successor plan is established, the employee's years of service under the predecessor plan are not equalled or exceeded by the aggregate number of consecutive 1-year breaks in service occurring after such years of service. Years of service and breaks in in service, without regard to whether the employee has nonforfeitable rights under the predecessor plan, are determined under section 411(a) (5) and (6) except that years between the termination date of the predecessor plan and the date of establishment of the succcessor plan do not count as years of service.

(B) *Definition of predecessor plan.* For purposes of this section, if—

(1) An employer establishes a retirement plan (within the meaning of section 7476(d)) qualified under subchapter D of chapter 1 of the Code within the 5-year period immediately preceding or following the date another such plan terminates, and

(2) The other plan is terminated during a plan year to which this section applies.

The terminated plan is a predecessor plan with respect to such other plan.

(C) *Example.* The rules provided by this subparagraph are illustrated by the following example:

Example. (1) Employer X's qualified plan A terminated on January 1, 1977. Employer X established qualified plan B on January 1, 1981. Under paragraph (b)(3)(v)(B) of this section, plan A is a predecessor plan with respect to plan B because plan B is established within the 5-year period immediately following the date plan A terminated.

(2) Employee C was not covered by the A plan. Under the general rule in subdivision (v)(A) of this subparagraph, plan B is not maintained until January 1, 1981, with resect to Employee C.

(3) Employee D was covered by the A plan. On December 31, 1976, D had 4 years of service. D had 4 consecutive 1-year breaks in service because, during the years between the termination of plan A and the establishment of plan B, he did not have more than 500 hours of service in any applicable computation period. Because D's consecutive 1-year breaks (4) equal his years of service prior to his breaks (4), plan B is not maintained until January 1, 1981, with respect to employee D.

(4) Employee E was covered by the A plan. On December 31, 1975, E had 6 years of service. E had a 1-year break in service in 1976. E also had 4 consecutive 1-year breaks in service for the period between plan A's termination and plan B's establishment. Because E's years of service (6) are not less than his consecutive 1-year breaks (5), plan B is maintained for E as of the establishment date of plan A.

(4) *Break in service.* A year of service which is not required to be taken into account by reason of a break in service (within the meaning of section 411(a)(6) and § 1.411(a)–6)).

(5) *Service before January 1, 1971.* A year of service completed by an employee prior to January 1, 1971, unless the employee completes at least 3 years of service at any time after December 31, 1970. For purposes of determining if an employee completes 3 years of service, whether or not consecutive, the exceptions of section 411(a)(4) are not applicable. For the meaning of the term "year of service", see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(6) *Service before effective date.* A year of service completed before the first plan year for which this section applies to the plan, if such service would have been disregarded under the plan rules relating to breaks in service (whether or not such rules are so designated in the plan) as such rules were in effect from time to time under the plan. For this purpose, plan rules which result in the loss of prior vesting or benefit accruals of an employee, or which deny an employee eligibility to participate, by reason of separation or failure to complete a required period of service within a specified period of time (*e.g.*, 300 hours in one year) will be considered break in service rules. See § 1.411(a)–9 for requirements relating to certain amendments to the break in service rules of a plan.

(ii) *Examples.* The rules of this subparagraph are illustrated by the following examples:

Example 1. The A plan in 1971 provides for immediate participation and vesting at normal retirement age. Employees accrue a unit benefit based on their compensation in each year. The plan provides that if an employee is not employed on the last day of the calendar year, he loses all accrued benefits. The requirement of employment on the last day of the year is a break in service rule because emnloyees can lose benefits by reason of their separation. Accordingly, in the case of employees who separate and do not return by the close of the year, service which is completed prior to separation may be disregarded.

Example 2. The B plan in 1971 excludes from plan participation employees who work less than 1200 hours per year. Because years of less than 1200 hours are not taken into account under the B plan for eligibility to participate, such years are excluded under rules relating to breaks in service. Therefore, the years can be disregarded under this subparagraph.

Example 3. The C plan in 1971 provides for immediate participation and provides accruals and vesting credit for 1,200 hours or more in a given year. The plan provides that if a participant works less than 300 hours in a given year, he loses all prior vesting and benefit credits. The 300 hour rule is a break in service rule because the failure to complete 300 hours results in the loss of vesting and prior service credit. The 1,200 hour requirement is not a break in service rule because even though employees do not increase vesting or accrue benefits for service between 300 and 1,200 hours, they can not lose prior vesting or benefits for such service. Accordingly, the C plan can disregard completed years only on account of less than 300 hours of service by an employee.

(c) *Special continuity rule for certain plans.* For special rules for computing years of service in the case of a plan maintained by more than one employer, see 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

§ 1.411(a)–6 Year of service; hour of service; breaks in service.

(a) *Year of service.* Under section 411(a)(5)(A), for purposes of the regulations thereunder, the term "year of service" is defined in regulations prescribed by the Secretary of Labor under section 203(b)(2)(A) of the Employee Retirement Income Security Act of 1974. For special rules applicable to seasonal industries and maritime industries, see regulations prescribed by the Secretary of Labor under subparagraphs (C) and (D) of section 203(b)(2) of the Employee Retirement Income Security Act of 1974.

(b) *Hours of service.* Under section 411(a)(5)(B), for purposes of the regulations thereunder, the term "hours of service" has the meaning provided by section 410(a)(3)(C). See regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(c) *Breaks in service.* Under section 411(a)(6), for purposes of § 1.411(a)–5(b)(4) and of this paragraph—

(1) *In general*—(i) *Year of service after 1-year break in service.* In the case of any employee who has incurred a 1-year break in service, years of service completed before such break are not required to be taken into account until the employee has completed one year of service after his return to service.

(ii) *Defined contribution plan.* In the case of a participant in a defined contribution plan or in an insured defined benefit plan (which plan satisfies the requirements of section 411 (b)(1)(F) and § 1.411(b)–1) who has incurred a 1-year break in service, years of service completed after such break are not required to be taken into account for purposes of determining the nonforfeitable percentage of the participant's right to employer-derived benefits which accrued before such break. This subdivision does not permit years of service completed before a 1-year break in service to be disregarded in determining the nonforfeitable percentage of a participant's right to employer-derived benefits which accrue after such break.

(iii) *Nonvested participants.* In the case of an employee who is a nonvested participant in employer-derived benefits at the time he incurs a 1-year break in service, years of service completed by such participant before such break are not required to be taken into account for purposes of determining the nonforfeitable percentage of his right to employer-derived benefits if at such time the number of consecutive 1-year breaks in service included in his most recent break in service equals or exceeds the aggregate number of his years of service, whether or not consecutive, completed before such break. In the case of a plan utilizing the elapsed time method described in Department of Labor regulations, the condition in the preceding sentence shall be satisfied if the period of severance is at least one year and the consecutive period of severance equals or exceeds his prior period of service, whether or not consecutive, completed before such period of severance. In computing the aggregate number of years of service prior to such break, years of service which could have been disregarded under this subdivision by reason of any prior break in service may be disregarded.

(2) *One-year break in service defined.* The term "1-year break in service" means a calendar year, plan year, or other 12-consecutive month period designated by a plan (and not prohibited under regulations prescribed by the Secretary of Labor) during which the participant has not completed more than 500 hours of service. In the case of a plan utilizing the elapsed time method, the term "1-year break in service" means a 12-consecutive month period beginning on the severance from service date or any anniversary thereof and ending on the next succeeding anniversary of such date; provided, however, that the employee during such 12-consecutive-month period does not complete any hours of service within the meaning of 29 CFR Part 2530.200b–2(a) for the employer or employers maintaining the plan. See regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(d) *Examples.* The rules provided by this section are illustrated by the following examples:

Example (1). (i) X Corporation maintains a defined contribution plan to which section 411 applies. The plan uses the calendar year as the vesting computation period. In 1980, Employee A, who was hired at age 35, separates from the service of X Corporation after completing 4 years of service. At the time of his separation, Employee A had a nonforfeitable right to 25 percent of his employer-derived accrued benefit which was not distributed. In 1985, after incurring 5 consecutive one-year breaks in service, Employee A is re-employed by X Corporation and becomes an active participant in the plan. The plan provides that, for 1985 and all subsequent years, Employee A's previous years of service will not be taken into account for purposes of computing the nonforfeitable percentage of his employer-derived accrued benefit, solely because of his break in service.

(ii) The plan fails to satisfy section 411. Section 411(a)(6)(B) would permit the plan to disregard Employee A's prior service for purposes of computing his nonforfeitable percentage in 1985 only, but such service must be taken into account in subsequent years unless there is another break in service. Under section 411(a)(6)(C), the plan is not required to take Employee A's post-break service into account for purposes of computing his nonforfeitable right to his pre-break employer-derived accrued benefits. This provision, however, would not permit the plan to disregard pre-break service in determining his nonforfeitable right to his benefit accrued after the break. The exception provided by section 411(a)(6)(D) does not apply in the case of a participant who has any nonforfeitable right to his accrued benefit derived from employer contributions.

Example (2). (i) X Corporation maintains a qualified plan to which sections 410 and 411 (relating to minimum participation standards and minimum vesting standards, respectively) apply. The plan permits participation upon completion of a year of service and provides that 100% of an employee's employer-derived accrued benefit vests after 10 years of service. The plan uses the calendar year as the vesting computation period. The plan provides that an employee who completes at least 1,000 hours of service in a 12-month period is credited with a year of service for participation and vesting purposes. The plan also provides that an employee who does not complete more than 500 hours of service in that 12-month period incurs a one-year break in service. The plan includes the rule described in section 411(a)(6)(D) for participation and vesting purposes. Under this rule, an employee's years of service prior to a break in service may be disregarded under certain circumstances if he has no vested right to any employer-derived benefit under the plan. The plan does not contain the rule described in section 411(a)(6)(B) (relating to the requirement of one year of service after a one-year break in service).

(ii) Employee A commences employment with the X Corporation on January 1, 1977. Employee A's employment history for 1977 through 1989 is as follows:

Year ending December 31:	*Hours of service completed*
1977	1,000
1978	800
1979	1,000
1980	400
1981	1,000
1982	0
1983	400
1984	1,000
1985	0
1986	0
1987	500
1988	200
1989	1,000

Employee A's status as a participant during this period is determined as follows:

1978: Employee A was a plan participant on January 1, 1978, because he completed a year of service (1,000 hours) in 1977. He did not complete a year of service in 1978 because he completed fewer than 1,000 hours in that year. Because he completed more than 500 hours of service in 1978, however, Employee A did not incur a one-year break in service that year.

1979: Employee A completes a year of service in 1979. Because he did not incur a one-year break in service in 1978, the plan may not disregard his 1977 service for purposes of determining his years of service as of January 1, 1979.

1980: Employee A incurs a one-year break in service in 1980.

1981: Because Employee A had completed 2 years of service prior to 1981 and had incurred one 1-year break in service prior to 1981, under section 411(a)(6)(D), the plan may not disregard his pre-1980 service in 1981. Employee A completes a year of service in 1981.

1982: Employee A incurs a one-year break in service in 1982.

1983: Employee A incurs a one-year break in service in 1983. As of the end of 1983, he has completed 3 years of service and has incurred 2 consecutive one-year breaks in service.

1984: Employee A completes a year of service in 1984. Under section 411(a)(6)(D), his pre-1982 service may not be disregarded in 1984 because, as of the beginning of 1984, his pre-1984 years of service (3) exceed his consecutive one-year breaks in service (2).

1985–1988: Employee A incurs 4 consecutive one-year breaks in service during the years 1985 through 1988.

1989: Employee A's pre-1989 service is disregarded in 1989 and all subsequent plan years because his years of service as of January 1, 1989, equal the number of consecutive one-year breaks he has incurred as of that date. Therefore, as of the beginning of 1989, Employee A is not a plan participant. Employee A completes a year of service in 1989. (Although section 411(a)(6)(D) does not prohibit the plan provision under which Employee A's pre-1989 service is disregarded, that section does not require such a provision in a qualified plan.)

§ 1.411(a)–7 Definitions and special rules.

(a) *Accrued benefit.* For purposes of section 411 and the regulations thereunder, the term "accrued benefit" means—

(1) *Defined benefit plan.* In the case of a defined benefit plan—

(i) If the plan provides an accrued benefit in the form of an annual benefit commencing at normal retirement age, such accrued benefit, or

(ii) If the plan does not provide an accrued benefit in the form described in subdivision (i) of this subparagraph, an annual benefit commencing at normal retirement age which is the actuarial equivalent (determined under section 411(c)(3) and § 1.411(c)–5) of the accrued benefit determined under the plan. In general, the term "accrued benefits" refers only to pension or retirement benefits. Consequently, accrued benefits do not include ancillary benefits not directly related to retirement benefits such as payment of medical expenses (or insurance premiums for such expenses), disability benefits not in excess of the qualified disability benefit (see section 411 (a)(9) and paragraph (c)(3) of this section), life inusrance benefits payable as a lump sum, incidental death benefits, current life insurance protection, or medical benefits described in section 401(h). For purposes of this paragraph a subsidized early retirement benefit which is provided by a plan is not taken into account, except to the extent of determining the normal retirement benefit under the plan (see section 411(a)(9) and paragraph (c) of this section). The accrued benefit includes any optional settlement at normal retirement age under actuarial assumptions no less favorable than those which would be applied if the employee were terminating his employment at normal retirement age. The accrued benefit does not include any subsidized value in a joint and survivor annuity to the extent that the annual benefit of the joint and survivor

V 42 163 AUG 23 77 UM

annuity does not exceed the annual benefit of a single life annuity.

(2) *Defined contribution plan.* In the case of a defined contribution plan, the balance of the employee's account held under the plan.

(b) *Normal retirement age*—(1) *General rule.* For purposes of section 411 and the regulations thereunder, the term "normal retirement age" means the earlier of—

(i) The time specified by a plan at which a plan participant attains normal retirement age, or

(ii) The later of—

(A) The time the plan participant attains age 65, or

(B) The 10th anniversary of the date the plan participant commences participation in the plan.

If a plan, or the employer sponsoring the plan, imposes a requirement that an employee retire upon reaching a certain age, the normal retirement age may not exceed that mandatory retirement age. The preceding sentence will apply if the employer consistently enforces a mandatory retirement age rule, whether or not set forth in the plan or any related document. For purposes of subdivision (i) of this subparagraph, if an age is not specified by a plan as the normal retirement age, then the normal retirement age under the plan is the earliest age beyond which the participant's benefits under the plan are not greater solely on account of his age or service. For purposes of paragraph (b)(1)(ii)(B) of this section, participation commences on the first day of the first year in which the participant commenced his participation in the plan, except that years which may be disregarded under section 410(a)(5)(D) may be disregarded in determining when participation commenced.

(2) *Examples.* The provisions of this paragraph are illustrated by the following examples:

Example (1). Plan A defines normal retirement age as age 65. Under the plan, benefits payable to participants who retire at or after age 60 are not reduced on account of early retirement. For purposes of section 411 and the vesting regulations, normal retirement age under Plan A is age 65 (determined under subparagraph (1)(i) of this paragraph). This is true even if in operation all participants retire at age 60.

Example (2). Plan B does not specify any age as the normal retirement age. Under the plan, participants who have attained age 55 are entitled to benefits commencing upon retirement but the benefits of participants who retire before attaining age 70 are subject to reduction on account of early retirement. For purposes of section 411 and the vesting regulations the normal retirement age under plan B is the later of (i) age 65, or (ii) the 10th anniversary of the date a plan participant commences participation in the plan (assuming such date is prior to age 70).

Example (3). The facts are the same as in example (2). Employee X first became a participant in Plan B on January 1, 1980 at age 53. His participation continued until December 31, 1980, when he separated from the service with no vested benefits. After incurring 5 consecutive 1-year breaks in service, Employee X again becomes an employee and a plan participant on January 1, 1986, at age 59. For purposes of section 411, Employee X's normal retirement age under Plan B is age 69, the 10th anniversary of the date on which his year of plan participation commenced. His participation in 1980 may be disregarded under the last sentence of paragraph (b)(1) of this section.

(c) *Normal retirement benefit*—(1) *In general.* For purposes of section 411 and the regulations thereunder, the term "normal retirement benefit" means the periodic benefit under the plan commencing upon early retirement (if any) or at normal retirement age, whichever benefit is greater.

(2) *Periodic benefit.* For purposes of subparagraph (1) of this paragraph—

(i) In the case of a plan under which a benefit is payable as an annuity in the same form upon early retirement and at normal retirement age, the greater benefit is determined by comparing the amount of such annuity payments.

(ii) In the case of a plan under which an annuity benefit payable upon early retirement is not in th same form as an annuity benefit payable at normal retirement age, the greater benefit is determined by converting the annuity benefit payable upon early retirement age into the same form of annuity benefit as is payable at normal retirement age and by comparing the amount of the converted early retirement benefit payment with the amount of the normal retirement benefit payment.

(iii) In the case of a plan which is integrated with the Social Security Act or any other Federal or State law, the periodic benefit payable upon and after early retirement age is adjusted for any increases in such benefits occurring on or after early retirement age which are taken into account under the plan. See however, section 401(a)(15) and the regulations thereunder.

(3) *Benefits included.* For purposes of this paragraph, the normal retirement benefit under a plan shall be determined without regard to ancillary benefits not directly related to retirement benefits such as medical benefits or disability benefits not in excess of the qualified disability benefit; see section 411(a)(7) and paragraph (a)(1) of this section. For this purpose, a qualified disability benefit is a disability benefit which is not in excess of the amount of the benefit which would be payable to the participant if he separated from service at normal retirement age.

(4) *Early retirement benefit; social security supplement.* (i) For purposes of this paragraph, the early retirement benefit under a plan shall be determined without regard to any social security supplement.

(ii) For purposes of this subparagraph, a social security supplement is a benefit for plan participants which—

(A) Commences before the age and terminates before the age when participants are entitled to old-age insurance benefits, unreduced on account of age, under title II of the Social Security Act, as amended (see section 202 (a) and (g) of such Act), and

(B) Does not exceed such old-age insurance benefit.

(5) *Special limitation.* If a defined benefit plan bases its normal retirement benefits on employee compensation, the compensation must reflect the compensation which would have been paid for a full year of participation within the meaning of section 411(b)(3). If an employee works less than a full year of participation, the compensation used to determine benefits under the plan for such year of participation must be multiplied by the ratio of the number of hours for a complete year of participation to the number of hours worked in such year. A plan whose benefit formula is computed on a computation base which cannot decrease is not required to adjust employee compensation in the manner described in the previous sentence. Thus, for example, if a plan provided a benefit based on an employee's compensation for his highest five consecutive years or a separate benefit for each year of participation based on the employee's compensation for such year the plan would not have to so adjust compensation. However, if a plan provided a benefit based on an employee's compensation for the employee's last five years or the five highest consecutive years out of the last 10 years, the compensation, would have to be so adjusted. For special rules for applying the limitations on proration of a year of participation for benefit accrual, see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(6) *Examples.* The provisions of this paragraph are illustrated by the following examples:

Example (1). Plan A provide for a benefit equal to 1% of high 5 years compensation for each year of service and a normal retirement age of 65. The plan also provides for a full unreduced accrued benefit without any actuarial reduction for any employee at age 55 with 30 years of service. Even though the actuarial value of the early retirement benefit could exceed the value of the benefit at the normal retirement age, the normal retirement benefit would not include the greater value of the early retirement benefit because actuarial subsidies are ignored.

Example (2). Plan B provides the following benefits: (1) at normal retirement age 65, $300/mo. for life and (2) at early retirement age 60, $400/mo. for life. The normal retirement benefit is $400/mo., the greater of the benefit payable at normal retirement age ($300) or early retirement ($400).

Example (3). Assume the same facts as example (2) except that the early retirement benefit of $400 is reduced to $300 upon attainment of age 65. If each employee's social security benefit at age 65 is not less than $100, the $100 would be considered to be a social security supplement and would therefore be ignored. Consequently, the normal retirement benefit would be $300.

Example (4). Plan C provides a benefit at normal retirement age equal to 1% per year of service, multiplied by the participant's compensation averaged over the 5 years immediately prior to retirement. An early retirement benefit is provided upon attainment of age 60 equal to the benefit accrued to date of early retirement reduced by 4 percent for each year by which the early retirement date precedes the normal retirement age of 65. Employee A was hired at age 30, participated immediately, and retired at age 65. Employee A's annual compensation was $50,000 between ages 55–60 and was reduced to $33,000 after age 60. The following table indicates the amount of annual benefit that would have been provided by the plan formula if the employee retired at or after after 60:

Age	Final average computed (1)	Percent accrued benefit (2)	Reduction (3)	Annual benefit (4)
60	$50,000	30	0.80	$12,000
61	46,600	31	.84	12,135
62	43,200	32	.88	12,165
63	39,800	33	.92	12,083
64	36,400	34	.96	11,881
65	33,000	35	1.00	11,550

NOTE.—Col. (1) times col. (2) times col. (3) equals col. (4).

The normal retirement benefit is the greater of the benefit payable at normal retirement age or the early retirement benefit. Employee A's normal retirement benefit is $12,165, the greatest annual benefit Employee A would be entitled to.

(d) *Rules relating to certain distributions and cash-outs of accrued benefits*—(1) *In general.* This paragraph sets forth vesting rules applicable to certain distributions from qualified plans and their related trusts (other than class year plans). Subparagraphs (2) and (3) set forth the exceptions to nonforfeitability on account of withdrawal of mandatory contributions provided by section 411(a)(3)(D). When a plan utilizes these exceptions with respect to a given participant's accrued benefit, such accrued benefit is not subject to the cash-out rules or vesting rules of subparagraphs (4) or (5), respectively. Section 411 prescribes certain requirements with respect to accrued benefits under a qualified plan. These requirements would generally not be satisfied if the plan disregarded service in computing accrued benefits even though amounts were distributed on account of such service. Subparagraph (4) of this paragraph sets forth rules under section 411(a)(7)(B) which allow a plan to make distributions and compute accrued benefits without regard to the accrued benefit attributable to the distribution. When a defined contribution plan utilizes this exception with respect to an accrued benefit, the plan is not required to satisfy the rules of subparagraph (5) of this paragraph. Subparagraph (5) of this paragraph sets forth a vesting requirement applicable to certain distributions from defined contribution plans. Subparagraph (6) sets forth other rules which pertain to the distribution rules of this paragraph.

(2) *Withdrawal of mandatory contribution*—(i) *General rule.* In the case of a participant's right to his employer-derived accrued benefit, a right is not treated as forfeitable merely because all or a portion of such benefit may be forfeited on account of the withdrawal by the participant of any amount attributable to his accrued benefit derived from his mandatory contributions (within the meaning of section 411(c)(2)(C) and § 1.411(c)–1) before he has become a 50 percent vested participant (within the meaning of § 1.401(a)–19(b)(2)). For purposes of determining the vested percentage, the plan may disregard service after the withdrawal. For example, assume that a plan utilizes 1000 hours for computing years of service and that for the computation period employee A had 1000 hours of service. If A was 40 percent vested at the beginning of the period but only had 800 hours at the time of the withdrawal, the plan could treat A as only 40 percent vested because service after the withdrawal can be disregarded. On the other hand, if A had 1000 hours at the time of the withdrawal, he must receive a year of service for the computation period, even though service is not taken into account until the end of such period.

(ii) *Plan repayment provision.* (A) Subdivision (i) of this subparagraph shall not apply unless, at the time the amount described in such subdivision is withdrawn by the participant, the plan provides the employee with a right to restoration of his employer-derived accrued benefit to the extent forfeited in accordance with such subdivision upon repayment to the plan of the full amount of the withdrawal.

(B) In the case of a defined benefit plan (as defined in section 414(j)) the restoration of the employee's employer-derived accrued benefit may be conditioned upon repayment of interest on the full amount of the distribution. Such interest shall be computed on the amount of the distribution from the date of such distribution to the date of repayment, compounded annually from the date of distribution, at the rate determined under section 411(c)(2)(C) in effect on the date of repayment. A plan may provide for repayment of interest which is less than the amount determined under the preceding sentence.

(C) In the case of a defined contribution plan (as defined in section 414(i)) the plan repayment provision described in this subparagraph may provide that the employee must repay the full amount of the distribution before the close of the vesting computation period within which the participant has a one-year break in service within the meaning of section 411(a)(6)(C) and § 1.411(a)–6, or in the case of a plan utilizing the elapsed time method described in Department of Labor regulations, before the end of a 12-consecutive month period beginning on the severance from service date or any anniversary thereof and ending on the next succeeding anniversary of such date during which the employee does not complete any hours of service within the meaning of 29 CFR Part 2530.200b–2(a) for the employer or employers maintaining the plan.

(D) A defined contribution plan or a defined benefit plan may require that such repayment be made by the employee not later than the earlier of (*1*) the end of the 2-year period beginning with the employee's resumption of employment covered by the plan, (2) the end of the 5-year period beginning with the date of withdrawal, or (3) in the case of a defined contribution plan, the time described in (C) of this subdivision.

(E) A plan using the break in service rule described in section 410(a)(5)(D) for determining employees' accrued benefits is not required to provide for repayment by an employee whose accrued benefit is disregarded by reason of that rule.

(iii) *Computation of benefit.* In the case of a defined contribution plan, the employer-derived accrued benefit required to be restored by this subparagraph shall not be less than the amount in the account balance of the employee which was forfeited, unadjusted by any subsequent gains or losses.

(iv) *Delayed forfeiture.* A defined contribution plan may, in lieu of the forfeiture and restoration described in this subparagraph, provide that the forfeiture does not occur until the expiration of the time for repayment described in subdivision (ii) of this subparagraph provided that the conditions of this subparagraph are satisfied.

(3) *Withdrawal of mandatory contributions; accruals before September 2, 1974*—(i) *General rule.* In the case of a participant's right to the portion of the employer-derived benefit which accrued prior to September 2, 1974, a right is not treated as forfeitable merely because all or part of such portion may be forfeited on account of the withdrawal by the participant of an amount attributable to his benefit derived from mandatory contributions (within the meaning of section 411(c)(2)(C) and § 1.411(c)–1(c)(4)) made by the participant before September 2, 1974, if the amount so subject to forfeiture is no more than proportional to such amounts withdrawn. This subparagraph shall not apply to any plan to which any mandatory contribution (within the meaning of section 411(c)(2)(C) and § 1.411(c)–1(c)(4)) is made after September 2, 1974.

(ii) *Defined contribution plan.* In the case of a defined contribution plan, the portion of a participant's employer-derived benefit which accrued prior to September 2, 1974, shall be determined on the basis of a separate accounting between benefits accruing before and after such date. Gains, losses, withdrawals, forfeitures, and other credits or charges must be separately allocated to such benefits. Any allocation made on a reasonable and consistent basis prior to September 1, 1977, shall satisfy the requirements of this subdivision.

(iii) *Defined benefit plan.* In the case of a defined benefit plan, the portion of a participant's employer-derived benefit which accrued prior to September 2, 1974, shall be determined in a manner consistent with the determination of an accrued benefit under section 411(b)(1)(D) (see § 1.411(b)–1(c)). Any method of determining such accrued benefit which the Commissioner finds to be reasonable shall satisfy the requirements of this subdivision.

(4) *Certain cash-outs of accrued benefits*—(i) *Involuntary cash-outs.* For

V 42163 AUG 23 77 UM

purposes of determining an employee's right to an accrued benefit derived from employer contributions under a plan, the plan may disregard service performed by the employee with respect to which—

(A) The employee receives a distribution of the present value of his entire nonforfeitable benefit at the time of the distribution,

(B) The portion of such distribution which is attributable to the present value of the employer-derived accrued benefit is not in excess of $1,750.

(C) The distribution is made due to the termination of the employee's participation in the plan, and

(D) The plan has a repayment provision which satisfies the requirements of subdivision (iv) of this subparagraph in effect at the time of the distribution.

A distribution shall be deemed to be made due to the termination of an employee's participation in the plan if it is made no later than the close of the second plan year following the plan year in which such termination occurs. For purposes of determining the entire nonforfeitable benefit, the plan may disregard service after the distribution, as illustrated in subparagraph (2)(i) of this paragraph.

(ii) *Voluntary cash-outs.* For purposes of determining an employee's accrued benefit derived from employer contributions under a plan, the plan may disregard service performed by the employee with respect to which—

(A) The employee receives a distribution of the present value of his nonforfeitable benefit attributable to such service at the time of such distribution,

(B) The employee voluntarily elects to receive such distribution,

(C) The distribution is made on termination of the employee's participation in the plan, and

(D) The plan has a repayment provision in effect at the time of the distribution which satisfies the requirements of subdivision (iv) of this subparagraph.

A distribution shall be deemed to be made on termination of participation in the plan if it is made not later than the close of the second plan year following the plan year in which such termination occurs. For purposes of determining the nonforfeitable benefit, the plan may disregard service after the distribution as illustrated in subparagraph (2)(i) of this subparagraph.

(iii) *Disregard of service.* Service of an employee permitted to be disregarded under subdivision (i) or (ii) of this subparagraph is not required to be taken into account in computing the employee's accrued benefit under the plan. In the case of a voluntary distribution described in subdivision (ii) of this subparagraph which is less than the present value of the employee's total nonforfeitable benefit immediately prior to the distribution, the accrued benefit not required to be taken into account is such total accrued benefit multiplied by a fraction, the numerator of which is the amount of the distribution and the denominator of which is the present value of his total nonforfeitable benefit immediately prior to such distribution. For example, A who is 50 percent vested in an account balance of $1,000 receives a voluntary distribution of $250. The accrued benefit which can be disregarded equals $1,000 times $250/$500, or $500. However, such service may not by reason of this paragraph be disregarded for purposes of determining an employee's years of service under sections 410(a)(3) and 411(a)(4).

(iv) *Plan repayment provision.* (A) A plan repayment provision satisfies the requirements of this subdivision if, under the provision, the accrued benefit of an employee which is disregarded by a plan under subdivision (i) or (ii) of this subparagraph is restored upon repayment to the plan by the employee of the full amount of the distribution. A plan is not required to provide for such repayment unless the employee—

(*1*) Received a distribution which is in a plan year to which section 411 applies (see § 1.411(a)–2), which distribution is less than the present value of his accrued benefit, and

(2) Resumes employment covered under the plan.

For purposes of (*1*) of this subdivision (iv)(A), an employee receives a distribution which is less than the present value of his accrued benefit if any portion of such benefit is forfeitable at the time of such distribution.

(B) A plan may impose the same conditions on repayments for the restoration of employer-derived accrued benefits that are allowed as conditions for restoration of employer-derived accrued benefits upon repayment of mandatory contributions under subparagraph (2)(ii)(B), (C), (D) and (E) of this paragraph.

(v) In the case of a defined contribution plan, the employer-derived accrued benefit required to be restored by this subparagraph shall not be less than the amount in the account balance of the employee, both the amount distributed and the amount forfeited, unadjusted by any subsequent gains or losses. Thus, for example, if an employee received a distribution of $250 when he was 25 percent vested in an account balance of $1,000, upon repayment of $250 the account balance may not be less than $1,000 even if, because of plan losses, the account balance, if not distributed, would have been reduced to $500.

(5) *Vesting requirement for defined contribution plans*—(i) *Application.* The requirements of this subparagraph apply to a defined contribution plan which makes distributions to employees from their accounts attributable to employer contributions at a time when—

(A) Employees are less than 100 percent vested in such accounts, and

(B) Under the plan, employees can increase their percentage of vesting in such accounts after the distributions.

(ii) *Requirements.* In order for a plan, to which this subparagraph applies, to satisfy the vesting requirements of section 411, account balances under the plan (with respect to which percentage vesting can increase) must be computed in a manner which satisfies either subdivision (iii)(A) or (B) of this subparagraph.

(iii) *Permissible methods.* A plan may provide for either of the following methods, but not both, for computing account balances with respect to which percentage vesting can increase and from which distributions are made:

(A)(*1*) A separate account is established for the employee's interest in the plan as of the time of the distribution, and

(2) At any relevant time the employee's vested portion of the separate account is not less than an amount ("X") determined by the formula: $X=P(AB+(R\times D))-(R\times D)$. For purposes of applying the formula: P is the vested percentage at the relevant time; AB is the account balance at the relevant time; D is the amount of the distribution; R is the ratio of the account balance at the relevant time to the account balance after distribution; and the relevant time is the time at which, under the plan, the vested percentage in the account cannot increase.

A plan is not required to provide for separate accounts provided that account balances are maintained under a method that has the same effect as under this subdivision.

(B) At any relevant time the employee's vested portion is not less than an amount ("X") determined by the formula: $X=P(AB+D)-D$. For purposes of applying the formula, the terms have the same meaning as under subdivision (iii)(A)(2) of this subparagraph.

(C) An application of the methods described in subdivisions (iii)(A) and (B) of this subparagraph is illustrated by the following examples:

Example (1). The X defined contribution plan uses the method described in subdivision (iii)(A) of this subparagraph for computing account balances and the break in service rule described in section 411(a)(6)(C) (service after a 1-year break does not increase the vesting percentage in account balances accrued prior to the break). The plan distributes $250 to A when A's account balance prior to the distribution equals $1,000 and he is 25 percent vested. At the time of the distribution, A has not incurred a 1-year break so that his vesting percentage can increase. Six years later, when A is 60 percent vested, he incurs a 1-year break so that his vesting percentage cannot increase. At this time his separate account balance equals $1,500. $R=\frac{\$1,500}{\$750}$ or 2. A's separate account must equal 60 percent ($1,500+(2\times\$250)$) $-(2\times\$250)$ or 60 percent ($1,500+$500)$-$500, or $1,200-$500 equals $700.

Example (2). The Y defined contribution plan uses the method described in subdivision (iii)(B) of this subparagraph for computing account balances and the break in service rule described in section 411(a)(6)(C). The plan distributes $250 to B when B's account balance prior to the distribution equals $1,000 and he is 25 percent vested. At the time of the distribution, B has not incurred a 1-year break so that his vesting percentage can increase. Six years later, when A is 60 percent vested, he incurs a 1-year break so that his vesting percentage cannot increase. At this time his account balance equals $1,500. B's separate account must equal 60 percent ($1,500+$250)$-$250, 60% of $1,750$-$250 equals $800.

(6) *Other rules*—(i) *Distributions on separation or other event.* None of the rules of this paragraph preclude distributions to employees upon separation from service or any other event recognized by the plan for commencing distributions. Such a distribution must, of course, satisfy the applicable qualification requirements pertaining to such distributions. For example, a profit-sharing plan could pay the vested portion of an account balance to an employee when he separated from service, but in order to satisfy section 411 the plan might not be able to forfeit the nonvested account balance until the employee has a 1-year break in service. Similarly, the fact that a plan cannot disregard an accrued benefit attributable to service for which an employee has received a distribution because the plan does not satisfy the cash-out requirements of subparagraph (4) of this paragraph does not mean that the employee's accrued benefit (computed by taking into account such service) cannot be offset by the accrued benefit attributable to the distribution.

(ii) *Joint and survivor requirements.* See § 1.401(a)–11(a)(2) (relating to joint and survivor annuities) for special rules applicable to certain distributions described in this paragraph.

(iii) *Plan repayments.* (A) Under subparagraphs (2) and (4) of this paragraph, a plan may be required to restore accrued benefits in the event of repayment by an employee.

(B) For purposes of applying the limitations of section 415(c) and (e), in the case of a defined contribution plan, the repayment by the employee and the restoration by the employer shall not be treated as annual additions.

(C) In the case of a defined contribution plan, the permissible sources for restoration of the accrued benefit are: income or gain to the plan, forfeitures, or employer contributions. Notwithstanding the provisions of § 1.401–1(b)(1)(ii), contributions may be made for such an accrued benefit by a profit-sharing plan even though there are no profits. In order for such a plan to be qualified, account balances (accrued benefits) generally must correspond to assets in the plan. Accordingly, there cannot be an unfunded account balance. However, an account balance will not be deemed to be unfunded in the case of a restoration if assets for the restored benefit are provided by the end of the plan year following the plan year in which the repayment occurs.

§ 1.411(a)–8 Changes in vesting schedule.

(a) *Requirement of prior schedule.* Under section 411(a)(10)(A), for plan years for which section 411 applies, a plan will be treated as not meeting the minimum vesting standards of section 411(a)(2) if the plan does not satisfy the requirements of this paragraph. If the vesting schedule of a plan is amended, then as of the date such amendment is adopted, the plan satisfies the requirements of this paragraph if, under the plan as amended, in the case of an employee who is a participant on—

(1) The date the amendment is adopted, or

(2) The date the amendment is effective, if later

The nonforfeitable percentage (determined as of such date) of such employee's right to his employer-derived accrued benefit is not less than his percentage computed under the plan without regard to such amendment.

(b) *Election of former schedule*—(1) *In general.* Under section 411(a)(10)(B), for plan years for which section 411 applies, if the vesting schedule of a plan is amended, the plan will not be treated as meeting the minimum vesting standards of section 411(a)(2) unless the plan as amended, provides that each participant whose nonforfeitable percentage of his accrued benefit derived from employer contributions is determined under such schedule, and who has completed at least 5 years of service with the employer, may elect, during the election period, to have the nonforfeitable percentage of his accrued benefit derived from employer contributions determined without regard to such amendment. Notwithstanding the preceding sentence, no election need be provided for any participant whose nonforfeitable percentage under the plan, as amended, at any time cannot be less than such percentage determined without regard to such amendment.

(2) *Election period.* For purposes of subparagraph (1) of this paragraph, the election period under the plan must begin no later than the date the plan amendment is adopted and end no earlier than the latest of the following dates:

(i) The date which is 60 days after the day the plan amendment is adopted,

(ii) The date which is 60 days after the day the plan amendment becomes effective, or

(iii) The date which is 60 days after the day the participant is issued written notice of the plan amendment by the employer or plan administrator.

(3) *Service requirement.* For purposes of subparagraph (1) of this paragraph, a participant shall be considered to have completed 5 years of service if such participant has completed 5 years of service, whether or not consecutive, without regard to the exceptions of section 411(a)(4) prior to the expiration of the election period described in subparagraph (2) of this paragraph. For the meaning of the term "year of service", see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(4) *Election only by participant.* The election described in subparagraph (1) of this paragraph is available only to an individual who is a participant in the plan at the time such election is made.

(5) *Election may be irrevocable.* A plan, as amended, shall not fail to meet the minimum vesting standards of section 411(a)(2) by reason of section 411(a)(10)(B) merely because such plan provides that the election described in subparagraph (1) of this paragraph is irrevocable.

(6) *Relationship with section 411(a)(2).* The election described in subparagraph (1) of this paragraph is available for a vesting schedule which does not satisfy the requirements of section 411(a)(2) only if under such schedule all participants have a 50 percent nonforfeitable right after 10 years of service, and a 100 percent nonforfeitable right after 15 years of service, in their employer-derived accrued benefit. If the vesting schedule provides less vesting than the percentages required by the preceding sentence, the plan can be amended to provide for such vesting.

(c) *Special rules*—(1) *Amendment of vesting schedule.* For purposes of this section, an amendment of a vesting schedule is each plan amendment which directly or indirectly affects the computation of the nonforfeitable percentage of employees' rights to employer-derived accrued benefits. Consequently, such an amendment, for example, includes each change in the plan which affects either the plan's computation of years of service or of vesting percentages for years of service.

(2) *Aggregation of amendments.* All plan amendments which are: (i) amendments of a vesting schedule within the meaning of subparagraph (1) of this paragraph and (ii) adopted and effective at the same time, shall be deemed to be a single amendment for purposes of applying the rules in paragraphs (a) and (b) of this section.

§ 1.411(a)–9 Amendment of break in service rules; transitional period.

(a) *In general.* Under section 1017(f)(2) of the Employee Retirement Income Security Act of 1974, a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if the rules of the plan relating to breaks in service are amended, and—

(1) Such amendment is effective after January 1, 1974, and before the effective date of section 411, and

(2) Under such amendment, the nonforfeitable percentage of any employee's right to his employer-derived accrued benefit is less than the lesser of the nonforfeitable percentage of such employee's right to such benefit—

(i) Under the break in service rules provided by section 411(a)(6) and § 1.411(a)–6(c), or

(ii) The greatest such percentage under the plan as in effect on or after January 1, 1974 (provided the break in service rules of the plan were not in violation of any law or rule of law on January 1, 1974).

(b) *Break in service rules.* For purposes of paragraph (a), the term "break in service rules" means the rules provided by a plan relating to circumstances under which a period of an employee's service or plan participation is disregarded, for purposes of determining the extent to which his rights to his accrued benefit under the plan are unconditional, if under such rules such

V 42163 AUG 23 77 UM

service is disregarded by reason of the employee's failure to complete a required period of service within a specified period of time. For this purpose, plan rules which result in the loss of prior vesting or benefit accruals of an employee, or which deny an employee eligibility to participate, by reason of separation or failure to complete a required period of service within a specified period of time (e.g. 300 hours in one year) will be considered break in service rules. For purposes of section 11(b)(3), service described under the plan's break in service rules, as in effect before the effective date of section 411, need not be counted.

9. Section 1.411(b)-1 is added to read as follows:

§ 1.411(b)-1 Accrued benefit requirements.

(a) *Accrued benefit requirements*—(1) *In general.* Under section 411(b), for plan years beginning after the applicable effective date of section 411, rules are provided for the determination of the accrued benefit to which a participant is entitled under a plan. Under a defined contribution plan, a participant's accrued benefit is the balance to the credit of the participant's account. Under a defined benefit plan, a participant's accrued benefit is his accrued benefit determined under the plan. A defined benefit plan is not a qualified plan unless the method provided by the plan for determining accrued benefits satisfies at least one of the alternative methods (described in paragraph (b) of this section) for determining accrued benefits with respect to all active participants under the plan. A defined benefit plan may provide that accrued benefits for participants are determined under more than one plan formula. In such a case, the accrued benefits under all such formulas must be aggregated in order to determine whether or not the accrued benefits under the plan for participants satisfy one of the alternative methods. A plan may satisfy different methods with respect to different classifications of employees, or separately satisfy one method with respect to the accrued benefits for each such classification, provided that such classifications are not so structured as to evade the accrued benefit requirements of section 411(b) and this section. (For example, if a plan provides that employees who commence participation at or before age 40 accrue benefits in a manner which satisfies the 133⅓ percent method of determining accrued benefits and employees who commence participation after age 40 accrue benefits in a manner which satisfies the 3 percent method of determining accrued benefits, the plan would be so structured as to evade the requirements of section 411(b).) A defined benefit plan does not satisfy the requirements of section 411(b) and this section merely because the accrued benefit is defined as the "reserve under the plan". Special rules are provided for the first two years of service by a participant, certain insured defined benefit plans, and certain reductions in accrued benefits due to increasing age or service. In addition, a special rule is provided with respect to accruals for service before the effective date of section 411.

(vii) *Accruals decreased by increasing age or service.* For special rules relating to prohibition of decrease in accrued benefit on account of increasing age or service, see paragraph (d)(3) of this section.

(viii) *Separate accounting.* For rules relating to requirements for separate accounting, see paragraph (e) of this section.

(ix) *Year of participation.* For definition of "year of participation", see paragraph (f) of this section.

(b) *Defined benefit plans.* A defined benefit plan satisfies the requirements of section 411(b)(1) and this paragraph for a plan year to which section 411 and this section apply if it satisfies the requirements of subparagraph (1), (2), or (3) of this paragraph for such year.

(1) *3 percent method*—(i) *General rule.* A defined benefit plan satisfies the requirements of this paragraph for a plan year if, as of the close of the plan year, the accrued benefit to which each participant is entitled, computed as if the participant separated from the service as of the close of such plan year, is not less than 3 percent of the 3 percent method benefit, multiplied by the number of years (not in excess of 33⅓) of his participation in the plan including years after his normal retirement age. For purposes of this subparagraph, the "3 percent method benefit" is the normal retirement benefit to which the participant would be entitled if he commenced participation at the earliest possible entry age for any individual who is or could be a participant under the plan and if he served continuously until the earlier of age 65 or the normal retirement age under the plan.

(ii) *Special rules*—(A) *Compensation.* In the case of a plan providing a retirement benefit based upon compensation during any period, the normal retirement benefit to which a participant would be entitled is determined as if he continued to earn annually the average rate of compensation which he earned during consecutive years of service, not in excess of 10, for which his compensation was the highest. For purposes of this subdivision (A), the number of consecutive years of service used in computing average compensation shall be the number of years of service specified under the plan (not in excess of 10) for computing normal retirement benefits.

(B) *Social security, etc.* For purposes of this subparagraph, for any plan year, social security benefits and all relevant factors used to compute benefits, *e.g.*, consumer price index, are treated as remaining constant as of the beginning of the current plan year for all subsequent plan years.

(C) *Computation in certain cases.* In the case of any plan to which the provisions of section 411(b)(1)(D) and paragraph (c) of this section are applicable, for any plan year the accrued benefit of any participant shall not be less than the accrued benefit otherwise determined under this subparagraph, reduced by the excess of the accrued benefit determined under this subparagraph as of the first day of the first plan year to which section 411 applies over the accrued benefit determined under section 411(b)(1)(D) and paragraph (c) of this section and increased by the amount determined under paragraph (c)(2)(v) of this section.

(iii) *Examples.* The application of this subparagraph is illustrated by the following examples.

Example (1). The M Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 or $4 per month for each year of participation. As a condition of participation, the plan requires that an employee have attained age 25. The normal retirement age specified under the plan is age 65. The plan provides for no limit on the number of years of credited service. A, age 40, is a participant in the M Corporation's plan.

A has completed 12 years of participation in the plan of the M Corporation as of the close of the plan year. Under subdivision (i) of this subparagraph, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit of $1,920 [40×(12×$4)]. Under paragraph (b)(1)(i) of this section, the plan does not satisfy the requirements of this subparagraph unless A has accrued an annual benefit of at least $691 [0.03×($1,920×12)] as of the close of the plan year. Under the M Corporation plan, A is entitled to an accrued benefit of $576 [(12×12)×$4] as of the close of the plan year. Thus, with respect to A, the accrued benefit provided under the M Corporation plan does not satisfy the requirements of this subparagraph.

Example (2). Assume the same facts as in example (1) except that the M Corporation's plan provides that only the first 30 years of participation are taken into account. Under subdivision (i) of this subparagraph, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) and served continuously until normal retirement age (65) is an annual benefit of $1,440 [30×$48]. Under paragraph (b)(1)(i) of this section, the plan does not satisfy the requirements of this subparagraph unless A has accrued an annual benefit of at least $518 [0.03×($1,440×12)] as of the close of the plan year. Under the M Corporation plan, A is entitled to an accrued benefit of $576 [12×$48]. Thus, with respect to A, the accrued benefit provided under the M Corporation plan satisfies the requirements of this subparagraph.

Example (3). The N Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 of 50 percent of average compensation for the highest 3 consecutive years of compensation for an employee with 25 years of participation. A participant who separates from service before age 65 is entitled to 2 percent of average compensation for the highest 3 consecutive years of compensation for each year of participation not in excess of 25. The plan has no minimum age or service requirement for participation. The normal retirement age specified under the plan is age 65. On December 31, 1990, B, age 40, is a participant in the N Corporation's plan. B began employment with the N Corporation and became a participant in the N Corporation's plan on January 1, 1980. Under this subparagraph, the normal retirement benefit to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is 50 percent of average compensation for the highest 3 consecutive years of compensation per year commencing at age 65. Under this subparagraph, B must have accrued an annual benefit of at least 16.5 percent of his highest 3 consecutive years of compensation per year commencing at age 65 [0.03×50 percent of average compensation for the highest 3 consecutive years of compensation × 11] as of the close of the plan year. Under the N Corporation plan, B has accrued an annual benefit of 22 percent of average compensation for his highest 3 consecutive years of compensation per year commencing at age 65. Thus, with respect to B, the accrued benefit under the N Corporation plan satisfies the requirements of this subparagraph.

Example (4). The P Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 of 50 percent of average compensation for the 3 consecutive years of compensation from the P Corporation next preceding normal retirement age. The plan has no minimum age or service requirement for participation. The normal retirement age under the plan is age 65. On December 31, 1990, C, age 55, separates from service with the P Corporation. C began employment with the P Corporation and became a participant in the P Corporation's plan on January 1, 1980. As of December 31, 1990, C's average compensation for the 3 consecutive years preceding his separation from service is $15,000. Under this subparagraph, the normal retirement benefit to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is an annual benefit of 50 percent of average compensation for the 3 consecutive years of compensation from the P corporation next preceding normal retirement age commencing at age 65. C must have accrued an annual benefit of at least $2,475 commencing at age 65 [0.03×(0.50×$15,000)×11] as of his separation from the service with the P Corporation in order for the P Corporation's plan to satisfy the requirements of this subparagraph with respect to C.

Example (5). On December 31, 1985, the R Corporation's defined benefit plan provided an annual retirement benefit commencing at age 65 of $100 for each year of participation, not to exceed 30. As a condition of participation, the plan requires that an employee have attained age 25. The normal retirement age specified under the plan is age 65. The appropriate computation period is the calendar year. On January 1, 1986, the plan is amended to provide an annual retirement benefit commencing at age 65 of $200 for each year of participation (before and after the amendment), not to exceed 30. B, age 40, is a participant in the R Corporation's plan. B has completed 15 years of participation in the plan of the R Corporation as of December 31, 1990. Under paragraph (b)(1)(i) of this section, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit of $6,000 [30×200]. Under subdivision (i) of this subparagraph, the plan does not satisfy the requirements of this subparagraph unless B has accrued an annual benefit of at least $2,700 [0.03×$6,000×15] as of December 31, 1990. Under the R Corporation plan, B is entitled to an accrued benefit of $3,000 [$200×15] as of December 31, 1990. Thus, with respect to B, the accrued benefit provided under the R Corporation plan satisfies the requirements of this subparagraph.

Example (6). On December 31, 1995, the J Corporation's defined benefit plan provided an annual retirement benefit commencing at age 65 of $4,800 after 30 years of participation. The normal retirement age specified under the plan is age 65. The appropriate computation period is the calendar year. On January 1, 1996, the plan is amended to provide an annual retirement benefit commencing at age 65 of $6,000. A, age 40, is a participant in the J Corporation's plan since its adoption on January 1, 1986. Under paragraph (b)(1)(i) of this section, on December 31, 1995, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is an annual benefit of $4,800. Under paragraph (b)(1)(i) of this section, on January 1, 1996, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is an annual benefit of $6,000. Under subdivision (i) of this subparagraph, the plan does not satisfy the requirements of this subparagraph unless A has an accrued benefit on December 31, 1995 of at least $1,440 [$4,800 × 0.03 × 10] and an accrued benefit on January 1, 1996 of at least $1,800 [$6,000 × 0.03 × 10].

Example (7). The X Company's defined benefit plan provides an annual retirement benefit commencing at age 65 of $4 per month for each year of participation (not to exceed 30). As a condition of participation, the plan requires that an employee have attained age 25. The normal retirement age specified under the plan is age 65. D, age 68, is a participant in the X Company's plan. D has completed 20 years of participation in the X Company plan as of the close of the plan year. Under paragraph (b)(1)(i) of this section, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit, commencing at age 65, of $1,440 [30 × $48]. Under paragraph (b)(1)(i) of this section, the plan does not satisfy the requirements of this subparagraph unless D has accrued an annual benefit, commencing at age 65, of $864 [0.03 × $1,440 × 20] as of the close of the plan year. Under the X Company plan, D has accured an annual benefit, commencing at age 65, of $960 [20 × $48]. Thus, with respect to D the accrued benefit provided under the X Company plan satisfies the requirements of this subparagraph.

Example (8). Assume the same facts as in example (7) except that for purposes of determining accrued benefits under the plan the X Company's plan disregards all years of participation after normal retirement age. Under paragraph (b)(1)(i) of this section, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit of $1,440 [30 × $48]. Under paragraph (b)(1)(i) of this section the plan does not satisfy the requirements of this subparagraph unless D has accrued an annual benefit, commencing at age 65, of $864 [0.03 × $1.440 20] as of the close of the plan year. Under the X Company's plan, D has accrued an annual benefit commencing at age 65, of $816 [17 × $48]. Thus, with respect to D, the accrued benefit provided under the X Company plan does not satisfy the requirements of this subparagraph.

(2) *133⅓ percent rule*—(i) *General rule.* A defined benefit plan satisfies the requirements of this subparagraph for a particular plan year if—

(A) Under the plan the accrued benefit payable at the normal retirement age (determined under the plan) is equal to the normal retirement benefit (determined under the plan), and

(B) The annual rate at which any individual who is or could be a participant can accrue the retirement benefits payable at normal retirement age under the plan for any later plan year cannot be more than 133⅓ percent of the annual rate at which he can accrue benefits for any plan year beginning on or after such particular plan year and before such later plan year.

(ii) *Special rules.* For purposes of this subparagraph—

(A) *Plan amendments.* Any amendment to the plan which is in effect for the current plan year shall be treated as if it were in effect for all other plan years.

(B) *Change in accrual rate.* Any change in an accrual rate which change does not apply to any individual who is or could be a participant in the plan year is disregarded. Thus, for example, if for its plan year beginning January 1, 1980, a defined benefit plan provides an accrued benefit in plan year 1980 of 2 percent of a participant's average compensation for his highest 3 years of compensation for each year of service and provides that in plan year 1981 the accrued benefit will be 3 percent of such average compensation, the plan will not be treated as failing to satisfy the requirements of this subparagraph for plan year 1980 because in plan year 1980 the change in the accrual rate does not apply to any individual who is or could be a

participant in plan year 1980. However, if, for example, a defined benefit plan provided for an accrued benefit of 1 percent of a participant's average compensation for his highest 3 years of compensation for each of the first 10 years of service and 1.5 percent of such average compensation for each year of service thereafter, the plan will be treated as failing to satisfy the requirements of this subparagraph for the plan year even though no participant is actually accruing at the 1.5 percent rate because an individual who could be a participant and who had over 10 years of service would accrue at the 1.5 percent rate, which rate exceeds 133⅓ percent of the 1 percent rate.

(C) *Early retirement benefits.* The fact that certain benefits under the plan may be payable to certain participants before normal retirement age is disregarded. Thus, the requirements of subdivision (i) of this subparagraph must be satisfied without regard to any benefit payable prior to the normal retirement benefit (such as an early retirement benefit which is not the normal retirement benefit (see § 1.411(a)–7(c)).

(D) *Social security, etc.* For purposes of this paragraph, for any plan year, social security benefits and all relevant factors used to compute benefits, *e.g.*, consumer price index, are treated as remaining constant as of the beginning of the current plan year for all subsequent plan years.

(E) *Postponed retirement.* A plan shall not be treated as failing to satisfy the requirements of this subparagraph for a plan year merely because no benefits under the plan accrue to a participant who continues service with the employer after such participant has attained normal retirement age.

(F) *Computation of benefit.* A plan shall not satisfy the requirements of this subparagraph if the base for the computation of retirement benefits changes solely by reason of an increase in the number of years of participation. Thus, for example, a plan will not satisfy the requirements of this subparagraph if it provides a benefit, commencing at normal retirement age, of the sum of (*1*) 1 percent of average compensation for a participant's first 3 years of participation multiplied by his first 10 years of participation (or, if less than 10 his total years of partcipation) and (2) 1 percent of average compensation for a participant's 3 highest years of participation multiplied by each year of participation subsequent to the 10th year.

(iii) *Examples.* The application of this subparagraph is illustrated by the following examples:

Example (1). On January 1, 1980, the R Corporation's defined benefit plan provides for an annual benefit (commencing at age 65) of a percentage of a participant's average compensation for the period of 5 consecutive years of participation for which his compensation is the highest. The percentage is 2 percent for each of the first 20 years of participation and 1 percent per year thereafter. The appropriate computation period is the calendar year. The R Corporation's plan satisfies the requirements of this subparagraph because the 133⅓ percent rule does not restrict subsequent accrual rate decreases.

Example (2). On January 1, 1980, the J Corporation's defined benefit plan provides for an annual benefit (commencing at age 65) of a percentage of a participant's average compensation for the period of his final 5 consecutive years of participation. The percentage is 1 percent for each of the first 5 years of participation; 1½ percent for each of the next 5 years of participation; and 1⅞ percent for each year thereafter. The appropriate computation period is the calendar year. Even though no single accrual rate under the J Corporation's plan exceeds 133⅓ percent of the immediately preceding accrual rate, the J Corporation's plan does not satisfy the requirements of this subparagraph because the rate of accrual for all years of participation in excess of 10 (1⅞ percent) exceeds 133⅓ percent of the rate of accrual for any of the first 5 years of participation (1 percent).

Example (3). On January 1, 1980, the C Corporation's defined benefit plan provides for an annual benefit (commencing at age 65) of a percentage of a participant's average compensation for the period of 3 consecutive years of participation for which his compensation is the highest. The percentage is 2 percent for each of the first 5 years of participation; 1 percent for each of the next 5 years of participation; and 1½ percent for each year thereafter. The appropriate computation period is the calendar year. Even though the average rate of accrual under the C Corporation's plan is not less rapidly than ratably, the C Corporation's plan does not satisfy the requirements of this subparagraph because the rate of accrual for all years of participation in excess of 10 (1½ percent) for any employee who is actually accruing benefits or who could accrue benefits exceeds 133⅓ percent of the rate of accrual for the sixth through tenth years of participation, respectively (1 percent).

(3) *Fractional rule—*(i) *In general.* A defined benefit plan satisfies the requirements of this paragraph if the accrued benefit to which any participant is entitled is not less than the fractional rule benefit multiplied by a fraction (not exceeding 1)—

(A) The numerator of which is his total number of years of participation in the plan, and

(B) The denominator of which is the total number of years he would have participated in the plan if he separated from the service at the normal retirement age under the plan.

(ii) *Special rules.* For purposes of this subparagraph—

(A) *Fractional rule benefit.* The "fractional rule benefit" is the annual benefit commencing at the normal retirement age under the plan to which a participant would be entitled if he continued to earn annually until such normal retirement age the same rate of compensation upon which his normal retirement benefit would be computed. Such rate of compensation shall be computed on the basis of compensation taken into account under the plan (but taking into account average compensation for no more than the 10 years of service immediately preceding the determination). For purposes of this subdivision (A), the normal retirement benefit shall be determined as if the participant had attained normal retirement age on the date any such determination is made.

(B) *Social security, etc.* For purposes of this subparagraph, for any plan year, social security benefits and all relevant factors used to compute benefits, *e.g.*, consumer price index, are treated as remaining constant as of the beginning of the current plan year for all subsequent plan years.

(C) *Postponed retirement.* A plan shall not be treated as failing to satisfy the requirements of this subparagraph merely because no benefits under the plan accrue to a participant who continues service with the employer after such participant has attained normal retirement age under the plan.

(D) *Computation in certain cases.* In the case of any plan to which the provisions of section 411(b)(1)(D) and paragraph (c) of this section are applicable, for any plan year the accrued benefit of any participant shall not be less than the accrued benefit otherwise determined under this subparagraph, reduced by the excess of the accrued benefit determined under this subparagraph as of the first day of the first plan year to which section 411 applies over the accrued benefit determined under section 411(b)(1)(D) and paragraph (c) of this section and increased by the amount determined under paragrah (c)(2)(v) of this section.

(iii) *Examples.* The application of this subparagraph is illustrated by the following examples:

Example (1). The R Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 of 30 percent of a participant's average compensation for his highest 3 consecutive years of participation. If a participant separates from service prior to normal retirement age, the R Corporation's plan provides a benefit equal to an amount which bears the same ratio to 30 percent of such average compensation as the participant's actual number of years of participation in the plan bears to the number of years the participant would have participated in the plan had he separated from service at age 65. The plan further provides that normal retirement age is age 65. A, age 55, is a participant in the R Corporation's plan for the current year, and A has 15 years of participation in the R Corporation's plan. As of the current year, A's average compensation for his highest 3 years of compensation is $20,000. The R Corporation's plan satisfies the requirements of this subparagraph because if A separates from the service in the current year he will be entitled to an annual benefit of $3,600 commencing at age 65 [0.3×$20,000)×15/25].

Example (2). The J Corporation's defined benefit plan provides a normal retirement benefit of 1 percent per year of a participant's average compensation from the employer. In the case of a participant who separates from service prior to normal retirement age (65), the plan provides that the annual benefit is an amount which is equal to 1 percent of such compensation multiplied by the number of years of plan participation actually completed by the participant. The plan year of the J Corporation's plan is the calendar year. B, age 55, is a participant in the J Corporation's plan for the current year. B became a participant in the J Corporation's plan on January 1, 1980. As of December 31, 1990, B's compensation history is as follows:

Year	Compensation
1980	$17,000
1981	18,000
1982	20,000
1983	20,000
1984	21,000
1985	22,000
1986	23,000
1987	25,000
1988	26,000
1989	29,000
1990	32,000

If B separates from service on December 31, 1990, he would be entitled to an annual benefit of $2,530 commencing at age 65. Because the J Corporation's plan does not limit the number of years of compensation to be taken into account in determining the normal retirement benefit, B's rate of compensation for purposes of determining his normal retirement benefit is $23,600 [$18,000+$20,000+$20,000+$21,000+$22,000+$23,000+$25,000+$26,000+$29,000+$32,000]

10

Under this subparagraph, B's accrued benefit under the J Corporation's plan as of December 31, 1990 must be not less than $2,561 per year commencing at age 65 [0.0' × ($17,000 + $18,000 + $20,000 + $20,000 + $21,000 + $22,000 + $23,000 + $25,000 + $26,000 + $29,000 + $32,000 + ($23,600 × 10)) × 11/21]. Thus, the J Corporation's plan would not satisfy the requirements of this subparagraph.

(c) *Accruals for service before effective date—*(1) *General rule.* For a plan year to which section 411 applies, a defined benefit plan does not satisfy the requirements of section 411(b)(1) and this section unless, under the plan, the accrued benefit of each participant for plan years beginning before section 411 applies is not less than the greater of—

(i) Such participant's accrued benefit (as of the day before section 411 applies) determined under the plan as in effect from time to time prior to September 2, 1974 (without regard to any amendment adopted after such date), or

(ii) One-half of the accrued benefit that would be determined with respect to the participant as of the day before section 411 applies if the participant's accrued benefit were computed for such prior plan years under a method which satisfies the requirements of section 411(b)(1)(A), (B), or (C) and paragraph (b)(1), (2), or (3) of this section. See 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans, for time participation deemed to begin.

(2) *Special rules—*(i) A plan shall not be deemed to fail to satisfy the requirements of section 411(b) and this section merely because the method for computing the accrued benefit of a participant for years of participation prior to the first plan year for which section 411 is effective with respect to the plan is not the same method for computing the accrued benefit of a participant for years of participation subsequent to such plan year.

(ii) For purposes of paragraph (c)(1)(ii) of this section, section 411(b)(1)(A) and paragraphs (b)(1) of this section shall be applied as if the participant separated from service with the employer on the day before the first day of the first plan year to which section 411 applies.

(iii) For purposes of paragraph (c)(1)(ii) of this section, section 411(b)(1)(B) and paragraph (b)(2) of this section shall be applied in the following manner:

(A) Except as provided in (c)(2)(iii)(B) of this section, section 411(b)(1)(B) and paragraph (b)(2) of this section shall be applied as if the participant separated from service with the employer on the day before the first day of the first plan year to which section 411 applies.

(B) In the case that the plan does not satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section at any time prior to the day specified in (c)(2)(iii)(A) of this section, the plan shall be deemed revised to the extent necessary to satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section for all plan years beginning before the applicable effective date of section 411 and this section. For purposes of the preceding sentence, a plan shall not be deemed revised to the extent necessary to satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section for a plan year if the benefit a participant would receive if he were employed until normal retirement age is reduced by such revision or if the revised rate of accrual with respect to such accrued benefit does not otherwise satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section.

(iv) For purposes of paragraph (c)(1)(ii) of this section, section 411(b)(1)(C) and paragraph (b)(3) of this section shall be applied as if the participant separated from service on the day before the first day of the first plan year to which section 411 applies.

(v) The excess of the accrued benefit payable at normal retirement age of any participant determined under section 411(b)(1)(A), (B), or (C) (without regard to section 411(b)(1)(D)), and paragraph (b)(1), (2), or (3) of this section (without regard to this paragraph) as of the day before the first day of the first plan year to which section 411 and this section applies over the accrued benefit determined under paragraph (c)(1) of this section shall be accrued in accordance with the provisions of the plan as in effect after the applicable effective date of section 411, as if the plan had been initially adopted on such effective date.

(d) *Special rules—*(1) *First 2 years of service.* Notwithstanding paragraphs (1), (2), and (3) of paragraph (b) of this section, under section 411(b)(1)(E) and this subparagraph, a plan shall not be treated as failing to satisfy the requirements of paragraph (b) of this section solely because the accrual of benefits under the plan does not become effective until the employee has completed 2 continuous years of service. For purposes of this subparagraph, continuous years of service are years of service (within the meaning of section 410(a)(3)(A)) which are not separated by a break in service (within the meaning of section 410(a)(5)). For years of service beginning after such 2 years of service, the accrued benefit of an employee shall not be less than that to which the employee would be entitled if section 411(b)(1)(E) and this subparagraph did not apply. Thus, for example, a plan which otherwise satisfies the requirements of paragraph (b)(2) of this section provides for a rate of accrual of 1 percent of average compensation for the highest 3 years of compensation beginning with the third year of service of a participant shall not be treated as satisfying paragraph (b)(2) of this section because as of the time the employee completes 3 continuous years of service there is no accrual during the first 2 years of service. In addition, a plan which otherwise satisfies the requirements of paragraph (b)(1) of this section and which requires that an employee must attain age 25 and complete 1 year of service prior to becoming a participant will not satisfy the requirements of paragraph (b)(1) of this section if an employee who completes 2 years of service prior to attaining age 25 does not begin accruals immediately upon commencement of participation in the plan. For rules relating to years of service, see 29 CFR part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans.

(2) *Certain insured defined benefit plans.* Notwithstanding paragraphs (b)(1), (2), and (3) of this section, a defined benefit plan satisfies the requirements of paragraph (b) of this section if such plan is funded exclusively by the purchase of contracts from a life insurance company and such contracts satisfy the requirements of sections 412(i)(2) and (3) and the regulations thereunder. The preceding sentence is applicable only if an employee's accrued benefit as of any applicable date is not less than the cash surrender value such employee's insurance contracts would have on such applicable date if the requirements of section 412(i)(4), (5), and (6) and the regulations thereunder were satisfied.

(3) *Accrued benefit may not decrease on account of increasing age or service.* Notwithstanding paragraphs (b)(1), (2), and (3) of this section and paragraphs (d)(1) and (2) of this section, a defined benefit plan shall be treated as not satisfying the requirements of paragraph (b) and (d) of this section if the participant's accrued benefit is reduced on account of any increase in his age or years of service. The preceding sentence shall not apply to social security supplements described in § 1.411(a)–7(c)(4).

(e) *Separate accounting.* A plan satisfies the requirements of this paragraph if the requirements of paragraph (e)(1) or (2) of this paragraph are met.

(1) *Defined benefit plan.* In the case of a defined benefit plan, the requirements of this paragraph are satisfied if the plan requires separate accounting for the portion of each employee's accrued benefit derived from any voluntary employee contributions permitted

V 42 163 AUG 23 77 UM

under the plan. For purposes of this subparagraph the term "voluntary employee contributions" means all employee contributions which are not mandatory contributions within the meaning of section 411(c)(2)(C) and the regulations thereunder. See § 1.411(c)-1(b)(1) for rules requiring the determination of such an accrued benefit by the use of a separate account.

(2) *Defined contribution plan.* In the case of a defined contribution plan, the requirements of this paragraph are not satisfied unless the plan requires separate accounting for each employee's accrued benefit. If a plan utilizes the break in service rule of section 411(a)(6)(C), an employee could have different percentages of vesting between pre-break and post-break accrued benefits. In such a case, the requirements of this paragraph are not satisfied unless the plan computes accrued benefits in a manner which takes into account different percentages. A plan which provides separate accounts for pre-break and post-break accrued benefits will be deemed to compute benefits in a reasonable manner.

(f) *Year of participation*—(1) *In general.* This paragraph is inapplicable to a defind contribution plan. For purposes of determining an employee's accrued benefit, a "year of participation" is a period of service determined under regulations prescribed by the Secretary of Labor in 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(2) *Additional rule relating to year of participation.* A trust shall not constitute a qualified trust if the plan of which such trust is a part provides for the crediting of a year of participation, or part thereof, and such credit results in the discrimination prohibited by section 401(a)(4).

(g) *Additional illustrations.* The application of this section may be illustrated by the following example:

Example. (i) The S Corporation established a defined benefit plan on January 1, 1980. The plan provides a minimum age for participation of age 25. The normal retirement age under the plan is age 65. The appropriate computation periods are the calendar year. The plan provides an annual benefit, commencing at age 65, equal to $96 per year of service for the first 25 years of service, and $48 per year of service for each additional year of service.

(ii) The plan of the S Corporation does not satisfy the requirements of section 411(b)(1)(A) and paragraph (b)(1) of this section because the accrued benefit under the plan at some point will be less than the accrued benefit required under section 411(b)(1)(A) and paragraph (b)(1) of this section (i.e., 3 percent × normal retirement benefit × years of participation).

(iii) The plan of the S Corporation does satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section because the rate of benefit accrual is equal in each of the first 25 years of service and the rate decreases thereafter.

(iv) The plan of the S Corporation does satisfy the requirements of section 411(b)(1)(C) and paragraph (b)(3) of this section because the accrued benefit under the plan will equal or exceed the normal retirement benefit multiplied by the fraction described in paragraph (b)(3)(i) of this section.

10. Section 1.411(c)-1 is amended to read as follows:

§ 1.411(c)-1 Allocation of accrued benefits between employer and employee contributions.

(a) *Accrued benefit derived from employer contributions.* For purposes of section 411 and the regulations thereunder, under section 411(c)(1), an employee's accrued benefit derived from employer contributions under a plan as of any applicable date is the excess, if any, of—

(1) The total accrued benefit under the plan provided for the employee as of such date, over

(2) The accrued benefit provided for the employee, derived from contributions made by the employee under the plan as of such date.

For computation of accrued benefit derived from employee contributions to a defined contribution plan or from voluntary employee contributions to a defined benefit plan, see paragraph (b) of this section. For computation of accrued benefit derived from mandatory employee contributions to a defined benefit plan, see paragraph (c) of this section.

(b) *Accrued benefit derived from employee contribution to defined contribution plan, etc.* For purposes of section 411 and the regulations thereunder, under section 411(c)(2)(A) the accrued benefit derived from employee contributions to a defined contribution plan is determined under paragraph (b)(1) or (2) of this section, whichever applies. Under section 411(d)(5), the accrued benefit derived from voluntary employee contributions to a defined benefit plan is determined under paragraph (b)(1) of this section.

(1) *Separate accounts maintained.* If a separate account is maintained with respect to an employee's contributions and all income, expenses, gains, and losses attributable thereto, the accrued benefit determined under this subparagraph as of any applicable date is the balance of such account as of such date.

(2) *Separate accounts not maintained.* If a separate account is not maintained with respect to an employee's contributions and the income, expenses, gains, and losses attributable thereto, the accrued benefit determined under this subparagraph is the employee's total accrued benefit determined under the plan multiplied by a fraction—

(i) The numerator of which is the total amount of the employee's contributions under the plan less withdrawals, and

(ii) The denominator of which is the sum of (A) the amount described in paragraph (b)(2)(i) of this section, and (B) the total contributions made under the plan by the employer on behalf of the employee less withdrawals.

For purposes of this subparagraph, contributions include all amounts which are contributed to the plan even if such amounts are used to provide ancillary benefits, such as incidental life insurance, health insurance, or death benefits, and withdrawals include only amounts distributed to the employee and do not reflect the cost of any death benefits under the plan.

(c) *Accrued benefit derived from mandatory employee contributions to a defined benefit plan*—(1) *General rule.* In the case of a defined benefit plan (as defined in section 414(j)) the accrued benefit derived from contributions made by an employee under the plan as of any applicable date is an annual benefit, in the form of a single life annuity (without ancillary benefits) commencing at normal retirement age, equal to the amount of the employee's accumulated contributions (determined under paragraph (c)(3) of this section) multiplied by the appropriate conversion factor (determined under paragraph (c)(2) of this section). Paragraph (e) of this section provides rules for actuarial adjustments where the benefit is to be determined in a form other than the form described in this paragraph.

(2) *Appropriate conversion factor.* For purposes of this paragraph, the term "appropriate conversion factor" means the factor necessary to convert an amount equal to the accumulated contributions to a single life annuity (without ancillary benefits) commencing at normal retirement age and shall be 10 percent for a normal retirement age of 65 years. For other normal retirement ages the appropriate conversion factor shall be the factor as determined by the Commissioner.

(3) *Accumulated contributions.* For purposes of section 411(c) and this section, the term "accumulated contributions" means the total of—

(i) All mandatory contributions made by the employee (determined under paragraph (c)(4) of this section),

(ii) Interest (if any) on such contributions, computed at the rate provided by the plan to the end of the last plan year to which section 411(a)(2) does not apply (by reason of the applicable effective date), and

(iii) Interest on the sum of the amounts determined under paragraphs (c)(3)(i) and (ii) of this section compounded annually at the rate of 5 percent per annum from the beginning of the first plan year to which section 411(a)(2) applies (by reason of the applicable effective date) to the date on which the employee would attain normal retirement age.

For example, if under section 1017 of the Employee Retirement Income Security Act of 1974, section 411(a)(2) of the Code applies for plan years beginning after December 31, 1975, and for plan years beginning before 1975, the plan provided for 3 percent interest on employee contributions, an employee's accumulated contributions would be computed by crediting interest at the rate provided by the plan (3 percent) for plan years beginning before 1976 and by crediting interest at the rate of 5 percent (or another rate prescribed under section 411(c)(2)(D)) thereafter. Section 1017 of the Employee Retirement Income Security Act of 1974 and § 1.411(a)-2 provide the effective dates for the application of section 411(a)(2).

(4) *Mandatory contributions.* For purposes of section 411(c) and this section the term "mandatory contributions" means amounts contributed to the plan by the employee which are required as a condition of his employment, as a condition of his participation in the plan, or as a condition of obtaining benefits (or additional benefits) under the plan attributable to employer contributions. For example, if the benefit derived from employer contributions depends upon a specified level of employee contributions, employee contributions up to that level would be treated as mandatory contributions. Mandatory contributions, otherwise satisfying the requirements of this subparagraph, include amounts contributed to the plan which are used to provide ancillary benefits such as incidental life insurance, health insurance, or death benefits.

(d) *Limitation on accrued benefit.* The accrued benefit derived from mandatory employee contributions under a defined benefit plan (determined under paragraph (c) of this section) shall not exceed the greater of—

(1) The accrued benefit of the employee under the plan, or

(2) The accrued benefit derived from employee contributions determined without regard to any interest under section 411(c)(2)(C) (ii) and (iii) and under paragraphs (c)(3) (ii) and (iii) of this section.

(e) *Actuarial adjustments for defined benefit plans*—(1) *Accrued benefit.* In the case of a defined benefit plan (as defined in section 414(j)) if an employee's accrued benefit is to be determined as an amount other than an annual benefit commencing at normal retirement age, such benefit (determined under section 411(c)(1) and paragraph (a) of this section) shall be the actuarial equivalent of such benefit, as determined by the Commissioner.

(2) *Accrued benefit derived from employee contributions.* In the case of a defined benefit plan (as defined in section 414(j)) if the accrued benefit derived from mandatory contributions made by an employee is to be determined with respect to a benefit other than an annual benefit in the form of a single life annuity (without ancillary benefits) commencing at normal retirement age, such benefit shall be the actuarial equivalent of such benefit (determined under section 411(c)(2)(B) and paragraph (c) of this section) as determined by the Commissioner.

(f) *Suspension of benefits, etc.*—(1) *Suspensions.* No adjustment to an accrued benefit is required on account of any suspension of benefits if such suspension is permitted under section 203(a)(3)(B) of the Employee Retirement Income Security Act of 1974 (88 Stat. 855) (Code section 411(a)(3)(B)).

(2) *Employment after retirement.* No actuarial adjustment to an accrued benefit is required on account of employment after normal retirement age. For example, if a plan with a normal retirement age of 65 provides a benefit of $400 a month payable at age 65, the same $400 benefit (with no upward adjustment) could be paid to an employee who retires at age 68.

11. Sections 1.411(d)-1 through 1.411(d)-3 are added to read as follows:

§ 1.411(d)-1 Coordination of vesting and discrimination requirements. [Reserved]

§ 1.411(d)-2 Termination or partial termination; discontinuance of contributions.

(a) *General rule*—(1) *Required nonforfeitability.* A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan provides that—

(i) Upon the termination or partial termination of the plan, or

(ii) In addition, in the case of a plan to which section 412 (relating to minimum funding standards) does not apply, upon the complete discontinuance of contributions under the plan,

the rights of each affected employee to benefits accrued to the date of such termination or partial termination (or, in the case of a plan to which section 412 does not apply, discontinuance), to the extent funded, or the rights of each employee to the amounts credited to his account at such time, are nonforfeitable (within the meaning of § 1.411(a)-4.

(2) *Required allocation.* (i) A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan provides for the allocation of any previously unallocated funds to the employees covered by the plan upon the termination or partial termination of the plan (or, in the case of a plan to which section 412 does not apply, upon the complete discontinuance of contributions under the plan). Such provision may be incorporated in the plan at its inception or by an amendment made prior to the termination or partial termination of the plan or the discontinuance of contributions thereunder. In the case of a defined contribution plan under which unallocated forfeitures are held in a suspense account in order to satisfy the requirements of section 415, this subdivision shall not require such plan to provide for allocations from the suspense account to the extent that such allocations would result in annual additions to participants' accounts in excess of amounts permitted under section 415 for the year for which such allocations would be made.

(ii) Any provision for the allocation of unallocated funds which is found by the Secretary of Labor or the Pension Benefit Guaranty Corporation (whichever is appropriate) to satisfy the requirements of section 4044 or section 403(d)(1) of the Employee Retirement Income Security Act of 1974 is acceptable if it specifies the method to be used and does not conflict with the provisions of section 401(a)(4) of the Internal Revenue Code of 1954 and the regulations thereunder. Any allocation of funds required by paragraph (1), (2), (3), or (4)(A) of section 4044(a) of such Act shall be deemed not to result in discrimination prohibited by section 401(a)(4) of the Code (see, however, paragraph (e) of this section). Notwithstanding the preceding sentence, in the case of a plan which establishes subclasses or categories pursuant to section 4044(b)(6) of such Act, the allocation of funds by the use of such subclasses or categories shall not be deemed not to result in discrimination prohibited by the Code. The allocation of unallocated funds may be in cash or in the form of other benefits provided under the plan. However, the allocation of the funds contributed by the employer among the employees need not necessarily benefit all the employees covered by the plan.

(iii) Paragraph (a)(2)(i) and (ii) of this section do not require the allocation of amounts to the account of any employee if such amounts are not required to be used to satisfy the liabilities with respect to employees and their beneficiaries under the plan (see section 401(a)(2)).

(b) *Partial Termination*—(1) *General rule.* Whether or not a partial termination of a qualified plan occurs (and the time of such event) shall be determined by the Commissioner with regard to all the facts and circumstances in a particular case. Such facts and circumstances include: the exclusion, by reason of a plan amendment or severance by the employer, of a group of employees who have previously been covered by the plan; and plan amendments which adversely affect the rights of employees to vest in benefits under the plan.

(2) *Special rule.* If a defined benefit plan ceases or decreases future benefit accruals under the plan, a partial termination shall be deemed to occur if, as a result of such cessation or decrease, a potential reversion to the employer, or employers, maintaining the plan (determined as of the date such cessation or decrease is adopted) is created or increased. If no such reversion is created or increased, a partial termination shall be deemed not to occur by reason of such cessation or decrease. However, the Commissioner may determine that a partial termination of such a plan occurs pursuant to subparagraph (1) of this paragraph for reasons other than such cessation or decrease.

(3) *Effect of partial termination.* If a termination of a qualified plan occurs, the provisions of section 411(d)(3) apply only to the part of the plan that is terminated.

(c) *Termination*—(1) *Application.* This paragraph applies to a plan other than a plan described in section 411(e)(1) (relating to governmental, certain church plans, etc.).

(2) *Plans subject to termination insurance.* For purposes of this section, a plan to which title IV of the Employee Retirement Income Security Act of 1974 applies is considered terminated on a particular date if, as of that date—

(i) The plan is voluntarily terminated by the plan administrator under section 4041 of the Employee Retirement Income Security Act of 1974, or

(ii) The Pension Benefit Guaranty Corporation terminates the plan under

V 42163 AUG 23 77 A UM V

section 4042 of the Employee Retirement Income Security Act of 1974.

For purposes of this subparagraph, the particular date of termination shall be the date of termination determined under section 4048 of such Act.

(3) *Other plans.* In the case of a plan not described in paragraph (c)(2) of this section, a plan is considered terminated on a particular date if, as of that date, the plan is voluntarily terminated by the employer, or employers, maintaining the plan.

(d) *Complete discontinuance*—(1) *General rule.* For purposes of this section, a complete discontinuance of contributions under the plan is contrasted with a suspension of contributions under the plan which is merely a temporary cessation of contributions by the employer. A complete discontinuance of contributions may occur although some amounts are contributed by the employer under the plan if such amounts are not substantial enough to reflect the intent on the part of the employer to continue to maintain the plan. The determination of whether a complete discontinuance of contributions under the plan has occurred will be made with regard to all the facts and circumstances in the particular case, and without regard to the amount of any contributions made under the plan by employees. Among the factors to be considered in determining whether a suspension constitutes a discontinuance are:

(i) Whether the employer may merely be calling an actual discontinuance of contributions a suspension of such contributions in order to avoid the requirement of full vesting as in the case of a discontinuance, or for any other reason;

(ii) Whether contributions are recurring and substantial; and

(iii) Whether there is any reasonable probability that the lack of contributions will continue indefinitely.

(2) *Time of discontinuance.* In any case in which a suspension of a profit-sharing plan maintained by a single employer is considered a discontinuance, the discontinuance becomes effective not later than the last day of the taxable year of the employer following the last taxable year of such employer for which a substantial contribution was made under the profit-sharing plan. In the case of a profit-sharing plan maintained by more than one employer, the discontinuance becomes effective not later than the last day of the plan year following the plan year within which any employer made a substantial contribution under the plan.

(e) *Contributions or benefits which remains forfeitable.* Under section 411(d)(2) and (3), section 411(a) and this section do not apply to plan benefits which may not be provided for designated employees in the event of early termination of the plan under provisions of the plan adopted pursuant to regulations prescribed by the Secretary or his delegate to preclude the discrimination prohibited by section 401(a)(4). Accordingly, in such a case, plan benefits may be required to be reallocated without regard to this section. See § 1.401-4(c).

§ 1.411(d)-3 Other special rules.

(a) *Class year plans*—(1) *General rule.* Under section 411(d)(4), the requirements of section 411(a)(2) for a class year plan shall be deemed to be satisfied if such plan provides that each employee's rights to or derived from employer contributions on his behalf for any plan year are nonforfeitable no later than the end of the 5th plan year following the plan year for which such contributions were made. However, the rights of an employee who separates from service prior to such time, and who is not reemployed in the plan year of separation, may be forfeited. For purposes of section 411 and the regulations thereunder, the term "class year plan" means a profit-sharing, stock bonus, or money purchase plan which provides that the nonforfeitable rights of employees to or derived from employer contributions are determined separately for each plan year.

(2) *Other rules*—(i) *Prohibited forfeiture on withdrawals.* In the case of a class year plan, section 401(a)(19) and the regulations thereunder shall be applied separately to each plan year.

(ii) *Distribution rules.* The rules of § 1.411(a)-7(d) apply to a class year plan. For example, under the rule in § 1.411(a)-7(d)(2)(ii)(D), a class year plan would be permitted to limit the time of repayment to a 5 year period beginning on the date of withdrawal, or under the rule in § 1.411(a)-7(d)(2)(iii), a class year plan would restore the amount of the forfeited account balance in the event of repayment. For purposes of applying subparagraphs (2) and (3) of § 1.411(a)-7(d), relating to withdrawal of mandatory contributions, a withdrawal of employee contributions shall be treated as a withdrawal of such contributions on a plan year by plan year basis in succeeding order of time. Any repayments shall be treated as being on account of plan years in succeeding order of time. For purposes of applying any rule of such paragraph (e.g., paragraph (d)(2)(ii)(C)) the term "one-year break in service" means any plan year in which under subparagraph (1) of this paragraph a class year plan may forfeit an employee's rights.

(iii) *Computation of years for withdrawals.* In applying the requirement of paragraph (a)(1) of this section that rights must be nonforfeitable no later than the end of the fifth plan year following the plan year for which contributions are made, any plan year for which there has been a withdrawal of contributions and no repayment of such contributions (determined as of the last day of the plan year) is not required to count toward the five years. For example, assume that contributions are made for A in 1981 to a calendar year plan. Under the general rule of paragraph (a)(1) of this section, the contributions must be nonforfeitable on December 31, 1986. If in 1982, A withdraws the contributions for 1981, and repays these contributions in 1984, 1982 and 1983 are not required to be counted toward the five years because at the end of each year there is a withdrawal and no repayment of such withdrawal. Accordingly, the plan must provide that A's interest in the contribution for 1981 will be vested on December 31, 1988.

(b) *Prohibition against accrued benefit decrease.* Under section 411(d)(6) a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if a plan amendment decreases the accrued benefit of any plan participant, unless the plan amendment satisfies the requirements of section 412(c)(8) (relating to certain retroactive amendments) and the regulations thereunder. For purposes of determining whether or not any participant's accrued benefit is decreased, all the provisions of a plan affecting directly or indirectly the computation of accrued benefits which are amended with the same adoption and effective dates shall be treated as one plan amendment. Plan provisions indirectly affecting accrued benefits include, for example, provisions relating to years of service and breaks in service for determining benefit accrual, and to actuarial factors for determining optional or early retirement benefits.

(c) *Rules applicable to section 414(k) plan.* For special rules applicable to defined benefit plans which provide a benefit derived from employer contributions which is based partly on a participant's separate account, see section 414(k) and the regulations thereunder.

12. Sections 1.413-1 and 1.413-2 are added to read as follows:

§ 1.413-1 Special rules for collectively bargained plans.

(a) through (d) [Reserved]

(e) *Vesting.* Section 411 (other than section 411(d)(3) relating to termination or partial termination; discontinuance of contributions) and the regulations thereunder shall be applied as if all employers who have been parties to the collective-bargaining agreement constituted a single employer. The application of any rules with respect to breaks in service under section 411 shall be made under regulations prescribed by the Secretary of Labor. Thus, for example, all the hours which an employee worked for each employer in a collectively-bargained plan would be aggregated in computing the employee's hours of service under the plan. See also 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

§ 1.413-2 Special rules for plans maintained by more than one employer.

(a) through (c) [Reserved]

(d) *Vesting.* Section 411 and the regulations thereunder shall be applied as if all employers who maintain the plan constituted a single employer. The application of any rules with respect to breaks in service under section 411 shall be made under regulations prescribed by the Secretary of Labor. Thus, for example, all the hours which an employee worked for each employer maintaining the plan would be aggregated in computing the employee's hours of service under the plan. See also 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

§ 1.801-8 [Amended]

12. Paragraph (g) of § 1.801-8 is amended by deleting "or (D)" the two places it appears therein and inserting in lieu thereof "(D), or (E)".

13. Section 1.805-7 is amended by revising paragraphs (3) and (4) and adding a new paragraph (5) to paragraph (b) thereof to read as follows:

§ 1.805-7 Pension plan reserves.

* * * * *

(b) *Pension plan reserves defined.*

* * *

(3) Provided for employees of the life insurance company under a plan which for the taxable year meet the requirements of section 401(a)(3), (4), (5), (6), (7), (8), (11), (12), (13), (14), (15), (16), and (19) for the taxable year to which such paragraphs apply. For the purposes of this subparagraph, the term "employees" includes full-time life insurance salesmen treated as employees under section 7701(a)(20);

(4) Purchased to provide retirement annuities for the employees of an organization which (as of the time the contracts were purchased) was an organization described in section 501(c)(3) which was exempt from tax under section 501(a) or was an organization exempt from tax under section 101(6) of the Internal Revenue Code of 1939 or the corresponding provisions of prior revenue laws. The definition of pension plan reserves described in section 805(d)(1)(D) and this paragraph includes only life insurance reserves held under contracts purchased by those organizations described in section 501(c)(3) and exempt from tax under section 501(a), and does not include life insurance reserves held under contracts purchased by organizations described under any other provision of section 501(c). Accordingly, the reserves held under contracts purchased by such other exempt organizations, or by entities not subject to Federal income tax (such as a State, municipality, etc.), shall not be treated as pension plan reserves unless they qualify as such under section 805(d)(1)(A), (B), (C), or (E); or

(5) Purchased under contracts entered into with trusts which (at the time the contracts were entered into) were individual retirement accounts described in section 408(a) or under contracts entered into with individual retirement annuities described in section 408(b).

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

PART 0—COMMISSION ORGANIZATION

Editorial Amendment of Part 0 to Reflect a Reorganization of the Common Carrier Bureau

AGENCY: Federal Communications Commission.

ACTION: Amendment of rules.

SUMMARY: This amendment changes the Rules to reflect changes in organization and functions of the Common Carrier Bureau. These changes were necessary to focus and strengthen the Bureau's surveillance activities, to facilitate policy development and coordination, and to improve program management and research activities.

EFFECTIVE DATE: August 22, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mr. H. Walker Feaster, III, Office of the Executive Director, 632-7513.

SUPPLEMENTARY INFORMATION: In the Matter of Editorial Amendment of Part 0 of the Commission's Rules to reflect a reorganization of the Common Carrier Bureau.

ORDER

Adopted: August 12, 1977.

Released: August 16, 1977.

1. Changes in the organization and functions of the Common Carrier Bureau were adopted by the Commission February 4, 1976. Two new divisions were established within the Bureau. Several divisions were renamed, and functional statements were updated. These changes were necessary to focus and strengthen the Bureau's surveillance activities, to facilitate policy development and coordination, and to improve program management and research activities. Part 0 of the Rules and Regulations, which describes the organization of the Commission, is being amended to reflect these changes.

2. The amendments adopted herein pertain to agency organization. The prior notice, procedure and effective date provisions of Section 4 of the Administrative Procedure Act are therefore inapplicable. Authority for the amendments adopted herein is contained in Sections 4(i) and 5(b) of the Communications Act of 1934, as amended, and in Section 0.231(d) of the Commission's Rules.

3. In view of the foregoing, IT IS ORDERED, effective August 22, 1977, that Part 0 of the Rules and Regulations is amended as set forth below.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
R. D. LICHTWARDT,
Executive Director.

1. In Section 0.91, the introductory text, and paragraph (a), (b), (c), (d), (e) and (f) are revised to read as follows:

§ 0.91 Functions of the Bureau.

The Common Carrier Bureau develops, recommends and administers policies and programs for the regulation of the services, facilities, rates and practices of entities which furnish interstate or foreign communications services for hire—whether by wire, radio, cable or satellite facilities—and of ancillary operations related to the provision or use of such services. The Bureau also licenses all radio facilities used for such services, including those dedicated entirely to intrastate use. The Bureau performs the following specific functions:

(a) Advises and makes recommendations to the Commission, or acts for the Commission under delegated authority, in matters pertaining to the regulation and licensing of communications common carriers and ancillary operations. This includes: policy development and coordination; adjudicatory and rule making proceedings, including rate and service investigations, determinations regarding lawfulness of carrier tariffs; action on applications for service, facility and radio authorizations; review of carrier performance; economic research and analysis; administration of Commission accounting and reporting requirements; compliance and enforcement activities.

(b) Participates in all phases of international conferences concerning common carrier and related matters and in the implementation of international agreements.

(c) Collaborates with representatives of state regulatory commissions and with the National Association of Regulatory Utility Commissioners in cooperative studies of common carrier and related matters.

(d) Advises the Commission on policy and technical matters regarding the use of satellites and related facilities for both common carrier and ancillary communications services.

(e) Advises and assists the public, other government agencies and industry groups on common carrier regulation and related matters.

(f) Exercises such authority as may be assigned or referred to it by the Commission pursuant to Section 5(d) of the Communications Act of 1934, as amended.

* * * * *

2. Sections 0.92 through 0.99 are revised to read as follows:

V 42 163 AUG 23 77 UM

§ 0.92 Units in the Bureau.

(a) Office of the Bureau Chief.
(b) Policy and Rules Division.
(c) Tariff Division.
(d) Facilities and Services Division.
(e) Mobile Services Division.
(f) Economics Division.
(g) Accounting and Audits Division.
(h) Hearing Division.

§ 0.93 Office of the Bureau Chief.

The Office of the Bureau Chief is composed of the Bureau Chief, the Deputy Bureau Chief, an Assistant Bureau Chief-International, an Assistant Chief-Management, a Program Evaluation Staff, an International Programs Staff and an Administrative Office. They assist the Chief of the Bureau in planning, directing, coordinating, executing, and evaluating the functions and programs of the Bureau.

§ 0.94 Policy and rules division.

Develops uniform and integrated policies for the regulation of domestic and international communication common carriers.

(a) Develops new policies to provide a framework for the orderly growth of the common carrier industry to meet future communications needs of the nation;

(b) Reviews existing policies and regulations to determine the need for modifications;

(c) Acts on petitions for rule making involving major policy questions;

(d) Prepares precedent setting rule interpretations;

(e) Participates in rule making proceedings and inquiries involving major changes to existing policies and regulations or the development of new policies.

§ 0.95 Tariff division.

Administers the tariff provisions of the Communications Act requiring that the charges, classifications, regulations, and practices of communications common carriers providing interstate and foreign services are just, reasonable and not unduly discriminatory.

(a) Examines tariffs to determine their lawfulness,

(b) Conducts formal or informal investigations of tariff matters.

(c) Establishes and enforces criteria concerning speed, quality, reliability and accuracy of communications services.

(d) Analyzes and disposes of formal and informal complaints regarding charges, adequacy and quality of service and other carrier practices.

§ 0.96 Facilities and services division.

Authorizes and regulates the facilities and services of domestic and international communications common carriers including domestic wireline and microwave, overseas cable and radio, and international and domestic satellites.

(a) Reviews proposals for new services or the modifications of existing services insofar as they impact on facilities.

(b) Examines applications for radio, cable or wireline facilities, through construction or acquisition, and for the construction, launch and operation of space satellites and associated earth stations.

(c) Coordinates frequency assignments.

(d) Issues licenses and other authorizations.

(e) Acts on requests for temporary authority and rule waivers.

(f) Develops and recommends policy, rules, standards, procedures and forms for the authorization and regulation of interstate and foreign communication services.

(g) Participates in adjudicatory hearings on contested and mutually exclusive applications.

(h) Monitors compliance and initiates appropriate enforcement action.

(i) Keeps abreast of technological development and activities in the communications field, and maintains continuing surveillance over the evolution and performance of the domestic and international telecommunication networks.

§ 0.97 Mobile services division.

Authorizes and regulates the domestic common carrier mobile radio services including the domestic public land and aeronautical mobile radio service, the rural radio telephone service and the offshore radio transmission service.

(a) Examines applications from carriers or individuals for new or modified radio facilities;

(b) Coordinates frequency assignments;

(c) Issues licenses and other authorizations;

(d) Acts on requests for temporary or developmental authority, or rule waivers;

(e) Develops and recommends policy, rules, standards, procedures and forms for the authorization and regulation of these services;

(f) Participates in adjudicatory hearings on contested or mutually exclusive applications;

(g) Monitors compliance, acts on complaints and initiates appropriate enforcement action.

§ 0.98 Economics division.

Investigates the economic implications of common carrier regulatory policies and programs and the economic consequences of industry structure and practices. Collects, analyzes and publishes carrier financial operating and other statistical data. Studies and analyzes:

(a) Cost of capital, capital structure and financial policies of carriers;

(b) Customer demand;

(c) Methods for pricing public utility services;

(d) Carrier costs and expenses;

(e) Carrier rates, rate levels, rate bases and rate structures;

(f) Jurisdictional separations and division of revenues;

(g) Carrier depreciation practices.

§ 0.99 Accounting and audits division.

Develops and administers the FCC Uniform Systems of Accounts for communications common carriers, including related Commission requirements for reporting and preservation of records. Monitors carrier compliance with Commission requirements through the review and approval of carrier accounting reports. Conducts a program of comprehensive and selective field audits and investigations of carriers' financial and operating practices, procedures and records.

Sections 0.100 and 0.101 are added to read as follows:

§ 0.100 Hearing division.

Serves as separated trial staff for the Bureau in adjudicatory and rule making proceedings, including rate investigations.

§ 0.101 Field offices.

Common Carrier Bureau field offices are located in Room 1309X, 90 Church Street, New York, New York 10007; and Room 546, 210 Twelfth Street, St. Louis, Mo. 63101.

SPECTRUM MANAGEMENT IN THE LAND MOBILE SERVICES

Editorial Amendments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document deletes the requirement that permits the filing of applications in the Chicago Region without evidence of frequency coordination. The amendments will result in the Chicago Region operating under the same procedures as the rest of the continental United States.

EFFECTIVE DATE: September 1, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Richard Breen, Spectrum Management Division, Safety and Special Radio Services Bureau, 202-634-4970.

SUPPLEMENTARY INFORMATION:

ORDER

Adopted: August 11, 1977.

Released: August 12, 1977.

In the matter of inquiry into the practices and procedures for spectrum management in the land mobile services governed by Parts 89, 91, 93 of the Commission's Rules, Docket No. 21229.

1. In its Notice of Inquiry released May 17, 1977, in the above entitled matter, the Commission stated its intention to return to frequency coordination in the Chicago Region. We further stated that an Order would be issued deleting those portions of the rules that permit the filing of applications in the Chicago Region without evidence of frequency coordination.

2. In view of the above, and for the reasons set forth in the Notice of Inquiry in Docket No. 20909, effective September 1, 1977, the Commission will no longer accept applications that are not accompanied either by evidence of frequency coordination or by a field survey in the Chicago Land Mobile Spectrum Management District.

3. Authority for this action is contained in Sections 4 (i) and (j) and 303 (r) of the Communications Act of 1934, as amended. Because the amendments are editorial and procedural in nature, the prior notice and effective date provisions of 5 U.S.C. 553 do not apply.

4. Accordingly, *It is ordered*, effective September 1, 1977, That Parts 89, 91 and 93 of the Rules and Regulations are amended as set out below.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
R. D. LICHTWARDT,
Executive Director.

Parts 89, 91 and 93 of Chapter 1 of Title 47 of the Code of Federal Regulations are amended as follows:

PART 89—PUBLIC SAFETY RADIO SERVICES

§ 89.81 [Amended]

1. Section 89.81(g) deleted.

PART 91—INDUSTRIAL RADIO SERVICES

§ 91.67 [Amended]

2. Section 91.67(g) deleted.

PART 93—LAND TRANSPORTATION RADIO SERVICES

§ 93.67 [Amended]

3. Section 93.67(g) deleted.

[FR Doc.77-24268 Filed 8-22-77;8:45 am]

[Docket No. 20547; RM-1773]

PART 91—INDUSTRIAL RADIO SERVICES

Modifying Type Acceptance Requirements for Transmitters in Industrial Radiolocation Service; Correction

AGENCY: Federal Communications Commission.

ACTION: Second correction.

SUMMARY: An errata to correct the appendix in the Report and Order in Docket 20547 so as to: (1) Specify the actual effective date in § 91.109(b)(2); (2) specify the field strength limitations for equipment in the frenquency bands 10,500–10,550 MHz and 23,000–24,250 MHz; and (3) show the proper position of the unit "MHz" under the column heading "Frequency or band".

EFFECTIVE DATE: July 12, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Nevarro C. Elliott, Research and Standards Division, Office of Chief Engineer, 202-632-7093.

In the Matter of amendment of Parts 89, 91, and 93 of the Commission's Rules to modify the type acceptance requirements for transmitters in the Industrial Radiolocation Service, (Docket No. 20547 RM-1773).

SECOND ERRATA

Released: August 17, 1977.

In the Report and Order, FCC 77-358, adopted May 26, 1977, and released June 9, 1977, published at 42 FR 30509, the appendix is corrected as follows:

1. Section 91.109(b) (2) is amended so as to specify the actual effective date.

§ 91.109 Acceptability of transmitters for licensing.

* * * * *

(b) * * *

(1) * * *

(2) Transmitters used at radiolocation stations prior to January 1, 1978.

* * * * *

2. Sections 91.604 (a) and (b) are amended so as to specify field strength limitations for equipment operating in the frequency bands 10,500–10,550 MHz and 23,000–24,500 MHz and to show the proper position of the unit "MHz" under the column heading "Frequency or band".

§ 91.604 Frequencies available.

(a) * * *

Frequency or band (megahertz)	Class of station(s)	Limitation(s)
*	*	*
2150-2500	do	3, 20, 21, 22
10,500-10,550	do	12, 20, 21, 23, 24
23,000-24,250	do	17, 20, 21, 23, 24
*	*	*

(b) * * *

(24) Devices designed to operate as field disturbance sensors on frequencies between 10,500 and 10,550 MHz and between 23,000 and 24,250 MHz, with a field strength equal to or less than 250,000 microvolts per meter at 30 meters, on the fundamental frequency, will not be licensed or type accepted for use under this part. Such equipment must comply with the requirements for field disturbance sensors as set forth in Subpart F of Part 15 of this Chapter.

* * * * *

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.77-24325 Filed 8-22-77;8:45 am]

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket RNE-1 Notice 2]

PART 210—RAILROAD NOISE EMISSION COMPLIANCE REGULATIONS

AGENCY: Federal Railroad Administration, DOT.

ACTION: Final rule.

SUMMARY: This rule sets forth procedures to insure compliance with the noise emission standards prescribed by the Environmental Protection Agency (EPA) for locomotives and rail cars (40 CFR 201).

EFFECTIVE DATE: October 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Principal Program Person: Philip J. Brannigan, Office of Safety, 202-426-8686.
Principal Attorney: Anne-Marie Hyland, Office of the Chief Counsel, 202-426-8836.

Examination of written comments: All written comments received in this proceeding are available for examination, in the public docket RNE-1, during regular business hours in Room 5101, Nassiff Building, 400 Seventh Street SW., Washington, D.C.

SUPPLEMENTARY INFORMATION: On November 8, 1976, FRA published a notice of proposed rulemaking (NPRM, 41 FR 49183) setting forth proposed procedures to assure compliance with the EPA Railroad Noise Emission Standards ("EPA standards", 40 CFR 201). As stated in the proposed rule, the EPA standards were published by the EPA on January 14, 1976 (41 FR 2184). They became effective on December 31, 1976. Both the Standards and these compliance regulations are issued pursuant to section 17 of the Noise Control Act of 1972 "(Noise Control Act)" (86 Stat. 1248, 42 U.S.C. 4916). In the development of this final rule, consultations were conducted with EPA as required by section 17(b) of the Noise Control Act.

FRA has received ten comments on the proposed rule, each of which urged significant changes. As a result of these comments, a number of changes have been made. A summary of the comments and FRA's responses follows.

DISCUSSION OF MAJOR COMMENTS

PRELIMINARY ISSUES

Time to Comment. Two commenters stated that the comment period was too short to complete detailed analysis of certain provisions and noted that they reserved the right to comment further. FRA provided the 45 day comment period which is established by Department of Transportation policy as the minimum time for comment on an NPRM. Because of the effective date of the EPA standards, FRA was unable to provide a more lengthly comment period. Two comments that were received after the close of the comment period were reviewed and have been considered fully. FRA's general rules of practice provide procedures for petitions for reconsideration as well as petitions for waiver or amendment of any rule issued by FRA. (See 49 CFR 211, 41 FR 54181 (Dec. 13, 1976)). These additional procedures provide any interested party with the opportunity to express views as to the appropriateness of any FRA regulation, or the need for amendment or revision of any such regulation.

V 42 N 163 AUG 23 77 UM

Inflationary Impact and Regulatory Analysis. Two commenters contended that FRA was required to issue an inflationary impact statement for the proposed rule under Executive Order 11821, Office of Management and Budget Circular No. A–107, and DOT Order 2050.4. The NPRM (at 41 FR 49185) stated that the inflationary impact had been considered pursuant to Executive Order 11821. It was determined that the additional impact resulting from the proposed procedures would not be so costly as to reach the $50 million threshold that determines what actions are to be considered "major proposals" requiring inflationary impact evaluation. The major complaint raised by these commenters concerned testing for compliance with the stationary locomotive noise emission standard by use of a load cell as prescribed in the EPA standards (40 CFR 201.11 and Subpart C to 40 CFR 201). The requirement that locomotives be capable of operating within the prescribed decibel limits when connected to a load cell, and the measurement instrumentation, acoustical environment, and procedures which are to be used in determining such compliance have been established by the EPA. The FRA does not have the authority to alter any of these requirements. Several of the commenters have raised issues related to their ability to comply with the measurement criteria for conducting the load cell test. It was noted that many carriers do not presently have load cell facilities, and that the location of the majority of the load cells on those carriers that do have such facilities will not permit noise measurement in accordance with the measurement criteria established by EPA. These comments have raised several difficult issues which FRA has reviewed and considered in detail. Although this agency does not have the authority to alter any provisions of the EPA standards, in developing this final rule we have attempted to define a regulation which will insure compliance with the EPA standards without placing unreasonable or costly additional burdens on railroads. If existing load cell sites will not permit testing for compliance with the requirements prescribed by the EPA without substantial and costly modification, that issue should be addressed to EPA. FRA will provide the appropriate official of that agency with copies of the relevant comments submitted in this proceeding.

One commenter also contended that a regulatory analysis was required under the policy statement of the Secretary of Transportation published April 16, 1976 (41 FR 16200). Since the issuance of this rule is specifically required by section 17 of the Noise Control Act, the comprehensive regulatory impact evaluation normally required of all proposed rulemaking actions undertaken by agencies comprising the Department of Transportation is not required by the Secretary's policies in this case.

Nevertheless, FRA feels that an appropriate application of the Secretary's policies in this case is to assess the relative costs of alternative means of achieving the results contemplated by the statute in an effort to develop an effective and reasonable implementing regulation. FRA believes that, as a result of changes made in response to the comments received in this proceeding, the final rule issued herein will ensure effective enforcement of the EPA standards without imposing on the railroad industry unreasonable costs in excess of the minimum costs necessary to comply with the statutory intent.

Environmental Impact. One commenter also contended that an environmental impact statement is required under the National Environmental Policy Act (NEPA), 42 USC 4332(2)(c). NEPA requires environmental impact statements on all proposals for "major Federal actions significantly affecting the human environment". The Administrator has determined that this rule making is not a major Federal action since the rule only prescribes additional compliance procedures to assure compliance with the substantive requirements of the EPA standards. In the issuance of those standards, the EPA has considered the environmental impacts of the overall railroad noise emission program.

EPA Standards. EPA suggested that the preamble of the final rule should clearly state that the EPA standards do not require that locomotive consists be composed entirely of locomotives manufactured either before 1980 or after 1979. EPA also suggested that the preamble should state clearly that the EPA standards do not apply to warning devices when operated for the purpose of safety. FRA believes that the wording of section 210.3(b)(3) adequately addresses this issue.

SECTION BY SECTION ANALYSIS

§ 210.3

Some question appears to have arisen as to the scope of applicability of these noise compliance rules. These rules are intended to be coextensive with the EPA standards and the Act. The scope of the EPA standards encompasses all common carriers by railroad, or partly by railroad and partly by water, within the continental United States, that are subject to the Interstate Commerce Act. Locomotives and rail cars used in industrial railroad operations that are conducted solely within an industrial complex would not be subject to these rules. The FRA does not have the authority to limit the applicability of the EPA standards, and cannot except any operations that are common carrier operations subject to the Interstate Commerce Act. Section 210.3 has been amended to reflect the statutory scope of applicability of the EPA standards.

§ 210.7

Who should be responsible for compliance? Three commenters recommended that an industrial railroad not be required to repair or remove from service noise defective equipment belonging to another railroad. The commenters operate and maintain some equipment of their own, but they do not have the capacity or capability to repair and maintain the comparatively large number of cars involved in their interchange operations. A similar problem—lack of capability or adequate capacity to perform repairs on potentially large numbers of cars—exists with many short line railroads. In holding the operator, rather than the owner, responsible for compliance with the EPA standards, it was the intent of FRA to utilize present railroad industry practices concerning the repair of defective equipment.

Currently, when defects are found under the Freight Car Safety Standards or other safety regulations, repairs usually are made by the operating railroad. The car owner is then billed for the repair of defects that are not "handling line caused". In those cases in which correction of the defect would involve extensive repairs to the rail car, alternative procedures can be used to return the equipment to its "home shop" for repairs.

This system recognizes the nature of the rail car fleet which operates on the principle of free interchange of railroad cars among carriers. In addition, it assures the efficient freight car utilization which would be impossible if defective equipment had to be returned to its owner each time even minor repairs are required. The FRA believes that the use of this system for the repair and handling of noise defective equipment is the only practical approach to the enforcement of the EPA standards. Some relief may be provided by the procedures established under § 210.9 for the movement of noise defective equipment. If a car is discovered to be defective while being operated by an industrial railroad or short line carrier that does not have the repair facilities necessary to correct the defect, the car may be moved to the next forward location where the noise can be eliminated.

Must noise defective equipment be stopped en route for inspection? One commenter suggested clarification of whether the rule would require immediate stopping for inspection whenever the railroad has notice that a passby test has shown a noise emission in excess of the EPA standards. Stopping trains en route entails an unreasonable interference with interstate commerce and also could result in safety problems that FRA believes would be more serious than the continued excessive noise emission until the train reaches the next point where it is inspected in the normal course of operations. Section 210.25(c)(3) of the final rule provides that inspections on the basis of a passby test are to be performed at the next recognized inspection point, which would include an initial terminal, terminal, interchange, 500-mile, or crew change inspection point.

§ 210.9(a)

Where must noise defective equipment be repaired? Five commenters objected to the proposed restriction allowing noise defective equipment to be moved only to the nearest location where the noise defect can be eliminated, contending that it was unduly burdensome and unclear.

They noted that the procedure for moving cars with safety defects under the Freight Car Safety Standards is less restrictive.

FRA believes that it is reasonable to allow noise defective equipment to be moved in a defective condition to the next forward facility where repairs can be made. The authority for such movement is similar to that adopted when a highly visible rear end marking device becomes inoperative (see 49 CFR 221.17(a), 42 FR 2321, January 11 1977) and to that included in a recent notice of proposed rulemaking governing movement of a locomotive with an inoperative wheel slip/slide indicator (see 42 FR 2994, January 14, 1977). This provision assures that movement of railroad equipment will not be impeded by a requirement to set out defective cars so as to move them to a closer repair point in the opposite direction. Nevertheless, since the rule prescribes the maximum distance defective equipment may be moved, a carrier also would have the option of moving the defective equipment to a closer facility to the rear. As adopted, the authority for movement of noise defective equipment is somewhat more restrictive than the authority for movement of defective equipment under the Freight Car Safety Standards (49 CFR 215). Under those standards a defective car could be tagged and sent to its "home shop for repairs". The more restrictive limitation in this rule is needed to minimize the noise impact after a violation of the EPA standards is found. We wish to point out that, consistent with the safety rules, movement to the home shop would be allowed after correction of the noise defect. Since equipment maintained in accordance with the Freight Car Safety Standards or the Locomotive Inspection rules also should comply with the noise standards, FRA believes that very few noise defects which are not also safety defects will be found. Accordingly, this rule generally is not expected to impose a significant added burden upon even very small repair facilities.

Should noise defective equipment be inspected before movement for repairs? Two commenters objected to the proposed requirement for an equipment inspection before the noise defective equipment is moved to the repair site. They stated that the requirement could seriously disrupt railroad operations because movement could not be made until after the inspection of each piece of equipment suspected of being noise defective.

One of the commenters contended that it is illegal for FRA to require any inspection under this part on the basis of safety considerations. The commenter argued that in fact there is no connection between noise and safety defects, that Congress intended by its reference to the safety statutes in section 17 of the Noise Control Act solely to provide for the use of available machinery to enforce compliance, and that EPA did not contemplate that compliance with its standards would cause any additional maintenance burden. Both commenters contended that an inspection requirement is unnecessary. The first contended that noise often comes from conditions with no safety consequence, and if there is in fact a safety defect it would have been found and corrected under the equipment safety rules, 49 CFR 215 and 230. The second stated that its current practices would assure safety. The commenter instructs its employees to observe passing trains and report anything unusual, and it requires car inspections at each terminal and interchange.

The requirement for an inspection prescribed in this section is within the authority of FRA, based on the need to avoid exposure to possible safety problems as well as unlawful noise emissions. We disagree with the assertion that a noise violation does not imply existence of a safety problem. Certainly, there are a number of possible nonsafety-related causes for a sound level measurement above those prescribed in the EPA standards. However, the EPA standards were established after consideration of noise emission levels emitted by properly maintained equipment. Therefore, a measurement showing a noise emission in excess of the EPA standard indicates a possible safety problem may be present also. Even if equipment is maintained in accordance with the safety rules, there is no certainty that the previous inspection uncovered every problem or that a safety defect did not develop after the inspection. FRA believes that this inspection is necessary in the interests of railroad safety and the safety of the operating crew. In addition, the inspection is also intended to identify the sources of excess noise emissions for corrective action. A prompt, systematic, thorough inspection is necessary for that purpose alone.

Who should perform the inspection on noise defective equipment? Two other commenters argued that a person designated to inspect and test for noise defects is not the appropriate person to perform the inspection required under section 210.9 since the primary purpose of that inspection is to assure the safety of movement to the repair site.

The FRA agrees with these commenters, and has eliminated the reference to a person designated to inspect for noise defects. The railroad's duty under this provision is to determine that the equipment is safe to move to the repair point. Such a determination may be made by any railroad personnel available at the location where the railroad receives notice of the noise defect. It should be noted, however, that, if such an inspection involving equipment covered by the Freight Car Safety Standards (49 CFR 215) results in the identification of a defective component as defined in those standards, further movement of that equipment will also be governed by § 215.9 of title 49 of the Code of Federal Regulations.

§ 210.15

Section 210.15 of the proposed rule required each railroad that operates equipment to which the EPA standards apply to designate persons qualified to inspect and test locomotives and rail cars for noise defects. The primary purpose for this designation was the need to identify those railroad employees who were to perform the inspection required under § 210.9 above and the load cell test required under § 210.31(g) of the NPRM. As stated earlier, on reconsideration, FRA has determined that the designation of specific railroad personnel under 210.9, to perform the inspection prior to movement of noise defective equipment, is unnecessary. In addition, as a result of the comments submitted concerning the present load cell facilities, and their inappropriate locations for conducting noise tests as specified in the EPA standards, FRA has decided to eliminate the requirement that a locomotive be subjected to a noise test each time it is subjected to a load cell test for whatever reason. Furthermore, it is the responsibility of the railroad to assure that equipment that it is operating is maintained in a manner which will assure compliance with the EPA standards. Similar noise compliance regulations issued under parallel provisions of the Act governing motor carrier operations (section 18 of the Act) do not require the designation of specialized "noise control" personnel (see 49 CFR 325). DOT has not experienced enforcement problems due to any lack of such a designation in the motor carrier area, and does not expect the experience to differ significantly in the railroad area. Therefore, the requirement for the designation of qualified railroad persons under section 210.15 of the NPRM has been eliminated from this final rule.

§ 210.17

Section 210.17 of the proposed rule required that State agencies wishing to participate in the enforcement of the EPA standards must designate qualified personnel who must be approved by FRA prior to the commencement of enforcement activities. This provision remains in the final regulation with slight modifications.

The purpose of such a provision is to encourage States to participate in the Federal railroad noise control program and thus minimize interference with the flow of interstate commerce. State and local governments may, under section 17(c)(1) of the Noise Control Act, enact and enforce their own standards identical to the Federal standards. DOT, however, encourages them to instead enforce the Federal standards by availing themselves of the provisions of § 210.17 of this regulaton. To the extent State and local governments choose to enforce the Federal standards, enforcement of noise standards on rail cars and locomotives will be limited to certain designated and qualified State or local governments officials, all of whom will follow the same rules contained in these regulations.

To further insure against unreasonable interferences with interstate commerce, § 210.25(c)(3) has been revised in this final rule to provide specifically that government inspectors enforcing the Federal standard may perform, or request the railroad to perform, inspec-

V 42163 AUG 23 77 UM

tions and/or tests prescribed in this part only at recognized inspection points or scheduled stopping points. Train movements may not, under these regulations, be required to stop at other locations en route on the basis of an excessive noise emission noted in a random passby test.

How does State participation in noise enforcement differ from the FRA State Participation Program? From several comments submitted in response to the NPRM it appears that there is some confusion between State participation in the enforcement of the EPA standards and in the FRA "State Participation Program" under section 206 of the Federal Railroad Safety Act of 1970 (84 Stat. 972, 45 U.S.C. 435) and the regulations contained in 49 CFR 212.

The Federal Railroad Safety Act provides for a program of State participation in the investigative and surveillance activities prescribed by the Administrator for the enforcement of railroad safety regulations issued under that Act. Federal grants for up to 50 percent of the State's costs for such activities are also provided. The rules established in this part are issued under the Noise Control Act and the Secretary's authority under the Safety Appliance Acts, the Interstate Commerce Act and the Department of Transportation Act as provided in section 17 of the Noise Control Act. Therefore, the rules and regulations governing the State Participation Program for railroad safety do not apply to noise enforcement activities undertaken by a State under this part. In order to avoid further confusion of the two programs, § 210.17 has been redrafted to eliminate language referring to "participation". In addition, the scope of applicability of the section has been expanded to include not only State but also local jurisdictions that wish to enforce the Federal Railroad Noise Emission Standards.

How should State (local) inspectors be identified? One commenter stated that approved State inspectors should be required to carry appropriate credentials so that access to railroad property may not be denied on the basis of the lack of State authority. This commenter suggested that the FRA issue appropriate credentials to all approved State inspectors. As a result of these comments, FRA has reviewed the entire concept of prior FRA approval of each State or local noise compliance inspector and has determined that the administrative burden and additional paper work involved in such an approval process is unnecessary to accomplish the intent of this provision. As stated above that intent was twofold—to require qualified personnel and to identify such personnel for the railroads that are to be subject to their authority. FRA believes this can be accomplished by requiring the State or local jurisdiction to designate the personnel authorized to enforce the Federal standards, to certify that they are qualified to inspect and test locomotives and rail cars, that is that they have the knowledge and ability to detect the cause of noise defects, and to provide such persons with appropriate credentials to attest to their authority. FRA will continue to require the State or local jurisdiction to notify FRA that it is going to enforce the Federal standards so that we can accurately assess what the overall enforcement effort is at any given time. Section 210.17 of this final rule has been redrafted accordingly.

Should the regulation prescribe a level of effort to assure adequate State (local) effort? One commenter stated that, if State involvement would result in decreased Federal enforcement, the regulation should provide for a specified level of effort to assure that State involvement is adequate for effective enforcement. This comment apparently results from a confusion with the procedures of the State Participation Program as discussed above. Under that Program, once a State's inspection program is fully certified, the State effort replaces the routine Federal inspection effort in that State. Therefore, FRA has prescribed a specific level of State effort necessary before a program for a particular safety standard can be certified. This procedure does not apply to State or local involvement in enforcement of the EPA standards. State noise enforcement is not intended to substitute for, nor is it expected to reduce, the FRA efforts. Therefore, a prescribed level of State or local effort is not necessary.

Should inspectors be required to be qualified to inspect and test both locomotives and rail cars? Section 210.17(a) of the NPRM required the State to designate persons qualified to inspect and test locomotives or rail cars. One commenter suggested that the final rule should make it clear that any designated State inspector is authorized to inspect and test both locomotives and rail cars. The use of the word "or" rather than the word "and" in the proposed rule was purposeful. FRA does not agree that each State or local inspector enforcing the Federal standards must be qualified to inspect and test both locomotives and rail cars. The experience and knowledge necessary to adequately inspect a locomotive is substantially different from that necessary to perform a similar function with respect to rail cars because of the basic mechanical differences in the railroad equipment. FRA believes that an efficient and effective enforcement program must recognize these differences and provide the greatest degree of flexibility. Accordingly, while an individual inspector may be authorized to inspect and test both locomotives and rail cars if he is qualified to do so, the State or local jurisdiction is not limited to individuals with such dual qualfications.

§ 210.19

Two commenters recommended that the waiver provisions be eliminated or clarified. According to one, FRA's proposed rule contains no provision that is unduly burdensome, and all of the provisions are necessary for effective enforcement of the EPA standards. Therefore, any waiver would improperly interfere with enforcement. As an alternative the commenter stated that, if the provision is retained, FRA should amend the regulation to clarify that all of the provisions of 49 CFR 211 apply, including those providing interested parties an opportunity to receive notice of, and to comment on, all waiver applications. The other commenter stated that the regulation should be clarified to state that FRA may not waive, directly or indirectly, any requirement prescribed in the EPA standards.

The suggested changes have not been adopted. First, despite FRA's endeavors to structure a reasonable rule of general applicability, the railroad industry is characterized by such diversity that differing individual circumstances may justify the waiver of some provisions of this rule. The term "waiver" as used here, and throughout FRA safety regulations, does not necessarily mean a total relaxation or exemption from compliance with the prescribed rule. The waiver procedure allows FRA to impose alternative requirements to accomplish the intended purpose of the regulation in those cases in which the general rule may not be appropriate. Second, the proposed rule makes it clear that all of the provisions of part 211 apply to waiver proceedings and that FRA may not, either directly or indirectly, waive a requirement of the EPA standards. FRA will notify the EPA whenever a petition for waiver is filed under this section and will consult with that agency prior to a final determination on such a petition.

One commenter stated that § 210.19 should specify both the period within which the Administrator must make a decision on an application for waiver and the period for which a waiver may be effective.

FRA has not adopted a time limit within which the Administrator must act upon any petition for waiver under this part because the complexity of the issues raised and the time between the filing dates and proposed effective dates will vary. However, to the extent practicable we will comply with the nine-month time limit applicable to waiver proceedings under the Federal Railroad Safety Act of 1970 (See 49 CFR 211.1, 211.41 (41 FR 54181, December 13, 1976)).

With respect to the period for which a waiver may be effective, FRA does not believe it is appropriate to specify a maximum duration for a waiver. A waiver may be temporary or permanent. Each petition is considered individually, on its own merits, and conditions that will assure the accomplishment of the intent of the general rule are tailored to the circumstances of each case.

§ 210.21

One commenter contended that the proposed penalty provision is inadequate because penalties would be provided only for knowing violations. The commenter stated that the EPA standards prohibit operation of any car or locomotive that violates the standards, and that only if money penalties are established for all violations will the railroads have the incentive to establish testing and maintenance programs that will eliminate excessive noise. The commenter contended that FRA has the authority under the various acts to establish the penalties.

FRA has considered the Noise Control Act, its legislative history, and the related statutes. We believe that Congress intended to set forth in section 11 all of the penalties applicable to violators of the EPA standards themselves. The criminal penalties (fines and imprisonment) may be assessed against willful or knowing violators of these regulations or the EPA standards.

Another commenter stated that the criminal penalty provision was unacceptable because it was unclear when a railroad would be liable because of a violation on equipment owned by someone else.

The EPA standards prohibit operation of noise defective equipment. In addition, as stated in the discussion of § 210.7, this rule imposes the responsibility for inspection and repair of noise defective equipment on the operating railroad rather than on the owner of the equipment because that is the only practical way to enforce the EPA standards. FRA cannot alter the criminal penalty provisions prescribed in the Noise Control Act. It should be noted, however, that the mere existence of a noise defect on operated equipment is not sufficient in itself to establish criminal liability since the penalties apply only for willful or knowing violations. The words "known or has notice" are included in § 210.7 to indicate that some evidence of willfulness or knowledge is necessary before a criminal action for enforcement of the EPA standards can be initiated under the Noise Control Act.

§ 210.25

Should railroads perform the tests? Some commenters stated that the FRA or State inspectors should conduct any noise emission tests since many railroads do not have instrumentation, trained personnel, or suitable test sites. Section 210.25 (b) of the final rule provides that the railroad carrier can be required to conduct the noise tests itself only if it has the capability to do so.

Should periodic noise inspections be required? Another commenter recommended that the section be strengthened to require the railroad to make periodic inspections of all cars and locomotives for noise violations and keep records of the results available for inspection. Since frequent, thorough inspections are required under 49 CFR Parts 215 and 230, and cars and locomotives maintained in accordance with those parts are expected to meet the EPA standards, FRA does not believe that an additional inspection requirement is warranted.

Should inspectors be empowered to conduct or request inspections or testing at random? The thrust of the other comments was that the FRA and State inspectors' authority to inspect, test, or require a railroad to test or inspect locomotives or rail cars should be limited to avoid undue burdens on interstate commerce. One commenter estimated that an average passby test of a rail car would cost a railroad approximately $1,000 in equipment time, crew time, fuel consumption, and interference with other activities. It recommended amending the proposed rule to include guidelines authorizing an inspector to require a locomotive or rail car to be submitted for inspection or testing only if there are reasonable grounds to suspect a noise defect, if the request is in writing, and if the time and place are reasonable.

In light of the comments, the rule has been redrafted to authorize an inspector to request the railroad to test, inspect or examine for noise defects only when there are reasonable grounds to believe that a noise defect is present. Such grounds could be established by a passby noise emission reading in excess of the standards for locomotives or railroad cars or by numerous public complaints about excessive noise from an identified piece of equipment or specific train operation. On the basis of such evidence, an inspector could make, or request a railroad to make, an inspection of the train at the next recognized inspection point or scheduled stopping point. If a railroad has the capability to perform the appropriate tests for noise emissions as prescribed by EPA, testing requested by an inspector must be performed as soon as practicable. If the railroad does not have the capability, the inspector may request that the railroad make the rolling stock and appropriate personnel available at a reasonable time and location for the inspector to obtain the required sound measurements. However, a railroad is not required to test or submit its rolling stock for testing if a readily identifiable noise producing condition is corrected and the correction is verified by an inspector.

Should the requests be in writing? The section also includes the added requirement that the inspector's request that the railroad make a noise inspection or test be in writing, stating his grounds for suspecting a noise defect. This requirement will provide a basis for the railroads to determine why the inspectors are requesting them to make noise inspections. The written record also will serve as evidence that a railroad has been given notice of the existence of noise defective equipment and will serve to establish the "willful" or "knowing" violation necessary to support a criminal action under the Noise Control Act.

Should the rule allow testing during movement pursuant to § 210.9? The same commenter also recomended that an inspector be precluded from testing or demanding a test when cars are moving pursuant to § 210.9 or when the cause of a noise defect has been noted and there is reasonable evidence to show that it has been eliminated. The suggested amendment to preclude testing during movement to § 210.9 has not been adopted because FRA believes it would constitute too broad an exception. While conducting a passby test to determine whether a train was operating in compliance with the EPA standards, an inspector might not be aware that the train included equipment being moved under § 210.9. Under the rule as written a railroad cited for violating the standards must be prepared to show that the noise emissions above the standards could have resulted from the movement of noise defective equipment in accordance with § 210.9. To preserve its defense in that situation, the railroad will have to retain records of the movement in accordance with § 210.9 for enough time to allow for delays between measuring violations and issuing citations.

§ 210.27(b)(1)

One commenter objected to measuring the noise emissions from a consist of locomotives manufactured both before 1980 and after 1979 against the higher noise emission standard for pre-1980 locomotives. The commenter contended that the provision has the effect of changing the substance of the standard for post-1979 locomotives. This commenter recommended that a procedure be established either to differentiate the noise emitted from different locomotives in a mixed consist, or to require the railroad to test each unit in a mixed consist when the consist violates the lower standard for post-1979 locomotives.

The changes recommended by the commenter have been rejected as infeasible. First, the rule does not prescribe a procedure to distinguish the noise emitted by different locomotives in the same consist during a passby test, because such a procedure is technically impossible given the present state of the art in noise measurement unless such locomotives are separated within the consist by at least 10 rail car lengths or 500 feet. Second, a requirement to test individually each unit in a mixed consist that violates the post-1979 standard probably would force individual retesting of each of the units whenever there is a passby test of a mixed consist. To avoid that retesting burden, a railroad would have to operate only unmixed locomotive consists. Such a severe restriction on the use of motive power would impose an undue burden on interstate commerce by railroad.

§ 210.27(b)(3)

One commenter stated that if the built dates of locomotives are not known to the inspector at the time of a passby test, the railroad should have the burden to supply them or have the lower post-1979 noise emission standards applied. FRA does not agree. In most cases, the inspector will not know the built dates of the locomotive units in a consist at the time of a passby test. He will, therefore, be required to identify the units in the locomotive consist by number when the test is made. The built dates for the specific units in a consist can then be determined by reference to carrier records. If the inspector fails to record the locomotive unit numbers, and the built dates cannot be established, the higher pre-1980 standard will apply since all locomotives, regardless of age, must operate below that noise level.

V 42 16 3 AUG 23 77 UM

§ 210.27(c)

One commenter objected to applying the standard for movement at more than 45 miles per hour when the inspector's measuring equipment is not operating within an accuracy of 5 mph. The commenter stated that it is the inspector's duty to maintain properly calibrated measuring devices, and the enforcement regulation should not dilute the EPA standard in anticipation of his failure to do his job properly.

FRA agrees that it is the inspector's duty to maintain his equipment properly. However, if a failure does occur, prosecution for violation of the lower standard is not possible without proof that the train's speed was 45 mph or less.

§ 210.29(b) (1) (i)

One commenter stated that it is unclear whether the noise measurement device must be calibrated to actual frequencies. The section has been amended to make it clear that calibration to nominal frequencies satisfies the requirement. A sufficient degree of accuracy in noise measurements is assured as long as the calibrator frequency is accurate within a range, for example plus or minus three percent.

Another commenter stated that hourly calibrations are not necessary during a series of measurements, stating that calibration at the beginning of each series would assure accurate measurements.

FRA disagrees. The sound level meters are battery powered. Accordingly, frequent calibration during continuous use is important to assure that the inspector is aware as soon as the battery's voltage output drops close to the minimum operating voltage level of the sound level meter.

§ 210.29(c)

One commenter suggested increasing the measurement tolerance to at least 3dB(A), stating that the factors enumerated may realistically justify up to 5dB(A). The 2dB(A) measurement tolerance has been retained because it is the tolerance level generally accepted in the technical noise measurement community for field measurement purposes. (See, e.g., Society of Automotive Engineers Standard J952b, September 1971; SAE Technical Report J192, December 1970.)

In response to another commenter, paragraph (6) of the NPRM, which included an interpretation factor among those taken into account in determining the 2dB(A) tolerance, has been eliminated in this final rule. FRA agrees that the interpretation of the other factors is not properly listed as a separate item in the series and has included this consideration in the general explanation as to the purpose of the 2dB(A) tolerance.

§ 210.31(a)

One commenter opposed requiring that each locomotive manufactured after 1979 be tested for stationary noise emissions before it is placed in service initially. In response to the comment, type certification based on sample testing of each locomotive model will be required on all new locomotives built after 1979. The certification may be based on either load cell or passby testing. For reasons of clarity and rational organization of the final rule, the provisions for new locomotive certification for locomotives built after December 31, 1979 have been placed in a separate section § 210.33.

§ 210.31(g)

Six commenters addressed the proposed requirement for stationary noise testing whenever a locomotive is load cell tested for any reason. All six were opposed. They stated that the requirement would be ineffective in enforcing the noise emission standards, and compliance would be totally impractical. According to the commenters, many railroads do not have load cell facilities at all. One survey that included all of the major railroads plus a number of switching railroads showed that they have only approximately 176 load cell facilities. Furthermore, the typical locations of load cells is in or adjacent to locomotive repair shops. These locations often are unsuitable for noise testing in accordance with the EPA standards because they do not present the large open area, and the isolation from other noise sources that is required by the EPA definition of an acceptable test site. Also, some existing load cells depend upon high voltage direct current. Relocating the load cells at a distance from the shops would require the use of expensive transmission cables, and line losses of electric current during transmission from the power source to the remote load cell would reduce the efficiency of the devices for their primary purpose, i.e., testing the power output of the locomotive engines. The survey cited above showed that only seven existing load cell facilities in the country are suitable for noise testing under the site requirements prescribed in the EPA standards. One commenter that has two locomotive repair shops with load cells estimated that it would need to spend approximately $360,000 on modification of facilities and equipment before it could carry out stationary noise testing in accordance with the EPA standards at those shops. The commenters were also very concerned about the potential delays in returning recently repaired locomotives to service should a load cell noise test be required each time the locomotive is submitted to load cell testing for any purpose, because load cell noise emission tests cannot be performed during precipitation or when the measured wind velocity is over 12 mph. One commenter stated that the ability to take full advantage of its functioning motive power is critical for a small, financially weak railroad. Another concern was utilization of personnel. One commenter asserted that large numbers of new personnel would be needed, especially since the remote locations and random times for the required tests would reduce their efficiency. Finally, a commenter stated that additional problems might arise because of annoyance to the general public and employees who are not now subjected to load cell test noise. That commenter estimated that the proposed regulation would require approximately 47,000 stationary noise tests annually.

Two arguments were made about the effectiveness of the regulation in enforcing the standards. First, the commenters stated that load cell testing normally is done just after overhauls, repairs, or maintenance. That is the time a locomotive is most likely to be in compliance. To provide a more effective enforcement program, the commenters felt that required noise measurements should be taken on equipment with a higher probability of violations. Second, the commenters stated that the proposed rule would in effect exempt certain locomotives from any requirement for stationary noise testing. For example, there are many new locomotives that are equipped with a feature that permits load testing without connecting the unit to wayside load cell testing equipment. Also, locomotives owned by railroads that do not have load cell test facilities would not be subject to the requirement. A commenter that favored more frequent testing stated that the proposed rule needs to be strengthened because railroads do not conduct load cell tests regularly and there is no requirement for them to do so.

As a result of our review of the comments and further analysis, FRA believes it is not reasonable to require periodic load cell testing by the railroads. Many railroads apparently could not perform the tests without a substantial investment in facilities and equipment, and it is not sensible to require such an investment when the EPA has not identified locomotives as a major noise source. However, FRA is not at liberty to exempt locomotives entirely from load cell testing because EPA clearly did not intend the standards for stationary and moving locomotives to be alternatives. The preamble to the EPA standards states in part that—

> The EPA strongly believes that a stationary as well as a moving standard is necessary in order to account for the varying nature of locomotive noise (41 FR 2189).

An inspector could still request a railroad that has the capability to conduct a load cell test to do so if a locomotive is suspected of having a noise defect (§ 210.25(b)(1)). In addition, locomotives manufactured after December 31, 1979, must be certified for noise emission compliance before being placed in service initially. This certification may be based upon a load cell test.

§ 210.31(h)

One commenter stated that no test of a noise defective locotmotive should be required if the cause of the noise defect was readily identifiable and corrected.

The FRA recognizes that the retesting requirement for locomotives under proposed § 210.31(h) will constitute somewhat of a burden on railroads. This is true because the present location of locomotive repair facilities within or directly adjacent to congested yard areas will not ordinarily present an acceptable test site in terms of the criteria established by EPA in Subpart C of 40 CFR 201. In addition, as stated earlier, very few of the existing load cell facilities are located in areas that present acceptable test sites.

FRA believes that the source of excessive locomotive noise will often be readily identifiable as a result of recognized inspection and maintenance procedures. The retesting requirement, is not necessary in such cases in order to accomplish the intended purpose of the EPA standards. Therefore, in those situations in which the excessive noise emission is readily identifiable as related to a particular defective component, and that component can be replaced or there is an accepted repair procedure, FRA believes that retesting before returning the locomotive to service should not be required. Where no such defective component can be readily identified, retesting is necessary to assure elimination of the noise defect and will be required. Paragraph (c) of this section has been redrafted accordingly.

EMPLOYEE SAFETY AND HEALTH

One commenter criticized the EPA standards themselves, stating that they are too high to protect employees from noise related injury. The commenter also stated that there are many sources of railroad noise that might affect an employee's health that are not covered by the EPA standards. The commenters requested that FRA promulgate noise emission standards to protect employees.

The commenter's request is not within the scope of this proceeding. Further related rule making could be undertaken in the future, depending upon the nature of any evidence that particular noise emissions are a serious safety problem.

In accordance with the foregoing, Title 49 of the Code of Federal Regulations is amended by adding a new part 210 to read as set forth below. These rules shall become effective on October 1, 1977.

Issued in Washington, D.C. on August 17, 1977.

JOHN M. SULLIVAN,
Administrator.

Subpart A—General Provisions

Sec.
210.1 Scope of part.
210.3 Applicability.
210.5 Definitions.
210.7 Responsibility for noise defective locomotives or rail cars.
210.9 Movement of a noise defective locomotive, rail car or consist of a locomotive and rail cars.
210.17 State or local enforcement of Federal Railroad Noise Emission Standards—qualified noise compliance inspector.
210.19 Waivers.
210.21 Penalty.

Subpart B—Inspection and Testing

210.23 Scope of subpart.
210.25 Noise testing and inspection.
210.27 Operation standards.
210.29 Measurement criteria and procedures.
210.31 Locomotive tests.
210.33 New locomotive certification.

AUTHORITY: Sec. 17, Pub. L. 92–574, 86 Stat. 1234 (42 U.S.C. 4916); § 1.49(p) of the regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(p).

Subpart A—General Provisions

§ 210.1 Scope of part.

This part prescribes minimum compliance regulations for enforcement of the Railroad Noise Emission Standards established by the Environmental Protection Agency in 40 CFR Part 201.

§ 210.3 Applicability.

(a) The provisions of this part apply to the total sound emitted by rail cars and locomotives operated by a common carrier as defined in 45 U.S.C. 22 under the conditions prescribed herein and in 40 CFR Part 201, including the sound produced by refrigeration and air conditioning units which are an integral element of such equipment, except:

(b) The provisions of this part do not apply to:

(1) Steam locomotives;

(2) Street, suburban or interurban electric railways unless operated as a part of the general railroad system of transportation;

(3) Sound emitted by a warning device, such as a horn, whistle or bell when operated for the purpose of safety;

(4) Special purpose equipment which may be located on or operated from rail cars; and

(5) As prescribed in 40 CFR 201.10, the provisions of 40 CFR 201.11 (a) and (b) do not apply to gas turbine-powered locomotives or any locomotive type which cannot be connected by any standard method to a load cell.

§ 210.5 Definitions.

(a) *Statutory definitions.* All terms used in this part and defined in the Noise Control Act of 1972 (Pub. L. 92–574, 86 Stat. 1234) have the definitions set forth in that Act.

(b) *Difinitions in standards.* All terms used in this part and defined in § 201.1 of the Railroad Noise Emission Standards, 40 CFR 201.1, have the definition set forth in that section.

(c) *Additional definitions:* As used in this part:

(1) "FRA" means the Federal Railroad Administration.

(2) "Administrator" means the Federal Railroad Administrator, the Deputy Administrator, or any official of the FRA to whom the Administrator has delegated authority to enforce the Act.

(3) "Consist of a locomotive and rail cars" means one or more locomotives coupled to a rail car or rail cars.

(4) "Noise defective" means the condition in which a locomotive, rail car or consist of a locomotive and rail cars is found to exceed the Railroad Noise Emission Standards, 40 CFR Part 201.

(5) "Standards" means the Railroad Noise Emission Standards, 40 CFR Part 201.

(6) "Inspector" means FRA regional Motive Power & Equipment Specialists, FRA Motive Power & Equipment Inspectors and State or local noise compliance inspectors designated and certified under § 210.17.

§ 210.7 Responsibility for noise defective locomotives or rail cars.

Any railroad that knows or has notice that a locomotive, rail car or a consist of a locomotive and rail cars that it is operating or testing is noise defective according to the criteria established in this part and in the Standards is responsible for compliance with this part. Subject to § 210.9, such railroad shall:

(a) Correct the noise defect; or

(b) Remove the noise defective locomotive or rail car from service.

§ 210.9 Movement of a noise defective locomotive, rail car or consist of a locomotive and rail cars.

A locomotive, rail cars or consist of a locomotive and rail cars that is noise defective may be moved no further than the nearest forward facility where the noise defective condition can be eliminated only after the locomotive, rail car or consist of a locomotive and rail cars has been inspected and been determined to be safe to move.

§ 210.17 State or local enforcement of the standards—qualified noise compliance inspectors.

(a) Any State or local jurisdiction that desires to enforce the Standards must so notify the FRA, and shall designate persons qualified to inspect and test locomotives or rail cars for defects prescribed by this part. Each person designated must be certified by the State or local jurisdiction and must carry official credentials stating his or her authority to conduct inspections and tests as prescribed in this part.

§ 210.19 Waivers.

(a) Any person may petition the Administrator for a waiver of compliance with any requirement in this part. A waiver of compliance with any requirement prescribed in the Standards, may not be granted under this provision.

(b) Each petition for a waiver under this section must be filed in the manner and contain the information required by 49 CFR Part 211.

(c) If the Administrator finds that a waiver of compliance applied for under paragraph (a) of this section is in the public interest and is consistent with railroad noise abatement and safety, he may grant a waiver subject to any conditions he deems necessary. Notice of each waiver granted, including a statement of the reasons therefor, will be published in the FEDERAL REGISTER.

§ 210.21 Penalty.

Any person who willfully or knowingly operates a locomotive or rail car in violation of the requirements of this part or of the Standards is liable to a penalty as prescribed in section 11 of the Noise Control Act of 1972 (Pub. L. 92–574, 86 Stat 1242).

Subpart B—Inspection and Testing

§ 210.23 Scope of subpart.

This subpart prescribes the compliance criteria concerning the requirements for inspection and testing of a locomotive, a rail car or a consist of a locomotive and rail cars.

§ 210.25 Noise inspection and testing.

(a) An inspector is authorized to perform a passby noise emission test as prescribed in the Standards, and in the procedures of this part, at any time, at any appropriate location, and without prior notice to the railroad for the purpose of determining whether a locomotive, rail car, or consist of a locomotive and rail cars is in compliance with the Standards.

(b)(1) An inspector is authorized to request that a locomotive, rail car or consist of a locomotive and rail cars together with appropriate railroad personnel be made available for a passby or stationary noise emission test as prescribed in the Standards, and in the precedures of this part, and to conduct such test, at a reasonable time and location, for the purpose of determining whether the locomotive, rail car or consist of a locomotive and rail cars is in compliance with the Standards.

(2) If the railroad has the capability to perform an appropriate noise emission test as prescribed in the Standards, and in the procedures of this part, an inspector is authorized to request the railroad to test the locomotives or rail cars. The railroad must perform the appropriate test as soon as practicable.

(3) The requests referred to in this paragraph must be in writing, must state the grounds upon which the inspector has reason to believe that the locomotive, rail car or consist of a locomotive and rail cars does not conform to the Standards, and must be presented to an appropriate operating official of the railroad.

(4) Testing or submission for testing is not required if the cause of the noise defect is readily apparent and the inspector verifies that it is corrected by the replacement of defective components or by instituting a normal maintenance or repair procedure.

(c)(1) An inspector is authorized to inspect or examine a locomotive, rail car or consist of a locomotive and rail cars operated by a railroad, or to request the railroad to inspect or examine the locomotive, rail car or consist of a locomotive and rail cars, whenever he has reason to believe that it does not conform to the requirements of the Standards.

(2) The reouest referred to in this paragraph must be in writing, must state the grounds upon which the inspector has reason to believe that the locomotive, rail car or consist of a locomotive and rail cars does not conform to the Standards, and must be presented to an appropriate operating official of the railroad.

(3) The inspection or examination referred to in this paragraph may be conducted only at recognized inspection points or scheduled stopping points.

(4) An inspector may request a railroad to conduct an inspection or examination of a rail car or consist of rail cars on the basis of an excessive noise emission level measured by a passby test. If, after such inspection or examination, no mechanical condition that would result in a noise defect can be found, and the inspector verifies that no such mechanical condition exists, the rail car or consist of rail cars may be continued in service.

(5) An inspector may request a railroad to conduct an inspection or examination of a locomotive on the basis of an excessive noise emission level measured by a passby test. If, after such inspection or examination, no mechanical condition that would result in a noise defect can be found, and the inspector verifies that no such mechanical condition exists, the locomotive may be continued in service.

§ 210.27 Operation standards.

The operation standards for the noise emission levels of a locomotive, rail car or consist of a locomotive and rail cars are prescribed in the Standards.

(a) Noise emission standards for locomotive operating under stationary conditions are contained in § 201.11 of the Standards.

(b) Noise emission standards for locomitives operating under moving conditions are contained in § 201.12 of the Standards. Measurements for compliance with the standards prescribed in § 201.12 of the Standards shall be made in compliance with the provisions of Subpart C of the Standards and the following:

(1) Consists of locomotives containing at least one locomotive unit manufactured prior to December 31, 1979, shall be evaluated for compliance in accordance with § 201.12(a) of the Standards, unless a locomotive within the consist is separated by at least 10 rail car lengths or 500 feet from other locomotives in the consist, in which case such separated locomotives may be evaluated for compliance according to their respective built dates.

(2) Consists of locomotives composed entirely of locomotive units manufactured after December 31, 1979, shall be evaluated for compliance in accordance with § 201.12(b) of the Standards.

(3) If the inspector cannot establish the built dates of all locomotives in a consist of locomotives measured under moving conditions, evaluation for compliance shall be made in accordance with § 201.12(a) of the Standards.

(c) Noise emission standards for rail cars operating under moving conditions are contained in section 201.13 of the Standards. If speed measurement equipment used by the inspector at the time of the measurement is not operating within an accuracy of 5 miles per hour, evaluation for compliance shall be made in accordance with § 201.13(2) of the Standards.

§ 210.29 Measurement criteria and procedures.

The parameters and procedures for the measurement of the noise emission levels are prescribed in the Standards.

(a) Quantities measured are defined in § 201.21 of the Standards.

(b) Requirements for measurement instrumentation are prescribed in § 201.22 of the Standards. In addition, the following calibration procedures must be utilized:

(1) (i) The sound level measurement system including the microphone must be calibrated and appropriately adjusted at one or more nominal frequencies in the range from 250 through 1000 Hz at the beginning of each series of measurements, at intervals not exceeding 1 (one) hour during continual use, and immediately following a measurement indicating a violation.

(ii) The sound level measurement system must be checked not less than once each year by its manufacturer, a representative of its manufacturer, or a person of equivalent special competence to verify that its accuracy meets the manufacturer's design criteria.

(2) An acoustical calibrator of the microphone coupler type designed for the sound level measurement system in use shall be used to calibrate the sound level measurement system in accordance with paragraph (1) (i) of this subsection. The calibration must meet or exceed the accuracy requirements specified in § 5.4.1 of the American National Standard Institute Standards, "Method for Measurement of Sound Pressure Levels," (ANSI S1.13–1971) for field method measurements.

(c) Acoustical environment, weather conditions and background noise requirements are prescribed in § 201.23 of the Standards; and in addition, measurement tolerances not to exceed 2dB(A) for a given measurement will be allowed to take into account the effects of the factors listed below and the interpretation of these effects by enforcement personnel:

(1) The common practice of reporting field sound level measurements to the nearest whole decibel; (2) Variations resulting from commercial instrument tolerances; (3) Variations resulting from the topography of the noise measurement site; (4) Variations resulting from atmospheric conditions such as wind, ambient temperature, and atmospheric pressure; and (5) Variations resulting from reflected sound from small objects allowed within the test site.

(d) Procedures for the measurement of locomotive and rail car noise are prescribed in § 201.24 of the Standards; and

(1) Accurate determination to within plus or minus 5 miles per hour of train speed (which may change during a passby) must be made as the train passes the microphone location, as defined in § 201.24 of the Standards, to determine the rail car compliance level specified in § 201.13(1) or (2) of the Standards.

(2) Locomotives and rail cars tested pursuant to the procedures prescribed

in this part and in the Standards shall be considered in noncompliance whenever the test measurement, minus the appropriate tolerance, exceeds the noise emission levels prescribed in §§ 201.11, 201.12, or 201.13 of the Standards, as appropriate.

§ 210.31 Locomotive tests.

(a) For load cell tests: (1) Each noise emission test shall begin after the engine of the locomotive has attained the normal cooling water operating temperature as prescribed by the locomotive manufacturer.

(2) Noise emission testing in idle or maximum throttle setting shall start after a 40 second stabilization period in the throttle setting selected for the test.

(3) After the stabilization period as prescribed in paragraph (2) of this subsection, the A-weighted sound level reading in decibels shall be observed for an additional 30 second period in the throttle setting selected for the test.

(4) The maximum A-weighted sound level reading in decibels that is observed during the 30 second period of time prescribed in paragraph (3) of this subsection shall be used for compliance purposes.

(b) The following data determined by any locomotive noise emission test conducted after December 31, 1976 shall be recorded in the "Remarks" section on the reverse side of Form FRA F 6180.49: (1) Location of the test; (2) Type of test; (3) Date and location of the test; and (4) The A-weighted sound level reading in decibels obtained during the passby test, or the readings obtained at idle throttle setting and maximum throttle setting during a load cell test.

(c) Any locomotive subject to this part that is found not to be in compliance with the Standards as a result of a passby test shall be subjected to a load cell test or another passby test prior to return to service, except that no such retest shall be required if the cause of the noise defect is readily apparent and is corrected by the replacement of defective components or by a normal maintenance or repair procedure.

(d) The last entry recorded on Form FRA F 6180.49 as required by paragraph (b) of this section shall be transcribed to a new Form FRA F 6180.49 when it is posted in the locomotive cab.

§ 210.33 New locomotive certification.

(a) A railroad shall not operate a locomotive built after December 31, 1979 unless the locomotive has been certified to be in compliance with the Standards.

(b) The certification prescribed in this section shall be determined for each locomotive model, by either: (1) Load cell testing in accordance with the criteria prescribed in the Standards; or (2) Passby testing in accordance with the criteria prescribed in the Standards.

(c) If passby testing is used under paragraph (b)(2) of this section, it shall be conducted with the locomotive operating at maximum rated horsepower output.

(d) Each new locomotove certified under this section shall be identified by a permanent badge or tag attached in the cab of the locomotive near the location of the inspection Form F 6180.49. The badge or tag must state: (1) Whether a load cell or passby test was used; (2) The date and location of the test; and (3) The A-weighted sound level reading in decibels obtained during the passby test, or the readings obtained at idle throttle setting and maximum throttle setting during a load cell test.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

SUBCHAPTER B—TAKING, POSSESSION, TRANSPORTATION, SALE, PURCHASE, EXPORTATION AND IMPORTATION OF WILDLIFE

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Determination That the Tan Riffle Shell is an Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rulemaking.

SUMMARY: The Director, U.S. Fish and Wildlife Service issues a rule which determines the tan riffle shell (*Epioblasma walkeri*) to be an Endangered species because of the likelihood that this mussel could become extinct within the foreseeable future.

DATES: The amendments will become effective on September 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director—Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240 (202–343–4646).

SUPPLEMENTARY INFORMATION: The Director, U.S. Fish and Wildlife Service (hereinafter the Director and the Service, respectively) hereby issues a rulemaking pursuant to Section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1531–1543; 87 Stat. 884: hereinafter the Act) which determines the tan riffle shell (*Epioblasma walkeri*) to be an Endangered species.

BACKGROUND

On September 26, 1975, the Service published a proposed rulemaking in the FEDERAL REGISTER (40 FR 44329) advising that sufficient evidence was on file to support a determination that the tan riffle shell was an Endangered species as provided for by the Act. That proposal summarized the factors thought to be contributing to the likelihood that this mussel could become extinct within the foreseeable future; specified the prohibitions which would be applicable if such a determination were made; and solicited comments, suggestions, objections and factual information from any interested person.

Section 4(b)(1)(A) of the Act requires that the Governor of each State, within which a resident species of wildlife is known to occur, be notified and be provided 90 days to comment before any such species is determined to be a Threatened species or an Endangered species. Letters were sent to the Governors of Virginia, Kentucky, and Tennessee on June 25, 1976, notifying them of the proposed rulemaking. Such letters were inadvertently not sent at the time of the proposed rulemaking in 1975.

SUMMARY OF COMMENTS AND RECOMMENDATIONS

Section 4(b)(1)(C) of the Act requires that a "* * * summary of all comments and recommendations received * * * be published in the FEDERAL REGISTER prior to adding any species to the List of Endangered and Threatened Wildlife."

In the September 26, 1975, FEDERAL REGISTER proposed rulemaking (40 FR 44329) and the related press release, all interested parties were invited to submit factual reports or information which might contribute to the formulation of a final rulemaking.

Comments were received from three States and one individual. In a letter dated July 19 from Governor Julian M. Carroll, the State of Kentucky did "not wish to register any opposition to the action" and considered the tan riffle shell to be restricted to the Red River, in Logan and Simpson Counties, Kentucky, in rather limited numbers. The State of Virginia, according to Earl J. Shiflet of the Office of the Governor in a letter dated July 14, 1976, did not have sufficient information available regarding the status of this mussel in Virginia to make a judgment as to whether it should be designated Endangered pursuant to the Act. However, this State did not believe that overharvesting was an immediate danger. The State of Tennessee, in a letter dated September 16, 1976, from Harvey Bray, Executive Director, Tennessee Wildlife Resources Agency, supported the listing of *Epioblasma walkeri* "based on its limited occurrence in the Clinch, Powell and Duck Rivers and its rapid rate of disappearance." They further recommended that the Department of the Interior "do all possible to implement, in cooperation with States, a realistic program aimed at water quality improvement as the prime means of effecting a recovery program for Endangered mussels and habitats; encourage designation of acceptable comprehensive classification and nomenclatural terms, and distribution and population data; and that immediate research be coordinated to determine management procedures (relating to impoundment effects, commercial and scientific mussel use, and to industrial, municipal, and agricultural practices) which will best assure perpetuation of these mussels."

The Service received a report on the status of *Epioblasma walkeri* from Dr. David H. Stansbery, Museum of Zoology, The Ohio State University, Columbus, Ohio, which resulted from contract 14–16–0008–755. This report (RF 37 12 Final No. 6, October 1976, The Ohio State University Research Foundation, 1314 Kinnear Road, Columbus, Ohio 43212) summarized the synonymy, taxonomic status,

V 42 163 AUG 23 77 UM

diagnostic characteristics, former distribution (a rather general distribution in medium small to large streams in both the Cumberland and Tennessee systems), the present distribution (Middle Fork Holston River above South Holston impoundment, Red River of the Cumberland system, Clinch River and the Duck River from Wilhoite Mill downstream to Columbia) and threats. Threats include sewage effluent from Marion, Chilhowie and other communities in the middle fork Holston. The TVA Columbia Dam, if completed, would inundate the entire Duck River population of the mussel.

CONCLUSION

After a thorough review and consideration of all information available, the Director has determined that the tan riffle shell is in danger of extinction throughout all or a significant portion of its range due to one or more of the factors described in Section 4(a) of the Act. This review amplifies and substantiates the description of those factors included in the proposed rulemaking (40 FR 44329). Those factors are as follows:

1. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The tan riffle shell is a pearly mussel and it exemplifies a well known characteristic of its genus (*Epioblasma*): It characteristically inhabits riffle areas of medium to large streams. Species adapted to live in such riffle areas are particularly vulnerable to power dams because of the voluminous, rapid water flow, as well as to pollution because of their large oxygen requirement. About a third of the three dozen *Epioblasma* species are presumed extinct.

The tan riffle shell formerly had a rather general distribution in medium small to large streams in both the Cumberland and Tennessee River systems. It is presently found only in the lower Red River of the Cumberland system in Kentucky and Tennessee, the middle fork of the Holston River in Virginia, possibly the Stones River in Tennessee where it would be very rare, the Duck River in Tennessee from Wilhoite Mill downstream to Columbia, and the Clinch River in Virginia and Tennessee where it is very rare. It is endangered in all of these rivers by pollution, including mine acid and municipal wastes. Pollution problems include low dissolved oxygen below Adairville and untreated effluent from a meat packing plant in the Red River system; mercury and lead in the middle fork of the Holston; low dissolved oxygen at Murfreesboro in the west fork Stones River; and lead, mercury, and a history of accidental spills of fly ash and sulfuric acid in the Clinch River. It is further endangered by channelization of the upper Clinch and by the TVA dam being constructed on the Duck River at Columbia. This dam will inundate and thereby extirpate the Duck River population.

Information on the mechanism by which physical and chemical factors jeopardize *Epioblasma* and other genera of mussels appeared in the "Proceedings of a Symposium on Rare and Endangered Molluscs of the U.S.", Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111, August 10, 1971, and "Greater Adaptability of Freshwater Mussels to Natural Rather than to Artificial Displacement" by Marc J. Imlay, which appeared in the *Nautilus* (1972, 86:76–79). In general, the mussels were demonstrated to be better adapted to naturally occurring stresses than to artificial ones. For example, 25 transplanted mussels (the result of dredging) lay on their sides and were disoriented in a stream where other mussels had reoriented after natural storms had washed them downstream.

Information on water quality appeared in material supplied by the Virginia State Water Control Board, Southwestern Regional Office; Division of Water Quality, Kentucky Department for Natural Resources and Environmental Protection; Proposed Criteria for Water Quality, Volume I, October 1973, U.S. Environmental Protection Agency, Washington, D.C. 20460; and Water Resources Data for Tennessee Water Year 1975. U.S. Geological Survey TN 75 1.

2. *Overutilization for commercial, sporting, scientific, or educational purposes.* This species appears on Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora because it is threatened with extinction and could enter into previously unregulated international commerce. The impact of this commerce (pearl button and Japanese cultured pearl industry) on the tan riffle shell, while significant, is relatively minor, however, compared to the impact on mussel species with thick shells.

3. *Disease or predation.* Not applicable for this species.

4. *The inadequacy of existing regulatory mechanisms.* No regulations currently exist pertaining to the protection and conservation of this species other than the prohibitions against international trade that apply to species such as *E. walkeri* which are on Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora. These regulations provide no protection against taking for domestic purposes.

5. *Other natural or manmade factors affecting its continued existence.* During the mid-1950s the Asian clam, *Corbicula manilensis*, was introduced into the Tennessee River system. *Corbicula* has spread throughout the Tennessee River system where it has replaced many beds of native mussels including the tan riffle shell. A square yard of bottom frequently contains hundreds of individual Asian clams. Information on *Corbicula* appeared in the "Proceedings of a Symposium on Rare and Endangered Molluscs of the U.S.", U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111, August 10, 1971.

EFFECT OF THE RULEMAKING

The effects of these determinations and this rulemaking include, but are not necessarily limited to, those discussed below. Endangered Species regulations already published in Title 50 of the Code of Federal Regulations set forth a series of general prohibitions and exceptions which apply to all Endangered species. The prohibited regulations referred to above, which pertain to Endangered species, are found at § 17.21 of Title 50 and, for the convenience of the reader, are reprinted below:

§ 17.21 Prohibitions.

(a) Except as provided in Subpart A of this part, or under permits issued pursuant to § 17.22 or § 17.23, it is unlawful for any person subject to the jurisdiction of the United States to commit, to attempt to commit, to solicit another to commit or to cause to be committed, any of the acts described in paragraphs (b) through (f) of this section in regard to any endangered wildlife.

(b) *Import or export.* It is unlawful to import or to export any endangered wildlife. Any shipment in transit through the United States is an importation and an exportation, whether or not it has entered the country for customs purposes.

(c) *Take.* (1) It is unlawful to take endangered wildlife within the United States, within the territorial sea of the United States, or upon the high seas. The high seas shall be all waters seaward of the territorial sea of the United States, except waters officially recognized by the United States as the territorial sea of another country, under international law.

(2) Notwithstanding paragraph (c)(1) of this section, any person may take endangered wildlife in defense of his own life or the lives of others.

(3) Nothwithstanding paragraph (c)(1) of this section, any employee or agent of the Service, any other Federal land management agency, the National Marine Fisheries Service, or a State conservation agency, who is designated by his agency for such purposes, may, when acting in the course of his official duties, take endangered wildlife without a permit if such action is necessary to:

(i) Aid a sick, injured or orphaned specimen; or

(ii) Dispose of a dead specimen; or

(iii) Salvage a dead specimen which may be useful for scientific study; or

(iv) Remove specimens which constitute a demonstrable but nonimmediate threat to human safety, provided that the taking is done in a humane manner; the taking may involve killing or injuring only if it has not been reasonably possible to eliminate such threat by live-capturing and releasing the specimen unharmed, in a remote area.

(4) Any taking pursuant to paragraphs (c)(2) and (3) of this section must be reported in writing to the United States Fish and Wildlife Service, Division of Law Enforcement, P.O. Box 19183, Washington, D.C. 20036, within 5 days. The specimen may only be retained, disposed of, or salvaged in accordance with directions from the Service.

"(5) Nothwithstanding paragraph (c)(1) of this section, any qualified employee or agent of a State Conservation Agency which is a party to a Cooperative Agreement with the Service in accordance with section 6(c) of the Act, who is designated by his agency for such purposes, may, when acting in the course of his official duties take Endangered Species, for conservation programs in accordance with the Cooperative Agreement, provided that such taking is not reasonably

anticipated to result in: (i) the death or permanent disabling of the specimen; (ii) the removal of the specimen from the State where the taking occurred; (iii) the introduction of the specimen so taken, or of any progeny derived from such a specimen, into an area beyond the historical range of the species; or (iv) the holding of the specimen in captivity for a period of more than 45 consecutive days."

(d) *Possession and other acts with unlawfully taken wildlife.* (1) It is unlawful to possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any endangered wildlife which was taken in violation of paragraph (c) of this section.

Example. A person captures a whooping crane in Texas and gives it to a second person, who puts it in a closed van and drives thirty miles, to another location in Texas. The second person then gives the whooping crane to a third person, who is apprehended with the bird in his possession. All three have violated the law—the first by illegally taking the whooping crane; the second by transporting an illegally taken whopping crane; and the third by possessing an illegally taken whopping crane.

(2) Notwithstanding paragraph (d)(1) of this section, Federal and State law enforcement officers may possess, deliver, carry, transport or ship any endangered wildlife taken in violation of the Act as necessary in performing their official duties.

(e) *Interstate or foreign commerce.* It is unlawful to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, and in the course of a commercial activity, any endangered wildlife.

(f) *Sale or offer for sale.* (1) It is unlawful to sell or to offer for sale in interstate or foreign commerce any endangered wildlife.

(2) An advertisement for the sale of endangered wildlife which carries a warning to the effect that no sale may be consummated until a permit has been obtained from the U.S. Fish and Wildlife Service shall not be considered an offer for sale within the meaning of this subsection.

The determination set forth in this final rulemaking also makes the tan riffle shell eligible for the consideration provided by Section 7 of the Act. That Section reads as follows:

"The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical."

The Director has prepared, in consultation with an ad hoc interagency committee, guidelines for Federal agencies for the application of Section 7 of the Act. Proposed regulations were published regarding Section 7 (42 FR 4868; January 26, 1977). When this rulemaking becomes effective, all Federal agencies will be required to meet their responsibilities under Section 7 of the Act, and where appropriate, utilize the consultation procedures contained in Section 7 guides and the proposed regulations.

Regulations which appear in Part 17, Title 50 of the Code of Federal Regulations were first published in the FEDERAL REGISTER of September 26, 1975 (40 FR 44412), and provide for the issuance of permits to carry out otherwise prohibited activities involving Endangered or Threatened species under certain circumstances.

NATIONAL ENVIRONMENTAL POLICY ACT

An environmental assessment has been prepared and is on file in the Service's Washington Office of Endangered Species. It addresses this action as it involves the tan riffle shell. The assessment and the public comments received on this rulemaking are the basis for a decision that these determinations are not major Federal actions which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969.

(Endangered Species Act of 1973 (U.S.C. 1531–1543; 87 Stat. 884).)

This final rulemaking was prepared by Dr. Marc J. Imlay, Office of Endangered Species.

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: May 10, 1977.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.

According, § 17.11 of Part 17 of Chapter 1 of Title 50 of the U.S. Code of Federal Regulations is amended as follows:

1. By adding the tan riffle shell to the list under "Clams" as indicated below:

Species			Range		Status	When listed	Special rules
Common name	Scientific name	Population	Known distribution	Portion of range where threatened or endangered			
Riffle shell, tan	*Epioblasma walkeri*	NA	Virginia, Tennessee, Kentucky.	Entire	E	27	NA

PART 21—MIGRATORY BIRD PERMITS

States Meeting Federal Falconry Standards

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service publishes a list of States where falconry laws have been determined by the Director to meet or exceed the minimum Federal standards. Any State may obtain a review and determination of its existing laws or regulations relating to falconry. Falconry may now be practiced in the States listed in 50 CFR 21.29.

DATE: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Danny M. Searcy, Special Agent, Division of Law Enforcement, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, telephone 202–343–9242.

SUPPLEMENTARY INFORMATION: In notices of proposed rulemaking dated July 30, 1973 (38 FR 20264), and April 4, 1974 (39 FR 12314), the Service issued proposed regulations which provided for the review and approval of State falconry laws. If a given State's laws were approved, the State would be listed in 50 CFR 21.29(k), and falconry permitted therein pursuant to a system of joint Federal-State permits. These regulations were finalized on January 15, 1976 (41 FR 2237). On December 28, 1976 (41 FR 56329), the time limit for a State to submit its laws for review and approval was extended until December 31, 1977.

Utilizing the criteria established in 50 CFR 21.29, the Director has now reviewed and approved the falconry laws of 25 States. In accordance with 41 FR 2237 and 41 FR 56329, upon publication of this Appendix in the FEDERAL REGISTER, the practice of falconry in the 25 States listed below shall be governed by 50 CFR 21.28, as amended, and § 21.29.

The primary author of this document is Mr. Ronald Swan, Office of the Solicitor, Department of the Interior.

Accordingly, the following list is hereby added to 50 CFR 21.29(k):

§ 21.29 Federal falconry standards.

PART 32—HUNTING

Opening of Iroquois National Wildlife Refuge, New York, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to hunting of Iroquois National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977, through February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Edwin Chandler, Iroquois National Wildlife Refuge, R.F.D. 1, Basom, New York, 14013, Telephone No. 716-948-5445.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of woodcock and crow on the Iroquois National Wildlife Refuge, New York, is permitted during the regular State open seasons, except on areas designated by signs as closed. This open area is shown on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158.

Hunting shall be in accordance with all State and Federal regulations covering the hunting of woodcock and crow.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A 107.

AUGUST 12, 1977.

WILLIAM C. ASHE,
Regional Director,
Fish and Wildlife Service.

[FR Doc.77-24338 Filed 8-22-77;8:45 am]

PART 32—HUNTING

Opening of Iroquois National Wildlife Refuge, New York, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to hunting of Iroquois National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977 through February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Edwin Chandler, Iroquois National Wildlife Refuge, RFD 1, Basom, New York, 14013, Telephone No. 716-948-5445

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of upland game birds and small game mammals, including foxes, opossoms, red squirrels, woodchucks is permitted during the respective State seasons except on areas designated by signs as closed. This open area comprising 10,383 acres is shown on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts, 02158. Hunting shall be in accordance with all State Regulations subject to the following special condition:

(1) A seasonal permit is required for the nighttime hunting of racoon. Permits may be obtained by applying in person at the refuge office.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, as are set forth in Title 50, Code of Federal Regulations, Part 32.

The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

WILLIAM C. ASHE,
Acting Regional Director,
Fish and Wildlife Service.

AUGUST 12, 1977.

[FR Doc.77-24339 Filed 8-22-77;8:45 am]

PART 32—HUNTING

Opening of Noxubee National Wildlife Refuge, Mississippi to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Noxubee National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: State Waterfowl Season.

FOR FURTHER INFORMATION CONTACT:

Travis H. McDaniel, Refuge Manager, Noxubee National Wildlife Refuge, Route 1, Box 84, Brooksville, Miss. 39739, telephone 601-323-5548.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuges.

Public hunting of ducks and coots on the Noxubee National Wildlife Refuge is permitted only on the area designated by the refuge manager as Green Timber Reservoir No. 1. The open area of 520 acres is delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State and Federal regulations governing the hunting of ducks and coots subject to the following special conditions:

1. Hunting will be permitted only on Mondays, Wednesdays, and Saturdays from one-half hour before sunrise to 12 noon during the State waterfowl hunting season.

2. The use of boats with electric motors is permitted within the hunting area.

3. The construction of blinds is not permitted.

4. Hunters will not be permitted to enter the hunting area sooner than 45 minutes before legal shooting hours.

5. No hunting may take more than 16 shootgun shells into the hunting area.

6. No shooting will be permitted from the levee or the open water area immediately adjacent to the levee.

7. All hunters are required to check in and out at the designated check station.

8. Only steel shot ammunition may be used. The possession or use of lead or other toxic shot is prohibited.

9. Permit required.

10. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas general generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 15, 1977.

HAROLD W. BENSON,
Acting Regional Director.

[FR Doc.77-24272 Filed 8-22-77;8:45 am]

PART 32—HUNTING

Opening of Savannah National Wildlife Refuge, Georgia to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Savannah National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Season to be set by State of Georgia.

FOR FURTHER INFORMATION CONTACT:

John P. Davis, Refuge Manager, Savannah National Wildlife Refuge Complex, P.O. Box 4623, Savannah, Ga. 31402, telephone 912-232-4321, ext. 415.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game bird hunting; for individual wildlife refuge areas.

Hunting is permitted on the Savannah National Wildlife Refuge, Georgia only on the areas designated as being open to hunting. These areas comprising 3,500 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, 17 Executive Park Drive NE. Atlanta, Ga. 30329. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Daily bag limits are the same as State regulations for ducks, coots, and snipe. Hunters are cautioned against killing, shooting at, or molesting any species of wildlife other than those listed.

2. Hunting will be permitted only on Thursday, Friday, and Saturday, from one-half hour before sunrise to 12 o'clock noon during the season set by State regulation.

NOTE.—Snipe season opens at different dates than ducks and coots but will close on the refuge on the same date.

3. Hunting will not be permitted in or on Front, Middle, and Back Rivers, nor closer than 50 yards to the shoreline of these rivers.

4. Hunters will not be permitted to enter the hunting area sooner than one and one-half hours before sunrise.

5. Only steel shot ammunition may be used, all lead shot shells are prohibited. Guns must be unloaded and cased or dismantled while being carried to and from the hunting area.

6. Only temporary blinds constructed of native materials are permitted. Hunters must build their own blinds and furnish their own boats and decoys.

7. Dogs used to retrieve waterfowl must be under control at all times.

8. Season permits must be carried on person while hunting. Permits may be obtained from the Refuge Manager in person or by mail.

9. Hunting questionnaires must be completed and returned to the Refuge Manager, Savannah National Wildlife Refuge, within 30 days following the end of the season.

10. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

SPECIAL INFORMATION

Since Savannah Refuge is located near the coast, the hunting area is subject to tidal fluctuations of 6 to 8 feet. Hunters are urged to be familiar with tide tables, carry adequate safety equipment, and exercise extreme caution in all boating and hunting activities.

The provisions of this special regulation supplements the regulations which govern hunting of wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 15, 1977.

HAROLD W. BENSON,
Acting Regional Director.

PART 32—HUNTING

Opening of Noxubee National Wildlife Refuge, Mississippi to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Noxubee National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Squirrel and Rabbit—October 29-November 12, 1977. Raccoon and Opossum—January 1-31, 1978. Quail and Rabbit—January 16-February 21, 1978. Turkey—March 25-April 5, 1978 and April 7-22, 1978.

FOR FURTHER INFORMATION CONTACT:

Travis H. McDaniel, Refuge Manager, Noxubee National Wildlife Refuge, Route 1, Box 84, Brooksville, Miss. 39739, telephone 601-323-5548.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of upland game on the Noxubee National Wildlife Refuge, Mississippi, is permitted on the area designated by signs as open to hunting. This open area is delineated on a map available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive NE., Atlanta, Ga. 30329. Hunting shall be in accordance with all State and Federal regulations subject to the following special conditions:

1. Squirrels and rabbits may be hunted October 29-November 12, 1977 on all areas of the refuge (except closed areas).

2. Quail may be hunted January 16-February 21, 1978. Rabbits may be hunted as an incidental species during the quail hunt. Only shotguns permitted during this hunt.

3. Raccoons and oppossums may be hunted January 1-31, 1978 with .22 caliber rimfire weapons only.

4. Turkey (Gobblers only) may be hunted March 25-April 5, 1978 and April 7-22, 1978. Limit of two turkeys per year.

5. Sunday hunting is prohibited.

6. Dogs are permitted during the quail, raccoon and opossum hunts only.

7. Turkeys killed must be checked at refuge headquarters.

8. Permits are required for all hunts and may be obtained at refuge headquarters.

9. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

10. The use of any Citizen's Band Radio devices to aid in the pursuit or taking of any game species is prohibited.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 15, 1977.

HAROLD W. BENSON,
Acting Regional Director.

PART 32—HUNTING

Opening of Piedmont National Wildlife Refuge, Georgia to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Piedmont National Wildlife Refuge is

V 42 163 AUG 23 77 UM V

compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Squirrel and quail: November 22, 1977 through February 28, 1978 on Tuesdays, Saturdays, and National Holidays.

FOR FURTHER INFORMATION CONTACT:

Ronnie A. Shell, Refuge Manager, Piedmont National Wildlife Refuge, Round Oak, Georgia 31080, telephone (912) 986-3651.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Hunting is permitted on the entire Piedmont National Wildlife Refuge, Georgia except on the areas designated by signs as being closed to hunting. This open area, comprising approximately 33,000 acres, is delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Species permitted to be taken: Bobwhite quail and gray squirrels only.

2. Open season: Quail and gray squirrels—November 22, 1977 thru February 28, 1978, on Tuesdays, Saturdays, and National Holidays. Hunters are permitted on areas open to quail and squirrel hunting from 30 minutes before sunrise until 30 minutes after sunset on the above cited hunting days.

3. No vehicular or horseback travel except on State and county roads.

4. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

5. Camping and fires are prohibited.

6. Dogs permitted for quail hunting, and one dog per party authorized for squirrel hunting.

7. Firearms limited to .22 caliber rimfire rifles and shotguns.

8. A refuge permit is required. An unlimited number of permits for the quail and squirrel hunts will be available at refuge headquarters Monday through Friday 8 a.m.-4:30 p.m. during the respective hunt period. Questionnaire on permit must be completed and returned to refuge office at close of season.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 15, 1977.

HAROLD W. BENSON,
Acting Regional Director.

PART 32—HUNTING

Opening of Catahoula National Wildlife Refuge, Louisiana, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to big game hunting of Catahoula National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 10, 1977, through November 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Stephen K. Joyner, Refuge Manager, Catahoula National Wildlife Refuge, P.O. Drawer LL, Jena, Louisiana 73142, telephone (318) 992-5261

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

White-tailed deer hunting is permitted on the Catahoula National Wildlife Refuge, Louisiana, only on the areas designated by signs as being open to hunting. These areas comprising 3,000 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive NE., Atlanta, Georgia 30329. Deer hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Bucks only—gun hunt; November 10-12, 1977.

2. Guns must be centerfire rifles.

3. Hunting hours: One-half hour before sunrise until one-half hour after sunset. Hunters may enter area 30 minutes prior to legal shooting hours and must exit 30 minutes after legal hours.

4. Permits: A refuge permit is required for all hunts.

5. Still hunting only. No dogs allowed. No permanent tree stands may be constructed. It is unlawful to drive a nail, spike, or other metal object into any tree or to hunt from any tree in which a metal object has been driven.

6. Required clothing: Every hunter must wear outer garmets consisting of at least 400 square-inches of daylight fluorescent orange colored material worn above the waistline.

7. No vehicles may be parked more than 50 yards from existing main roads. No ATV vehicles other than jeep type will be allowed. No vehicles with tires larger than 9.00x16" may be used.

8. Unmarked feral hogs may be taken by deer hunters.

9. All deer killed must be checked at a refuge checking station.

10. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB circular A-107.

Dated: August 15, 1977.

HAROLD W. BENSON,
Acting Regional Director.

PART 32—HUNTING

Opening of White River National Wildlife Refuge, Arkansas, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of White River National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: *Archery*-October 11-30; *Muzzleloading rifles*: October 28-29; *Gun*: November 14-15-16, 1977.

FOR FURTHER INFORMATION CONTACT:

Raymond R. McMaster, Refuge Manager, P.O. Box 308, DeWitt, AR 72042, telephone (501) 946-1468.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations: big game; for individual wildlife refuge areas.

Hunting is permitted on the White River National Wildlife Refuge, Arkansas, only on the areas designated by signs as being open to hunting. These areas comprising 90,000 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Species permitted to be taken: White-tailed Deer.

2. Bag Limit: One deer of either sex for archery and muzzle loader, one buck only for regular gun hunt.

3. Weapons—In accordance with State regulations.

4. Loaded guns are not permitted in vehicles or in camps. Shooting is not allowed from boats, vehicles, or roadways used by vehicles. Dogs and horses are not allowed and all vehicles must stay on regularly used roads and trails. Shooting hours are 30 minutes before sunrise to 30 minutes after sunset. Camping is permitted in designated areas. Hunters may enter the open hunting area at noon on the date preceding each hunt and must be out of the area by dark of the closing day. Fires may be built only at the campsites.

5. Deer killed during the gun hunting must be checked at one of the refuge check stations between 7:30 a.m. and 7 p.m.

6. Hunters may not return to the hunting area after they have killed a deer.

7. Permit required. No person is authorized to enter the hunting area without a permit. Submission of more than one permit application or applications containing false information is prohibited.

8. Each hunter under 18 years of age must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

9. Each gun deer hunter is required to wear a minimum of 500 square inches of daylight fluorescent orange above the waistline.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 15, 1977.

HAROLD W. BENSON,
Acting Regional Director.

PART 32—HUNTING

Opening of Wheeler National Wildlife Refuge, Alabama, to Big Game Hunting, White-Tailed Deer

AGENCY: Fish and Wildlife Service. Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to big game hunting, white-tailed deer, of Wheeler National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 22, 1977 through January 21, 1978, inclusive.

FOR FURTHER INFORMATION CONTACT:

Thomas Z. Atkeson, P.O. Box 1643, Decatur, Alabama 35602, (205) 353-7243.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Big game hunting for white-tailed deer is permitted on the Wheeler National Wildlife Refuge, Alabama, only on the areas designated by signs as being open to hunting. This area comprising approximately 4,500 acres and including all those parts of the Wheeler National Wildlife Refuge included within the Redstone Arsenal Reservation, is delineated on maps available at the Refuge Headquarters, Box 1643, Decatur, Alabama 35602, U.S. Fish and Wildlife Service Area Office, 200 East Pascagoula Street, Suite 490, Jackson, Mississippi 39201, and from the office of the Provost Marshal, Redstone Arsenal, Alabama. Big game hunting for white-tailed deer shall be in accordance with all applicable State and Federal regulations subject to the following conditions:

1. Only white-tailed deer may be taken.

2. Hunting shall be by daily permit only with permits obtained from the office of the Deputy Post Game Warden, Redstone Arsenal, Alabama.

3. Hunting will be limited to the periods October 22-23, October 29-30, November 5-6, November 12-13, 1977, archery only, either sex; November 19-20, November 26-27, December 3-4, December 10-11, December 17, December 26, 1977, January 2, January 7, January 14, January 21, 1978, guns only, either sex until State quota of 200 antlerless deer is reached after which hunts will be for antlered bucks only.

4. Weapons are limited to shotguns of gauges 20 to 12, loaded with single ball only and longbows with broadhead arrows.

5. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

6. Fluorescent orange caps and or vests or coats will be worn.

The provisions of this special regulation supplement the regulations which govern big game hunting for white-tailed deer on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 15, 1977.

HAROLD W. BENSON,
Acting Regional Director.

PART 32—HUNTING

Opening of Pungo National Wildlife Refuge, North Carolina to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Pungo National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: *Archery hunt:* September 19—October 5, 1977 *Shotgun and Primitive weapons:* October 11-13, 1977; October 17-19, 1977; and October 25-26, 1977

FOR FURTHER INFORMATION CONTACT:

John C. Fields, Refuge Manager, P.O. Box 267, Plymouth, North Carolina 27962, telephone (919) 793-2143.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Big game hunting is permitted on the Pungo National Wildlife Refuge, North Carolina, only on the areas designated by signs as being open to hunting. These areas comprising 7,000 acres for gun hunting and 9,000 acres for bow hunting are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Big game hunting shall be in accordance with all applicable state regulations subject to the following conditions:

1. Species and bag limit: One white-tailed deer per day; three per season.

2. Seasons and sex: (a) Bow and arrow only: either sex—September 19-October 5, 1977. (b) Shotguns and primitive weapons: either sex—October 11, 12, 13, 17, 18, 19, 25 and 26, 1977.

3. Hunting hours: Sunrise to sunset. All guns must be unloaded and bows unstrung at sunset.

4. Weapons: (a) Bow and arrow as provided for in State regulations. (b) Shotguns—20 gauge or larger used with rifled slugs or shot no smaller than No. 4 buckshot. (c) Primitive weapons are muzzleloading percussion cap or flintlock rifles.

5. Permits: (a) Gun hunters must have a valid permit issued by the U.S. Department of the Interior, Fish and Wildlife Service, as a result of a public drawing of advance applications. (b) Bow hunters must have a permit issued at the refuge.

6. Required clothing: Every gun hunter must wear outer garments consisting of at least 400 square inches of day-light fluorescent orange-colored material worn above the waistline.

7. Age limits: Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more

V 42163 AUG 23 77 UM

than two juveniles under his/her supervision.

8. Closed area: Unauthorized entry into any building or designated "Closed Area" is prohibited. No hunting is permitted within 200 yards of the refuge subheadquarters.

9. Transporting weapons: Weapons must be unloaded while being transported in or on a vehicle. Nocked arrows are considered loaded weapons.

10. Prohibited: Modern rifles, pistols, crossbows, dogs, fires, camping and littering.

11. Hunters shall not disturb, damage or destroy unharvested crops.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation on an Economic Impact Statement under Executive Order 11949 and OMB A-107.

Dated: August 15, 1977.

HAROLD W. BENSON,
Acting Regional Director.

PART 32—HUNTING

Opening of Wheeler National Wildlife Refuge, Alabama to Big Game Hunting, White-Tailed Deer

AGENCY: Fish and Wildlife Service. Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to big game hunting, white-tailed deer, of Wheeler National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 24 through November 5, 1977, inclusive.

FOR FURTHER INFORMATION CONTACT:

Thomas Z. Atkeson, P.O. Box 1643, Decatur, Alabama 35602, telephone 205/353-7243.

SUPPLEMENTARY INFORMATION:

§ 32.32 **Special regulations; big game; for individual wildlife refuge areas.**

Big game hunting for white-tailed deer is permitted on the Wheeler National Wildlife Refuge, Alabama, only on the areas designated by signs as being open to hunting. These areas comprising approximately 9,000 acres including all refuge area on the northern side of the Tennessee River from Rockhouse Landing eastward to the Redstone Arsenal boundary and all on the southern side of the river from Bluff City eastward to the eastern end of refuge, are delineated on maps available at the refuge headquarters and from the office of the Regional Director, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Big game hunting for white-tailed deer shall be in accordance with all applicable State regulations subject to the following conditions:

1. Special permits are required and are obtainable without charge at the refuge office.

2. Only white-tailed deer, either sex, may be taken, though no spotted fawns may be shot.

3. Only longbows and broadhead arrows may be used.

4. Hunters must wear fluorescent orange caps and/or vests or coats.

5. Dog use is not allowed.

6. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

The provisions of this special regulation supplement the regulations which govern big game hunting for white-tailed deer on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 15, 1977.

PART 32—HUNTING

Opening of Noxubee National Wildlife, Refuge, Mississippi to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Noxubee National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1-15, 1977; November 21-26, 1977; December 12-17; 1977; and January 9-14, 1978.

FOR FURTHER INFORMATION CONTACT:

Travis H. McDaniel, Refuge Manager, Noxubee National Wildlife Refuge, Route 1, Box 84, Brooksville, Mississippi 39739, telephone (601) 323-5548

SUPPLEMENTARY INFORMATION:

§ 32.32 **Special regulations; big game; for individual wildlife refuge areas.**

Public hunting of white-tailed deer on Noxubee National Wildlife Refuge, Mississippi, is permitted only on the area designated by signs and delineated on maps available at Refuge Headquarters and from the Office of the Regional Director, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Hunting shall be in accordance with all applicable State and Federal regulations governing the hunting of white-tailed deer, subject to the following special conditions:

1. Open Seasons: Archery hunt—October 1-15, 1977; Gun hunts—November 21-26, 1977 and January 9-14, 1978; Primitive weapons—December 12-17, 1977.

2. Weapons: Longbow and arrows; shotguns 20 gauge or larger and centerfire rifles, muzzleloading rifles and shotguns.

3. Sunday hunting prohibited.

4. Horses and dogs are not permitted.

5. All deer killed must be checked out at the designated refuge checking station of refuge headquarters.

6. Permits are required for all deer hunts.

7. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons, the ratio should be one adult to one juvenile but in no case should one adult have more than two juveniles under his/her supervision.

8. Man-drive deer hunting prohibited.

9. The use of any Citizen's Band Radio devices to aid in the pursuit or taking of any wildlife species is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

[7 CFR Part 657]

PRIME AND UNIQUE FARMLANDS

Important Farmland Inventory

AGENCY: U.S. Department of Agriculture, Soil Conservation Service.

ACTION: Proposed rule.

SUMMARY: This rule prescribes general guidelines for a national program of inventorying prime and unique farmland, as well as other farmlands of statewide or local importance. It includes specific criteria for the definition of prime farmland.

DATE: Comments must be received on or before October 7, 1977.

FOR FURTHER INFORMATION CONTACT:

R. M. Davis, Administrator, Soil Conservation Service, U.S. Department of Agriculture, P.O. Box 2890, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: On October 15, 1975, the Soil Conservation Service (SCS) issued Land Inventory and Monitoring (LIM) Memorandum-3, to establish SCS policy regarding a national program for inventorying important farmlands. For purposes of determining applicability, "inventorying" means to identify, locate, classify, and measure. LIM Memorandum-3 was developed in response to growing concern over the continuing reduction of the Nation's supply of prime and unique farmland and initiated a standard procedure for showing the kind, extent, and location of these important farmlands.

Prime and unique farmlands are important to the Nation as the base of high quality land that can provide present and future food and fiber supplies with the least use of energy, capital, and labor and with minimal environmental impact.

Prime farmland is the only category in the important farmland inventory that is defined on the basis of national criteria. These criteria are based on soil, water, and climatic factors which are readily available in soil surveys and other related resource information. Application of these criteria assure that the lands classified as prime farmland will meet similar criteria in all parts of the Nation. This is essential to provide uniformity of interpretation and establish a basis for National policy and program action affecting those lands that have the best physical and chemical qualities for the production of food, feed, forage, fiber, and oilseed crops. The definition of prime farmland is published here to fulfill the requirements of Section 701(20), Pub. L. 95-87, and for other purposes.

Unique farmlands and farmlands of statewide importance are identified by representatives of the Governor's office, agencies of the State Government, and others in cooperation with the SCS. Farmlands of local importance are identified if it has been determined by local agencies that this information is needed.

LIM Memorandum-3 is hereby revised to indicate new procedural responsibilities in making and publishing inventories of important farmlands. These new responsibilities provide SCS State Conservationists additional opportunities and flexibility to develop inventories more rapidly. There is no change in the specific criteria for prime farmland, but both the general definition and the specific criteria have been edited to provide a more clearly understandable definition for lay people and technical specialists.

The SCS plans to issue these regulations to provide information on the important farmland inventory and to serve as a standard reference for the definition and specific criteria for prime farmland. This is necessitated by the growing number of legislative and regulatory references to the term "prime farmland" and the need to provide a uniformly accepted definition.

Concern for the continuing loss of these lands to non-agricultural uses has resulted in legislative and regulatory efforts by different levels of Government attempting to reduce these losses. SCS policy and programs support these efforts in several ways. Making and keeping current an inventory of the important farmlands is one such way. Other SCS efforts include special evaluation of the impact of major Federal actions on prime farmlands. (See 7 CFR 650.8.) As other SCS policies or programs to protect prime and unique farmlands are developed, they will be published in this part.

Interested persons are invited to submit written comments, suggestions, data, or arguments as they desire. Comments should be submitted to:

Administrator, Soil Conservation Service, U.S. Department of Agriculture, P.O. Box 2890, Washington, D.C. 20013.

Written comments received on or before October 7, 1977, will be considered before any action is taken on this proposed rule.

Comments received before the closing date will be made available for examination by interested persons.

Dated: August 16, 1977.

WILLIAM M. JOHNSON,
Deputy Administrator for Technical Services, Soil Conservation Service.

(Catalog of Federal Domestic Assistance programs numbered 10.900 (Great Plains), 10.901 (Resource Conservation and Development), 10.902 (Soil and Water Conservation), 10.904 (Watershed Protection and Flood Prevention), and 10.905 (Plant Materials).)

657.4 SCS Responsibilities.
657.5 Identification of important farmlands.

AUTHORITY: 16 U.S.C. 590a-f, q; 7 CFR 2.62; Pub. L. 95-87; 42 U.S.C. 4321 et seq.

Subpart A—Important Farmland Inventory

§ 657.1 **Purpose.**

The Soil Conservation Service is concerned about any action that tends to impair the productive capacity of American agriculture. The Nation needs to know the extent and location of the best land for producing food, feed, fiber, forage, and oilseed crops. Farmlands, in addition to prime and unique farmlands, that are of statewide and local importance for producing these crops need to be identified.

§ 657.2 **Policy.**

It is SCS policy to make and keep current an inventory of the prime farmland and unique farmland of the Nation. This inventory is to be carried out in cooperation with other interested agencies at the national, State, and local levels of Government. The objective of the inventory is to identify the extent and location of important rural lands needed to produce food, feed, fiber, forage, and oilseed crops.

§ 657.3 **Applicability.**

Inventories made under this memorandum do not constitute a designation of any land area to a specific land use. Such designations are the responsibility of appropriate local and State officials.

§ 657.4 **SCS Responsibilities.**

(a) *State Conservationists.* Each State Conservationist is to:

V 42 163 AUG 23 77 UM

(1) Provide leadership for inventories of important farmlands for the State, county, or other subdivision of the State. Each is to work with appropriate agencies of State Government and others to establish priorities for making these inventories.

(2) Identify the soil mapping units within the State that qualify as prime farmland. Each is to invite representatives of the Governor's Office, agencies of the State Government, and others to identify farmlands of statewide importance and unique farmlands that are to be inventoried within the framework of this memorandum.

(3) Prepare a statewide list of:

(i) Soil mapping units that meet the criteria for prime farmland.

(ii) Soil mapping units that are farmlands of statewide importance if the criteria used were based on soil information.

(iii) Specific high-value food and fiber crops that are grown and, when combined with other favorable factors, qualify lands to meet the criteria for unique farmlands. Copies are to be furnished to Field Offices and to the Technical Service Centers (TSC's). (See 7 CFR 600.3, 600.6.)

(4) Coordinate soil mapping units that qualify as prime farmlands with adjacent States, including the States responsible for the soil series. Since farmlands of statewide importance and unique farmlands are designated by others at the State level, the soil mapping units and areas identified need not be coordinated among States.

(5) Instruct District Conservationists to arrange local review of lands identified as prime, unique, and additional farmlands of statewide importance by Conservation Districts and representatives of local agencies. This review is to determine if additional farmland should be identified to meet local decisionmaking needs.

(6) Make and publish each important farmland inventory on a base map of national map accuracy at an intermediate scale of 1:50,000 or 1:100,000. State Conservationists who need base maps of other scales are to submit their requests with justification to the Administrator for consideration.

(b) *Technical Service Centers.* Field Representatives (see 7 CFR 600.2(f)) are to provide requested technical assistance to State Conservationists in inventorying prime and unique farmlands. This includes reviewing statewide lists of soil mapping units that meet the criteria for prime farmlands and resolving coordination problems that may occur among States for specific soil series or soil mapping units.

(c) *National Office.* The Assistant Administrator for Field Services (see 7 CFR 600.2) is to provide national leadership in preparing guidelines for inventorying prime farmlands and for national statistics and reports of prime farmlands.

§ 657.5 Identification of important farmlands.

(a) *Prime farmland*—(1) *General.* Prime farmland is land that has the best combination of physical and chemical characteristics for producing food, feed, forage, fiber, and oilseed crops, and also available for these uses (the land could be cropland, pastureland, rangeland, forest land, or other land, but not urban built-up land or water). It has the soil quality, growing season, and moisture supply needed to economically produce sustained high yields of crops when treated and managed, including water management, according to modern farming methods. In general, prime farmlands have an adequate and dependable moisture supply from precipitation or irrigation, a favorable temperature and growing season, acceptable acidity or alkalinity, acceptable salt and sodium content, and few or no rocks. They are permeable to water and air. Prime farmlands are not excessively erodible or saturated with water for a long period of time, and they either do not flood or are protected from flooding. Examples of soils that qualify as prime farmland are Palouse silt loam, 0 to 7 percent slopes; Brookston silty clay loam, drained; and Tama silty clay loam, 0 to 5 percent slopes.

(2) *Specific criterial.* Prime farmlands meet the following criterial. Terms used in this section are defined in USDA publications: Soil Taxonomy, Agriculture Handbook 436; Soil Survey Manual, Agriculture Handbook 18; Rainfall-Erosion Losses from Cropland, Agriculture Handbook 282; and Saline and Alkali Soils, Agriculture Handbook 60.

(i) The soils have: (A) Aquic, udic, ustic, or xeric moisture regimes and sufficient available water capacity within a depth of 40 inches (1 meter), or in the root zone if the root zone is less than 40 inches deep to produce the commonly grown crops in 7 or more years out of 10; or

(B) Xeric or ustic moisture regimes in which the available water capacity is limited, but the area has developed irrigation water supply that is dependable (a dependable water supply is one in which enough water is available for irrigation in 8 out of 10 years for the crops commonly grown) and of adequate quality; or,

(C) Aridic or torric moisture regimes and the area has a developed irrigation water supply that is dependable and of adequate quality; and,

(ii) The soils have a temperature regime that is frigid, mesic, thermic, or hyperthermic (pergelic and cryic regimes are excluded). These are soils that, at a depth of 20 inches (50 cm), have a mean annual temperature higher than 32° F (0° C). In addition, the mean summer temperature at this depth in soils with an O horizon is higher than 47° F. (8° C); in soils that have no O horizon, the mean summer temperature is higher than 59° F (15° C); and,

(iii) The soils have a pH between 4.5 and 8.4 in all horizons within a depth of 40 inches (1 meter) or in the root zone if the root zone is less than 40 inches deep; and,

(iv) The soils either have no water table or have a water table that is maintained at a sufficient depth during the cropping season to allow food, feed, fiber, forage, and oilseed crops common to the area to be grown; and,

(v) The soils can be managed so that, in all horizons within a depth of 40 inches (1 meter) or in the root zone if the root zone is less than 40 inches deep, during part of each year the conductivity of the saturation extract is less than 4 mmhos/cm and the exchangeable sodium percentage (ESP) is less than 15; and,

(vi) The soils are not flooded frequently during the growing season (less often than once in 2 years); and,

(vii) The product of K (erodibility factor) x percent slope is less than 2.0, and the product of I (soil erodibility) X C (climatic factor) does not exceed 60; and,

(viii) The soils have a permeability rate of at least 0.06 inch (0.15 cm) per hour in the upper 20 inches (50 cm) and the mean annual soil temperature at a depth of 20 inches (50 cm) is less than 59° F (15° C); the permeability rate is not a limiting factor if the mean annual soil temperature is 59° F (15° C) or higher; and.

(ix) Less than 10 percent of the surface layer (upper 6 inches) in these soils consists of rock fragments coarser than 3 inches (7.6 cm).

(b) *Unique farmland*—(1) *General.* Unique farmland is land other than prime farmland that is used for the production of specific high value food and fiber crops. It has the special combination of soil quality, location, growing season, and moisture supply needed to economically produce sustained high quality and/or high yields of a specific crop when treated and managed according to modern farming methods. Examples of such crops are citrus, treenuts, olives, cranberries, fruit, and vegetables.

(2) *Specific characteristics of unique farmland.* (i) Is used for a specific high-value food or fiber crop.

(ii) Has a moisture supply that is adequate for the specific crop. The supply is from stored moisture, precipitation, or a developed irrigation system.

(iii) Combines favorable factors of soil quality, growing season, temperature, humidity, air drainage, elevation, aspect, or other conditions, such as nearness to market, that favor the growth of a specific food or fiber crop.

(c) *Additional farmland of Statewide importance.* This is land, in addition to prime and unique farmlands, that is of statewide importance for the production of food, feed, fiber, forage, and oilseed crops. Criteria for defining and delineating this land are to be determined by the appropriate State agency or agencies. Generally, additional farmlands of statewide importance include those that are nearly prime farmland and that economically produce high yields of crops when treated and managed according to modern farming methods. Some may produce as high a yield as prime farmlands if conditions are favorable. In some States, additional farmlands of statewide importance may include tracts of land that have been designated for agriculture by State law.

(d) *Additional farmland of local importance.* In some local areas there is concern for certain additional farmlands for the production of food, feed, fiber, forage, and oilseed crops, even though these lands are not identified as having national or statewide importance. Where appropriate, these lands are to be identified by the local agency or agencies concerned. In places, additional farmlands of local importance may include tracts of land that have been designated for agriculture by local ordinance.

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 430]

ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Proposed Energy Efficiency Improvement Target for Home Heating Equipment, Not Including Furnaces; Further Opportunity for Comment

AGENCY: Federal Energy Administration.

ACTION: Notice of further opportunity for public comment.

SUMMARY: The Federal Energy Administration gives notice of an extension of the deadline for submission of written comments concerning the proposed energy efficiency improvement target for home heating equipment, not including furnaces, which appeared at 36648 of the July 15, FEDERAL REGISTER. The new deadline is October 25, 1977. A second, public hearing will be held concerning this proposed target, at the time of the hearing on test procedures for vented home heating equipment, which will be proposed shortly.

DATES: Comments by October 25, 1977; hearing to be held on November 2, 1977.

FOR FURTHER INFORMATION CONTACT:

James A. Smith, Office of Conservation, Room 307—Old Post Office Building, 12th & Pennsylvania Ave., N.W., Washington, D.C. 20461, (202) 566-4635.

William J. Dennison, or Laurence J. Hyman, Office of the General Counsel, Room 7148—Federal Building, 12th & Pennsylvania Ave., N.W., Washington, D.C. 20461, (202) 566-9750.

SUPPLEMENTARY INFORMATION: The Federal Energy Administration (FEA) previously proposed an energy efficiency improvement target for home heating equipment, not including furnaces, and scheduled a public hearing concerning this target, to be held on August 19, 1977 (42 FR 36648, July 15, 1977). FEA intends to publish shortly proposed test procedures for vented home heating equipment. Publication of proposed test procedures for other types of appliances has preceded the proposal of targets for those appliances. FEA believes that reference to the test procedures for vented home heating equipment would permit more effective public comment on the proposed energy efficiency improvement target for home heating equipment. Therefore, FEA has extended the period for written comment concerning the target to October 25, 1977. Comments should continue to be sent to the address specified in the July 15, 1977, FEDERAL REGISTER notice. A public hearing concerning both the proposed test procedures and the proposed target will be held on November 2, 1977. The exact time and place of this hearing, and procedures for requesting an opportunity to speak, will be announced when the test procedures for vented home heating equipment are proposed. The August 19, 1977, hearing will be held as scheduled.

Issued in Washington, D.C., August 17, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

CERTIFICATION OF ANTIBIOTIC DRUGS

Revised Requirements for Submission of Requests for Batch Certification

Correction

In FR Doc. 77-20306, appearing at page 36492 in the issue of Friday, July 15, 1977, make the following changes:

1. The second line of the fourth full paragraph on page 36493 should read, "(c)(4) to require submission of the date".

2. The fourth complete word in the ninth line of the fifth full paragraph on page 36493 should read "test".

3. The eleventh to last line of the fifth full paragraph on page 36493 should be omitted.

PENSION BENEFIT GUARANTY CORPORATION

[29 CFR Part 2610]

VALUATION OF PLAN BENEFITS

Interim Regulation; Proposed Amendment

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Proposed Amendment to the Interim Regulation.

SUMMARY: This proposed rule prescribes the rates and factors to be used for valuing plan benefits under Title IV of the Employee Retirement Income Security Act of 1974 for plans that terminated on or after March 1, 1977, but before June 1, 1977. It is necessary because the PBGC has not yet published valuation rates and factors for plans that terminated during the period covered by the proposed amendment. The proposed amendment's effect is to provide notice of the rates and factors that will be used to value benefits provided under such plans.

DATES: Comments should be submitted on or before September 22, 1977.

ADDRESSES: Comments should be sent to: Office of the General Counsel, Pension Benefit Guaranty Corporation, Suite 7200, 2020 K Street NW., Washington, D.C. 20006. Copies of written comments will be available for examination in: Office of Communications, Pension Benefit Guaranty Corporation, Suite 7100, 2020 K Street NW., Washington, D.C., between the hours of 9 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT:

William E. Seals, Staff Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, D.C. 20006 202-254-4895

SUPPLEMENTARY INFORMATION: On November 3, 1976 the Pension Benefit Guaranty Corporation (the "PBGC") issued an interim regulation estabishing the methods for valuing plan benefits under Title IV of the Employee Retirement Income Security Act of 1974 (the "Act"). (41 FR 48484 et seq.). The regulation included an appendix containing rates and factors to be used to value benefits in plans that terminated on or after September 2, 1974, but before October 1, 1975. Subsequently, the PBGC adopted additional rates and factors for valuing benefits in plans that terminated on or after October 1, 1975, but before December 1, 1976. (42 FR 2678 et seq., 42 FR 32777 et seq.). On June 8, 1977, The PBGC published for comment in the FEDERAL REGISTER additional rates and factors for valuing benefits in plans that terminate on or after December 1, 1976, but before March 1, 1977 (42 FR 29318 et seq.). The PBGC has now developed rates and factors for valuing benefits in plans that terminate on or after March 1, 1977, but before June 1, 1977, and proposes to amend the interim regulation to add these factors.

Each person submitting comments on this proposal should include his/her name and address, identify this notice and give reasons for any recommmendation. The proposal may be changed in the light of comments received.

In consideration of the foregoing, it is proposed to amend Part 2610 of Chapter XXIV of Title 29, Code of Federal Regulations, by adding a new Table VIII to Appendix B to read as follows:

V 42 H 163 AUG 23 77 UM

VIII—THE FOLLOWING INTEREST RATES AND QUANTITIES USED TO VALUE DEFERRED ANNUITIES SHALL BE EFFECTIVE FOR PLANS THAT TERMINATE ON OR AFTER MARCH 1, 1977, BUT BEFORE JUNE 1, 1977.

I.—INTEREST RATE FOR VALUING IMMEDIATE ANNUITIES

An interest rate of 7 percent shall be used to value immediate annuities, to compute the quantity "G_T" in § 2610.6 and for valuing both portions of a cash refund annuity.

II.—INTEREST RATE FOR VALUING DEATH BENEFITS

An interest rate of 5 percent shall be used to value death benefits other than the decreasing term insurance portion of a cash refund annuity pursuant to § 2610.8.

III.—INTEREST RATES AND QUANTITIES USED FOR VALUING DEFERRED ANNUITIES

The following factors shall be used to value deferred annuities pursuant to § 2610.6:

(1) $k_1 = 1.06$
(2) $k_2 = 1.0475$
(3) $k_3 = 1.035$
(4) $n_1 = 8$
(5) $n_2 = 10$

(Secs. 4002(b)(3), 4041(b), 4044, 4062(b)(1)(A), Pub. L. 93-406, 88 Stat. 1004, 1020, 1025-27, 1029 (29 U.S.C. 1302(b)(3)), 1341(b), 1344, 1362(b)(1)(A).)

Issued at Washington, D.C., on this 10th day of August 1977.

RAY MARSHALL,
Chairman, Board of Directors,
Pension Benefit Guaranty Corporation.

Issued on the date set forth above, pursuant to a resolution of the Board of Directors authorizing its Chairman to issue same.

HENRY ROSE,
Secretary, Pension Benefit
Guaranty Corporation.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 95]

[Docket No. 21000]

CITIZENS RADIO SERVICE

Spurious and Harmonic Emissions From Class D Transmitters; Extension of Time

AGENCY: Federal Communications Commission

ACTION: Extension of Time to file Comments and Reply Comments

SUMMARY: An extension of time to file comments has been requested in Docket No. 21000. Because of the importance of this proceeding to both manufacturers and consumers, the Chief Engineer pursuant to his delegated authority is granting the request. No objections have been received.

DATES: Comments must be received on or before October 17, 1977; and Reply Comments by November 17, 1977

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT:

Frank Rose, Research and Standards Division, Office of Chief Engineer, (202) 632-7093.

SUPPLEMENTARY INFORMATION: In the matter of amendment of the Commission's Rules to address the matter of further attenuation of the spurious and harmonic emissions from Class D transmitters operating in the Citizens Radio Service under Part 95, (Docket No. 21000).

ORDER EXTENDING TIME AND FILE COMMENTS (42 FR 27629)

Adopted: August 16, 1977.

Released: August 17, 1977.

By the Chief Engineer:

1. A request for a further extension of time to file Comments in this proceeding has been received from the Consumer Electronics Group of the Electronic Industries Association.

2. Because of the technical nature of this proceeding, which requires testing and other studies by those commenting, the importance of this proceeding to both manufacturers and licensees, and the Commission's desire to have the most definitive responses possible, an extension of time from August 29, 1977 to October 17, 1977 for filing Comments and from September 28, 1977 to November 17, 1977 for filing Reply Comments is hereby ordered pursuant to the authority granted by § 0.241(d) of the Commission's Rules..

RAYMOND E. SPENCE,
Chief Engineer.

DEPARTMENT OF THE INTERIOR

Mining Enforcement and Safety Administration

[30 CFR Part 70]

COAL MINE HEALTH NOISE STANDARD

Objections Filed and Hearing Requested

AGENCY: Department of the Interior, Mining Enforcement and Safety Administration.

ACTION: Notice of Objections Filed and Hearing Requested.

SUMMARY: This is a notice that objections have been filed and a hearing requested for proposed amendments to 30 CFR Part 70, which would permit the use of noise dosimeters. The Secretary of Health, Education and Welfare will issue notice at a later date that will advise interested persons of the date and place set for the public hearing.

FOR FURTHER INFORMATION CONTACT:

Joseph Lamonica, Chief, Division of Health, Coal Mine Health and Safety, MESA, Room 830, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Va. 22203, 703-235-1358 or Vern Rose, Director of the Division of Criteria Documentation and Standards Development, NIOSH, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3680.

The comments and objections which have been filed may be examined at, or copies obtained from, either of the above offices.

SUPPLEMENTARY INFORMATION: On June 2, 1977, there was published in the FEDERAL REGISTER (42 FR 28151) a Notice of Proposed Rulemaking containing proposed amendments to 30 CFR Part 70. These proposed amendments will permit the use of integrating sound level meters (noise dosimeters) to meet the noise measurement requirements of Parts 70 and 71 of Title 30, CFR. The notice stated that comments, suggestions, objections and requests for a hearing were to be received on or before July 18, 1977.

Several comments, suggestions and objections were submitted to the Assistant Administrator, Coal Mine Health and Safety, MESA concerning the proposed regulations. The comments and suggestions were varied and ranged from approval to disapproval of the proposed regulations. While some comments stated that noise dosimeters would be inaccurate, others stated that their accuracy was high. The location of the dosimeter also received criticism, such as being located in a position which would be a hazard to the miner, as well as not being located in the "hearing zone" of the miner. Some commenters believed that tampering with the dosimeters could occur, resulting in false readings, since a qualified person could not always be present. Additionally, some commenters suggested that false noises and vibrations would cause inaccuracy of the dosimeter readings. One commenter stated that the tolerance of ±2 dBA can be realized only with a "non-man-worn instrument", while another questioned whether violations should be cited only when results exceed 132 percent, thus ignoring the −2 dBA tolerance. There were also comments that the cost would be too high to the mine operator and that the use of the dosimeter would not be helpful to the health of the miner. Some commenters observed that since the ANSI dosimeter standard has not yet been approved these regulations should not be finalized. Other commenters suggested changes in wording and definition.

Section 101(f) of the Federal Coal Mine Health and Safety Act of 1969

provides that after objections have been filed, the Secretary of the Interior shall publish in the FEDERAL REGISTER, a notice that objections have been filed and a hearing requested.

Notice is hereby given in accordance with section 101(f) of the Federal Coal Mine Health and Safety Act of 1969, that objections have been timely filed as well as requests for a hearing.

Pursuant to section 101(g) of the Act, the Secretary of Health, Education, and Welfare will, after publication of this notice in the FEDERAL REGISTER issue notice of, and hold, a public hearing for the purpose of receiving relevant evidence on the issues raised by the comments and objections which have been filed.

Dated: August 19, 1977.

ANTHONY RASPOLIC,
Assistant
Secretary of the Interior.

[FR Doc.77-24511 Filed 8-22-77;8:45 am]

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

SOIL SAMPLES

List of Approved Laboratories for Receipt of Certain Soil Samples

Correction

In FR Doc. 77-21830, appearing at page 38616 in the issue of Friday, July 29, 1977, make the following changes:

1. On page 38617, second column, 27th line, the state abbreviation at the end of the entry for Cook Associates should read, "CA".

2. On page 38618, third column, 17th to last line, between the words "County" and "Bureau" insert the word "Farm".

CIVIL AERONAUTICS BOARD

[Order 77-8-76; Dockets Nos. 31202, 31203]

KLM-ROYAL DUTCH AIRPLANES

Order Dismissing Complaints

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 17th day of August, 1977.

In the matter of westbound transatlantic 10,000 kg. specific and general commodity rates filed by KLM-Royal Dutch Airlines.

By tariff revisions filed July 22, 1977, for effectiveness August 21, 1977, KLM-Royal Dutch Airlines (KLM) proposes new specific commodity rates (SCR's) for Item 6799 (polyester foil on mill rolls, packed in crates) at 1.68 guilders per kg. from Amsterdam to New York; and reduced freight-all-kinds (FAK) container rates at 2.13 guilders per kg. from Amsterdam to New York. Both proposals would apply to consignments with a minimum weight of 10,000 kgs.[1]

Complaints against both filings have been submitted by Seaboard World Airlines, Inc. (Seaboard). In opposition to the Item 6799 SCR, Seaboard alleges that KLM's generation estimate of 200 tons per month from surface is grossly overstated, since the air rates would still be too far above the surface rate of 9.2 cents per kg. to be effective in attracting surface traffic to air, and according to U.S. Department of Commerce statistics, current surface traffic of this variety from the Netherlands to the United States amounts to only 69.2 tons per month; that the proposed rate, 16.75 cents per revenue ton-mile (RTM), is uneconomic since it falls well below the U.S. carriers' costs per RTM of 32.04 cents as well as their cost per available ton-mile (ATM) of 23.15 cents; that the KLM rate is aimed at a large Seaboard Brussels shipper, and KLM will truck the traffic 48 miles to Amsterdam; that Seaboard will lose over $1.5 million in revenue if it does not match the rate, and will suffer serious dilution if it does; and that KLM's proposal is at odds with the Board's established policy against undue reliance on SCR's over the Atlantic.

In its complaint against the 10,000 kg. FAK rate, Seaboard contends that the rate would be below cost at its yield of only 22.07 cents per RTM; that KLM's allegation of a need for reducing the minimum weight from 34 to 10 tons is fallacious since there are no westbound 34-ton rates now in effect from Amsterdam or adjacent markets; the KLM's undue reliance on pricing based on incremental costing of the bellies, designed to favor the combination carriers, will lead to the destruction of regular and frequent all-cargo service if endorsed by the Board; that the KLM rate, if approved, will quickly spread to neighboring markets such as Brussels and Paris; and that while the Board historically has taken the position that reduced high weightbreak rates must be tied to demonstrable carrier cost savings, KLM has made no statement as to the extent of cost savings which might justify its proposal, nor has it supported its claim that the rate will generate new traffic.

In support of its SCR filing, and in answer to Seaboard's complaint, KLM asserts that it was approached by shippers with a proposal to switch from surface to air transportation at the proposed rate; that the traffic is of very high density and thus quite attractive for air transport;[2] that the commodity is precisely described, is not specified elsewhere in current Amsterdam-Now York rates, and hence Seaboard's fears of diversion are unfounded; that the freight will not be trucked to Amsterdam and, in fact, Seaboard is now trucking it from Amsterdam to Brussels; that the complainant's reliance on Commerce Department data is misplaced since such figures do not include new business which will be reflected in future statistics; and that while Seaboard contends the rate would be uneconomic for it, this does not mean it would necessarily be below cost for KLM, and in fact Seaboard itself has on file similar SCR rate levels for other commodities from Brussels.

In its justification for the 10,000 kg. FAK container rates, KLM submits that the minimum weight level of 10 tons is more appropriate for the Dutch market, which does not warrant a minimum shipment size of 34 tons, and the rates will equalize the competitive position of the Dutch market versus the weaker currency countries; that the reduction in rates will divert enough traffic from surface to air to exceed any self-dilution which may occur; and that there is sufficient Amsterdam-New York capacity to absorb the expected increase in traffic.

Upon consideration of all relevant matters, the Board has concluded to dismiss the complaints.

Seaboard's complaint against the SCR for Item 6799 centers on its allegation that it will suffer massive diversion of existing traffic to the reduced rate, or alternatively serious revenue dilution if it chooses to match KLM's filing. However, the complainant has provided no information on the amount of such freight now carried or the rates at which it moves. If, as Seaboard alleges, the possibilities of generating new traffic are slight because of the large surface/air rate differential, then by the same token it appears likely that little of this traffic already moves by air and thus the diversion potential is also limited. While KLM's generation estimate may be somewhat high, and the Board believes KLM should have provided more information to support its generation forecast, Seaboard's estimates of diversion and dilution are based on equally vague and unsupported contentions. In these circumstances, where there appears to be some potential for generation of new traffic with little diversion of existing traffic, the Board prefers to give the benefit of the doubt to the proponent of the rate reduction.[3]

We will also dismiss the complaint against the proposed FAK container rate. By Order 76-12-98, December 16, 1976, the Board approved an IATA agreement which established 10,000 kg. SCR's, but stated its disappointment that the carriers had not adopted high weightbreak rates on a FAK basis. While we have some reservations about the reasonableness of the level of KLM's 10,000 kg. FAK container rate, nevertheless it should help reduce the undue reliance

[1] At the current exchange rate of $0.413 = 1 guilder, the SCR equals about 69.5 cents per kg., and the FAK rate, about 88.1 cents per kg.

[2] KLM states that the density of this traffic ranges from about 26 to 34 lbs. per cu. ft.

[3] Further, having dismissed complaints against an SCR filing by Trans World Airlines, Inc., (TWA) for similar Item No. 6113 (Plastic Film and Sheets) as well as other items from London to New York at an even lower yield than the rates proposed here, we are not prepared to take action against KLM's rate. See Order 77-4-154, April 29, 1977.

on specific commodity rates as well as promote containerization, both Board objectives of long standing. And as indicated above, the Board has permitted SCR container rates filed by TWA at considerably lower levels to become effective in the U.K.-U.S. market.

Seaboard notes that the yields from the KLM rates, at 16.75 cents per RTM for the SCR and 22.07 cents per RTM for the FAK container rate, would fall below the U.S. carriers' average unit cost per ATM of 23.15 cents. However, that cost figure, as well as Seaboard's own cost per ATM of 19.75 cents during the first quarter of 1977, reflect the average cost of transatlantic freighter operations in both directions. The proposed KLM rates would apply only in the westbound direction, where substantial excess capacity exists, such that the capacity portion of the costs attributable to freight carried under these tariffs would be considerably less than the average figure for total North Atlantic operations. The proposed rates have the potential for improving the economics of the carrier's service by generating additional revenue and ufilizing otherwise unused westbound capacity, and we will therefore permit them to become effective.

Accordingly, *it is ordered* That:

The complaints of Seaboard World Airlines, Inc., in Dockets 31202 and 31203 be dismissed.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[4]

PHYLLIS T. KAYLOR,
Secretary.

TRANSATLANTIC ROUTE PROCEEDING

Oral Argument

The Board has decided that, in view of the deadline set for it by the President, a new oral argument will be held in this proceeding.

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that oral argument in this proceeding is assigned to be held before the Board on August 31, 1977, at 9 a.m. (local time), in Room 1027, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C. The argument will be confined to the question of the bearing on the Board's July 13, 1976, decision of the Bermuda II Agreement and any other developments since July 13, 1976.

Each party which wishes to participate in the oral argument shall so advise the Acting Chief Administrative Law Judge, in writing, on or before August 25, 1977, together with the name of the person who will represent it at the argument.

[4] All Members concurred except Vice Chairman O'Melia who did not participate.

Dated at Washington, D.C., August 18, 1977.

HENRY M. SWITKAY,
Acting Chief
Administrative Law Judge.

[Order 77-8-71; Docket No. 28898]

TRANS-PROVINCIAL AIRLINES LTD.

Statement of Tentative Findings and Conclusions and Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 16th day of August, 1977.

In the matter of application of Trans-Provincial Airlines, Ltd. for renewal of a foreign air carrier permit pursuant to section 402 of the Federal Aviation Act of 1958.

By application filed February 19, 1976,[1] Trans-Provincial Airlines, Ltd. (TPA) requests renewal of its foreign air carrier permit[2] authorizing: (a) foreign air transportation of persons, property, and mail between the terminal point Prince Rupert, British Columbia, Canada, and the terminal point Ketchikan, Alaska, and (b) the performance of charter trips pursuant to Part 212 of the Board's Economic Regulations. The carrier requests that its permit be renewed for an indefinite period. On April 22, 1977, the carrier filed a petition requesting that its application be handled by show-cause procedures.

The Air Transport Services Agreement of January 17, 1966, between the Governments of the United States and Canada, as amended May 8, 1974, provides for scheduled servies by a Canadian carrier between Prince Rupert, British Columbia and Ketchikan, Alaska. The Government of Canada has designated Trans-Provincial Airlines to serve the Prince Rupert-Ketchikan route.[3]

By Order 74-2-79 the Board found that TPA was substantially owned and effectively controlled by nationals of Canada. The information provided by the record continues to support this finding. Approximately 90 percent of the issued stock is held by Canadian citizens. With the exception of one director who is a United States citizen, all thirteen directors and officers of TPA are Canadian citizens. Accordingly, it is tentatively found from the foregoing that TPA is owned and controlled by nationals of Canada.

In Order 74-2-79 the Board found that TPA met the fitness standards of the Act. The record continues to support a finding that the carrier is fit, willing, and able to continue providing the service for which renewed authority is sought. TPA has no history of formal violations of Board regulations and has not defaulted on its transportation commitments.

Normally permits of indefinite duration are awarded to designees under bilateral agreements. At the time TPA's permit was issued in 1974, however, the carrier's accident record showed ten accidents between 1968 and 1973 which had resulted in six deaths and four injuries. The duration of the carrier's permit was, therefore, limited to two years to give the Board an opportunity to reexamine the carrier's safety fitness. Since the permit was issued, the carrier's operations have resulted in no personal injuries or deaths. While the carrier has sustained minor damage to its aircraft on seven occasions, in most instances the damage was caused by the weather while the aircraft were stationary. In view of the carrier's improved safety performance, the record now supports a finding of safety fitness. We propose, therefore, to issue the carrier a permit of indefinite duration. We will require, however, that TPA report any future accidents to the Board. This will enable the Board to keep apprised of the carrier's accident record and to periodically reevaluate the carrier's safety fitness.

Following the issuance of TPA's permit, the Governments of the United States and Canada executed a Non-scheduled Air Service Agreement which governs the operation of charter flights by all U.S. and Canadian carriers. By Order 75-2-25, TPA was issued a charter permit of indefinite duration pursuant to that Agreement.[4] To grant the carrier authority here to conduct off-route charters pursuant to Part 212 of the Board's Economic Regulations would be duplicative of the charter authority possessed by TPA under its charter permit.[5] We will, therefore, omit all ancillary charter authority from the renewed route permit.

In view of the foregoing and all the facts of record, the Board tentatively finds:

1. That TPA is substantially owned and effectively controlled by nationals of Canada;

2. That it is in the public interest to renew the foreign air carrier permit of TPA authorizing the carrier, for a period of indefinite duration, to engage in foreign air transportation with rspect to persons, property, and mail between the terminal point Prince Rupert, British Columbia, Canada, and the terminal point Ketchikan, Alaska;

[1] A copy of the application has been transmitted to the President of the United States in accordance with the requirements of section 801 of the Act.

[2] Issued pursuant to Order 74-2-79, approved February 19, 1974.

[3] Diplomatic Note. No. ECT/607, date May 31, 1973.

[4] TPA is authorized by Board Order 75-2-25, effective February 6, 1975, to engage in charter foreign air transportation between any point or points in Canada and any point or points in the United States subject to conditions.

[5] By Order 74-11-154, approved by the President November 27, 1974, the Board required TPA to obtain prior approval of any on-route charter flights. The Board's intention in imposing the requirement was to make certain that any on-route charter flights would also be conducted pursuant to the carrier's charter permit issued under the Agreement.

V 42 163 AUG 23 77 UM

3. That the public interest requires that the exercise of the privileges granted by said permit shall be subject to the following condition:

The holder shall file with the Board a report of each accident which occurs while performing the scheduled services tentatively authorized by this order. For each accident, the report shall indicate the date, location, type of aircraft involved, cause, and the extent of property or aircraft damage. The report shall also state whether the accident resulted in any deaths or injuries. All reports shall be filed within 20 days after the accident occurs and marked to the attention of the Director, Bureau of International Affairs. Minor incidents of aircraft damage need not be reported. In the event no accidents occur during any calendar year, the carrier shall file a report indicating that result within 30 days after the end of that calendar year.

4. That TPA is fit, willing, and able properly to perform the above-described foreign air transportation and to conform to the provisions of the Act and the rules, regulations, and requirements of the Board thereunder;

5. That except to the extent granted herein, the application of Trans-Provincial Airlines, Ltd. in Docket 28898 should be denied;

6. That an evidentiary hearing is not required in the public interest; and

7. That renewal of Trans-Provincial Airlines' foreign air carrier permit is not a "major federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, and will not be inconsistent with the policy objectives of the Energy Policy and Conservation Act of 1975 (EPACA),[6]

Accordingly, it is ordered that:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein, and why the foreign air carrier permit issued to Trans-Provincial Airlines, Ltd. by Order 74-2-79, should not, subject to the approval of the President pursuant to section 801 of the Act, be renewed for a period of indefinite duration;

2. Any interested person having objection to the issuance, without hearing, of an order making final the tentative findings and conclusions stated herein shall file a statement of objections, supported by evidence within 21 days after the adoption of this order. If an evidentiary hearing is requested, the objection should state in detail why such hearing is considered necessary and what relevant and material facts would be expected to be established through such hearing which cannot be established in written pleadings;

3. If timely and properly supported objections are filed, further consideration will be accorded the matters and issues raised by the objections before further action is taken by the Board;[7]

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived, and the Board may proceed to enter an order in accordance with the tentative findings and conclusions set forth herein; and

5. Copies of this order shall be served upon Trans-Provincial Airlines, Ltd., Alaska Airlines, Western Air Lines, and the Ambassador of Canada in Washington, D.C.

This order will be published in the FEDERAL REGISTER and will be transmitted to the President.

By the Civil Aeronautics Board.[8]

PHYLLIS T. KAYLOR,
Secretary.

SPECIMEN PERMIT

PERMIT TO FOREIGN AIR CARRIER (AS AMENDED)

TRANS-PROVINCIAL AIRLINES, LTD.

Is hereby authorized, subject to the provisions hereinafter set forth, the provisions of the Federal Aviation Act of 1958, and the orders, rules, and regulations issued thereunder, to engage in foreign air transportation (except charter foreign air transportation) with respect to persons, property, and mail, as follows:

Between the terminal point Prince Rupert, British Columbia, Canada, and the terminal point Ketchikan, Alaska.

The holder shall conform to the airworthiness and airman competency requirements prescribed by the Government of Canada for Canadian international air service.

This permit shall be subject to all applicable provisions of any treaty, convention, or agreement affecting international air transportation now in effect, or that may become effective during the period this permit remains in effect, to which the United States and Canada shall be parties.

The holder shall not commence scheduled service between any of the points authorized herein, except pursuant to an initial tariff setting forth rates, fares, and charges no lower than rates, fares, or charges that are then in effect for any U.S. air carrier engaged in the same foreign air transportation.

By accepting this permit, the holder waives any right it may possess to assert any defense of sovereign immunity from suit in any action or proceeding instituted against the holder in any court or other tribunal in the United States (or its territories or possessions) based upon any claim arising out of operations by the holder under this permit.

This permit shall be subject to the condition that the holder shall keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to liability limitations of the Warsaw Convention and the Hague Protocol approved by Board Order E-23680, May 13, 1966, and a signed counterpart of any amendment or amendments to such agreement which may be approved by the Board and to which the holder becomes a party.

The holder (1) shall not provide foreign air transportation under this permit unless there is in effect third-party liability insurance in the amount of $1,000,000 or more to meet potential liability claims which may arise in connection with its operations under this permit, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the third-party liability insurance provided, and (2) shall not provide foreign air transportation with respect to persons unless there is in effect liability insurance sufficient to cover the obligations assumed in CAB Agreement 18900, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the passenger liability insurance provided. Upon request, the Board may authorize the holder to supply the name and address of an insurance syndicate in lieu of the names and addresses of the member insurers.

The exercise of the privileges granted hereby shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This permit shall be effective on ---------- Unless otherwise terminated at an earlier date pursuant to the terms of any applicable treaty, convention, or agreement, this permit shall terminate (1) upon the effective date of any treaty, convention, or agreement, or amendment thereto, which shall have the effect of eliminating the route hereby authorized from the routes which may be operated by airlines designated by the Government of Canada, or (2) upon the effective date of any permit granted by the Board to any other carrier designated by the Government of Canada in lieu of the holder hereof, or (3) upon the termination or expiration of the Air Transport Services Agreement of January 17, 1966, between the Government of the United States and the Government of Canada as amended by an exchange of notes signed May 8, 1974; *Provided, however*, That clause (3) of this paragraph shall not apply if, prior to the occurrence of the event specified in clause (3), the operation of the foreign air transportation herein authorized becomes the subject of any treaty, convention, or agreement to which the United States and Canada are or shall become parties.

In Witness Whereof, the Civil Aeronautics Board has caused this permit to be executed by the Secretary of the Board, and the seal of the Board to be affixed hereto, on the ----------.

Secretary.

(SEAL)

Issuance of this permit to the holder approved by the President of the United States on ---------- in Order ------.

[FR Doc.77-24367 Filed 8-22-77;8:45 am]

[6] Since no new services are to be performed, there will be no material increase in the utilization of fuel.

[7] Since provision is made for the filing of objections to this order, petitions for reconsideration will not be entertained.

[8] All Members concurred.

GULF OF MEXICO FISHERY MANAGEMENT COUNCIL

Partially Closed Meeting

Notice is hereby given of a meeting of the Gulf of Mexico Fishery Management Council established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265).

The Gulf of Mexico Fishery Management Council has authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to Alabama, west coast of Florida, Louisiana, Mississippi, and Texas. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plants with respect to the fisheries within its area of authority prepare comments on foreign fishing applications and conduct public hearings.

The meeting will be held Wednesday, Thursday and Friday, September 7, 8 and 9, 1977, in the Executive Room II of the Ramada Inn, 1011 South Akord, Dallas, Texas. The meeting will convene at 1:30 p.m. on September 7, and adjourn at about noon on September 9, 1977. The daily sessions will start at 8:30 a.m. and adjourn at 5 p.m. except as otherwise noted. The meeting may be extended or shortened depending on progress on the agenda.

PROPOSED AGENDA

SEPTEMBER 7

1. Management plans.
2. Personnel and administration categories.
3. Review of foreign fishing applications, if any.

SEPTEMBER 8

1. Closed session to discuss proposals by potential contractors in a negotiated procurement for the preparation of draft fishery management plans.

SEPTEMBER 9

1. Other fishery management business.

A closed session is planned for one day on September 8, 1977, to discuss pro-

posals by potential contractors in a negotiated procurement for the preparation of draft fishery management plans.

The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined, on August 18, 1977 pursuant to 5 U.S.C. 552b(c) (4), (6), and (9) (B), the agenda item covered in closed session should be exempt from the provisions of the Act relating to open meetings and public participation. (A copy of the determination is available for public inspection and copying.)

The meeting will be open to the public (except the closed session) and there will be seating for a limited number of public member available on a first-come, first-served basis.

Members of the public having an interest in specific items for discussion are also advised that agenda changes are, at times, made prior to the meeting. To receive information on changes, if any, made to the agenda, interested members of the public should contact on or about August 29, 1977:

Mr. Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Florida 33609.

At the discretion of the Council, interested members of the public may be permitted to speak at times which will allow the orderly conduct of Council business. Interested members of the public who wish to submit written comments should do so by addressing the Executive Director at the above address. The public is permitted to file written statements at any time before or after the meeting. However, to receive due consideration and to facilitate inclusion of these comments in the record of the meeting, typewritten statements should be received within 10 days after the close of the Council meeting.

WINIFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

MID-ATLANTIC FISHERY MANAGEMENT COUNCIL AND ITS SCIENTIFIC AND STATISTICAL COMMITTEE

Meeting Date Change

Notice is hereby given of a change in dates of the September 12–15, 1977, meeting of the Mid-Atlantic Fishery Management Council and its Scientific and Statistical Committee as published in the FEDERAL REGISTER, Vol. 42, No. 156 on Friday, August 12, 1977.

The meetings of the Council and Committee are now scheduled to be held concurrently on September 27–28, 1977. They will convene at 9 a.m. and adjourn at approximately 3 p.m. each day.

The agenda for both meetings will remain unchanged. These meetings are open to the public, and public seating will be available on a first-come, first-served basis. There will be approximately 30 seats for the meetings.

Dated: August 18, 1977.

WINFRED H. MEIBOHM,
Acting Deputy Director,
National Marine Fisheries Service.

SOUTH ATLANTIC FISHERY MANAGEMENT COUCIL

Supplemental Notice of Public Meeting and Public Hearing

Notice was given in the FEDERAL REGISTER on July 18, 1977 (42 FR 36857) of meetings scheduled by the South Atlantic Fishery Management Council for the purpose of providing an opportunity for public input and to serve as a fact-finding mechanism relative to development of a fishery management plan for the domestic and foreign billfish fishery. An additional meeting has been scheduled as follows:

August 31, 1977, Stewart, Florida, Holiday Inn, 1209 South Federal Highway, 7:30 p.m. to 10 p.m.

Notice was also given in the FEDERAL REGISTER on July 29, 1977 (42 FR 38625) of hearings to provide an opportunity for public comment on a draft environmental impact statement for the proposed implementation of a preliminary fishery management plan for the Atlantic Foreign Pelagic Longline Fishery (billfishes and sharks). The draft environmental statement was prepared by NOAA. Hearings were scheduled concurrently with the South Atlantic Fishery Management Council meetings on a fishery management plan for billfish. A supplemental hearing will be held in Stewart, Florida on August 31, 1977 at the time and place listed above.

Dated: August 18, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL

Statement of Organization, Practices, and Procedures

Pursuant to Section 302(f)(6) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), each Regional Fishery Management Council is responsible for determining its organization and prescribing its practices and procedures for carrying out its functions under the Act in accordance with such uniform standards as are prescribed by the Secretary of Commerce. Further, each Council must publish and make available to the public a statement of its organization, practices, and procedures. As required by the Act, the South Atlantic Fishery Management Council has prepared and is hereby publishing its Statement of Organization, Practices, and Procedures.

Dated: August 15, 1977.

JOSEPH W. SLAVIN,
Acting Associate Director,
National Marine Fisheries Service.

STATEMENT OF ORGANIZATION PRACTICES AND PROCEDURES

1. NAME OF COUNCIL

South Atlantic Fishery Management Council.

2. LOCATION OF OFFICES

The principal office of the South Atlantic Fishery Management Council is located in the South Park Building, 1 South Park Circle, Charleston, South Carolina, 29407.

3. LEGAL AUTHORITY

Legal authority for the Council is found in the Fishery Conservation and Management Act of 1976 (Public Law 94-265, § 302 (a)(3)). Additional authority which governs actions of the Council is found in the Federal Advisory Committee Act (Public Law 92-463).

4. PURPOSES

The purposes for the South Atlantic Fishery Management Council are as follows:

a. To prepare fishery management plans or amendments thereto with respect to each fishery within the geographic area of authority of the Council, and submit those plans or amendments to the Secretary of Commerce for approval and implementation. (§ 302(h)(1).)

b. To prepare along with any fishery management plan or amendments, proposed regulations deemed necessary and appropriate to carry out the plan or amendments and to submit these to the Secretary of Commerce. (§ 303(c).)

c. To prepare and transmit, within 45 days of receipt, comments to the Secretary of Commerce on any application for foreign fishing which is forwarded to the Council, along with suggested conditions of restrictions. The Council will consider the comments of any interested person in fulfilling this function. (§ 302(h)(2).)

d. In the event the Secretary of Commerce shall disapprove all or part of a plan or amendment to a plan submitted by the South Atlantic Fishery Management Council, the Council shall at the Secretary's request attempt to change such plan or amendment to satisfy the Secretary's objections and resubmit the plan within 45 days of receipt. (§ 304(a)(2).)

e. To ensure appropriate comment by members of the public through the conduct of public hearings. Such hearings shall permit, within reason, all interested persons; especially those in the geographical area concerned; to be heard in the development of fishery management plans and amendments to such plans and in the administration and implementation of the Fishery Conservation and Management Act of 1976. (§ 302(h)(3).)

f. To submit reports to the Secretary of Commerce, including an annual report by February 1 of each year concerning Council activities in the preceding calendar year. (§ 302(h)(4).)

g. To review assessments and specifications of optimum yield and of allowable foreign fishing continually, and to revise those assessments and specifications as appropriate. (§ 302(h)(5).)

h. To conduct the following additional activities that are necessary and appropriate.

(1) To prepare and submit to the Secretary of Commerce, annual budgets and work plans in the form of grant proposals.

(2) To accept contributed personnel, special studies or direct funds from states within the South Atlantic region or from other sources.

(3) select a Chairman and Vice-chairman from among the voting members. (§ 302(3)(2).)

(4) To appoint and assign duties to an Executive Director and an administrative staff. (§ 302(f)(1).)

(5) To make application to the Secretary of Commerce for such administrative and technical support services as are necessary. (§ 302(f)(5).)

(6) To seek from the Secretary of State relevant information concerning foreign fishing and international fishery agreements. (§ 302(f)(5).)

(7) To establish a Scientific and Statistical Committee and other advisory panels as necessary and appropriate to the development and amendment of fishery management plans. (§ 302(g)(1)(2).)

(8) To conduct any other activities which are required by or provided for in the Fishery Conservation and Management Act of 1976 or which are necessary and appropriate to the foregoing functions. (§ 302(h)(6).)

5. COMPOSITION

The South Atlantic Fishery Management Council consists of representatives of North Carolina, South Carolina, Georgia, and Florida. There are 17 Council members, 13 of these are voting members. Of the voting members 8 are appointed by the Secretary of Commerce for 3 year terms. The other 5 voting members are the principal state officials with the marine fishery management responsibility, or their designees and the Regional Director of the National Marine Fisheries Service for the Southeast Region or his designee. The non-voting members of the Council are: the Southeast Regional Director of the U.S. Fish and Wildlife Service or his designee; the Commander, Seventh Coast Guard District, or his designee; the Executive Director of the Atlantic States Marine Fisheries Commission, or his designee; and a representative of the U.S. Department of State or his designee.

6. OFFICERS AND TERMS OF OFFICE

The Council elects annually from among the voting members, by majority vote of the voting members present and voting a Chairmand and a Vice-chairman, who serve for a one year term ending August 10, or until their successors have been duly elected. Elections are held at the first meeting of the Council after August 10th.

7. STAFF

a. Composition: The Council appoints an Executive Director and such additional staff as it deems necessary.

b. Functions: The Executive Director is the chief administrative Officer of the Council and reports to the Council through the Council Chairman. As directed by the Council, he is responsible for the day to day operations of the Council and its staff. He serves as the principal staff officer to each committee and advisory panels of the Council. Subject to Council regulations, he may assign duties and delegate authority to the Council staff.

c. Employment Practices:

(1) *Scope.* This section shall govern employment practices by the South Atlantic Fishery Management Council unless specifically modified by federal legislation or funding requirements.

(2) *Status of Employees.* The South Atlantic Fishery Management Council is a quasi-public non-profit organization funded by a grant from the United States Department of Commerce. Members of the Council and its employees are not federal employees and are not subject to federal benefits or Civil Service Regulations.

(3) *Personnel Administration.* The Executive Director shall be responsible for the day to day administration of the Council staff. He reports to the Council on personnel matters through the Personnel Committee. Staffing, salary and wage administration, hours of work, etc., are included in a more detailed statement available at the Council office.

(4) *Personnel Committee.* The Personnel Committee is a standing committee of the Council. It shall consist of at least three Council members appointed by the Chairman. One member is designated by the Chairman to act as committee chairman. The Personnel Committee is responsible to the Council for the administration of these regulations.

(5) *Standards of Conduct.*

.01 *Political Activity.* No employee of the Council shall use his or her official authority or influence derived from his or her position with the Council for the purpose of interfering with or affecting the result of an election to or a nomination for any national, state, county, or municipal elective office.

No employee of the Council shall be deprived of employment, position, work, compensation, or benefit provided for or made possible by the Act on account of any political activity or lack of such activity in support of or in opposition to any candidate or any political party in any national, state, county, or municipal election or on account of his or her political affiliation.

No Council member or employee shall pay, or offer, of promise, or solicit, or receive from any person, firm, or corporation, a contribution of money or anything of value either as a political contribution or a personal emolument in consideration of either support, or the use of influence, or the promise of support, or influence in obtaining for any person, any appointive office, place or employment under the Council.

.02 *Financial Interest.* No employee of the Council shall have a direct or indirect financial interest that conflicts with the fair and impartial conduct of his or her Council duties.

.03 *Use of Information.* No Council member or employee of the Council shall use or allow the use, for other than official purposes, of information obtained through or in connection with his or her Council employment which has not been made available to the general public.

.04 *Improper Conduct.* No Council member or employee of the Council shall engage in criminal, infamous, dishonest, notoriously immoral or disgraceful conduct prejudicial to the Council.

.05 *Use of Council Property.* No Council member or employee of the Council shall use Council property on other than official business. Such property shall be protected and preserved from improper or deleterious operation or use.

(6) *Equal Employment Opportunity.*

.01 *Policy.* It is the policy of the South Atlantic Fishery Management Council that neither race, religion, color, creed, national origin, sex, age, political affiliation, nor physical disability is to be considered in the:

Recruitment and employment of new employees of the Council.

Promotion, demotion, transfer, lay-off, termination, or selection of employees of the Council for training and development.

Establishment of rates of pay including the awarding of salary adjustments and merit salary increments.

The Council will be bound by the standards contained in Executive Order 11246, as administered by the U.S. Department of Commerce.

.02 *Appeal Procedure.* Any applicant for employment or any employee who believes that employment, promotion, training, transfer, salary adjustment or merit salary increment was denied him or that demotion, transfer, lay-off or termination was forced on him, because of his race, religion, color, creed, national origin, sex, age, political affiliation, or physical disability may appeal directly to the Council.

8. STANDING COMMITTEES OF COUNCIL MEMBERS

a. The following standing committees have been established by the South Atlantic Fishery Management Council:

(1) *Finance Committee.*

(2) *Personnel Committee.*

b. The composition of the standing committees of the Council are as follows:

(1) *Finance Committee.* The Finance Committee is composed of at least three members appointed by the Chairman. One member is designated by the Chairman to chair the committee.

(2) *Personnel Committee.* The Personnel Committee is composed of at least three members appointed by the Chairman. One member is designated by the Chairman to chair the committee.

c. The standing committees of the Council function as follows.

(1) *Finance Committee.* The Finance Committee prepares for Council approval the annual budget and grant application. It reviews on a regular basis all Council expenditures and reports to the Council.

The committee approves the award of all contracts entered into by the Council. Subject to federal regulations, the Finance Committee may recommend to the Council the transfer of funds from one budget item to another.

(2) *Personnel Committee.* The Personnel Committee is responsible for the administration of the Council's employment practices.

9. MEETINGS AND HEARINGS

a. Frequency: The Council is required by regulation to meet in plenary session at least once a quarter. In addition the Council meets at the call of the Chairman or upon request of a majority of the voting members.

Meetings of the Council may be plenary sessions, working groups, or individually. Meetings held individually are subject to the Council's public hearing procedures.

Council advisory bodies shall meet as frequently as necessary, with the approval of the Council Chairman.

All Council meetings, hearings and meetings of advisory bodies shall be held only after adequate notice has been given according to applicable law.

b. Duration: Council meetings will generally begin on the fourth Tuesday and continue through Thursday of that week. They may however vary in duration depending upon the agenda. Meetings of advisory bodies and public hearings will vary in duration. Exact duration of Council meetings will be contained in published public notices.

c. Location: Council meetings will be held throughout the 4 states composing the South Atlantic Region. In addition, hearings may be held in other states, if that geographic area is affected by Council action. In selecting meeting sites the Council will consider public access.

d. Agendas or Orders of Business: Public notice of Council meetings shall contain agendas or orders of business. The Council may by majority vote suspend an agenda or order of business and proceed to other items or discuss an item not appearing on the agenda or order of business.

V 42 163 AUG 23 77 UM

e. Minutes: Detailed minutes are kept of all Council meetings. Summary minutes will be prepared for all opening portions of Council meetings. Persons or organizations desiring copies of Council minutes should contact the Council's Executive Director.

When the Council or a member meets for hearing purposes an accurate record will be maintained of the participants and their views. Such a record will be maintained as a part of the Council's official records and shall be available for public inspections.

f. General Rules of Procedure: Unless modified in this SOPP the Council will follow Roberts Rules of Order Newly Revised.

g. Hearing Procedure: The Council will follow the following procedure when conducting public hearings.

(1) *Scope of Rules.* These rules shall apply to all public hearings held by the Council pursuant to the requirements of Public Law 94–265 (16 USC 1852).

(2) *When Required.* Public hearings will be held during the development of Fishery Management Plans. The Council may in its discretion hold such hearings at any time and from time to time during the development of a Fishery Management Plan.

The Council may not submit a Fishery Management Plan to the Secretary of Commerce without first receiving public comments on the plan through a public hearing.

The Council may when it deems necessary hold public hearings with respect to the administration and implementation of the Fishery Conservation and Management Act of 1976.

(3) *Location.* Public hearings conducted pursuant to these rules shall be held in the geographic area deemed by the Council to be the most concerned with the proposed action.

The council may in its discretion hold public hearings in several locations when the proposed action is one that affects many areas of the South Atlantic Region.

(4) *Presiding Officer.* When a public hearing is conducted at a scheduled Council meeting the Chairman or his designee shall act as presiding officer.

When a public hearing is conducted with less than the full Council participating, the Council shall designate one voting member to act as presiding officer.

(5) *Powers and Duties of the Presiding Officer.* The presiding officer at the hearing shall have complete control of the proceedings including: extensions of time requirements, recognition of speakers, time allotments for presentations, the right to question speakers, direction of the discussion and management of the hearing. The presiding officer, at all times, will take care that each person participating in the hearing is given a fair opportunity to present views, data and comments.

(6) *Record of Proceedings.* A record will be maintained subject to the provisions § 9e. above. Records will be available for public inspection at the Council offices during regular office hours.

(7) *Public Notice.* Public notice of hearings shall be given in the manner prescribed by 50 CFR 601.24(c)(3) and by such other means as the Council may determine necessary to assure that interested parties are aware of the opportunity to make their views known.

(8) *Content of Notice.* Public notice shall include a summary of the subject matter of the hearing; the time and place for the hearing; and a statement that written comments may be received until 10 days following the close of the hearing. Where management plans are to be discussed the notice shall also set forth where copies may be obtained and at what cost.

h. Authority of the Chair. Unless modified in this SOPP the authority of the chair will be governed by Roberts Rules of Order Newly Revised.

10. ADVISORY PANELS

The Scientific and Statistical Committee was chartered on March 18, 1977 and the Advisory Panel was chartered on April 20, 1977. Copies of the charters are available in the Council headquarters.

11. ORGANIZATION OF MANAGEMENT PLAN DEVELOPMENT TEAM

a. Organization: Management plan development teams shall be working teams of State, Federal, and non-government specialists. A planning team will be established for each management unit which will be the subject of a planning effort. The planning teams will report to the Council through the Executive Director.

b. Practices and Procedures: Planning teams will be established by the Council. The Scientific and Statistical Committee may recommend to the Council persons who should serve on each planning team. Each team shall have a team leader or chairman. The team will meet or consult as needed with the appropriate advisory panel and the Scientific and Statistical Committee, with coordination being provided by the Executive Director. The Council will be informed of progress periodically. The team shall develop alternative management plans and shall thoroughly evaluate the effects of each in terms of objectives or criteria determined by the Council. The planning team shall conduct its planning and evaluation effort in such a way as to satisfy the Fishery Conservation and Management Act requirements. On completion of the initial planning project, the set of alternatives will be transmitted through the Executive Director to the Scientific and Statistical Committee and the appropriate panel for review and comment. Comments will be made to the Council. The Council will evaluate these comments and, if necessary, refer the plan back to the planning team for further work. The revised plans will be submitted to the Council. When the Council is satisfied, it will sponsor public hearings to solicit additional inputs from those groups or individuals who might be affected by future regulatory action. Prior to holding public hearings on these alternatives, the Council will distribute copies widely so that all interested parties have an opportunity to review and consider the alternatives, from which the Council will be making a selection. After consideration of public comments, the planning team shall make such revision of the alternatives as the Council deems necessary and shall draft proposed regulations. Upon final adoption of selected alternatives, the Council shall transmit the plan and an associated environmental assessment or draft Environmental Impact Statement to the Secretary of Commerce for promulgation of implementing regulations.

c. Balance Among Criteria.

(1) *Focused Responsibility.* The organization structure of the Council clearly relates the decision making responsibility of the Council; the advisory nature of planning teams, advisory panels, and the Scientific and Statistical Committee; and the coordination responsibilities of the Executive Director.

(2) *Administrative Simplicity.* The organization of the major units of the Council is among major functional lines, with clear lines of authority between and within individual units.

(3) *Flexibility.* There is sufficient flexibility in the structure to allow for variations within separate units to accommodate changes in priorities or conditions. For example, the Council has chosen to establish separate fishery related advisory panels rather than one large, multi-fishery advisory panel because the former can be established and terminated in accordance with planning efforts and representation can be more selective.

(4) *Independence and Relevance of Science.* The Scientific and Statistical Committee is a separate unit in the Council's organizational structure, and Committee members have been selected on the basis of scientific expertise in several disciplines. This will assure that the Council receives independent and objective scientific advice on alternative management planning teams would comprise representatives of diverse disciplines and interests, and these teams would present plan alternatives and evaluations for Council considerations. In this manner, planning teams will not make judgements as to whether a particular plan is "right" or "wrong", and evaluations should be complete and objective.

(5) *Quality of Scientific and Technical Information.* As indicated, the Council has insured the integrity and independence of science through the organizational structure chosen. Further, selection of individuals to serve on the Scientific and Statistical Committee and the planning teams will be based on expertise and skills, thus assuring that the Council will receive high quality information.

(6) *Minimum Cost.* The Council believes the Structure is the most cost-effective means to carry out its functions. Under this structure fishery planning teams and advisory panels are temporary units which will function until a plan for the specific fishery has been developed and implemented. This approach provides resources for the planning effort without creating large and permanent planning teams or advisory panels. Resources can be assigned in accordance with shifts in priorities. Specialized resources can be obtained readily when necessary rather than being permanently retained at high costs.

12. PROCUREMENT

The Council will contract for services to be provided by other government agencies, educational institutions, profit and non-profit organizations. Detailed procurement procedures have been approved by the Council and are available for review in the Council headquarters. These procurement procedures provide for agreements and orders for procurement, or disposal, of supplies and services. It includes awards and notices of award; fixed-fee, cost, cost-plus-a-fixed-fee, negotiated, or incentive type contracts; letter contracts; and purchase orders. Topics covered are formal advertising; sole source procurements; award; contract types; contract administrations; protests, contract disputes, and appeals; and code of conduct.

ROUGH-TOOTHED DOLPHIN

Prohibition of Take Incidental to Commercial Fishing Operations

AGENCY: National Marine Fisheries Service, Commerce.

ACTION: Notice of prohibition of take of rough-toothed dolphin incidental to commercial fishing operations.

SUMMARY: A prohibition on taking rough-toothed dolphin is being implemented due to the fact that the quota established in 1977 for rough-toothed dolphin has been exceeded.

DATES: Effective August 30, 1977, rough-toothed dolphin may not be taken incidental to fishing operations pursuant to the general permit issued to the American Tunaboat Association, Category 2; Encircling Gear, Yellowfin Tuna Purse Seining.

ADDRESSES: Observer records may be reviewed at the Southwest Regional Office, Office of the Director, 300 South Ferry Street, Terminal Island, California.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Marine Mammal Program Manager, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C. 20235. Telephone: 202–634–7461.

SUPPLEMENTARY INFORMATION: In the permit issued to the American Tunaboat Association for 1977, a limit of five (5) rough-toothed dolphin mortalities was stipulated. That limit has been exceeded based on reports of National Marine Fisheries Service observers. In accordance with 50 CFR 216.24(d)(2)(i)(A) notice of the date when the prohibition on further taking is hereby published.

If at the time the net skiff is released from the vessel attached to the net at the start of a set no rough-toothed dolphin are observed in the herd of porpoise upon which the set is being made, the fact that rough-toothed dolphin are subsequently encircled or killed in the course of completing that set will not be cause for issuance of a notice of violation or assessment of penalty; provided that all procedures required by the applicable regulations have been followed. This policy is being implemented because there are circumstances where an unintentional and accidental taking occurs due to the difficulty of identifying different species and stocks, or due to error in attempting identification particularly when small numbers are interspersed in a larger group of animals.

The number of rough-toothed dolphin encircled or killed will be recorded and this policy will be reviewed periodically in light of its effects on the rough-toothed dolphin population.

Dated: August 17, 1977.

WINFRED H. MEIBOHM,
Acting Deputy Director,
National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Defense Communications Agency

SCIENTIFIC ADVISORY GROUP

Closed Meeting

The DCA Scientific Advisory Group will hold a closed meeting on 16 September 1977. The 16 September meeting will be at the Defense Communications Agency, Director's Conference Room at Headquarters, Defense Communications Agency, 8th Street and South Courthouse Road, Arlington, Va.

The agenda item will be AUTOSEVOCOM II and group discussions.

Any person desiring information about the advisory group may telephone (Area Code 202–692–1765) or write Chief Scientist, Associate Director, Technology, Headquarters, Defense Communications Agency, 8th Street and South Courthouse Road, Arlington, Va. 22204.

This meeting is closed because the material to be discussed is classified requiring protection in the interest of National Defense. (Freedom of Information Act, 5 U.S.C. 552b(c)(5).)

MARGARET E. ANDERSON,
Committee Management Officer.

Department of the Air Force

ADVISORY COMMITTEE ON AIR FORCE HISTORICAL PROGRAM

Meeting

AUGUST 8, 1977.

The Advisory Committee on the Air Force Historical Program will meet at the James Forrestal Building, Washington, D.C., on September 15–16, 1977.

The purpose of the meeting is to examine the mission, scope, progress, and productivity of the Air Force Historical Program and make recommendations thereon for the consideration of the Secretary of the Air Force.

The meeting will be open for public attendance, and will begin at 9:30 a.m. on both dates, in Room 8E–069, James Forrestal Building. Among the topics on the tentative agenda are: Air Force Historical Progress and Problems, Contract Histories, Organizational Changes, Personnel Plans, and Current Status of Historical Projects.

If additional information is desired, contact Lt. Col. Charles N. Wood, USAF, Executive Office of Air Force History, HQ USAF (AF/CHO), Washington, D.C., telephone 693–7394.

VAN L. CRAWFORD,
Deputy Director of Administration.

Office of the Secretary

DEFENSE SYSTEMS MANAGEMENT COLLEGE

Board of Visitor's Meeting

A meeting of the Board of Visitors of the Defense Systems Management College will be held in Building 202, Fort Belvoir, VA. on Tuesday, October 4, 1977, from 8:30 a.m. until 5 p.m. The agenda will include a review of the course offerings and discussion of DSMC operations, educational policies, and plans. The meeting is open to the public; however, because of limitations on space available, allocation of seating will be made on a first-come, first-served basis. Persons desiring to attend should call the DSMC Director, Department of Administration, Operations, & Support (703–664–1314) to reserve a seat as far in advance as possible.

Dated: August 18, 1977.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of Assistant Secretary of Defense (Comptroller).

[FR Doc.77-24330 Filed 8-22-77;8:45 am]

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

HIGH ENERGY PHYSICS ADVISORY PANEL

Meeting

AUGUST 18, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act, the High Energy Physics Advisory Panel (HEPAP) will meet September 19–20, 1977, at the Brookhaven National Laboratory, Upton, New York. The meeting will be held in the North Room of the Brookhaven Center. Discussion of organizational matters concerned with the meeting will occur from 9 a.m. to 10 a.m. on September 19, with regular agenda items scheduled from 10 a.m. through 5:45 p.m. The portion of the meeting which will be open to the public on September 20 will convene from 9 a.m. to 11:30 a.m.

The Panel's consideration will include a review of the research program and developmental activities at the Alternating Gradient Synchrotron (AGS) and the Intersecting Storage Accelerator (ISABELLE); equipment for major experiments at the Positron-Electron (PEP), the Fermi National Accelerator Laboratory (Fermilab), the Cornell Electron Storage Ring (CESR), the Zero Gradient Synchrotron (ZGS), and the ISABELLE; results of the July 1977 meeting of the US/USSR Joint Coordinating Committee on Research in the Fundamental Properties of Matter; budget status of the national program in high energy physics; and a discussion of recent new particle discoveries.

In addition to the public sessions, an executive session of the Panel is scheduled. The executive session will occur at approximately 11:30 a.m. on September 20 and continue throughout the end of the meeting at 4:30 p.m. Topics to be discussed at the executive session are possible construction and shutdown of some facilities to be included in the FY 1979 budget.

I have determined, in accordance with subsection 10(d) of Pub. L. 92–463 that this executive session will involve information, the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action, which falls within exemption 9B of 5 U.S.C. 552b(c).

Any nonexempt material that may be discussed at this session will be inextricably intertwined with the discussion of exempt material and no further separation is practical. The public interest will be served by closing such portion of the meeting as it is essential to protect such information.

V 42 163 AUG 23 77 UM

The Chairman is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements on the topics for discussion may do so by mailing 25 copies thereof, postmarked, if possible, no later than September 8, 1977, to the Executive Secretary, High Energy Physics Advisory Panel, Dr. Ernest Coleman, Division of High Energy and Nuclear Physics, U.S. Energy Research and Development Administration, Washington, D.C. 20545. Minutes of the meeting will be kept open for 30 days for receipt of written statements for the record.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement, and shall set forth reasons justifying the need for such oral statements and their usefulness to the Panel. To the extent that the time available for the meeting permits, the Panel will receive oral statements during a period of not more than 30 minutes at an appropriate time, chosen by the Chairman.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Panel, who is empowered to apportion the time available among those selected by him to make oral statements.

(d) Information as to the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted, can be obtained by a prepaid telephone call on September 15, 1977, to the office of the Executive Secretary of the Panel on (301) 353-3624 between 8:30 a.m. and 5 p.m. Eastern Time.

(e) Questions at the meeting may be asked only by members of the Advisory Panel.

(f) Seating for the public will be made available on a first-come, first-served basis.

(g) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the course of the meeting, will be permitted both before and after the open portions of the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(h) Copies of minutes of public sessions will be made available for copying, following their certification by the Chairman, in accordance with the Federal Advisory Committee Act, at the U.S. Energy Research and Development Administration's Public Document Room, 20 Massachusetts Avenue, N.W., Washington, D.C., upon payment of all charges required by law.

HARRY L. PEEBLES,
Deputy Advisory Committee Management Officer.

CIBA-GEIGY CORP., ET AL.

Filing of Pesticide Petitions

The Environmental Protection Agency has received the following petitions for consideration.

PP 7F1983. Ciba-Geigy Corp., PO Box 11422, Greensboro, N.C. 27409. Proposes amending 40 CFR 180.298 by establishing a higher tolerance for residues of the insecticide methidation (0,0-dimethyl phosphorodithioate, S-ester with 4-(mercaptomethyl)-2-methyl 1-Δ-1,3,4-thiadiazolin-5-one) in or on the raw agricultural commodities alfalfa and alfalfa hay at 12.0 part per million (ppm). Proposed analytical method for determining residues is by gas chromatography employing flame photometric detection. PM12 (202-426-9425).

PP 7F1984. Ciba-Geigy Corp., Proposes amending 40 CFR 180.289 by establishing a tolerance for residues of the insecticide methidation (0,0-dimethyl phosphorodithioate, S-ester with 4-(mercaptomethyl)-2-methoxy-Δ 2-1,3-4-thiadiazolin-5-one in or on the raw agricultural commodities pome and stone fruits at 0.05 ppm. Proposed analytical method for determining residues is by using gas chromatography employing flame photometric detection and thin-layer chromotography. PM12 (202/426-9425).

Interested persons are invited to submit written comments on any petitions to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. Inquiries concerning specific petitions may be directed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone at the numbers cited. Written comments should bear a notation indicating the number of the petition to which the comments pertain. Comments may be made at any time while a petition is pending before the Agency. All written comments filed will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: August 18, 1977.

E. I. DUPONT DE NEMOURS & CO., ET AL.

Filing of Pesticide Petitions

The Environmental Protection Agency has received the following petitions for consideration.

PP 7F1954. E. I. DuPont De Nemours and Co., Wilmington DE 19898. Proposes amending 40 CFR 180.303 by establishing a tolerance for residues of the insecticide Oxamyl (methyl N',N'-dimethyl-N-[(methylcarbamoyl)oxy]-1-thioxamimidate) and its metabolite, N,N-dimethyl-1-cyanoformamide in or on the raw agricultural commodities apples at 2.0 parts per million (ppm). Proposed analytical method for determining residues is a gas chromatographic procedure using a flame photometric detector. PM12 (202-426-9425).

PP 7F1988. Mobay Chemical Corp., Chemagro Agricultural Division, PO Box 4913, Kansas City MO 64120. Proposes amending 40 CFR 180.320 by establishing a tolerance for residues of the insecticide 3,5-dimethyl-4-(methylthio) phenyl methylcarbamate and its cholinesterase-inhibiting metabolites in or on the raw agricultural commodities apples at 15 ppm; meat, fat and meat byproducts of cattle, goats, horses, sheep and swine at 0.05 ppm; milk at 0.01 ppm. Proposed analytical method for determining residues is a gas chromatographic procedure using a flame photometric detector. PM12 (202-426-9425).

PP 7F1971. Monsanto Agricultural Products, 800 N. Lindbergh Blvd., St. Louis MO 63166. Proposes amending 40 CFR 180.364 by establishing a tolerance for combined residues of the herbicide N-phosphonomethylglycine and its metabolite aminomethylphosphonic acid in or on the raw agricultural commodities cottonseed at 6 ppm; soybeans at 6 ppm, soybean forage and hay at 15 ppm, and liver and kidney of cattle, goats, hogs, horses, poultry, and sheep at 0.1 ppm. Proposed analytical method for determining residues is gas liquid chromotography using a phosphorous specific flame photometric detector. PM25 (202-426-2632).

Interested persons are invited to submit written comments on any petitions to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. MONSANTO AGRICULTURAL PRODUCTS, ET AL.

Filing of Food Additive Petitions

The Environmental Protection has received the following petitions for consideration.

FAP 7H5168. Monsanto Agricultural Products, 800 N. Lindbergh Blvd., St. Louis MO 63166. Proposes amending 21 CFR 561 by establishing a regulation permitting the use of the herbicide N-phosphonomethylglycine and its metabolite aminomethylphosphonic acid on the commodity soybeans hulls with a tolerance limitation of 20 parts per million (ppm). PM25 (202-426-2632)

FAP 7H5169. Mobay Chemical Corp., Chemagro Agricultural Division, PO Box 4913, Kansas City MO 64120. Proposes amending 21 CFR 561 by establishing a regulation permitting the use of the insecticide 3,5-dimethyl-4-(methylthio) phenyl methylcarbamate and its cholinesterase-inhibiting metabolites on the commodity dried apple pomace with a tolerance limitation of 30 ppm resulting in animal feed when present as a result of application of the pesticide chemical to the growing commodity apples. PM12 (202-426-9425)

Interested persons are invited to submit written comments on any petitions to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. Inquiries concerning specific petitions may be directed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone at the number cited. Written comments should bear a notation indicating the number of the petition to which the comments pertain. Comments may be made at any time while a petition is pending before the Agency. All written comments filed will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: August 18, 1977.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862), its interim policy with respect to the administration of Section 3(c) (1) (D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ("Interim Policy Statement"). On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" (41 FR 3339). This document described the changes in the Agency's procedures for implementing Section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement which were effected by the enactment of the recent amendments to FIFRA on November 28, 1975 (Pub.L. 94-140), and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 (40 CFR Part 162).

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnisher by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street SW., Washington, D.C. 20460. In the case of applications subject to the new Section 3 regulations, and applications not subject to the new Section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c), desires to assert a claim under Section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under Section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11,12, and 13—202/755-9315
PM 21 and 22—202/426-2454
PM 24—202/755-2196
PM 31—202/426-2635
PM 33—202/755-9041
PM 15, 16, and 17—202/426-9425
PM 23—202/755-1397
PM 25—202/755-2632
PM 32—202/426-9486
PM 34—202/426-9490

The Interim Policy Statement requires that claims for compensation be filed on or before October 25, 1977. With the exception of 2(c) applications not subject to the new Section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiriers and assertions that data relied upon are subject to protection under Section 10 of FIFRA, as amended, should be made on or before September 22, 1977.

Dated: August 16, 1977.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

APPLICATIONS RECEIVED (OPP-33000, 513)

EPA Reg. No. 239-2369. Chevron Chemical Co., 940 Hensley St., Richmond CA 94804. DIFOLATAN 4 FLOWABLE SEED PROTECTANT. Active Ingredients: Captafol 39%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM21

EPA Reg. No. 239-2418. Chevron Chemical Co., 940 Hensley St., Richmond CA 94804. ORTHENE 75 S SOLUBLE POWDER. Active Ingredients: Acephate (O,S-Dimethyl acetylphosphoramidothioate) 75%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM16

EPA Reg. No. 239-2418. Chevron Chemical Co., 940 Hensley St., Richmond CA 94804. ORTHO ORTHENE 75 S SOLUBLE POWDER. Active Ingredients: Acephate (O,S-Dimethyl acetylphosphoramidothioate) 75%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Amended registration. PM16

EPA Reg. No. 239-2418. Chevron Chemical Co., 940 Hensley St., Richmond CA 94804. ORTHENE 75 S SOLUBLE POWDER. Active Ingredients: Acephate (O,S-Dimethyl acetylphosphoramidothioate) 75%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM16

EPA Reg. No. 239-2418. Chevron Chemical Co., 940 Hensley St., Richmond CA 94804. ORTHO ORTHENE 75 S SOLUBLE POWDER. Active Ingredients: Acephate (O,S-Dimethyl acetylphosphoramidothioate) 75%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM16

V 42 163 AUG 23 77 UM V

EPA Reg. No. 241-243. American Cyanamid Co., PO Box 400, Princeton NJ 08540. PROWL HERBICIDE. Active Ingredients: [N-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine] 43.8%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Revised offer to pay statement. PM25

EPA Reg. No. 352-342. E. I. DuPont De Nemours & Co. (Inc.), Biochemicals Department, 6054 Dupont Bldg., Wilmington DE 19898. LANNATE METHOMYL INSECTICIDE, WATER SOLUBLE POWDER. Active Ingredients: S-methyl N-[methylcarbamoyl)oxy] thioacetimidate 90%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352-354. E. I. du Pont de Nemours & Co. (Inc.), Biochemicals Department, 6054 DuPont Bldg., Wilmington DE 19898. DUPONT "BENLATE" BENOMYL FUNGICIDE. Active Ingredients: Benomyl [Methyl 1-(butylcarbamoyl)-2-benzimidazolecarbamate] 50%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM22

EPA Reg. No. 352-370. E. I. du Pont de Nemours & Co. (Inc.), Biochemicals Department, 6054 DuPont Bldg., Wilmington DE 19898. DUPONT LANNATE L METHOMYL INSECTICIDE. Active Ingredients: S-methyl-N-[(methylcarbamoyl)oxy]thioacetimidate 24%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM12

EPA File Symbol 359-ATI. Rhodia Inc., Agricultural Div., PO Box 125, Monmouth Junction NJ 08852. RONSTAR. Active Ingredients: Oxadiazon [2-tert-butyl-4-(2,4-dichloro-5-isopropoxyphenyl)-2-1,3,4-oxadiazolin-5-one] 24.4%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Revised offer to pay statement. PM24

EPA Reg. No. 372-46. Mallinckrodt, Inc., 3600 N. Second St., St. Louis MO 63147. BANROT BROAD SPECTRUM FUNGICIDE 40% WETTABLE POWDER. Active Ingredients: 5-Ethoxy-3-trichloromethyl-1,2,4-thiadiazole 15%; Dimethyl 4,4'-o-Phenylenebis (3-thioallophanate) 25%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Revised labeling. PM21

EPA Reg. No. 891-155. Hercules Inc., Wilmington DE 19898. HERCULES TORAK EMULSIFIABLE CONCENTRATE INSECTICIDE AND MITICIDE. Active Ingredients: Dialifor [O,O-diethyl S-(2-chloro-1-phthalimidoethyl) phosphorodithioate] 40.5%; Related reaction products 4.5%. Method of Support: Application proceeds under 2(a) of interim policy. PM16

EPA File Symbol 1029-RGU. Aidex Corp., PO Box 7348, Omaha NE 68107. DAC-FERT EX GRANULAR CRABGRASS CONTROL AND LAWN FERTILIZER. Active Ingredients: Dimethyl ester of tetrachloroterephthalic acid 2.3%. Method of Support: Application proceeds under 2(b) of interim policy. PM23

EPA Reg. No. 1258-843. Olin Chemicals, 120 Long Ridge Rd., Stamford CT 06904. SODIUM OMADINE 40% AQUEOUS SOLUTION. Active Ingredients: Sodium 2-pyridinothiol 1-oxide 40%. Method of Support: Application proceeds under 2(a) of interim policy. PM33

EPA Reg. No. 2139-101. NOR-AM Agricluturaal Products, Inc. Chicago IL 60606 BETANAL POST-EMERGENCE HERBICIDE FOR CONTROL OF WEEDS IN BEETS. Active Ingredients: Phenmedipham 15.9%. Method of Support: Application proceeds under 2(b) of interim policy. PM25

EPA Reg. No. 2139-119. NOR-AM Agricultural Products, Inc. Chicago, IL 60606. BETANEX POST-EMERGENCE HERBICIDE FOR CONTROL OF REDROOT PIGWEED AND OTHER WEEDS IN SUGAR BEETS. Active Ingredients: Desmedipham 16.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM25

EPA Reg. No. 5736-41. DuBois Chemicals, Div. of Chemed Corp., DuBois Tower, Cincinnati OH 45202. BACTOLOOB BACTERIOSTATIC CONVEYOR CHAIN LUBRICANT. Active Ingredients: Triethanolamine and Potassium soap 34.31%; Tetrasodium Ethylenediamine Tetraacetic Acid 7.60%; Isopropyl Alcohol 7.28%; Ortho Benzyl-Para-Chloro Phenol 0.864%; Orthophenylphenol 1.156%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Revised offer to pay statement. PM32

EPA Reg. No. 6836-39. Daycon Products Co., Inc., PO Box 348, Bladensburg MD 20710. DAYCON DISINFECTANT TOILET BOWL CLEANER. Active Ingredients: Octyl decyl dimethyl ammonum chloride 1.250%; Dioctyl dimethyl ammonium chloride 0.625%; Dideoyl dimethyl ammonium chloride 0.625%; Alkyl amino betaine 1.000%; Hydrogen Chloride 8.000%. Method of Support: Application proceeds under 2(b) of interim policy. PM32

EPA File Symbol 28070-G. Clarke Chemical Corp., PO Box 332, Miami FL 33147. A & S 600. Active Ingredients: Poly [oxyethylene (dimethylininio) ethylene (dimethylininio) ethylene dichloride] 60.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA File Symbol 28070-U. Clarke Chemical Corp., PO Box 332, Miami FL 33147. A & S 300. Active Ingredients: Poly [oxyethlene (dimethylininio) ethylene (dimethylininol) ethylene dichloride] 30.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM 34

EPA Reg. No. 34164-G. American Refining & Mfg., Inc., PO Box 332, Miami FL 33147. SANI-BOL. Active Ingredients: Octyl decyl dimethyl ammonium chloride 1.250%; Dioctyl dimethyl ammonium chloride 0.625%; Dideoyl dimethyl ammonium chloride 0.625%; Alkyl amino betaine 1.000%; Hydrogen chloride 17.500%. Method of Support: Application proceeds under 2(b) of interim policy. PM32

EPA File Symbol 38109-E. S & W Plumbing Supply, Inc., 23655 S. Dixie Highway, Miami FL 33032. LANECHLOR. Active Ingredients: Sodium Hypochlorite 9.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA File Symbol 39395-E. Viking Laboratories, Inc., 8725 Mississippi Blvd. NW., Coon Rapids MN 55433. P-114 ALGAECIDE. Active Ingredients: Poly[oxyethylene (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride] 10.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA File Symbol 39479-G. Galaxy Chemical Corp., 2012 Whitfield Park Ave., Sarasota FL 33580. GALAXIDE NP 9.0. Active Ingredients: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 4.5%; n-Alkyl (68% C12, 38% C14) dimethyl ethylbenzyl ammonium chlorides 4.5%; Tetrasodium ethylenediamine tetracetate 2.0%; Sodium Carbonate 4.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM31

EPA File Symbol 39910-E. Triple E Systems Engineering, Inc., PO Box 3039, Hialeah FL 33013. EEESE SYSTEMS BIO-I. Active Ingredients: Poly[oxyethylene (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride] 12.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34

EPA File Symbol 39910-G. Triple E Systems Engineering, Inc., PO Box 3039, Hialeah FL 33013. EEESE SYSTEMS BIO-SHOCK. FEDERAL COMMUNICATIONS COMMISSION

[Report No. 871]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

AUGUST 15, 1977.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (See § 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. (See §§ 1.227(b)(3) and 21.30(b) of the Commission's Rules.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

21897–CD–TC–TC–77 South Georgia Telephone Company Consent to Transfer of Control from Raiford J. Parker transferor to Continental Telephone Corporation transferee. Station: KIY765, Folkston, Georgia.

21899–CD–AL–(2)–77 Victor E. Duane, Sr. and Victor E. Duane, Jr. d.b. as Central Mobile Radio Phone Service, Consent to Assignment of License from Victor E. Duane, Sr. and Victor E. Duane, Jr. d.b. as Central Mobile Radio Phone Service, assignor to Central Mobile Radio Phone Service, Inc., assignee. Stations: KQD599, Cincinnati, Ohio and KQK595, Toledo, Ohio.

21900–CD–AL–(8)–77 Victor E. Duane d.b. as Central Mobile Radio Phone Service, Consent to Assignment of License from Victor E. Duane d.b. as Central Mobile Radio Phone Service, assignee. Stations: KUC995, KUS298, KUS346, and KQA770, Columbus; KUC871, Jefferson Township; KQD597, Dayton; KQC875, Springfield; and KUC929, Cincinnati, Ohio.

21901–CD–P–77 James Parker and Steven Beeferman d.b. as Genesee and Alleghany Radiotelephone Company (New) C.P. for a new station to operate on 152.18 MHz to be located at Tobes Hill, 1 mile NE of Hornell City limits, Hornell, New York.

21902–CD–P–(2)–77 Two-Way Radio of Carolina, Inc. (KIY441), C.P. to change antenna system and relocate facilities operating on 454.175, 454.125 MHz at Loc. No. 2, to be located 400 S. Tryon Street, Charlotte, North Carolina.

21903–CD–P–77 Ram Broadcasting of Michigan, Inc. (KQD303), C.P. for additional facilities to operate on 158.70 MHz to be located at 536 South Forest Avenue, Ann Arbor, Michigan (Loc. 3).

21904–CD–P–(2)–77 South Shore Radio-Telephone, Inc. (KUD238), C.P. for additional facilities to operate on 454.100 and 454.025 MHz located at 9355 Joliet Road, LaGrange, Illinois.

21905–CD–P–77 Grants Radiotelephone Service, Inc. (KKT397), C.P. for additional facilities to operate on 152.15 MHz at Loc. No. 4; 800 Airport Road, Milan, New Mexico.

21906–CD–P–77 Grant's Radiotelephone Service, Inc. (KUD202), C.P. for additional Repeater facilities to operate on 2173.6 MHz at a new site described as Loc. No. 3 to be located 10 miles WSW of Sheep Springs, Washington Pass, New Mexico.

21907–CD–P–77 Page-A-Fone Corporation (new) C.P. for a new 2-way station to operate on 454.125 MHz to be located 1 mile east of intersection of Texas Hwys. 171 and 174 near Cleburne, Texas.

21908–CD–TC(2)–77 Anserphone of Goldsboro, Inc., Consent to Transfer of Control from Ferebee Land Patterson to Hilda S. Patterson, Executrix of Estate of Ferebee Land Patterson, Deceased, transferee. Stations: KUC942 and KRH678, Goldsboro, North Carolina.

21909–CD–P–77 Lafayette Radiotelephone Company (new) C.P. for a new 1-way station to operate on 152.24 MHz to be located at 101 Colony Road, W. Lafayette, Indiana.

21910–CD–P/ML–77 Contact, Inc. (KGA 807), C.P. for additional facilities to operate on 35.22 MHz to be located at a new site described as Loc. No. 6; 4011 Miller Road, Baltimore, Maryland.

21912–CD–P–77 Dorothy Faye Gallimore and Beverly Fulton Martin d.b. as Pampa Communications Center (KLB497) C.P. for addition Control facilities to operate on 454-300 MHz at a new site described as Loc. No. 2: Near Hobart and McCullough Streets, Pampa: and Repeater facilities to operate on 459.300 MHz at S.E. ¼ of section 60, Block A–8, Wheeler, Texas.

CORRECTION

21788–CD–P–2–77 Sully Buttes Tel. Coop., Inc. (new) Correct frequency to read 152.-600 MHz and 152.66 MHz.

RURAL RADIO

60381–CR–P/L–77 Continental Telephone Company of California (new). C.P. for a new Rural Subscriber station to operate on 157.80 MHz to be located Fish Spring Flat, 7.1 miles east of Gardnerville, Nevada.

60382–CR–P–77 The Lincoln County Telephone System, Inc. (new). C.P. for a new Central Office station to operate on 454.50 MHz: Tempiute, Nevada.

60383–CR–P–77 The Lincoln County Telephone System, Inc. (new). C.P. for a new Rural Subscriber station to operate on 459.50 MHz to be located Approximately 6.8 miles west of Tempiute Mine, Sand Springs, Nevada.

60385–CR–TC–(3)–77 South Georgia Telephone Company. Consent to Transfer of Control form Raiford J. Parker, transferor, to Continental Telephone Corporation, transferee. Stations: KXR74, Temp Fixed; WCZ27, Cumberland Island, WBO 50, Stephen C. Foster State Park, Georgia.

CORRECTION

60376–CD–P–77 Thru 60379–CD–P/ML–77; Correct each file number to read: 60376–CR–P–77, 60377–CR–P–77, 60378–CR–P/ML–77 and 60379–CR–P/ML–77. All other particulars remain as reported on PN3870, dated 8/8/77.

MAJOR AMENDMENTS

Adirondack Mobile Telephone Co., Inc. Suite 13–F, 100 Graham Road, Ithaca, New York, File No. 21383–CD–P–(4)–77, Beekman Court, Plattsburg, New York (Lat. 44°42' 38.5" Long. 73°28'10.5") and WGFM–FM Tower; Rand Hill, Plattsburg, New York (Lat. 44°46'13", Long. 73°36'47"). Application amended to change frequencies to 454.125 MHz and 454.350 MHz.

POINT TO POINT MICROWAVE RADIO SERVICE

3346–CF–P–77 Continental Telephone Company of California (KNB39), Garberville 485 Conger Street, Garberville, California. Lat. 40°06'07" N., Long. 123°47(31" W. C.P. to change name and location of receive station and replace antenna on frequency 6093.5H MHz toward Benbow PR and from passive reflector to Pratt Mtn.

3347–CF–P–77 Same (KNB40), Pratt Mtn. 6 miles NE of Garberville, California. Lat. 40°07'11" N., Long. 123°41'29" W. C.P. to change name and location of receive station and replace antenna on frequency 6345.5H MHz toward Benbow PR.

3371–CF–P–77 The Mountain States Telephone and Telegraph Company (KYJ78), 13.6 miles SW of Rawlins, Wyoming. Lat. 41°38'75" N., Long. 107°23'11" W. C.P. to add a new point of communication on frequencies 2118.8V MHz toward Min Ex Mine and 2118.8V MHz toward Lamont.

3372–CF–P–77 Same (new), Min Ex Mine 22.2 miles SW of Baiboil, Wyoming. Lat. 42°02'06" N., Long. 107°53'58" W. C.P. for a new station on frequency 2168.8V MHz toward Separation, Wyoming.

CORRECTION

3107–CF–MP–77 The Bell Telephone Company of Pennsylvania (KGP35), corrected to read change polarity from V to H on frequencies 11245 11565 MHz toward Rockview, Pa. All other particular remain as reported on PN No. 867 dated July 18, 1977.

3108–CF–MP–77 Same (WCG251), corrected to read change polarity from V to H on frequencies 10795 11115 MHz toward State College, Pa. All other particular remain as reported on PN No. 867 dated July 18, 1977.

3338–CF–P–77 Mountain Microwave (KAQ 88), Mt. Coolidge, 6.0 miles ESE of Custer, South Dakota (Lat. 43°44'42" N., Long. 103°28'51" W.). Construction permit to add 6256.5V, 6286.2H and 6345.5H MHz toward Elk Mountain, South Dakota, via power split, on azimuth 267.9°.

3351–CF–P–77 Eastern Microwave, Inc. (KZA 86), Tyrone Mtn., Hoover Road, 6 miles NW of Tyrone Pennsylvania (Lat. 40° 43'56" N., Long. 78°19'33" W.). Construction permit to replace transmitter 10775.V MHz toward Kinter Hill, Pennsylvania, on azimuth 277.7°.

3354–CF–P–77 Eastern Microwave, Inc. (KZA 85), Boone Mtn., Kersey Road, 5 miles east of Brockport, Pennsylvania (Lat. 41°14'56" N., Long. 78°38'33" W.). Construction permit to change antenna system toward Kane (5989.7V), Punxsutawny (5989.7H), and Reynoldsville (5989.7V), all in Pennsylvania.

MAJOR AMENDMENTS

3599–CF–P–76 RCA American Communications, Inc. (new), Wauconda, Illinois (Lat. 42°14'12" N., Long. 86°04'17" W.). Application amended (a) to delete Chicago (Merchandise Mart), Illinois, as point of communication (frequencies 6034.2V and 6152.8V MHz) and (b) to add 5945.2H MHz and 6063.8H MHz toward Chicago CTO, Illinois, on azimuth 137.6°. (NOTE.—See file No. 2106–CF–P–77 elsewhere in this Public Notice)

3600–CF–P–76 RCA American Communications, Inc. (new), Chicago CTO, 2 North Riverside Plaza, Illinois (Lat. 41°52'57" N., Long. 87°38'21" W.). Application amended to add frequencies 6197.2V and 6315.9V MHz toward Wauconda, Illinois, on azimuth 317.9°.

FEDERAL ENERGY ADMINISTRATION

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of August 5 Through August 12, 1977

Notice is hereby given that during the week of August 5 through August 12, 1977, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

ERIC J. FYGI,
Acting General Counsel.

August 17, 1977.

APPENDIX.—*List of cases received by the Office of Exceptions and Appeals, week of Aug. 5 through Aug. 12, 1977*

Date	Name and location of applicant	Case No.	Type of submission
Aug. 5, 1977	Sundance Oil Co., Denver, Colo. (If granted: The Sundance Oil Co., would be granted a stay of the requirements of the FEA's July 29, 1977, remedial order pending a final determination of an appeal of that order which Sundance states it intends to file.)	FRS-1415	Stay request.
Aug. 8, 1977	E. B. Brooks, Jr., Dallas, Tex. (If granted: E. B. Brooks, Jr., would be granted a stay of the requirement specified in the FEA's July 25, 1977, remedial order that it refund overcharges made on sales of crude oil pending a final determination of the firm's appeal of that order which it intends to file.)	FRS-1402	Do.
Do.	Cities Service Oil Co., Tulsa, Okla. (If granted: The Cities Service Oil Co. would be granted a stay of the requirements of the FEA's July 11, 1977, remedial order pending a final determination of the firm's appeal of that order.)	FRS-1404	Do.
Do.	Diamond Shamrock Corp., Amarillo, Tex. (If granted: The Diamond Shamrock Corp. would receive an extension of the exception relief granted in the FEA's Mar. 22, 1977, decision and order which would permit it to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of $0.005/gal.)	FXE-4472	Extension of relief granted in *Diamond Shamrock Corp.*, case No. FXE-3705 (decided Mar. 22, 1977) (unreported decision).
Do.	Dyco Petroleum Corp., Tulsa, Okla. (If granted: The Dyco Petroleum Corp's. A. B. Cavanaugh No. 1 well located in Jefferson Davis Parish, La., would be classified as a stripper well property.)	FEE-4471	Price exception (sec. 212.74).
Do.	Gulf Oil Corp., Houston Tex. (If granted: The FEA's Feb. 14, 1975, remedial order as modified on July 22, 1977, would be rescinded and the Gulf Oil Corp. would not be required to refund rent charged to Anthony Weber for a service station located in Plymouth, Mich.)	FRA-1423	Appeal of FEA region III's July 22, 1977, 2d modification of remedial order issued Feb. 14, 1975.)
Do.	Hunt Petroleum Corp. (Kinder), Dallas, Tex. (If granted: The Hunt Petroleum Corp. would be permitted to increase its prices for natural gas liquid products produced at the Kinder plant to reflect nonproduct cost increases in excess of $0.005/gal.)	FEE-4473	Price exception (sec. 212.-165).
Do.	Leonard E. Belcher, Inc., Springfield, Mass. (If granted: Leonard E. Belcher, Inc., would be granted a stay of the requirements of the FEA's July 18, 1977, remedial order pending a final determination of the firm's appeal of that order which it intends to file.)	FRS-1414	Stay request.
Do.	Prater Co., Farmington, N. Mex. (If granted; Prater Co. would receive a temporary stay of the refund requirement of the remedial order issued by FEA region VI on July 25, 1977, pending a determination on its application for stay and its appeal.)	FRT-0047	Temporary stay of the requirements of the remedial order issued by FEA region VI on July 25, 1977.
Do.	Prater Co., Farmington, N. Mex. (If granted: The FEA's July 25, 1977, remedial order would be rescinded and the Prater Co. would not be required to reduce its selling prices of motor gasoline or to refund overcharges made on sales of motor gasoline during the period Nov. 1, 1973, through Aug. 31, 1975.)	FRA-1413 FRS-1413 FEE-4470	Appeal of FEA region VI's remedial order issued July 25, 1977. Stay request.
Do.	Standard Oil Co. (Indiana), Chicago, Ill. (If granted: The FEA's June 28, 1977, and July 7, 1977, assignment orders issued to Standard Oil Co. (Indiana) would be rescinded and Standard Oil would not be required to supply additional quantities of motor gasoline to the Stone & Cooper Fuel Co.).	FEA-1417— FEA-1422	Appeal of FEA region I's assignment orders issued June 28, and July 7, 1977.
Aug. 19, 1977	Altex Oil Corp., Denver, Colo. (If granted: Crude oil produced from Altex Oil Corp.'s UPRR-Anshutz Ranch No. 1 well located in Carbon County, Wyo., would be sold at upper tier ceiling prices.)	FEE-4477	Price exception (sec. 212.73).

FEDERAL MARITIME COMMISSION

SACRAMENTO—YOLO PORT DISTRICT AND CARGILL OF CALIFORNIA, INC.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 76 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, NY., New Orleans, La., San Francisco, Calif., and Old San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before September 12, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Mr. John J. Hamlyn, Jr., Downey, Brand, Seymour & Rohwer, 555 Capital Mall, Sacramento, Calif. 95814.

Agreement No. T-21-6, between Sacramento-Yolo Port District (Port) and Cargill of California, Inc. (Cargill), modifies the basic agreement which provides for the lease to Cargill of a grain terminal facility at Sacramento, Calif. The purpose of the modification is to provide for the payment of a diverter type grain sampler which was installed in order to comply with the current applicable law. District and Cargill will each pay half of the cost of the sampler pursuant to paragraph 11 of the basic agreement. District will credit Cargill its share of the cost by reducing the monthly rental payment by $4,732.74 per month until the outstanding balance is paid.

By Order of the Federal Maritime Commission.

Dated: August 18, 1977.

JOSEPH C. POLKING,
Acting Secretary.

WEST COAST OF ITALY, SICILIAN AND ADRIATIC PORTS/NORTH ATLANTIC RANGE CONFERENCE (WINAC)

Agreement Filed

Notice is hereby given that the following agreements, accompanied by a statement of justification, have been filed with the Commission for approval pursuant to Section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreements and the statement of justification at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreements and the statement of justification at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before September 12, 1977. Any person desiring a hearing on the proposed agreements shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Stanley O. Sher, Esq., Billing, Sher & Jones, P. C., Suite 300, 2033 K Street NW., Washington, D.C. 20006.

Agreement No. 2846-30, among the members of WINAC modifies the basic agreement to provide that the clause outlining member's right of independent action will terminate either 450 days from July 5, 1977 or on the date the Commission approves a pooling agreement covering the trade.

VOL 42 NO 163 AUG 23 77 UM

By Order of the Federal Maritime Commission.

Dated: August 18, 1977.

JOSEPH C. POLKING,
Acting Secretary.

FEDERAL RESERVE SYSTEM

FIRST SECURITY CORP.

Request for Determination and Notice Providing Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)) ("the Act"), by First Security Corporation, Salt Lake City, Utah, for a determination that, upon the transfer of all the shares of First Security Savings and Loan Association, Pocatello, Idaho, by First Security Corporation to John Price, Salt Lake City, Utah, that First Security Corporation is not nor will be in fact capable of controlling First Security Savings and Loan Association or John Price, notwithstanding the fact that purchase of the shares of First Security Savings and Loan Association is being financed by a loan from First Security Corporation's banking subsidiary, First Security Bank of Utah, N.A., Salt Lake City, Utah, and that John Price is otherwise indebted to First Security Bank of Utah, N.A., Salt Lake City, Utah.

Section 2(g)(3) of the Act provides that shares transferred after January 1, 1966, by any bank holding company (or any company which but for such transfer, would be a bank holding company) directly or indirectly to any transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, shall be deemed to be indirectly owned or controlled by the transferor, unless the Board, after opportunity for hearing, determines that the transferor is not, in fact, capable of controlling the transferee.

Notice is hereby given, that, pursuant to section 2(g)(3) of the Act, an opportunity is provided for filing a request for oral hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than September 13, 1977. If a request for oral hearing is filed, each request should contain a statement of the nature of the requesting person's interest in the matter, the reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which such person wishes to give testimony. The Board subsequently will designate a time and place for any hearing it orders, and will give notice of such hearing to the transferor, the transferee, and all persons that have requested an oral hearing. In the absence of a request for an oral hearing, the Board will consider the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, August 16, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

CONTINUING EDUCATION REVIEW COMMITTEE

Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of September 1977:

CONTINUING EDUCATION REVIEW COMMITTEE

Date and time: September 30; 9 a.m.

Place: Conference Room M, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857

Type of meeting: Open meeting

Contact: Elizabeth R. Smith, Ph. D., Room 8C-22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-4735

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to mental health education projects for interdisciplinary and single discipline groups other than psychiatry, psychology, psychiatric nursing, and social work and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda: From 9 a.m. to 4 p.m., on September 30, the meeting will be open for administrative announcements and discussion of review criteria in the light of new program initiatives and priorities of the Institute.

Substantive program information may be obtained from the contact person listed above. The NIMH Information Officer who will furnish upon request summaries of the meetings and rosters of the Committee members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15-105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-4735.

Dated: August 16, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

NATIONAL ADVISORY RESEARCH RESOURCES COUNCIL

Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Advisory Research Resources Council, Division of Research Resources, September 19–21, 1977, Conference Room 9, Building 31, National Institutes of Health, Bethesda, Maryland 20014.

The meeting will be open to the public from 9 a.m. to recess on September 19 for: the conduct of Council business, including the report of the Director, DRR; a presentation of the DRR Forward Plan 1979–1983; a presentation by a member of the staff of the Veterans Administration, entitled "Summary of the National Academy of Sciences Study of the Veterans Administration Research Program"; a program review of the functions of the Division's Biotechnology Resources Program; and a discussion by the Planning and Agenda Work Group of the Council. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6) under Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on September 20 from 8:30 a.m. to recess, and on September 21 from 8:30 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications, including the review and administrative handling of an application requesting support for the maintenance of a nonhuman primate blood grouping research resource. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Room 5B13, Building 31, Bethesda, Maryland 20014, (301) 496–5545, will provide summaries of the meeting and rosters of the Council members.

Dr. James F. O'Donnell, Deputy Director, Division of Research Resources, National Institutes of Health, Room 5B03, Building 31, Bethesda, Maryland 20014, (301) 496–6023, will furnish substantive program information and will receive any comments pertaining to this announcement.

NATIONAL ARTHRITIS, METABOLISM, AND DIGESTIVE DISEASES ADVISORY COUNCIL

Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of The National Arthritis, Metabolism, and Digestive Diseases Advisory Council and its subcommittees on September 29–October 1, 1977, in Conference Room 10, Building 31, National Institutes of Health, Bethesda, Maryland. This meeting will be open to the public from 8:30 a.m. to 10:30 a.m. the first two days to discuss administrative reports. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4 and 552b(c)(6); Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meetings of the Digestive Diseases Subcommittee; the Arthritis, Bone, and Skin Diseases Subcommittee; the Diabetes, Endocrine, and Metabolic Diseases Subcommittee; and the Kidney, Urologic and Blood Diseases Subcommittee, will be closed on September 29 from 10:30 a.m. to closing, Building 31, exact room assignments to be announced later, for the review, discussion and evaluation of individual grant applications. On September 30, the full Council meeting will be closed from 10:30 a.m. to closing, and on October 1 from 8:30 a.m. to adjournment, Building 31, Conference Room 10, also for the review, discussion and evaluation of research grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Messrs. James N. Fordham and Leo E. Treacy, Office of Scientific and Technical Reports, NIAMDD, National Institutes of Health, Building 31, Room 9A04, Bethesda, Maryland 20014, will provide summaries of the meeting.

Office of Education

NATIONAL ADVISORY COUNCIL ON EQUALITY OF EDUCATIONAL OPPORTUNTY

Meeting; Location Change

AGENCY: National Advisory Council on Equality of Educational Opportunity.

ACTION: Amendment to notice of meeting.

SUMMARY: This notice amends the notice of meeting previously announced in the FEDERAL REGISTER to change the location of the forthcoming meeting of the Nonmajority/Minority Task Force. This document is intended to notify the general public of the change in location and of their opportunity to attend. The change is prompted by the fact that federal space in which to hold a public meeting has become available.

DATE AND PLACE OF MEETING: August 26, 1977; Los Angeles, Calif.

ADDRESS: Room 8041, U.S. Federal Building, 300 N. Los Angeles Street, Los Angeles, Calif. 90012.

FOR FURTHER INFORMATION CONTACT:

Rosemarie Maynez, Administrative Assistant, NACEEO, 1325 G Street NW., Suite 710, Washington, D.C. 20005. Phone: 202–724–0221.

Signed at Washington, D.C., on August 18, 1977.

LEO A. LORENZO,
Executive Director.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

Counselor to the Secretary

[Docket No. D–77–490]

DELEGATION OF AUTHORITY

AGENCY: Department of Housing and Urban Development.

ACTION: Delegation of Authority.

SUMMARY: The Secretary is delegating to the Counselor to the Secretary certain authority with respect to completion and operation of a specific housing project in New York, New York.

EFFECTIVE DATE: August 12, 1977.

SUPPLEMENTARY INFORMATION: This delegation of authority confers those responsibilities that have been exercised by the Assistant Secretary for Housing—Federal Housing Commissioner and the Assistant Secretary for Neighborhoods, Voluntary Associations, and Consumer Protection relating solely to the East Harlem Pilot Block Project.

Accordingly, the Secretary delegates authority as follows:

Section A *Authority Delegated.* The Counselor to the Secretary, Joseph Burstein, shall exercise the power and authority of the Secretary with respect to all actions to be taken in completing the East Harlem Pilot Block Project and in operating that project designated as FHA Project Number 012–44096/97/98/99 including, but not limited to, the authority to act as contracting officer, to enter into and administer procurement contracts and make related determinations, except determinations under Section 302(c) (11), (12), and (13) of the Federal Property and Administrative Services Act (41 U.S.C. 251(c) (11), (12), and (13)), with respect to all contracts for goods and services for repair, construction, improvement, removal, demolition or alteration, maintenance, and operation of the East Harlem Pilot Block Project; broker management services in connection with that project; and contracts with public or private organizations to provide budget, debt management and related counseling services.

Section B *Additional Authority Excepted.* There is further excepted from the authority delegated under Section A the power to:

1. Establish the rate of interest on Federal loans;
2. Issue notes or other obligations for purchase by the Secretary of the Treasury;
3. Exercise the powers under section 402(a) of the Housing Act of 1950 (12 U.S.C. 1749a(a));
4. Sue and be sued, and
5. Issue rules and regulations.

Section C *Authority to Redelegate.* The Counselor to the Secretary is authorized to redelegate to employees of the Department any of the authority delegated under Section A.

(Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).)

Issued at Washington, D.C., August 12, 1977.

PATRICIA ROBERTS HARRIS,
Secretary of Housing and Urban Development.

[FR Doc.77–24289 Filed 8–22–77;8:45 am]

[Docket No. N–77–794]

TASK FORCE ON HOUSING COSTS

Establishment

AGENCY: Department of Housing and Urban Development (HUD).

ACTION: Establishment of a Task Force on Housing Costs.

SUMMARY: The Task Force on Housing Costs shall review the factors affecting the cost of housing construction; consider actions the Federal Government, especially HUD, might take to reduce such costs; and make recommendations to the Secretary concerning such actions. The time, place and agenda for the first Task Force meeting shall be published subsequently in the FEDERAL REGISTER at least 15 days prior to the meeting.

DATES: The charter of the Task Force on Housing Costs shall become effective on the date the Secretary of Housing and Urban Development files it with the Senate Committee on Banking, Housing and Urban Affairs, and the House Committee on Banking, Finance and Urban Affairs, which are the standing committees of the Congress having legislative jurisdiction over the Department of Housing and Urban Development. The charter will be filed also with the Office of Management and Budget and with the Library of Congress.

The Task Force will continue in existence under its charter for nine months from the date the charter is filed unless the charter is amended or revoked.

ADDRESS: Committee Management Officer Douglas C. Brooks, Room 3260, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

Douglas C. Brooks, 202-755-5208, or Donald K. McLain, 202-755-5333.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463) it is hereby determined that the establishment of the Task Force on Housing Costs is necessary, appropriate, and in the public interest.

The Task Force shall review and comment on written materials provided by HUD staff concerning factors that affect the cost of new housing and concerning actions that might reduce such costs. The Task Force may raise and consider issues and ideas not included in these materials. The Task Force may hear testimony from members of the general public. The Task Force shall discuss the merits of all suggested actions, and shall make recommendations to the Secretary of HUD concerning actions the Federal Government, particularly HUD, might take to reduce the cost of new housing to the consumer.

The membership of the Task Force on Housing Costs is planned to consist of no more than forty (40) people. The members shall include one or more senior Departmental officials designated by the Secretary of HUD, and will include people not employed by the Federal Government who are expected to serve without compensation. The Task Force will have a balanced membership, including minorities and women, representing diverse groups and points of view, including consumer interests, organized labor, environmental interests, mortgage and construction lenders, real estate brokers and managers, developers and builders, manufacturers of housing materials and components, elected officials, architects, planners, urban and rural housing officials, the academic community, the legal profession, and HUD employees. Broad geographical representation will be achieved.

The meeting(s) of the Task Force will be open to the public.

Issued at Washington, D.C., August 16, 1977.

JAY JANIS,
Under Secretary, Department of Housing and Urban Development.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Colorado 064425-RW]

COLORADO

Amendment To Pipeline Right-of-Way Western Slope Gas Company

AUGUST 16, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Western Slope Gas Co., P.O. Box 840, Denver, Colo. 80201, has applied for an amendment to right-of-way C-064425-RW within the existing boundaries of the original grant on Public Land located in NE¼SW¼ and NW¼SE¼ of Section 3, T. 8 S., R. 104 W., 6th P.M. in Garfield County, Colo.

The facility will enable applicant to enlarge an already existing site for construction of compressor building and related piping, office building, and a meter building, an automatic block and blow down system, and drain tank, and to enlarge an existing auxiliary building at the Baxter Pass Compressor Station. The facility will enable applicant to safely and efficiently operate the Baxter Pass Compressor Station and Carbonera Field gathering system in order to convey natural gas to the Grand Junction, Colo., market area. The proposed compressor building and related piping are necessary to eliminate existing deficiency in capacity caused by occasional sudden reduction in system loads which cause the transmission system to increase discharge pressure beyond the capability of the existing compressor units.

The purposes of this notice are: to inform the public that the Bureau of Land Management will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved and, if so, under what terms and conditions; to allow interested parties to comment on the application, and to allow any persons asserting a claim to the lands or having bona fide objections to the proposed natural gas gathering pipeline right-of-way to file their objections in this office. Any person asserting a claim to the lands or having bona fide objections must include evidence that a copy thereof has been served on the applicant.

Any comment, claim, or objections must be filed with the Chief, Branch of Adjudication, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colo. 80202, as promptly as possible after publication of this notice.

THOMAS HARDIN,
Chief, Branch of Adjudication.

[FR Doc.77-24348 Filed 8-22-77;8:45 am]

[NM 31300]

NEW MEXICO

Application

AUGUST 12, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Gas Co. of New Mexico has applied for one 4-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 26 N., R. 6 W.,
Sec. 3, lot 1 and SE¼SE¼;
Sec. 6, lots 6 and 7;
Sec. 7, lot 1;
Sec. 10, NE¼NE¼;
Sec. 11, NE¼NE¼ and NW¼NW¼;
Sec. 12, NW¼NW¼;
Sec. 13, NE¼NW¼;
Sec. 17, SE¼NE¼;
Sec. 18, SE¼SW¼ and S½SE¼;
Sec. 21, SW¼NE¼ and SE¼NW¼.

This pipeline will convey natural gas across 2.73 miles of public land in Rio Arriba County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

[FR Doc.77-24363 Filed 8-23-77;8:45 am]

[NM 31293]

NEW MEXICO

Application

AUGUST 11, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Ilano, Inc., has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 19 S., R 33 E.,
Sec. 7, SE¼NE¼.

This pipeline will convery natural gas across 0.11 of a mile of public land in Lea County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

ESQUATZEL COULEE WASTEWAY, COLUMBIA BASIN PROJECT, WASHINGTON

Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental statement for the Esquatzel Coulee Wasteway, Columbia Basin Project, Washington.

The environmental statement concerns the modification of a 5.6-mile reach of existing channel in the Esquatzel Coulee and improvement of unstable stream banks to provide for safe passage of natural runoff and irrigation return flows through the Coulee. Fish and Wildlife management units totaling about 4,000 acres will also be established as a part of this program.

Copies are available for inspection at the following locations:

Office of Assistant to the Commissioner—Ecology, Room 7620, Bureau of Reclamation, Department of the Interior, Washington, D.C. 20240, telephone 202-343-4991.
Office of Regional Director, Bureau of Reclamation, P.O. Box 043, 550 W. Fort Street, Boise, Idaho 83724, telephone 208-384-1208.
Columbia Basin Project Office, Bureau of Reclamation, P.O. Box 815, Division Ave. and C St. NW., Ephrata, Washington 98823, telephone 509-754-4611.

Single copies of the final statement may be obtained on request to the Commissioner of Reclamation or the Regional Director. Copies will also be available for inspection in libraries in the Columbia Basin Project area. Please refer to the statement number above.

Dated: August 18, 1977.

LARRY E. MEIEROTTO,
Deputy Assistant Secretary of the Interior.

PECOS RIVER BASIN WATER SALVAGE PROJECT, NEW MEXICO-TEXAS

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental impact statement for the Pecos River Basin Water Salvage Project.

The environmental statement concerns selective clearing of saltcedar from the flood plain of the Pecos River from Santa Rosa, New Mexico, to Girvin, Texas. To date, 53,950 acres have been selectively cleared (the net area cleared and maintained is 47,200 acres). Additional clearing is planned on 24,000 acres—14,000 acres scheduled for clearing and 10,000 (within McMillan Delta) deferred until provision has been made for replacement of terminal storage. Of the 14,000 acres, 10,500 acres will be the net acreage cleared.

Written comments may be submitted to the Regional Director (address below) on or before October 7, 1977.

DEPARTMENT OF JUSTICE

Antitrust Division

UNITED STATES v. STUDIENGESELLSCHAFT KOHLE, m.b.H., HERCULES INCORPORATED, STAUFFER CHEMICAL COMPANY, AND TEXAS ALKYLS, INC.

Proposed Consent Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16 (b) through (h), that a Proposed Consent Judgment and Competitive Impact Statement as set out below have been filed with the United States District Court for the District of Columbia in Civil Action No. 1255-70, *United States* v. *Studiengesellschaft Kohle, m.b.H., Hercules Incorporated, Stauffer Chemical Company, and Texas Alkyls, Inc.* Defendants Hercules Incorporated, Stauffer Chemical Company, and Texas Alkyls, Inc., have consented to the proposed judgment. Defendant Studiengesellschaft Kohle, m.b.H. is not a party to the proposed judgment, and will remain an active defendant in the lawsuit. The complaint in this action alleged that defendants violated 15 U.S.C. 1 and 2 by using patents on a process for manufacturing aluminum trialkyls to restrict the sale of the unpatented aluminum trialkyls made thereby. The proposed judgment enjoins defendants from using a patent on a process or machine to restrict the sale of unpatented products made by such process or machine, enjoins defendants from opposing a modification in a judgment which they obtained in 1963 against Ethyl Corporation and requires the defendants to license certain patents and technology relating to aluminum alkyls. The Competitive Impact Statement describes the anticipated effects of the proposed judgment on competition, and evaluates the alternative relief proposals actually considered by the United States. Public comment is invited on or before October 17, 1977. Such comments and responses thereto will be published in the FEDERAL REGISTER and filed with the Court. Comments should be directed to Richard H. Stern, Chief, Patent Section, Antitrust Division, SAFE 704, Department of Justice, Washington, D.C. 20530.

Dated: August 15, 1977.

BERNARD M. HOLLANDER,
Chief, Judgments and Judgment Enforcement Section.

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

United States of America, Plaintiff v. *Studiengesellschaft Kohle, m.b.H., Hercules Incorporated, Stauffer Chemical Company, and Texas Alkyls, Inc.*, Defendants.

Civil Action No. 1255-70.
Filed: August 15, 1977.

STIPULATION

It is stipulated by and between the plaintiff, United States of America, and three of the defendants herein, namely Hercules Incorporated, Stauffer Chemical Company, and Texas Alkyls, Inc., by their respective attorneys, that:

1. A Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party to this stipulation or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendants who are parties to this stipulation and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this stipulation, this stipulation shall be of no effect whatever and the making of this stipulation shall be without prejudice to plaintiff and to the defendants who are parties to this stipulation in this or any other proceeding.

Dated: August 15, 1977.

For the Plaintiff: Hugh P. Morrison, Jr., *Deputy Assistant Attorney General;* William E. Swope, John L. Wilson, Richard H. Stern, Kurt Shaffert, Hays Gorey, Jr., Roger B. Andewelt, *Attorneys, Department of Justice.*

For the Defendants: Wolf, Block, Schorr & Solis-Cohen, Philadelphia, Pa., by Bernard M. Borish, *Attorneys for Hercules Incorporated;* Covington & Burling, Washington, D.C., by John H. Schafer, *Attorneys for Stauffer Chemical Company and Texas Alkyls, Inc.*

Stipulation approved for filing.

Dated: August 15, 1977.

AUBREY E. ROBINSON, JR.,
United States District Judge.

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

United States of America, Plaintiff, v. *Studiengesellschaft Kohle, m.b.H., Hercules Incorporated, Stauffer Chemical Company, and Texas Alkyls, Inc.*, Defendants.

Civil Action No. 1255-70.
Filed: August 15, 1977.

FINAL JUDGMENT

Plaintiff, United States of America, having filed its complaint herein on April 24, 1970; defendants Hercules Incorporated, Stauffer Chemical Company, and Texas Alkyls, Inc., having appeared by their attorneys and having each filed its answer to the complaint; and the plaintiff and the three aforesaid defendants, by their respective attorneys, having consented to the entry of this Final Judgment;

Now, therefore, before commencement of trial and the taking of any testimony thereat, without this Final Judgment constituting any evidence against or admission by any party with respect to any issue of fact or law herein, and upon consent of the plaintiff and the three aforesaid defendants hereto, it is hereby

Ordered, adjudged, and decreed, as follows:

I

This Court has jurisdiction of the subject matter hereof and the parties hereto. The complaint states a claim upon which relief may be granted against the defendants under Sections 1 and 2 of the Sherman Act (15 U.S.C. § 1, 2, as amended).

II

As used in this Final Judgment:

(A) "Defendants" means Hercules Incorporated, Stauffer Chemical Company, and Texas Alkyls, Inc., all Delaware corporations.

(B) "Person" means any individual, corporation, partnership, firm corporation, association, or other business or legal entity.

(C) "Aluminum trialkyl" means any compound consisting of an aluminum atom linked with three carbon atoms, each one of which is a member of any alkyl radical consisting of one, two, three, four, or n carbon atoms and three, five, seven, nine, or $2n+1$ hydrogen atoms, respectively.

(D) "Aluminum alkyl" means any compound consisting of an aluminum atom linked with at least one carbon atom that is a member of an alkyl radical consisting of one, two, three, four, or n carbon atoms and three, five, seven, nine, or $2n+1$ hydrogen atoms respectively. The term includes, *inter alia*, aluminum trialkyls, alkyl aluminum dihydrides, dialkyl aluminum hydrides, alkyl aluminum dihalides, and dialkyl aluminum halides.

(E) "Delaware action" means *Ethyl Corporation* v. *Hercules Powder Co., et al.*, Civil Action No. 2142, United States District Court for the District of Delaware.

(F) "Patent" means United States patent. "Patented" means covered by the claims of an unexpired United States patent. "Unpatented" means not covered by the claims of an unexpired United States patent. "Patentee" means any person to whom a United States patent is issued and any successor in title to such person in respect of such patent.

(G) "Date of this Final Judgment" means that date on which this judgment becomes final.

(H) "Sole and exclusive license" means the transfer from the patentee to another person of the entire right under a process or machine patent for the remaining term thereof.

III

The provisions of this Final Judgment shall apply to each defendant that is named in Article II(A) hereof, to each of its officers, directors, agents, employees, subsidiaries, successors, and assigns; and to all other persons in active concert or participation with any of them that have received actual notice of this Final Judgment by personal service or otherwise.

IV

(A) (1) Subject to subparagraph (2), defendants are enjoined from preventing, restraining, or interfering with, and from attempting to prevent, restrain, or interfere with, the sale in the United States, manufacture in the United States for sale, use in the United States, or export from the United States of unpatented aluminum alkyls by any person—whether by asserting the provisons of any contract, agreement, or understanding to which the late former defendant Karl Ziegler or his successor, Studiengesellschaft Kohle, m.b.H., was a party; by prospectively asserting or enforcing any decision or judgment rendered in the Delaware action; by asserting or enforcing the agreement with Ethyl Corporation dated July 12, 1962; or otherwise.

(2) Article IV(A)(1) hereof shall not apply with respect to unpatented aluminum alkyls that are made or are to be made by any defendant outside the United States and that are not imported into the United States, nor shall it prevent a defendant from enforcing a process or machine patent claim against any person not licensed under such claim.

(B) (1) Subject to subparagraph (2), defendants are enjoined from entering into, maintaining in effect, or enforcing any agreement or understanding (in the form of a quantity limitation, field limitation, or otherwise) by the terms of which any person authorized to use a process or machine claimed in a patent is, or is to be:

(a) Prohibited or restrained from selling;
(b) Authorized to make, but not sell;
(c) Authorized to make, or sell, for some uses but not all uses—

any product made by the process or machine.

(2) Article IV(B)(1) hereof shall not prevent defendants from stating that no license is granted by implication on claims of patents not licensed expressly, or from enforcing any such patent.

(C) (1) Subject to subparagraph (2), defendants are enjoined from entering into, maintaining in effect, or enforcing any agreement or understanding by which any party to the agreement or understanding acquires an exclusive right to sell an unpatented product produced under a license to use a patented process or machine.

(2) Article IV(C)(1) hereof shall not prevent a defendant from entering into, maintaining in effect, or enforcing a sole and exclusive license.

V

If a motion is filed or proceedings are commenced by—(i) the United States, or (ii) any party to the Delaware action, or (iii) both—to vacate or modify the judgment entered in the Delaware action, or to change in any way the prospective effect of the injunction entered in the Delaware action:

(a) Defendants will not oppose the application of the United States to intervene in the Delaware action; and

(b) Defendants will not oppose (and they authorize the United States to represent to the United States District Court for the District of Delaware that defendants have advised the United States that they will not oppose) a modification of said judgment by which the sale of unpatented aluminum trialkyls is no longer enjoined.

Nothing contained in this Article V shall prevent defendants from opposing any further modification of that judgment for which the United States or any party moves.

VI

(A) For each patent or patent application that on the date of this Final Judgment a defendant owns or has any right to license, such defendant shall grant each applicant therefor, for such term as applicant requests, a license, on reasonable and nondiscriminatory rates and conditions, to practice in an unrestricted manner and all patented inventions relating to the manufacture or aluminum alkyls.

(B) Manufacture of any aluminum trialkyl under any license under this Article VI shall initially be royalty-free. At any time three years after the date of this Final Judgment, however, a defendant may, upon at least 30-days notice to plaintiff, file a motion in this Court to modify this Article VI to establish that the degree of competition in the sale of unpatented aluminum trialkyls (or such of them as the motion concerns) is such as to justify the prospective modification of the royalty-free licensing of such manufacture to licensing at a reasonable and nondiscriminatory royalty rate.

VII

(A) Subject to Article VII(B) hereof, each defendant shall grant a license, on reasonable and nondiscriminatory rates and conditions, to each applicant therefor, for such term as applicant requests, pursuant to which it will disclose and permit the practice in the United States in an unrestricted manner of any and all technology (whether in the form of know-how, trade secret, sales and technical literature, or otherwise), that—

(1) Relates to the manufacture, shipment, or storage of aluminum trialkyls; and

(2) Was practiced commercially at any time between April 24, 1970, and the date of this Final Judgment.

(B) No license under this Article VII need be granted to any applicant who, on the date of this Final Judgment, is in the business of manufacturing and selling any aluminum trialkyl in the United States. No license under this Article VII relating to the manufacture of aluminum trialkyls need be granted to any applicant who, on the date of this Final Judgment, is engaged in the manufacture of any aluminum trialkyl. Any license under this Article VII may forbid the unauthorized disclosure to third persons of any trade secret so long as it has not fallen into the public domain.

VIII

(A) For the purpose of securing compliance or determining whether there has been compliance with this Final Judgment, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, each defendant shall, subject to any legally recognized privilege:

(1) Permit any duly authorized representative of the Department of Justice, on reasonable notice, to inspect and copy, during regular office hours, all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession, custody, or control of that defendant, relating to any of the subject matter contained in this Final Judgment (including all licenses under patent claims that cover any process, machine, or any aluminum alkyl, and licenses relating to aluminum trialkyl technology, whether or not containing provisions prohibited by this Final Judgment); and to interview officers, directors, agents, partners, or employees of such defendant, who may have counsel present, regarding any such matter; and

(2) Submit such written reports with respect to any of the matters contained in this Final Judgment as may from time to time be requested.

(B) No information obtained pursuant to this Article VIII shall be disclosed by any representative of the Department of Justice to any person, other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings in which the United States is a party, for the purpose of securing compliance or determining whether there has been compliance with this Final Judgment, for law enforcement purposes, or as otherwise required by law.

(C) Before any disclosure is made (other than in a Grand Jury proceeding) under Article VIII(B) of any information or document that (i) is furnished by a defendant under Article VIII(A), (ii) is or contains a trade secret or other confidential research, development, or commercial information, as those terms are used in F.R.Civ.P. 26(c)(7), and (iii) is so designated by the defendant by prominently marking it or the document containing it with the legend "CONFIDENTIAL, NO DISCLOSURE WITHOUT 10 DAYS' NOTICE TO (name of defendant furnishing document)," such defendant shall be given at least ten (10) days' prior notice thereof.

(D) Copies of records and documents obtained pursuant to this Article VIII shall be returned to the defendant from whom obtained, upon that defendant's request, when their retention by the Department of Justice is no longer needed.

IX

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate in relation to the construction or modification of any of the provisions thereof, for the purpose of enforcement or compliance therewith, and for the punishment of violations thereof.

X

This Final Judgment shall terminate sixteen (16) years after the date of this Final Judgment. No license or rights granted under this Final Judgment shall terminate, however, solely because of the expiration of the 16-year term of this Final Judgment.

XI

Entry of this Final Judgment is in the public interest. There is no just reason to delay entry of this Final Judgment against the three defendants named herein, and the entry of this Final Judgment now is expressly directed.

Dated: _____

United States District Judge.

V 42163 AUG 23 77 UM V

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

United States of America, Plaintiff, v. *Studiengesellschaft Kohle, m.b.H., Hercules Incorporated, Stauffer Chemical Company, and Texas Alkyls, Inc.*, Defendants.

Civil Action No. 1255–70.
Filed: August 15, 1977.

COMPETITIVE IMPACT STATEMENT

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act (16 U.S.C. § 16 (b)), the United States of America hereby submits this Competitive Impact Statement relating to the proposed consent judgment submitted for entry in this civil antitrust action.

I. NATURE AND PURPOSE OF THE PROCEEDING

A. THE COMPLAINT

The government filed this civil action on April 24, 1970, against Dr. Karl Ziegler ("Ziegler") of Mülheim, Federal Republic of Germany, and against Hercules Incorporated ("Hercules"), Stauffer Chemical Company ("Stauffer"), and Texas Alkyls, Inc. ("Texas Alkyls"), all Delaware corporations. The complaint alleged that the defendants were violating §§ 1 and 2 of the Sherman Act by combining and conspiring to restrain interstate trade and commerce in aluminum trialkyls ("ATAs") and to monopolize the sale of ATAs. Upon the subsequent death of defendant Ziegler, Studiengesellschaft Kohle, m.b.H. ("SGK"), a German corporation, was substituted for him as a party defendant.

The prayer for relief sought:

(1) An adjudication and decree that the defendants had combined and conspired to restrain trade and commerce in ATAs and to monopolize the sale of ATAs, in violation of §§ 1 and 2 of the Sherman Act;

(2) A permanent injunction against defendants' attempting in any way to interfere with the sale of ATAs by others;

(3) a permanent injunction against defendants' attempting in any way to interfere with the use or disposition by any person of the unpatented product of a patented process—whether by color of exclusive selling license, field restriction or condition in a license, quantity limitation in a license, or otherwise;

(4) A permanent injunction against defendants' entering into or maintaining in effect any agreement pursuant to which any party thereto, or third-party beneficiary thereof, is promised or otherwise given freedom from competition in the sale of the unpatented product of a patented process, on the part of other persons licensed or to be licensed to practice such process;

(5) Compulsory licensing, on reasonable and nondiscriminatory terms, of any and all inventions relating to the manufacture, use, or sale of ATAs, claimed in any United States patent that any defendant owns or has the right to license on the date of the final judgment;

(6) Compulsory licensing, on reasonable and nondiscriminatory terms, of any and all technology relating to the manufacture, use, or sale of ATAs which, on the date of entry of a final judgment in this action, the defendant owns or has the right to license; and

(7) Such other and further relief as the nature of the case requires and the court may deem just and proper.

B. THE PRODUCTS INVOLVED

ATAs are organ metallic chemical compounds that have two principal commercial uses. The major use is as reactants with ethylene or other olefins (e.g., isobutylene) in the manufacture of straight-chain alkyl alcohols and alphaolefins that, in turn, are used in the manufacture of biodegradable detergents. The other principal use is as catalyst ingredients in the manufacture of such plastic materials as polyethylene and polypropylene, and such specialty synthetic rubber materials as polybutadiene and polyisoprene.

The members of the ATA family that are most widely used commercially are triethyl aluminum and trissobutyl aluminum. These products have long been known to chemists, and are not covered by patents. These compounds are highly pyrophoric (i.e., they spontaneously burst into flame uopn contact with air or other sources of oxygen). Special precautions must therefore be applied in their manufacture, shipment, and storage.

All commercial manufacture of ATAs in the United States is by processes that are covered by one or more patents issued to Ziegler. Moreover, many of the processes in which ATAs are consumed, such as certain processes for the manufacture of alcohols and plastics, are also covered by Ziegler patents.

C. THE PARTIES

Ziegler was, until his death in 1973, the director of a German research institute[1] in which the research leading to his patents was conducted. Under the terms of Ziegler's directorship, all patents resulting from the work performed under his direction at the institute were issued to him, and he was entitled to one-third of all royalty income.

Since Ziegler's death, SGK, as trustee, has been distributing one-third of the royalties to Ziegler's widow and the remainder to his co-inventors and the institute in accordance with Ziegler's contractual and other legal obligations.

Ziegler granted licenses-under his patents on the ATA–manufacturing processes to Hercules in 1954, and to eleven other American companies in the period between 1954 and 1962. Hercules had not engaged in the commercial manufacture of organometallic materials before it obtained this license. In 1959, Hercules formed a joint venture with Stauffer, which had expertise in organometallic chemical manufacture and in the marketing of catalysts. The joint venture, Texas Alkyls, built and operates a facility that manufactures ATAs and other aluminum alkyl compounds. Stauffer acts as exclusive sales agent for Texas Alkyls.

II. THE PRACTICES AND EVENTS GIVING RISE TO THE VIOLATIONS OF THE SHERMAN ACT ALLEGED IN THE COMPLAINT

Ziegler's license to Hercules stated that Hercules would receive a non-exclusive right to use the processes to manufacture ATAs and the exclusive right to sell in the United States the ATAs thus made. The other eleven Ziegler licensees were restricted, in some instances expressly and in other instances by implication, to using the licensed processes in order to manufacture ATAs only for certain specified end-uses in their own plants, but not for sale.

Several of the Ziegler process licensees (other than Hercules) made preparations for, or gave serious consideration to, selling ATAs that they would manufacture by a Ziegler process. Two of these licensees, Ethyl Corporation ("Ethyl") and Continental Oil Co. ("Conoco") have far larger, and therefore more efficient, ATA production facilities than those of defendant Texas Alkyls.

Before Ethyl initiated its ATA sales program, it sought Ziegler and Hercules' express permission to sell ATAs. Each declined to give such permission. When Ethyl discovered, in 1959, that its potential ATA customers were receiving warnings or threats from defendants of possible patent litigation, Ethyl sued defendants Hercules, Stauffer, and Texas Alkyls in federal court in Delaware for a declaratory judgment that Ethyl's sale of the unpatented ATAs (that it made by a patented Ziegler process) infringed no patent right enforceable by Hercules.[2] In 1963, the Delaware court found for defendants Hercules, Stauffer, and Texas Alkyls, and enjoined Ethyl from selling ATAs in the United States that were made by the patented Ziegler processes without Texas Alkyls' permission. 232 F. Supp. 453. Since that time, Ethyl has been selling ATAs with Texas Alkyls' permission, paying a "royalty" to Texas Alkyls on all such sales.

From 1957 onward, Conoco repeatedly sought to establish or obtain the right to sell in the United States the unpatented ATAs that it manufactured by the patented Ziegler processes. The consistent response from representatives of the defendants was that they had the exclusive right to make such sales and that Conoco was not permitted to do so.

Moreover, defendants represented to Conoco and other Ziegler licensees that their exclusive sales right extended to all aluminum alkyls made by the Ziegler process, not just to ATAs. "Aluminum alkyls" describes a category of chemical compounds that includes, in addition to the ATAs, such groups of commercial chemical compounds as the alkyl aluminum halides and the alkyl aluminum hydrides. As a result, Conoco has never sold in the United States any of the aluminum alkyls that it makes by a Ziegler process.

None of the other Ziegler licensees have sold any aluminum alkyls in the United States, leaving the entire field to defendant Texas Alkyls and to Ethyl.

In defending the present lawsuit, the defendants have asserted that Ziegler's process patents gave him the right to specify the use that each licensee could make of the ATAs manufactured by his patented processes and to specify whether or not the licensee could sell them, even though the ATAs are unpatented products. Defendants moved for summary judgment dismissing this action on the ground that such exercise of patent rights is exempt from the Sherman Act. The Court denied defendants' summary judgment motion, holding (1) that the Ziegler process patents confer only the right to exclude others from the use of the processes and not the right to exclude them from the sale of the unpatented ATAs made by those processes, and (2) that defendants' actions must stand scrutiny, in a full trial on the merits, under the Sherman Act. 426 F. Supp. 143 (1976).

III. EXPLANATION OF THE PROPOSED JUDGMENT AND ITS ANTICIPATED EFFECT ON COMPETITION

The United States and defendants Hercules, Stauffer, and Texas Alkyls have stipulated that the proposed consent judgment, in the form negotiated by the parties, may

[1] The Max Planck Institut für Kohlenforschung (Max Planck Institute for Coal Research) is jointly sponsored by the German coal mining industry, the German federal government and German state governments. This is one of many Max Planck Institutes engaged in research in different fields of science and technology under joint industry and government sponsorship.

[2] After this declaratory judgment suit had been pending for some years, the opposing parties agreed that they would cross-move for summary judgment on the basis of a lengthy set of stipulated facts and that, if the Delaware court ruled against Ethyl, defendants would nevertheless permit Ethyl to sell ATAs in the United States in return for payment by Ethyl to Texas Alkyls of a lump sum of $250,000 plus running "royalties" for a 15-year period. These payments to Hercules were in addition to the royalties that Ethyl was required to pay Ziegler for use of his patented process.

be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act. The proposed judgment provides that there has been no admission by any party with respect to any issue of fact or law. Under the provision of Section 2(e) of the Antitrust Procedures and Penalties Act, the Court must determine that the proposed judgment is in the public interest before it can be entered.

The proposed judgment would, with certain exceptions, enjoin the consenting defendants from interfering with the sale, use, manufacture for sale, or export of unpatented aluminum alkyls; from entering into, maintaining, or enforcing any agreement or understanding that restrains any person in the sale of products made by a patented process or machine that the person is licensed to use; and from entering into, maintaining, or enforcing any agreement or understanding by which a party acquires an exclusive right to sell an unpatented product made by a patented process or on a patented machine. The proposed judgment also provides that the consenting defendants will not oppose certain proceedings to modify the injunction entered in Delaware against Ethyl's sale of ATAs. It would also compel these defendants to grant licenses under all patents and patent applications that they own (or have the right to license) that related to the manufacture of aluminum alkyls, such licenses to be royalty-free for at least three years after final entry of the judgment, and to grant reasonable-royalty licenses on certain technology (know-how) relating to the manufacture, shipment, and storage of ATAs. The major provisions are discussed below.

A. PARTIES COVERED BY THE PROPOSED JUDGMENT

Inasmuch as only three of the four defendants are to be parties to the proposed consent judgment, it will be necessary to hold a trial between the government and the remaining defendant, SGK, even if this proposed consent judgment is entered.

The government proposes to consent to the entry of this judgment despite the fact that trial of the case will not be avoided thereby because it provides for substantially all of the relief against and from these three defendants that could be expected to be obtained in a judgment for the United States entered after trial.

B. ARTICLE IV—INJUNCTIVE RELIEF

Article IV(A) would enjoin the defendants to be covered by the proposed judgment from preventing, restraining, or interfering with:

(i) The sale in the United States,
(ii) Manufacture in the United States for the purpose of selling,
(iii) Use in the United States, or
(iv) Export from the United States,

of unpatented aluminum alkyls by any person. It would also enjoin any attempt to do so. This injunction applies regardless of the manner in which the prescribed activity or result is achieved or attempted; moreover, the following acts are specifically prohibited: asserting any contract, agreement, or understanding to which Ziegler or SGK was a party, or prospectively asserting or enforcing the judgment entered in the Delaware action or the agreement made with Ethyl during that action.

The injunction of Article IV(A) would apply not only to ATAs, but also to any aluminum alkyl (i.e., to any chemical compound in which an aluminum atom is linked with at least one carbon atom that is a member of any alkyl radical), unless the compound is covered by a composition of matter claim of an unexpired United States patent. Unpatented alkyl aluminum dihydrides, dialkyl aluminum hydrides, alkyl aluminum dihalides, and dialkyl aluminum halides, inter alia, are included.

Article IV(A) would not apply to unpatented aluminum alkyls that are made outside the United States by any of the defendants covered by the judgment or by any of their subsidiaries; it would apply, however, to any such material that is imported into the United States. Moreover, it would apply to aluminum alkyls manufactured outside the United States by persons other than these defendants and their subsidiaries. This exception would permit these defendants and their subsidiaries to engage in manufacture of aluminum alkyls abroad without subjecting them to a charge of contempt, should they elect not to import such foreign-made material into the United States. The exception would not authorize these defendants to exercise any restraint over such material in the event that it is imported nor to restrain the foreign manufacture of aluminum alkyls by others.

Article IV(A) also would not prevent any of the defendants covered by the proposed judgment from enforcing any process or machine patent claim against anyone not licensed under such claim. Thus, these defendants would continue to have the right to sue anyone that they have not licensed for infringement of any such patents, subject to the standard defenses of patent invalidity and unenforceability. Under Article VI, discussed infra, these three defendants would be required, however, to grant licenses to any applicant under any patent relating to the manufacture of aluminum alkyls.

Article IV(B) would enjoin each of the defendants to be covered by the proposed judgment from entering into, maintaining, enforcing any agreement or understanding that (1) authorizes use of a patented process or machine, but (2) also prohibits or restrains the sale of any product made by the machine or process. It would also enjoin these defendants from entering into, maintaining, or enforcing any agreement or understanding that authorizes the use of a patented process or machine (1) to make any product, but not to sell it, or (2) to make any product and to sell the product for some, but not all, uses.

Article IV(B) would not prevent any consenting defendant, in the event that it licenses certain patent claims, but not others, from bringing infringement suits, subject to the standard defenses of invalidity and unenforceability, with respect to unlicensed patent claims. Article IV(B) would also not prevent any of these defendants from stating to a licenseee who has a license under some, but not all, of the claims of a patent, that the licensee has no implied license under the remaining claims. These three defendants would be compelled to grant licenses to all applicants on all of their patents relating to the manufacture of aluminum alkyls under Article VI, infra, however, and any limitation of the foregoing type would be subject to the general requirements of the antitrust laws.

Article IV(C) would enjoin these defendants from entering into, maintaining, or enforcing any agreement under which a license is granted to use a patented process or machine and a party acquires the exclusive right to sell an unpatented product produced under that license.

Article IV(C) would not apply to "sole and exclusive licenses," i.e., to licenses in which the licensee acquires the entire patent right under a process or machine patent for the remaining term thereof. Inasmuch as the effect of such licenses is merely to substitute the licensee for the licensor, they have no adverse effect on competition and need not be enjoined, unless they violate the antitrust laws for some other reason not involved in this case.

Articles IV(B) and IV(C) enjoin the practices described above with regard to all products, not merely those involved in the violation charged in the complaint, and apply regardless of whether a defendant is granting or receiving rights under the agreement or understanding.

C. ARTICLE V—VACATUR OF DELAWARE INJUNCTION

Article V of the proposed judgment would apply in the event that a motion or other proceeding is brought in federal court in Delaware to vacate or modify the judgment entered by that court in *Ethyl Corporation v. Hercules Powder Co., et al.*, Civil Action No. 2142 (the "Delaware action"). That judgment enjoins Ethyl from selling unpatented ATAs without Texas Alkyls' permission. If the government or any party to the Delaware action (presumably Ethyl) files a motion to vacate or modify that Delaware judgment, these three defendants would be required to refrain from opposing a modification of the judgment by which the sale of unpatented aluminum trialkyls would no longer be enjoined by that Delaware judgment. Article V would also authorize the government to represent to the Delaware court that these three defendants have no opposition to such modification. These defendants would also be required not to oppose any application that the government may make to intervene in the Delaware action. These three defendants would, however, retain the right to oppose any further modification of the Delaware judgement.

D. ARTICLE VI—COMPULSORY PATENT LICENSE

Article VI of the proposed judgment would require each consenting defendant to grant a license to everyone that requests one under each patent and patent application that the defendant owns (or under which it has the right to grant licenses) on the date that the judgment becomes final, permitting the licensee to practice in an unrestricted manner any and all patented inventions relating to the manufacture of aluminum alkyls. These licenses would have to be granted either for the life of the patents involved or for whatever shorter period the applicant for the license requests. No unreasonable or discriminatory condition can be imposed in the license.

At no time would a defendant be permitted to charge more than a reasonable and non-discriminatory royalty rate for any such license. Manufacture of ATAs under any such license would initially be royalty-free, but at any time more than three years after the date of final entry of the proposed judgment a consenting defendant could bring a motion in this Court for an order to change such a royalty-free license to a license at reasonable and non-discriminatory royalty rates. The government could participate in any such motion and oppose it if appropriate. To assure that the government will have an opportunity to do so, it must be given at least 30 days' notice before the motion is to be adjudicated. According to the proposed judgment, the defendant bringing such a motion must establish that the degree of competition in the sale of unpatented ATAs is such as to justify permitting the defendant to charge a royalty for their manufacture.

This provision has reference to the principle that misused patents are unenforceable until all effects of such misuse have been purged. Thus this provision permits a defendant to establish before the Court, at any time after three years, that the effects of the violations charged in the complaint upon competition in the sale of ATAs have been

V 4216 AUG 23 77 UM V

totally purged and that the patents are therefore prospectively enforceable. A defendant could limit his proof as to the state of competition to those particular ATAs the manufacture of which he seeks to make subject to royalty.

The favorable impact of this compulsory patent license provision upon competition in the sale of ATAs and other aluminum alkyls is expected to be quite limited, due to the fact that these defendants neither own nor have the right to grant licenses under the Ziegler patents. These defendants do have certain other patents in the field, however, and these will be subject to the compulsory license provisions.

E. ARTICLE VII—COMPULSORY KNOW-HOW LICENSE

Each defendant that is to be covered by the judgment would be required to license, to everyone requesting it, certain technology relating to the manufacture, shipment, or storage of ATAs. All such technology that was practiced commercially anywhere in the world by anyone between April 24, 1970 (the date on which this lawsuit was begun), and the date of final entry of the judgment would be included. The reason for imposing the initial time limit is to avoid requiring that the defendants resurrect information about technology that has not been in use for years. The second time limit is imposed to maintain the incentive of competitive advantage to encourage these defendants to develop new technology after the date of the judgment.

All technology, whether in the form of know-how, trade secrets, sales and technical literature, or otherwise, is included. The defendants would be required to disclose all such technology to each licensee and to permit its use without restrictions in the United States in return for payment of a reasonable and nondiscriminatory royalty. Each license would be granted for such duration as the applicant requests.

Each such license would be allowed to contain a provision forbidding the licensee from breaching the confidentiality of any trade secret that has been disclosed to it, but only so long as that secret has not fallen into the public domain, i.e., so long as it is not published nor a matter of general knowledge.

No defendant would be required to grant a know-how license under Article VII to any party that is already in the business of manufacturing and selling ATAs. The only company now in that position, aside from defendants, is Ethyl. Requiring defendants to license this established producer and vendor to use its know-how would not be likely to encourage greater competition. Moreover, any company that is already a manufacturer of ATAs on the date that this judgment becomes final, but that does not sell ATAs, would be entitled to a license only for technology relating to shipment and storage of ATAs, but not to technology relating to manufacture of ATAs. The only company now in that category is Conoco. Conoco's production facilities, like Ethyl's, are considerably larger than those of the defendants. No incentive to competition is therefore anticipated from any requirement to license this existing manufacturer under manufacturing know-how. On the other hand, a license to Conoco for know-how relating to shipment and storage of ATAs may encourage this producer's entry into the sales market.

F. OTHER PROVISIONS

The proposed judgment would remain in effect, in accordance with Article X, for 16 years after its final entry, but no licenses or other rights granted under it would be terminated by the expiration of the judgment. That is, if a compulsory patent license or technology license were granted by a defendant for a longer period, that license would remain in effect for the term specified in the license, even if that term exceeds the duration of the judgment. On the other hand, defendants would not be required to grant new licenses after the judgment has expired. Also, the injunctive provisions would terminate with the judgment. The 16-year effective life of the judgment corresponds approximately to the life of the last patent relating to ATA manufacture that is known to exist.

As is customary in consent judgments such as this, the Court would retain jurisdiction under Article IX and the government would have "visitation" rights under Article VIII during the entire period that the proposed judgment is in effect. All license agreements in the possession, custody or control of any consenting defendant under any patent claim on any process or machine, regardless of the purpose for which such process or machine is to be used, or under any patent claim on any aluminum alkyl would be subject to visitation, regardless of whether such licenses contain provisions prohibited by the proposed judgment.

IV. REMEDIES AVAILABLE TO POTENTIAL PRIVATE PLAINTIFFS

All potential private plaintiffs who have been damaged by the violations charged in the complaint will retain the same right to sue for monetary damages, and for any other legal or equitable relief, to which they would have been entitled, as if the proposed judgment were not entered. This judgment may not be used as prima facie evidence in private litigation, however, pursuant to Section 5(a) of the Clayton Act, as amended, 15 U.S.C. § 16(a).

The government's trial brief, as well as all deposition transcripts and most of the documentary evidence on which the government intends to rely at trial have been filed with the Court. Most of this material is publicly available, but some of it is subject to the terms of one or more protective orders entered by the Court, and is therefore maintained under seal. Access to the material maintained under seal can only be obtained by petitioning the Court.

Moreover, any manufacturer facing a claim from any defendant in this action either for patent infringement or for non-payment of royalties based on manufacture of ATAs by the process covered by Ziegler's patents, or the use or sale of ATAs made by that process, could assert as a defense to the claim the doctrine of patent misuse. The applicability of that defense would, of course, be determined by the court adjudicating the claim.

V. PROCEDURES AVAILABLE FOR MODIFICATION OF THE PROPOSED JUDGMENT

The proposed Final Judgment is subject to a stipulation by and between the United States and the defendants, which provides that the United States may withdraw its consent to the proposed Final Judgment at any time before the Court finds that entry of the judgment is in the public interest. Under the proposed judgment, the Court would retain jurisdiction of this action in order, among other things, to permit any necessary or appropriate modification of the judgment or construction of its provisions, to enforce compliance with the judgment, and to punish any judgment violation.

As provided by the Antitrust Procedures and Penalties Act, any person wishing to do so may, during the sixty-day period following the publication of the proposed judgment, submit written comments on the judgment to the United States Department of Justice, Richard H. Stern, Chief, Patent Section, Antitrust Division (SAFE 704), Washington, D.C. 20530. The Department of Justice will file with the Court and publish in the FEDERAL REGISTER such comments and the Department's response to them, and will thereafter evaluate any and all such comments and determine whether there is any reason for withdrawing its consent to the proposed judgment.

VI. DESCRIPTION AND EVALUATION OF ALTERNATIVES TO THE PROPOSED JUDGMENT ACTUALLY CONSIDERED BY THE UNITED STATES

In addition to considering provisions that are either similar in scope to those in the proposed judgment, or that would have provided relief less advantageous to the public than those contained in the proposed judgment, the government gave actual consideration to, and then rejected, the following procedures and judgment provisions:

1. Even if this proposed consent decree is entered, a trial will have to be held against the remaining defendant, SGK. The United States considered the option of refusing to enter into a consent judgment with less than all defendants. This alternative was rejected on the following grounds:

(a) The proposed consent judgment includes all of the relief against these defendants that the government could expect to obtain after trial.

(b) Entry of the proposed consent judgment offers the possibility of realizing procompetitive effects without the delay inherent in obtaining a litigated judgment subject to appeals.

(c) On the facts of this case, it was not considered to be in the interest of justice to compel defendants to continue to defend this suit despite their willingness to consent to entry of this consent judgment.

2. With respect to Article IV(A), the government originally considered the adoption of the injunctive provisions of Article IV(A)(1) without the two limitations imposed thereon by Article IV(A)(2). The defendants to be covered by this proposed judgment asserted, however, that the injunction should not be drawn so as to prevent them from exercising their normal business judgment as to whether to import into the United States any aluminum alkyls that they or their subsidiaries may manufacture abroad. It was concluded that it would be, on balance, procompetitive to relieve these defendants of this concern and thereby not to discourage them or their subsidiaries from investing in foreign aluminum alkyl production facilities, so long as these defendants are not permitted to impose restrictions on the use or re-sale of aluminum alkyls that they manufacture abroad and that are then imported into this country. The first of the two limitations in Article IV(A)(2) is precisely of this scope.

It was also recognized that Article IV(A)(1) could be interpreted as totally preventing these defendants from enforcing any of their patents relating to aluminum alkyls. In view of the compulsory patent licensing provisions of Article VI, it was agreed that Article IV(A)(1) should be limited so as not to enjoin these defendants from enforcing their process and machine patents against persons that have not been licensed to use them. The second limitation in Article IV(A)(2) preserves these defendants' right to do so. The injunction of Article IV(A)(1) would, however, apply to prevent these defendants from restricting a licensee under a process or machine patent claim from selling an unpatented aluminum alkyl manufactured under the license, or from making any use of such material that the licensee sees fit to make. Because the two limitations contained in Article IV(A)(2) are not considered to limit the pro-competitive effect of the injunction in Article IV(A)(1), they were accepted by the government.

3. The parties originally considered adopting Article IV(C)(1) without limitation. It was subsequently realized, however, that this would prevent these defendants from granting sole and exclusive patent licenses. In such licenses the licensee is invested with all of the rights theretofore held by the licensor, and the licensor retains none of the rights under the patent. Therefore, no anticompetitive effect is anticipated to result from continuing to allow these defendants to grant such licenses.

4. With respect to Article V, the government originally proposed that these defendants be required to petition to change the judgment entered in Delaware against Ethyl. These defendants were unwilling to initiate such proceedings, themselves, but expressed their readiness to undertake not to oppose proceedings in the Delaware court that others initiated, and to agree to let the government represent such non-opposition to the Delaware court, provided that their non-opposition was limited as indicated below. Inasmuch as the objective of obtaining the appropriate modification of the Delaware judgment is equally well served regardless of who initiates the proceedings, the government agreed to the modification whereby these defendants would not themselves be required to petition the Delaware court.

Also, the original proposal considered by the government provided for the total vacatur of the Delaware judgment. The two objectives that would be served thereby are: (1) removal of any lingering anticompetitive effect of the Delaware judgment upon the sale of ATAs, and (2) elimination of the possible continuing precedential status of the Delaware decision as a putative justification of restrictions on the sale or use of unpatented products made by patented processes or made on patented machines. These defendants objected to consenting to such a total vacatur, but were willing to agree not to oppose such modification of the Delaware judgment whereby Ethyl would no longer be enjoined from selling ATAs. This more limited undertaking by these defendants appears to satisfy the first of the above-listed objectives, because, in view of the other provisions of this proposed consent judgment, the injunction is the only feature of the Delaware judgment that can have such anticompetitive effect. With respect to the other objective, the government remains free to make whatever arguments it deems appropriate concerning further modification or total vacatur of the Delaware judgment—albeit without the assurance that defendants will not oppose. In the circumstances, the government is willing to assume the burden of convincing the Delaware court of the appropriateness of any further modifications that the government may urge in a further proceeding, if any.

5. With respect to Article VII, the government originally proposed a technology license that would apply to all aluminum alkyls, rather than only to ATAs. These defendants objected on the ground that such a license would include significant aluminum alkyl technology that was developed at their expense and that was not directly related to the violations charged in the complaint. The government therefore agreed to limit the scope of Article VII(A)(1) to ATAs.

In addition, the government agreed to the inclusion of the limitations of Article VII(B). As originally proposed by the government, Article VII would have required defendants to license all their manufacturing technology to all applicants, including Ethyl Corp. and Conoco, both of which are already highly efficient manufacturers of ATAs. The government believes, on the basis of the information presently available to it, that both Ethyl and Conoco will be capable of achieving very strong competitive positions in the sale of ATAs as a result of this proposed judgment, and that requiring Texas Alkyls to share its manufacturing know-how with these established producers would probably have no substantial pro-competitive effect. Therefore, the proposed consent judgment would require no licensing of manufacturing technology to Conoco and Ethyl, but would entitle Conoco to a license for shipment and storage technology, because this producer has not sold ATAs in the United States.

6. With respect to Article VIII, the government originally proposed establishing visitation rights to all "licensing arrangements of defendants," regardless of the subject matter licensed, because it was thought to be impractical to specify the subject matter covered in a way that would assure no loopholes or omissions. Subsequently, more detailed consideration of the scope of visitation rights required to assure that compliance with the judgment could be detected and enforced led the government to agree to the scope ultimately adopted in Article VIII. This provides access, inter alia, to all license agreements in the possession, custody, or control of any of these defendants that grant rights under any patent claim covering any process or machine, regardless of the purpose for which such process or machine is to be used, and under any patent that claims any aluminum alkyl, whether or not such license contains provisions prohibited by the proposed judgment.

VII. DETERMINATION DOCUMENTS

There are no materials or documents which the government considered determinative in formulating the proposal for a consent judgment. Therefore, the United States is submitting none with this competitive impact statement, pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b).

Respectfully submitted,

KURT SHAFFERT,

Drug Enforcement Administration

ABBOTT LABORATORIES

Manufacture of Controlled Substances, Registration

By Notice dated June 28, 1977, and published in the FEDERAL REGISTER on July 5, 1977; (42 FR 34386) Abbott Laboratories, 14th & Sheridan Road, Attn: Customer Service D-345, North Chicago, Illinois 60064, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of pentobarbital, a basic class controlled substance listed in schedule II.

No comments or objections having been received, and pursuant to Section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and 21 CFR 1301.54(e), the Deputy Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of pentobarbital is granted.

Dated: August 16, 1977.

DONALD E. MILLER,
Acting Deputy Administrator, Drug Enforcement Administration.

CYCLO CHEMICAL DIVISION, DIVISION OF ALAMEDA LABORATORIES, INC.

Manufacture of Controlled Substances, Application

Section 303a(1) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 823(a)(1)) states:

The Attorney General shall register an applicant to manufacture controlled substances in schedule I or II if he determines that such registration is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on the effective date of this part. In determining the public interest, the following factors shall be considered:

(1) Maintenance of effective controls against diversion of particular controlled substances and any controlled substance in schedule I or II compounded therefrom into other than legitimate medical, scientific, research, or industrial channels, by limiting the importation and bulk manufacture of such controlled substances to a number of establishments which can produce an adequate and uninterrupted supply of these substances under adequately competitive conditions for legitimate medical, scientific, research, and industrial purposes;

Pursuant to § 1301.43 of Title 21 of the Code of Federal Regulations (CFR), Notice is hereby given that on July 15, 1977, Cyclo Chemical Division, Division of Alameda Laboratories, Inc., 1922 East 64th Street, Los Angeles, California 90001, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of diphenoxylate, a basic class of controlled substance in schedule II.

Pursuant to Section 301 of the Controlled Substances Act (21 U.S.C. 821), and in accordance with 21 CFR 1301.43 (a), notice is hereby given that the above firm has made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic class of controlled substance indicated, and any other such person, and any existing registered bulk manufacturer of diphenoxylate, may file written comments on or objections to the issuance of such registration and may, at the same time, file a written request for a hearing on the application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47. Such comments, objections and requests for a hearing may be filed no later than September 26, 1977.

Comments and objections may be addressed to the DEA Federal Register Representative, Office of Chief Counsel, Drug Enforcement Administration,

Room 1203, 1405 Eye Street, NW., Washington, D.C. 20537.

DEPARTMENT OF LABOR

Office of Federal Contract Compliance Programs

ANASTASI BROTHERS CORP.

Debarment

Notice hereby is given that for violating Executive Order 11246, as amended, all existing United States Government contracts and subcontracts and Federally-assisted construction contracts and subcontracts with Anastasi Brothers Corporation shall not be extended or modified and the Corporation shall be incligible for further contracts and subcontracts with the United States Government and federally assisted construction contracts until the Company has satisfied the Director, Office of Federal Contract Compliance Programs that it has established and will carry out personnel and employment policies in compliance with Executive Order 11246, as amended. The home office of Anastasi Brothers Corporation is located at 300 Mt. Airy Avenue, Philadelphia, Pennsylvania, 19119.

A copy of my Decision and copies of the Recommended Decision and Order of the Administrative Law Judge and the Final Decision of the Department of Health, Education, and Welfare Reviewing Authority (Civil Rights) follow.

Dated: August 16, 1977.

WELDON J. ROUGEAU,
Director, OFCCP.

DECISION BY THE DIRECTOR OF OFCCP

In the matter of Anastasi Brothers Corporation and U.S. Department of Health, Education and Welfare, Case No. CC-11.

The Department of Health, Education, and Welfare initiated an enforcement proceeding under Executive Order 11246 against Anastasi Brothers Corporation alleging violations of the "New Haven Plan" and Executive Order 11246 by the contractor during its performance on a Government funded project at St. Raphael Hospital which is located in the New Haven, Connecticut, area.

After a hearing, Administrative Law Judge Burton S. Sternburg concluded that Anastasi Brothers Corporation was subject to Executive Order 11246, as amended, and the New Haven Plan Bid Conditions and had violated its contractual obligations and the Executive Order by failing to make adequate good faith efforts to meet its goals for minority employment on the St. Raphael project. Accordingly, the Administrative Law Judge recommended debarment of the Company.

On December 30, 1976, the Department of Health, Education, and Welfare's Reviewing Authority adopted the recommended findings, conclusions and order of the Administrative Law Judge debarring Anastasi Brothers Corporation from further federally involved contracts and subcontracts. No appeal has been filed by the contractor, and the Secretary of Health, Education, and Welfare did not, on his own motion within 30 days, decide to review the decision of the Reviewing Authority as provided by 41 CFR 82.41. Therefore, pursuant to 45 CFR 82.42, the decision of the Reviewing Authority has become the final decision of the Department of Health, Education, and Welfare in this matter.

The Department of Health, Education, and Welfare, pursuant to 41 CFR 60-1.26(b)(2)(vi) (1976) and 45 CFR 82.43, has transmitted to the Office of Federal Contract Compliance Programs the Order of the Reviewing Authority which would debar Anastasi Brothers Corporation from further Federal and federally assisted construction contracts and subcontracts.

In accordance with the powers granted to the Director, Office of Federal Contract Compliance Programs by Title 41, Code of Federal Regulations, Sections 60-1.26(b)(2)(vi) and 60-1.27 of the Secretary of Labor's regulations issued pursuant to Executive Order 11246, as amended, I hereby approve the debarment of Anastasi Brothers Corporation, whose home office is located at 300 Mt. Airy Avenue, Philadelphia, Pennsylvania, 19119, its subsidiaries and divisions, and any and all purchasers, successors, assignees, and/or transferees, from the award of any contract or subcontract funded in whole or in part with Federal funds, including Federally-assisted construction contracts and subcontracts, and from extensions or other modifications of any such existing contracts or subcontracts.

The reference to Mr. John G. Bynoe's title in finding No. 26 of Judge Sternburg's Recommended Decision and Order and in finding No. 26 in the Final Decision of the Reviewing Authority should be changed to read "Director, OCR Region I." In addition, in the first paragraph of the Order in Judge Sternburg's Recommended Decision and Order and in the first paragraph of the Order of the Reviewing Authority's Final Decision, the word "purchases" should be changed to read "purchasers."

The debarment will continue in effect until such time as Anastasi has satisfied the Director, Office of Federal Contract Compliance Programs, that it has established and will carry out employment policies and practices in compliance with the equal opportunity clause of Executive Order 11246, as amended.

This debarment shall be effective as of this date.

Copies of the Recommended Decision and Order of the Administrative Law Judge and the HEW Final Decision of the Reviewing Authority of (Civil Rights) are attached hereto and made a part hereof.

Signed at Washington, D.C., this the 16th day of August 1977.

WELDON J. ROUGEAU,
Director, OFCCP.

[Case No. CC-11]

In the Matter of Anastasi Brothers Corporation and U.S. Department of Health, Education, and Welfare; Colin Gillis, Esquire, 125 Newbury Street, Boston, Massachusetts.

For Anastasi Brothers Corporation, and Thomas J. Flygare, Esquire, Edward P. Levy, Esquire, U.S. Department of Health, Education, and Welfare, J.F.K. Federal Building, Boston, Massachusetts.

Before the Department of Health, Education, and Welfare, before Burton S. Sternburg, Administrative Law Judge.

RECOMMENDED DECISION AND ORDER

STATEMENT OF THE CASE

This administrative enforcement proceeding was brought by the United States Department of Health, Education and Welfare, hereinafter called HEW, pursuant to Executive Order 11246, as amended, (non discrimination under Federal contracts)[1] and the implementing rules and regulations[2] and Order of the Secretary of Labor of October 14, 1971, establishing the "New Haven Plan" containing minority employment ranges as part of the Bid Conditions for all Federally assisted construction in the New Haven Connecticut area.

In accordance with 41 CFR 60-1.26(b), HEW notified Anastasi Brothers Corporation, hereinafter called Respondent, which was engaged in masonry work on the addition to the St. Raphael Hospital in New Haven, Connecticut of its proposal to declare Respondent ineligible for the award of Federal or Federally-assisted contract or subcontracts or extension or other modfications of existing contracts, because of Respondent's failure to comply with the Bid Conditions and Executive Order 11246 while performing the masonry work on the St. Raphael Hospital addition which was an HEW-assisted construction project. Thereafter, Respondent duly filed an Answer to the Notice of Proposed Ineligibility and requested a hearing in the matter.

Subsequently, pursuant to a Notice of Hearing dated March 11, 1976, a formal hearing on the matter was held on April 12 and 13, 1976, in Cambridge, Massachusetts. An additional hearing, pursuant to Respondent's request, was held in Washington, D.C. on May 27, 1976. Evidence was received as to whether the Respondent, while performing masonry work on the St. Raphael Hospital addition, was in compliance with Executive Order 11246 and the New Haven Plan. All parties were represented by counsel and afforded full opportunity to be heard, adduce evidence, and examine and cross-examine witnesses. Additionally, all parties were afforded the opportunity to present oral argument at the hearing and to file briefs, findings of fact, conclusions of law and a proposed order.

Both parties filed briefs and HEW filed proposed findings, conclusions of law, a recommended order, and a reply brief, all of which have been duly considered.

Upon the basis of the entire record, including my observation of the witnesses and their demeanor, the admissions of fact and genuineness of documents, I recommend the following Findings of Fact, Conclusions of Law and Order.

FINDINGS OF FACT

1. Respondent is a contractor which performs masonry work on construction projects, with a home office at 300 E. Mt. Airy Avenue, Philadelphia, Pennsylvania 19119, and a branch office at 853 Plain Street, Marshfield, Massachusetts 02050.

2. The construction of an addition to St. Raphael Hospital, 1450 Chapel Street, New Haven, Connecticut (hereinafter referred to as the "St. Raphael project") was Federally-assisted by grants administered by HEW and by loan guarantees, with interest subsidies, administered by HEW.

3. Respondent entered into a contract agreement, dated May 25, 1973, to do the masonry work on the St. Raphael project.

4. Respondent's contract for work on the St. Raphael project exceeded $10,000.

5. Respondent began work on the St. Raphael project in July, 1974, and except for minor alterations or modifications completed work on the project in December, 1975.

6. The New Haven Plan Bid Conditions were incorporated into Respondent's contract for work on the St. Raphael project.

7. The New Haven Plan Bid Conditions, which were contained in the Invitation for Bids on this project and incorporated into Respondent's contract, is a nineteen (19) page document approved by the Department of Labor on October 14, 1971.

8. The New Haven Plan Bid Conditions provided that when a contractor uses trades which are no longer participating in voluntary affirmative action plans acceptable to the Director of the Office of Federal Contract Compliance, U.S. Department of Labor (OFCC), the contractor's employment in those trades is subject to the imposed goals, timetables and specific affirmative action steps contained in Part II of the Bid Conditions.

9. On July 2, 1974, the Director of OFCC withdrew approval of the bricklayers' participation in the voluntary affirmative action provisions of the New Haven Plan Bid Conditions and bricklayers became subject to Part II of the New Haven Plan Bid Conditions.

10. Respondent's contract on the St. Raphael project was subject to the following goals for minority employment utilization in the bricklaying trade as contained in Part II of the New Haven Plan Bid Conditions: from 26.3% to 31.3% for February 18, 1974 through February 17, 1975, and from 31.3% to 36.3% for February 18, 1975 through February 17, 1976.

11. Respondent also was required by Part II of the New Haven Plan Bid Conditions to make every good faith effort to meet the goals which had been established while it was working on the St. Raphael project.

12. The New Haven Plan Bid Conditions contain 16 specific affirmative action steps to determine whether good faith efforts have been made to meet the minority employment goals.

13. The following chart shows the total bricklayer hours, minority bricklayer hours and the percentage of total bricklayer hours performed by minorities as contained in Minority Utilization Reports submitted to Office for Civil Rights (OCR), HEW, by the Respondent:

Document No.	Reporting period ending	Total bricklayer hours	Minority bricklayer hours	Minority percentage
18	July 20, 1974...	1,410	0	0
19	Aug. 12, 1974...	1,414	8	.57
20	Sept. 9, 1974...	2,750.5	150.5	5.47
21	Oct. 7, 1974...	2,112	160	7.58
22	Nov. 4, 1974...	1,912	264	18.81
23	Dec. 2, 1974...	2,144	208	9.70
24	Dec. 27, 1974...	1,088	0	0
25	Jan. 27, 1975...	1,049	0	0
26	Feb. 24, 1975...	0	0	0
	Subtotals...	12,429.5	790.5	6.36
27	Mar. 31, 1975...	903	80	8.86
28	Apr. 26, 1975...	1,688	408	24.17
29	May 31, 1975...	1,748	480	27.46
30	June 30, 1975...	2,176	600	27.57
31	July 28, 1975...	1,499	441	29.42
32	Aug. 31, 1975...	1,172	424	36.18
33	Sept. 30, 1975...	776	296	38.14
34	Oct. 31, 1975...	704	192	27.27
35	Nov. 30, 1975...	160	40	25.00
36	Dec. 31, 1975...	324	0	0
37	Jan. 31, 1976...	0	0	0
38	Feb. 29, 1976...	0	0	0
	Subtotals...	11,150	2,961	26.56
	Totals...	23,579.5	3,751.5	15.91

14. While working on the St. Raphael project, Respondent did not meet the minority employment goals as set forth in the New Haven Plan Bid Conditions and incorporated into the Respondent's contract for the following time periods: (a) February 18, 1974 through February 17, 1975; and (b) February 18, 1975 through February 17, 1976.

15. While working on the St. Raphael project, Respondent did not carry out the specific affirmative action steps contained in the New Haven Plan Bid Conditions. Specifically:

a. Respondent did not maintain a file of the names and addresses of all minority workers referred to it along with the action taken regarding the referred workers.

b. Respondent did not notify community organizations in the New Haven area that it had employment opportunities available at the St. Raphael project.

c. Respondent did not externally disseminate an Equal Employment Opportunity policy to recruitment sources, suppliers and subcontractors or in advertising.

d. Respondent did not make specific efforts to encourage its minority bricklayers working on the St. Raphael project to recruit their minority friends and relatives.

e. Respondent did not make specific and constant written and oral recruitment efforts directed at employing minority workers.

16. Respondent is a party to a collective bargaining agreement with Local Union No. 6 of the International Brotherhood of Bricklayers (hereinafter referred to as "Bricklayers Local No. 6").

17. It is accepted practice under the rules or customs of Bricklayers Local No. 6 for a bricklayer to go directly to the work site in an effort to secure employment.

18. Respondent hired sixteen (16) nonminority bricklayers, including one apprentice bricklayer, on the St. Raphael project before it hired the first minority bricklayer, Claude Lang, on August 12, 1974.

19. John L. Brinkley, a minority journeyman bricklayer and a member of Bricklayers Local No. 6 in New Haven, went to Respondent's work site on the St. Raphael project four or five times beginning in August, 1974, and asked for work, but was not hired by Respondent until October 15, 1974.

20. Moses Battle, a minority journeyman bricklayer and a member of Brieklayers Local No. 6 in New Haven, was hired by Respondent to work at the St. Raphael project on October 30, 1974.

21. Claude Lang, John Brinkley and Moses Batlle were laid off by Respondent on or about November 22, 1974.

22. Except for approximately 5 weeks when the job was closed down, Respondent maintained a workforce on the St. Raphael project containing no minority bricklayers from on or about November 22, 1974 until on or about March 17, 1975, when Claude Lang was rehired.

23. In March of 1975, following a period when the project was closed down, Respondent rehired seven nonminority bricklayers including one apprentice, before rehiring a minority bricklayer, Claude Lang, on March 17, 1975.

24. John Brinkley and Moses Battle were rehired by Respondent for work at the St. Raphael project on or about April 7, 1975, following a telegram from Respondent to Bricklayers Local No. 6 requesting referral of two minority bricklayers.

25. Minority bricklayers, who are journeymen members of Bricklayers Local No. 6, were unemployed and available for work during Respondent's term of performance on the St. Raphael project. Specifically:

a. Claude Lang was unemployed from July 15, 1974 to August 12, 1974; from November 22, 1974 to March 17, 1975; and from approximately October 24, 1975 to April 12, 1976.

b. John Brinkley was unemployed from sometime in August, 1974 until October 15, 1974; from November 22, 1974 to April 7, 1975; from approximately September 27, 1975 until approximately October 16, 1975; and from early November, 1975 through April 12, 1976.

c. Moses Battle was unemployed for about 6 weeks of the time between July 15, 1974 and October 30, 1974. He was also unemployed from November 22, 1974 to April 7, 1975.

d. Other minority bricklayers, registered with Recruitment and Training, Inc., were unemployed during the term of Respondent's performance on the St. Raphael project.

26. In a letter dated May 20, 1976 from Lawrence C. Anastasi to Mr. John G. Bynoe, Director OFCC, Respondent stated that the lay-off sequence it intended to follow as its

[1] 3 CFR 169.
[2] 41 CFR Part 60-1.

V42N163 AUG 23 77 UM

work on the St. Raphael project neared completion was as follows: 1–5 nonminorities; 2–3 minorities; 3–Shop Steward; 4–Deputy Foreman. Respondent did not adhere to the intended lay-off sequence because during the month of October it had only 2 minority bricklayers out of a total of seven bricklayers, and during the month of November it had only one minority out of a total of 5 bricklayers.

27. All subcontractors on the St. Raphael project, including Respondent, were requested to attend a meeting to be held at St. Raphael Hospital on June 17, 1975, to discuss compliance with the New Haven Plan Bid Conditions. Respondent failed to attend the meeting.

28. The Recruitment and Training Program, Inc. (hereinafter referred to as "RTP") is located in New Haven, Connecticut, and assists contractors in hiring minorities.

29. Throughout the term of Respondent's performance on the St. Raphael project, Respondent did not initiate any contracts with RTP or avail itself of RTP's assistance in obtaining minority bricklayers.

30. Respondent had reasonable opportunity to be aware of the existence and purpose of RTP, as a result of the following:

a. Respondent was invited but failed to attend a meeting held at St. Raphael Hospital on March 13, 1974, where representatives of the Office for Civil Rights and RTP discussed with subcontractors the minority hiring requirements of the New Haven Plan Bid Conditions and described area resources available to assist subcontractors in meeting those requirements.

b. An RTP representative made a visit to Respondent's work site during the term of Respondent's performance on the St. Raphael project.

c. RTP was specifically mentioned in a May 2, 1975 letter from John G. Bynoe to Lawrence C. Anastasi.

31. Other than a letter and telegram, both dated April 4, 1975, from Respondent to Bricklayers Local No. 6, Respondent made no specific efforts to meet the goals of the New Haven Plan while working on the St. Raphael project.

32. During its work on the St. Raphael project, Respondent did not notify OCR that Bricklayers Local No. 6 had impeded Respondent in reaching the goals of the New Haven Plan.

33. Bricklayers Local No. 6 did not impede Respondent in reaching the goals of the New Haven Plan while Respondent was working on the St. Raphael project.

34. Between July 15, 1974 and December 31, 1975, the only construction project in the New Haven Plan geographical area that Respondent worked on was the St. Raphael project.

35. Respondent employed no minority bricklayers in the geographical area covered by the New Haven Plan between July 15, 1974 and December 31, 1975, except those employed by Respondent on the St. Raphael project.

36. The Department of Health, Education, and Welfare has made adequate efforts to secure Respondent's voluntary compliance with the requirements of the New Haven Plan Bid Conditions. Specifically:

a. A pre-construction meeting was held on March 13, 1974, at St. Raphael Hospital for all subcontractors working or planning to work on the St. Raphael project. This meeting was referred to in 30a, supra.

b. An on-site visit was conducted on August 21, 1974, where OCR representative spoke with Respondent's superintendent on the St. Raphael project, Mr. Tony Pace, and urged him to learn the requirements of the New Haven Plan Bid Conditions by speaking to Mr. John Clark, the project EEO Officer and a vice-president for W. J. Megin, Inc., the prime construction contractor on the St. Raphael project.

c. A letter dated March 21, 1975 was sent by Mr. John Bynoe of OCR to Mr. Lawrence Anastasi stating that Respondent had a minority utilization deficiency and requesting a meeting to discuss the matter.

d. A meeting was held at Respondent's office in Marshfield, Massachusetts on April 2, 1975, between Mr. Lawrence C. Anastasi and representatives of OCR and OFCC.

e. A letter dated May 2, 1975, was sent by Mr. Bynoe to Mr. Anastasi, stating in detail the steps Respondent could take to avoid enforcement proceedings.

f. A meeting was held at the St. Raphael project on May 15, 1975, between Respondent's representatives and representatives of OCR.

37. The prime contractor, W. J. Megin, Inc., through its EEO officer, Mr. John R. Clark, has made efforts in cooperation with OCR to secure Respondent's compliance with the requirements of the New Haven Plan Bid Conditions. Specifically:

a. At the request of OCR, Mr. Clark invited Respondent to a March 13, 1974 meeting at St. Raphael Hospital to discuss the requirements of the New Haven Plan Bid Conditions. This meeting is referred to in 30a and 36a, supra.

b. At the request of OCR, Mr. Clark wrote a letter dated July 25, 1974 to all subcontractors, including Respondent, on the St. Raphael project stating in part that subcontractors should comply with Part II of the New Haven Plan. This letter contained a copy of a letter dated July 16, 1975, from Mr. John Bynoe to W. J. Megin, Inc., regarding the transfer of some trades from Part I to Part II of the New Haven Plan.

c. Upon the suggestion of OCR, Mr. Clark wrote a letter dated August 28, 1974, to Mr. Fred Chiarianza, Respondent's Vice-President, stating the requirements of the New Haven Plan, including the minority utilization percentages.

d. Mr. Clark wrote a letter dated September 10, 1974, to all subcontractors, including Respondent, on the St. Raphael project regarding compliance with the minority hiring requirements set forth in the bid conditions.

e. Mr. Clark wrote a letter dated March 13, 1975 to Respondent stating in part that W. J. Megin, Inc. has been unable to obtain compliance from Respondent regarding submission of Manpower Utilization Reports and minority employment.

f. Mr. Clark wrote a letter dated June 4, 1975 to subcontractors, including Respondent, on the St. Raphael project asking them to attend a meeting on June 17, 1975 at the St. Raphael Hospital to discuss compliance with the New Haven Plan. Respondent did not attend this meeting. This meeting was referred to in 27, supra.

CONCLUSIONS OF LAW

1. Executive Order 11246 and the New Haven Plan Bid Conditions applied to Respondent's work on the St. Raphael project.

2. Respondent violated the provisions of its contract implementing the New Haven Plan Bid Conditions by failing to make adequate good faith efforts to meet its goals for minority employment on the St. Raphael project.

3. The New Haven Plan Bid Conditions require that Respondent's entire work force in the trade of bricklaying, including foreman, deputy foreman, shop stewards, and apprentices, be counted in calculating Respondent's minority employment percentage in the trade of bricklaying.

4. Respondent violated the provisions of Section 202 (1) and (4) of Executive Order 11246 in that it failed to take affirmative action to ensure non-discrimination in the employment of minority workers.

5. HEW exerted adequate efforts towards achieving Respondent's voluntary compliance with the Executive Order and the New Haven Plan Bid Conditions.

ORDER

Anastasi Brothers Corporation having been found in non-compliance with Executive Order 11246, and its implementing rules, regulations and order, it is recommended that the following Order be entered.

Ordered, from the effective date of this order, Anastasi Brothers Corporation, and any and all purchases, successors, assignees, and/or transferees, shall be ineligible for the award of any contract or subcontract funded in whole or in part with Federal funds from any agency of the United States, or for extensions or other modifications of such existing contracts of subcontracts, until Anastasi Brothers Corporation has satisfied the Secretary of the United States Department of Labor that it has established and will carry out personnel and employment policies in compliance with the provisions of Executive Order 11246, or susperseding Executive Orders, and rules, regulations, and orders promulgated thereunder.

Dated: August 25, 1976. Washington, D.C.

BURTON S. STERNBURG,
Administrative Law Judge.

[Case No. CC–11]

In the Matter of Anastasi Brothers Corporation and U.S. Department of Health, Education, and Welfare.

CERTIFICATE OF SERVICE

Recommended decision by Administrative Law Judge Burton S. Sternburg, was issued to the following persons on August 25, 1976.

ADMINISTRATIVE PROCEEDING IN THE DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Docket No. CC–11]

In the matter of: ANASTASI BROTHERS CORPORATION (hereinafter referred to as Respondent).

Final Decision of the Reviewing Authority (Civil Rights)

STATEMENT OF THE CASE

This administrative enforcement proceeding was brought by the United States Department of Health, Education, and Welfare, hereinafter called HEW, pursuant to Executive Order 11246, as amended, (non discrimination under Federal contracts) and the implementing rules and regulations and Order of the Secretary of Labor of October 14, 1971, establishing the "New Haven Plan" containing minority employment ranges as part of the Bid Conditions for all Federally assisted construction in the New Haven, Connecticut area.

In accordance with 41 CFR 60–1.26(b), HEW notified Anastasi Brothers Corporation, hereinafter called Respondent, which was engaged in masonry work on the addition to the St. Raphael Hospital in New Haven, Connecticut, of its proposal to declare Respondent ineligible for the award of Federal or Federally-assisted contract or subcontracts or extension or other modifications of existing contracts, because of Respondent's failure to comply with the Bid Conditions and Executive Order 11246 while performing the masonry work on the St. Raphael Hospital addition which was an HEW-assisted construction project. Thereafter, Respondent duly filed an Answer to the Notice of Proposed Ineligibility and requested a hearing in the matter.

Subsequently, pursuant to a Notice of Hearing dated March 11, 1976, a formal hearing on the matter was held on April 12 and 13, 1976, in Cambridge, Massachusetts before Administrative Law Judge Burton S. Sternburg. An additional hearing, pursuant to Respondent's request, was held in Washington, D.C. on May 27, 1976. Evidence was received as to whether the Respondent, while performing masonry work on the St. Raphael Hospital addition, was in compliance with Executive Order 11246 and the New Haven Plan. All parties were represented by counsel and afforded full opportunity to be heard, adduce evidence, and examine and cross-examine witnesses. Additionally, all parties were afforded the opportunity to present oral argument at the hearing and to file briefs, proposed findings of fact, conclusions of law and a proposed order.

Both parties filed briefs and HEW proposed findings, conclusions of law, a recommended order, and a reply brief, all of which have been duly considered.

Upon the basis of the entire record, including his observation of the witnesses and their demeanor, the admissions of fact and genuiness of documents, the Administrative Law Judge recommended and submitted to us, the Reviewing Authority, Findings of Fact, Conclusions of Law and an Order.

No exceptions have been filed to the Administrative Law Judge's Recommended Decision, timely or otherwise, thereby presenting no contested issues of fact or law for our determination. However, in accordance with our responsibilities in matters such as this, we have reviewed the record, including the pleadings and transcripts, and we agree with the Recommended Decision. Except for a few editorial changes and additional findings, our decision is substantially identical to the Recommended Decision.

FINDINGS OF FACT

1. Respondent is a contractor which performs masonry work on construction projects, with a home office at 300 E. Mt. Airy Avenue, Philadelphia, Pennsylvania 19119, and a branch office at 853 Plain Street, Marshfield, Massachusetts, 02050.

2. The construction of an addition to St. Raphael Hospital, 1450 Chapel Street, New Haven, Connecticut (hereinafter referred to as the "St. Raphael project") was Federally-assisted by grants administered by HEW and by loan guarantees, with interest subsidies, administered by HEW.

3. Respondent entered into a contract agreement, dated May 25, 1973, to do the masonry work on the St. Raphael project.

4. Respondent's contract for work on the St. Raphael project exceeded $10,000.

5. Respondent began work on the St. Raphael project in July, 1974, and except for minor alterations or modifications completed work on the projetc in December, 1975.

6. The New Haven Plan Bid Conditions were incorporated into Respondent's contract for work on the St. Raphael project.

7. The New Haven Plan Bid Conditions, which were contanied in the invitation for Bids on this project and incorporated into Respondent's contract, is a nineteen (19) page document approved by the Department of Labor on October 14, 1971.

8. The New Haven Plan Bid Conditions provided that when a contractor uses trades which are no longer participating in voluntary affirmative action plans acceptable to the Director of the Office of Federal Contrate Compliance, U.S. Department of Labor (OFCC), the contractor's employment practices in those trades is subject to the imposed goals, timetables and specific affirmative action steps contained in Part II of the Bid Conditions.

9. On July 2, 1974, the Director of OFCC withdrew approval of the bricklayers' participation in the voluntary affirmative action provisions of the New Haven Plan Bid Conditions and bricklayers became subject to Part II of the New Haven Plan Bid Conditions.

10. Respondent's contract on the St. Raphael project was subject to the following goals for minority employment utilization in the bricklaying trade as contained in Part II of the New Haven Plan Bid Conditions: from 26.3% to 31.3% for February 18, 1974 through February 17, 1975, and from 31.3% to 36.3% for February 18, 1975 through February 17, 1976.

11. Respondent also was required by Part II of the New Haven Plan Bid Conditions to make every good faith effort to meet the goals which had been established while it was working on the St. Raphael project.

12. The New Haven Plan Bid Conditions contain 16 specific affirmative action steps to determine whether good faith efforts have been made to meet the minority employment goals.

13. The following chart shows Respondent's total bricklayer hours, minority bricklayer hours and the percentage of total bricklayer hours performed by minorities on the St. Raphael project as contained in Minority Utilization Reports submitted to Office for Civil Rights (OCR), HEW, by the Respondent:

Document No.	Reporting period ending	Total bricklayer hours	Minority bricklayer hours	Minority percentage
18	July 20, 1974	1,410	0	0
19	Aug. 12, 1974	1,413	8	.57
20	Sept. 9, 1974	2,750.5	150.5	5.47
21	Oct. 7, 1974	2,112	160	7.58
22	Nov. 4, 1974	1,912	264	13.81
23	Dec. 2, 1974	2,144	208	9.70
24	Dec. 27, 1974	1,048	0	0

	Sub-totals	11,150	2,961	26.56
	Totals	23,579.5	3,751.5	15.91

14. While working on the St. Raphael project, Respondent did not meet the minority employment goals as set forth in the New Haven Plan Bid Conditions and incorporated into the Respondent's contract for the following time periods: (a) February 18, 1974 through February 17, 1975; and (b) February 18, 1975 through February 17, 1976.

15. While working on the St. Raphael project, Respondent did not carry out the specific affirmative action steps contained in the New Haven Plan Bid Conditions. Specifically:

a. Respondent did not maintain a file of the names and addresses of all minority workers referred to it along with the action taken regarding the referred workers;

b. Respondent did not notify community organizations in the New Haven area that it had employment opportunities available at the St. Raphael project;

c. Respondent did not externally disseminate an Equal Employment Opportunity policy to recruitment sources, suppliers and subcontractors or in advertising;

d. Respondent did not make specific efforts to encourage its minority bricklayers working on the St. Raphael project to recruit their minority friends and relatives;

e. Respondent did not make specific and constant written and oral recruitment efforts directed at employing minority workers.

16. Respondent is a party to a collective bargaining agreement with Local Union No. 6 of the International Brotherhood of Bricklayers (hereinafter referred to as "Bricklayers Local No. 6").

17. It is accepted practice under the rules or customs of Bricklayers Local No. 6 for a bricklayer to go directly to the work site in an effort to secure employment.

18. Respondent hired sixteen (16) nonminority bricklayers including one apprentice bricklayer, on the St. Raphael project before it hired the first minority bricklayer Claude Lang, on August 12, 1974.

19. John L. Brinkley, a minority journeyman bricklayer and a member of Bricklayers Local No. 6 in New Haven, went to Respondent's worksite on the St. Raphael project four or five times beginning in August, 1974, and asked for work, but was not hired by Respondent until October 15, 1974.

20. Moses Battle, a minority journeyman bricklayer and a member of Bricklayers Local No. 6 in New Haven, was hired by Respondent to work at the St. Raphael project on October 30, 1974.

21. Claude Lang, John Brinkley and Moses Battle were laid off by Respondent on or about November 22, 1974.

22. Except for approximately 5 weeks when the job was closed down, Respondent maintained a workforce on the St. Raphael project containing no minority bricklayers from on or about November 22, 1974 until on or about March 17, 1975, when Claude Lang was rehired.

23. In March of 1975, following a period when the project was closed down, Respondent rehired seven nonminority bricklayers including one apprentice, before rehiring a minority bricklayer, Claude Lang, on March 17, 1975.

24. John Brinkley and Moses Battle were rehired by Respondent for work at the St. Raphael project on or about April 7, 1975, following a telegram from Respondent to Bricklayers Local No. 6 requesting referral of two minority bricklayers.

25. Minority bricklayers, who are journeymen members of Bricklayers Local No. 6, were unemployed and available for work during Respondent's term of performance on the St. Raphael project. Specifically:

a. Claude Lang was unemployed from July 15, 1974 to August 12, 1974; from November 22, 1974 to March 17, 1975; and from approximately October 24, 1975 to April 12, 1976.

b. John Brinkley was unemployed from sometime in August 1974 until October 15, 1974; from November 22, 1974 to April 7, 1975; from approximately September 27, 1975 until approximately October 16, 1975; and from early November 1975 through April 12, 1976.

V42N163 AUG 23 77 UM

c. Moses Battle was unemployed for about 6 weeks of the time between July 15, 1974 and October 30, 1974. He was also unemployed from November 22, 1974 to April 7, 1975.

d. Other minority bricklayers, registered with Recruitment and Training, Inc., were unemployed during the term of Respondent's performance on the St. Raphael project.

26. In a letter dated May 20, 1976 from Lawrence C. Anastasi to Mr. John G. Bynoe, Director OFCC, Respondent stated that the lay-off sequence it intended to follow as its work on the St. Raphael project neared completion was as follows: 1—5 nonminorities; 2—3 minorities; 3—Shop Steward; 4—Deputy Foreman. Respondent did not adhere to the intended lay-off sequence because during the month of October it had only 2 minority bricklayers out of a total of seven bricklayers, and during the month of November it had only one minority out of a total of 5 bricklayers.

27. All subcontractors on the St. Ralphael project, including Respondent, were requested to attend a meeting to be held at St. Raphael Hospital on June 17, 1975, to discuss compliance with the New Haven Plan Bid Conditions. Respondent failed to attend the meeting.

28. The Recruitment and Training Program, Inc. (hereinafter referred to as "RTP") is located in New Haven, Connecticut, and assists contractors in hiring minorities.

29. Throughout the term of Respondent's performance on the St. Raphael project, Respondent did not initiate any contracts with RTP or avail itself of RTP's assistance in obtaining minority bricklayers.

30. Respondent had reasonable opportunity to be aware of the existence and purpose of RTP, as a result of the following:

a. Respondent was invited but failed to attend a meeting held at St. Raphael Hospital on March 13, 1974, where representatives of the Office for Civil Rights and RTP discussed with subcontractors the minority hiring requirements of the New Haven Plan Bid Conditions and described area resources available to assist subcontractors in meeting those requirements;

b. An RTP representative made a visit to Respondent's work site during the term of Respondent's performance on the St. Raphael project;

c. RTP was specifically mentioned in a May 2, 1975, letter from Mr. John G. Bynoe, Director, OCR, Region I, to Mr. Lawrence C. Anastasi, Respondent's Vice-President.

31. Other than a letter and telegram, both dated April 4, 1975, from Respondent to Bricklayers Local #6, Respondent made no specific efforts to meet the goals of the New Haven Plan while working on the St. Raphael project.

32. During its work on the St. Raphael project, Respondent did not notify OCR that Bricklayers Local #6 had impeded Respondent in reaching the goals of the New Haven Plan.

33. Bricklayers Local #6 did not impede Respondent in reaching the goals of the New Haven Plan while Respondent was working on the St. Raphael project.

34. Between July 15, 1974 and December 31, 1975, the only construction project in the New Haven Plan geographical area that Respondent worked on was the St Raphael project.

35. Respondent employed no minority bricklayers in the geographical area covered by the New Haven Plan between July 15, 1974 and December 31, 1975, except those employed by Respondent on the St. Raphael project.

36. The Department of Health, Education, and Welfare has made adequate efforts to secure Respondent's voluntary compliance with the requirements of the New Haven Plan Bid Conditions. Specifically:

a. A pre-construction meeting was held on March 13, 1974, at St. Raphael Hospital for all subcontractors working or planning to work on the St. Raphael project. This meeting was referred to in 30a, supra;

b. An on-site visit was conducted on August 21, 1974, where an OCR representative spoke with Respondent's Superintendent on the St. Raphael project. Mr. Tony Pace, and urged him to learn the requirements of the New Haven Plan Bid Conditions by speaking to Mr. John Clark, the project EEO Officer and a vice-president for W. J. Megin, Inc., the prime construction contractor on the St. Raphael project;

c. A letter dated March 21, 1975 was sent by Mr. John Bynoe of OCR to Mr. Lawrence Anastasi stating that Respondent had a minority utilization deficiency and requesting a meeting to discuss the matter;

d. A meeting was held at Respondent's office in Marshfield, Massachusetts on April 2, 1975, between Mr. Lawrence C. Anastasi and representatives of OCR and OFCC;

e. A letter dated May 2, 1975, was sent by Mr. Bynoe to Mr. Anastasi, stating in detail the steps Respondent could take to avoid enforcement proceedings;

f. A meeting was held at the St. Raphael project on May 15, 1975, between Respondent's representatives and representatives of OCR.

37. The prime contractor, W. J. Megin, Inc., through its EEO officer, Mr. John R. Clark, has made efforts in cooperation with OCR to secure Respondent's compliance with the requirements of the New Haven Plan Bid Conditions. Specifically:

a. At the request of OCR, Mr. Clark invited Respondent to a March 13, 1974, meeting at St. Raphael Hospital to discuss the requirements of the New Haven Plan Bid Conditions. This meeting is referred to in 30a and 36a, supra;

b. At the request of OCR, Mr. Clark wrote a letter dated July 25, 1974 to all subcontractors, including Respondent, on the St. Raphael project stating in part that subcontractors should comply with Part II of the New Haven Plan. This letter contained a copy of a letter dated July 16, 1975, from Mr. John Bynoe to W. J. Megin, Inc., regarding the transfer of some trades from Part I to Part II of the New Haven Plan;

c. Upon the suggestion of OCR, Mr. Clark wrote a letter dated August 28, 1974, to Mr. Fred Chiarlanza, Respondent's Vice-President, stating the requirements of the New Haven Plan, including the minority utilization percentages;

d. Mr. Clark wrote a letter dated September 10, 1974, to all subcontractors, including Respondent, on the St. Raphael project regarding compliance with the minority hiring requirements set forth in the bid conditions;

e. Mr. Clark wrote a letter dated March 13, 1975, to Respondent stating in part that W. J. Megin, Inc. has been unable to obtain compliance from Respondent regarding submission of Manpower Utilization Reports and minority employment;

f. Mr. Clark wrote a letter dated June 4, 1975, to subcontractors, including Respondent, on the St. Raphael project asking them to attend a meeting on June 17, 1975, at the St. Raphael Hospital to discuss compliance with the New Haven Plan. Respondent did not attend this meeting. This meeting was referred to in 27, supra.

38. Respondent was not shown to be a participant in any authorized multi-employer affirmative action program which served to satisfy the requirements of the New Haven Plan or its Bid Conditions.

39. The so called "show cause meeting" of April 2, 1975, between Respondent's Vice-President and OCR representatives, appeared to be a preliminary, voluntary meeting designed to discuss Respondent's compliance status. This assemblage was not a proceeding but a meeting which was requested, not demanded, by OCR, and it was held in a branch office of the Respondent, not at a government installation or forum. The failure of OCR representatives to advise or insist that Respondent have its attorney present at the meeting is not a denial of the right to aid of counsel.

CONCLUSIONS OF LAW

1. Executive Order 11246 and the New Haven Plan Bid Conditions applied to Respondent's work on the St. Raphael project.

2. Respondent violated the provisions of its contract implementing the New Haven Plan Bid Conditions by failing to make every good faith effort to meet its goals for minority employment on the St. Raphael project.

3. The New Haven Plan Bid Conditions require that Respondent's entire work force in the trade of bricklaying, including foremen, deputy foremen, shop stewards, and apprentices, be counted in calculating Respondent's minority employment percentage in the trade of bricklaying.

4. Respondent violated the provisions of Section 202(1) and (4) of Executive Order 11246 in that it failed to take affirmative action to ensure non-discrimination in the employment of minority workers.

5. HEW exerted adequate efforts towards achieving Respondent's voluntary compliance with the Executive Order and the New Haven Plan Bid Conditions.

ORDER

Anastasi Brothers Corporation having been found in non-compliance with Executive Order 11246, and its implementing rules, regulations and order, it is hereby ordered, from the effective date of this order, Anastasi Brothers Corporation, and any and all purchases, successors, assignees, and/or transferees, shall be ineligible for the award of any contract or subcontract funded in whole or in part with Federal funds from any agency of the United States, or for extensions or other modifications of such existing contracts or subcontracts, until Anastasi Brothers Corporation has satisfied the Secretary of the United States Department of Labor that it has established and will carry out personnel and employment policies in compliance with the provisions of Executive Order 11246, or superceding Executive Orders, and rules, regulations, and orders promulgated thereunder.

Dated: December 30, 1976.

AMERICAN FINISH & CHEMICAL CO. ET AL.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 2, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 2, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 8th day of August 1977.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

BETHLEHEM MINES CORP., ET AL.

Investigations Regarding Certifications of Eligibility To Apply For Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm

or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 2, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at theaddress shown below, not later than September 2, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 10th day of August 1977.

DOMINIC SORRENTINO,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-906]

AMERICAN BRIDGE DIVISION, UNITED STATES STEEL CORP.

Revised Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 222 of the Trade Act of 1974 and in accordance with Section 223(a) of such Act, on September 6, 1976, the Department of Labor issued a certification of eligibility to apply for adjustment assistance applicable to workers and former workers fabricating structural steel at the Antioch, Calif., plant of the American Bridge Division of United States Steel Corporation.

The notice of certification was published in the FEDERAL REGISTER September 17, 1976 (41 FR 40242).

Subsequent to the publication of the original determination, the Office of Trade Adjustment Assistance received an inquiry on behalf of workers separated prior to the December 26, 1975, impact date. A review of statistical evidence obtained in the course of the original investigation revealed lay-offs associated with the adverse affects of increased imports of fabricated structural steel actually began in June 1976.

CONCLUSION

Based on a review of the entire record and in accordance with the provisions of the Act, I have determined that the following certification is hereby made as follows:

All workers engaged in employment related to the fabrication of structural steel at the Antioch, Calif., plant of the American Bridge Division of United States Steel Corporation who became totally or partially separated from employment on or after May 24, 1975; and before August 1, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All employees who become totally or partially separated on or after August 1, 1976, are denied certification.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-24375 Filed 8-22-77;8:45 am]

[TA-W-2035]

AMERICAN CAN CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2035: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 2, 1977, in response to a worker petition received on May 2, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing metal beer, soda, coffee, and peanut cans at the Hillside, N.J., plant of American Can Co., Greenwich, Conn.

The notice of investigation was published in the FEDERAL REGISTER on May 13, 1977 (42 FR 24346). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from American Can Co., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion 4 has not been met.

Evidence developed in the Department's investigation reveals that the Hillside, N.J., plant of American Can Co. manufacturers three-piece beer, soda, coffee, and peanut cans. As the trend in can production is toward the two-piece drawn can, the Hillside facility has lost sales to other domestic producers and to several sister plants who manufacture two-piece cans. There are no significant imports of cans into the United States. Customers of American Can did not report switching purchases from the Hillside plant to foreign sources. Several customers surveyed have increased purchases of three-piece cans from American Can in the past two years. It is uneconomical to ship cans over long distances because most of the can is air. In addition, most cans made abroad are of the heavier and more expensive three-piece variety.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with those produced by workers at the Hillside, N.J., plant of American Can Co. did not contribute importantly to total or partial separations of workers and to the absolute decline in sales or production at such plant as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-24376 Filed 8-22-77;8:45 am]

[TA-W-1908]

ANN WILL GARMENT CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1908: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 24, 1977, in response to a worker petition received on March 24, 1977, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing women's dresses at Ann Will Garment Co., Kingston, Pa.

The notice of investigation was published in the FEDERAL REGISTER on April 12, 1977 (42 FR 19175). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Ann Will Garment Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation revealed that criterion (4) has not been met.

Ann Will Garment Co., a contractor, produces women's dresses and pant suits.

The one jobber that Ann Will Garment Co. works for experienced increased sales in 1976 compared to 1975 and in the first quarter of 1977 compared to the first quarter of 1976. This jobber, which does not import or use foreign contractors, increased contract work with other domestic firms while decreasing its level of contracts with Ann Will Garment.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the women's dresses and pant suits produced at Ann Will Garment Co., Kingston, Pa., did not contribute importantly to the total or partial separations of the workers of that firm.

Signed at Washington, D.C., this 15th day of August 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[FR Doc.77-24377 Filed 8-22-77;8:45 am]

[TA-W-88T]

CLAYTON SHOE CO.

Termination of Investigation

Pursuant to Section 223(d) of the Trade Act of 1974 and 29 CFR 90.17(d), a termination investigation was initiated on July 28, 1975 to determine, with respect to the certification issued on September 12, 1975, whether total or partial separations from the Corning, Ark., plant of Clayton Shoe Co. are no longer attributable to the conditions specified in such certification.

Notice of investigation regarding termination of certification of eligibility to apply for worker adjustment assistance was published in the FEDERAL REGISTER on August 10, 1976 (41 FR 33595). No public hearing was requested and none was held.

The existing certification will expire on September 12, 1977. Since workers newly separated, totally or partially, after September 12, 1977, would be ineligible to apply for adjustment assistance, termination of the certification by the Secretary of Labor within 90 days from statutory termination would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C., this 11th day of August 1977.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

[FR Doc.77-24378 Filed 8-22-77;8:45 am]

[TA-W-590]

CRUCIBLE, INC.

Revised Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor issued a notice of determination on April 19, 1976, and published in the FEDERAL REGISTER on April 30, 1976 (41 FR 18186) certifying workers in the Stainless Steel Division of the Midland, Pa., plant of Crucible, Inc. and denying workers in the Alloy Division of the same plant.

At the request of the United Steelworkers of America, a review investigation was instituted. The review investigation reexamined the case history and additional information submitted by the petitioners and officials of Crucible, Inc., concerning the Midland, Pa., plant.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally of partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met with respect to those Alloy Division units listed in this certification.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment of hourly workers in general mill overhead units of the Alloy Division listed in this certification declined 13 percent from 1974 to 1975 and then increased 3 percent from 1975 to 1976. Employment in power and fuel units of the Alloy Division declined six percent from 1974 to 1975 and then increased 4 percent from 1975 to 1976. Employment in the alloy shops fell 20 percent from 1974 to 1975 and then increased 1 percent from 1975 to 1976. Employment in the internal transportation units of the Alloy Division declined 17 percent from 1974 to 1975 and declined 4 percent from 1975 to 1976. Employment in the melt shop maintenance shop declined 17 percent from 1974 to 1975 and then increased 12 percent from 1975 to 1976. Employment of hourly workers in the scrap yard and soaking pits fell 24 percent from 1974 to 1975 and then increased 8 percent from 1975 to 1976.

Employment of salaried workers in these Alloy Division units remained relatively stable in the period from 1974 through 1976. Employment of salaried workers in general mill overhead increased 1 percent from 1974 to 1975 and then remained stable from 1975 to 1976. Employment of salaried workers in power and fuel units remained constant from 1974 to 1975 and then declined 8 percent from 1975 to 1976. Salaried employment in the alloy shops and internal transportation departments remained constant from 1974 to 1975 and from 1975 to 1976. Separate employment data for salaried employees in the melt shop

V 421693 AUG 23 77 UM

maintenance shop and scrap yard and soaking pits was not available.

Labor turnover data for the Alloy Division indicates that layoffs in the alloy shops, power and fuel units, transportation and general mill overhead in 1975 equaled 107 percent, 12 percent, 121 percent, and 117 percent, respectively, of average annual employment in those units. In 1976, layoffs in the alloy shops, power and fuel units, transportation and general mill overhead equalled 28 percent, 4 percent, 148 percent and 155 percent, respectively, of average annual employment.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales by the Stainless Steel Division of the Midland Plant of Crucible, Inc., increased 22 percent from 1973 to 1974 and then decreased 38 percent from 1974 to 1975. Sales declined in each quarter of 1975 when compared to the same quarter in 1974. Production is equivalent to sales.

INCREASED IMPORTS

Imports of stainless hot and cold rolled sheet and strip decreased absolutely and relatively from 1972 to 1973 and then increased absolutely and relatively from 1973 to 1974 and from 1974 to 1975. From 1975 to 1976, imports increased by 18 percent from 66.0 thousand tons to 78.2 thousand tons. The ratio of imports to domestic shipments increased from 7.5 percent in 1974 to 15.1 percent in 1975 and then decreased to 11.1 percent in 1976.

CONTRIBUTED IMPORTANTLY

The Department's original determination for TA-W-590 certified all workers in the Stainless Steel Division of the Midland, Pa., plant of Crucible, Inc., engaged in employment related to the production of stainless steel sheet and strip.

The evidence developed during the Department's reinvestigation indicates that the production of stainless steel sheet and strip involves units in both the Stainless Steel Division and the Alloy Division of the Midland Plant. Employees in the Alloy Division units listed in this certification allocated a significant percentage of their time to the production of stainless steel sheet and strip.

The Department's first investigation revealed that customers of Crucible, Inc., had decreased purchases of stainless steel sheet and strip from the subject firm and increased purchases of stainless steel sheet and strip from foreign suppliers.

The degree of integration between the units of the Alloy Division not listed in this certification, and the Stainless Steel Division is not significant. Purchases by the Stainless Steel Division from the Alloy Division represented less than 11 percent of total Alloy Division revenues in 1974, 1975, and 1976. Additionally, while the Alloy Division produces and sells stainless steel product (stainless steel bars and billets), sales and production of that stainless steel product represents a small percentage of total Alloy Division sales and production. Employees in the Alloy Division allocated a minimal percentage of their time to the production of stainless steel bars and billets.

CONCLUSION

After careful review of the facts obtained in the reinvestigation of TA-W-590, Crucible, Inc., Midland, Pa., plant, I conclude that increases in imports of stainless steel hot and cold rolled sheet and strip like or directly competitive with the stainless steel hot and cold rolled sheet and strip produced at the Midland, Pa., plant of Crucible, Inc., contributed importantly to the total or partial separations of workers in the Alloy Division of that firm. In accordance with the provisions of the Act, I hereby issue the following revised determination:

All workers in the Alloy Division of the Midland, Pa., plant of Crucible, Inc., who became totally or partially separated from employment in the units listed below on or after February 2, 1975, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

HOURLY WORKERS

GENERAL MILL OVERHEAD

[TA-W-1564]

E. T. IRVIN WORKS, U.S. STEEL CORP.

Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1564: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigations were initiated on January 10, 1977, in response to a worker petition received on January 10, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel slabs, coated sheets, hot and cold rolled carbon steel strip and sheet and tin mill products at the Braddock and Dravosburg, Pa., plants of the E. T. Irvin works of the U.S. Steel Corporation.

The notice of investigation was published in the FEDERAL REGISTER on January 28, 1977 (42 FR 5456). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the U.S. Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation has revealed that criterion (2) has not been met for workers engaged in employment related to the production of carbon steel slabs and coated sheets. Furthermore, without regard as to whether any of the other criteria have been met, criterion (4) has not been met for workers engaged in employment related to the production of hot and cold rolled carbon steel strip and sheet. Furthermore, without regard as to whether any of the other criteria have been met, criterion (3) has not been met for workers engaged in employment related to the production of tin plated steel.

CARBON STEEL SLABS

Sales of carbon steel slabs increased 294.6 percent in quantity in 1976 as compared to 1975. Production data was not made available.

COATED SHEETS

Sales of coated sheets increased 49.7 percent in quantity in 1976 as compared to 1975. Production data was not made available.

TIN PLATED STEEL

Imports of tin plated steel declined each year from 516,900 tons in 1972 to 315,700 tons in 1974, increased to 407,100 tons in 1975 and declined to 309,300 tons in 1976.

The ratio of imports to domestic shipments of tin plated steel declined each year from 11.6 percent in 1972 to 5.7 percent in 1974, increased to 9.8 percent in 1975 and then declined to 6.5 percent in 1976.

HOT AND COLD ROLLED CARBON STEEL SHEET AND STRIP

The Department conducted a survey of customers of the E. T. Irvin Works of the U.S. Steel Corporation that bought hot and cold rolled carbon steel strip and sheet. The survey revealed that those customers contacted did not switch from the sheet and strip made at the E. T. Irvin Works to sheet and strip from foreign sources.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales of carbon steel slabs and coated sheets at the E. T. Irvin Works of the U.S. Steel Corporation have not declined as required for certification under Section 222 of the Trade Act of 1974. Furthermore, I conclude that imports of articles like or directly competitive with the tin plated steel products produced at the E. T. Irvin Works of the U.S. Steel Corporation have not increased, either absolutely or relative to domestic production, as required for certification under Section 222 of the Trade Act of 1974. Furthermore, I conclude that increased imports of articles like or directly competitive with the hot and cold rolled carbon steel sheet and strip produced at the E. T. Irvin Works of the U.S. Steel Corporation have not contributed importantly to the total or partial separations of workers engaged in employment related to the production of hot and cold rolled carbon steel strip and sheet at the plant as required for certification under Section 222 of the Trade Act of 1974.

Without regard to whether any of the other criteria have been met, criterion (2) has not been met.

The Department's investigation revealed that sales of metal fasteners by E. W. Ferry Screw Products, Inc., increased in quantity and value 70.9 percent and 33.7 percent, respectively in 1976 compared to 1975. Sales increased further in both quantity and value in the first quarter of 1977 by 41.3 percent and 66.8 percent, respectively compared to the first quarter of 1976.

Production of metal fasteners at E. W. Ferry Screw Products, Inc., increased in quantity and value by 94.0 percent and 17.9 percent, respectively in 1976 compared to 1975. Production further increased in quantity and value by 24.4 percent and 89.3 percent, respectively in the first quarter of 1977 compared to the same period in 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales or production of metal fasteners produced at E. W. Ferry Screw Products, Inc., Brookpark, Ohio, have not decreased absolutely as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1437]

FAIRLESS WORKS, U.S. STEEL CORP.

Determinations Regarding Eligibility To Apply for Worker Adjustment Asssitance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1437: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976, in response to a worker petition received on December 15, 1976, which was filed by the United Steelworkers of America on behalf of workers and former workers engaged in employment related to the production of carbon steel wire rod, carbon steel wire and wire products, carbon steel bar-size light shapes, and carbon steel pipe and tubing at the Fairless Works of the U.S. Steel Corporation, in Fairless Hills, Pa.

The notice of investigation was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 900). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the U.S. Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or sub-

Signed at Washington, D.C., this 15th day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[TA-W-1994]

E. W. FERRY SCREW PRODUCTS

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1994: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 20, 1977, in response to a worker petition received on April 19, 1977, which was filed by the Independent Workers Association on behalf of workers and former workers producing metal fasteners at E. W. Ferry Screw Products, Inc., Brookpark, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on May 10, 1977 (42 FR 23657). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of E. W. Ferry Screw Products, Inc., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof, have increased either actual, or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (2) has not been met.

V 42 163 AUG 23 77 UM

division are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met for workers engaged in employment related to the production of carbon steel pipe and tubing. Furthermore, the investigation has revealed that without regard as to whether any of the other criteria have been met, criterion (4) has not been met for workers engaged in employment related to the production of carbon steel wire rod and for workers engaged in employment related to the production of carbon steel wire and wire products. Furthermore, without regard as to whether any of the other criteria have been met, criterion (3) has not been met for workers engaged in employment related to the production of carbon steel bar-size light shapes.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

CARBON STEEL PIPE AND TUBING

Average employment declined 44.3 percent in the fourth quarter of 1975 as compared to the like 1974 quarter and continued to decline 35.6 percent in the first quarter of 1976 as compared to the like 1975 period before increasing 16.2 percent in the April through November 1976 period as compared to the like 1975 period.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

CARBON STEEL PIPE AND TUBING

Plant sales declined 52.5 percent in quantity in the fourth quarter of 1975 as compared to the like 1974 quarter and continued to decline 15.4 percent in the first quarter of 1976 as compared to the like 1975 period before increasing 43.2 percent in quantity in the April–November 1976 period as compared to the like 1975 period.

INCREASED IMPORTS

CARBON STEEL BAR-SIZED LIGHT SHAPES

Imports declined from 562,700 tons in 1972 to 457,400 tons in 1973, increased to 521,500 tons in 1974, declined to 167,200 tons in 1975 and continued to decline to 164,300 tons in 1976.

The ratio of imports of carbon steel bar-size light shapes to domestic shipments declined from 75.1 percent in 1972 to 44.2 percent in 1973 increased to 53.1 percent in 1974, declined to 22.7 percent in 1975 and continued to decline to 19.5 percent in 1976.

CARBON STEEL PIPE AND TUBING

Imports declined from 1,768,100 tons in 1972 to 1,574,600 tons in 1973, increased to 1,781,500 tons in 1974, declined to 1,542,500 tons in 1975 and increased to 1,820,700 tons in 1976.

The ratio of imports of carbon steel pipe and tubing to domestic shipments declined from 28.6 percent in 1972 to 20.3 percent in 1973, increased to 21.5 percent in 1974, increased to 22.8 percent in 1975 and continued to increase to 35.8 percent in 1976.

CONTRIBUTED IMPORTANTLY

The Department's investigation revealed that some customers reduced purchases of carbon steel pipe and tubing from the Fairless Works and increased purchases of imported carbon steel pipe and tubing.

The investigation further revealed that customers of carbon steel wire rod and carbon steel wire and wire products from the Fairless Works that were surveyed by the Department did not switch to imported carbon steel wire rod and imported carbon steel wire and wire products.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the carbon steel wire rod and the carbon steel wire and wire products produced at the Fairless Works of the U.S. Steel Corporation have not contributed importantly to the total or partial separation of workers engaged in employment related to the production of either carbon steel wire rod or carbon steel wire or wire products at the plant as required for certification under Section 222 of the Trade Act of 1974.

I further conclude that imports of articles like or directly competitive with the carbon steel bar-size light shapes produced at the Fairless Works of the U.S. Steel Corporation have not increased either absolutely or relative to domestic production as required for certification under Section 222 of the Trade Act of 1974.

I further conclude that increased imports of articles like or directly competitive with the carbon steel pipe and tubing produced at the Fairless Works of the U.S. Steel Corporation have contributed importantly to the total or partial separation of workers engaged in employment related to the production of carbon steel pipe and tubing at the plant.

In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of carbon steel pipe and tubing at the Fairless Works of the U.S. Steel Corporation in Fairless Hills, Pa., who became totally or partially separated from employment on or after November 15, 1975, and before April 4, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-24382 Filed 8-22-77;8:45 am]

[TA-W-1878]

FAYLEE SPORTSWEAR, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1878: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 23, 1977, in response to a worker petition received on March 23, 1977, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing women's dresses at Faylee Sportswear, Inc., Edwardsville, Pa.

The notice of investigation was published in the FEDERAL REGISTER on April 12, 1977 (42 FR 19176). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Faylee Sportswear, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make a naffirmative determination and issue a certification of eligibility to apply for ajustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation revealed that the fourth criterion has not been met.

Jobbers representing 100 percent of Faylee's contract work done in 1976 steadily increased their sales during the January 1974–April 1977 period while maintaining their level of contracts with the subject firm during this period. These jobbers do not use foreign contractors and do not import women's dresses.

Production at Faylee Sportswear, Inc., increased 12.9 percent in 1975 compared to 1974, and further increased 0.1 percent in 1976 compared to 1975. Production at the firm also increased 8.3 percent in the first four months of 1977 compared to the same period of 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports like or directly competitive with the women's dresses produced at Faylee Sportswear, Inc., Edwardsville, Pa., did not contribute importantly to the total or partial separations of the workers at that firm.

Signed at Washington, D.C., this 15th day of August 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[FR Doc.77-24383 Filed 8-22-77;8:45 am]

[TA-W-1919]

GULF & WESTERN INDUSTRIES, BONNEY FORGE DIVISION

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the result of TA-W-1919: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 29, 1977, in response to a worker petition received on March 28, 1977, which was filed on behalf of workers and former workers producing steel pipe fittings at Gulf & Western Industries, Bonney Forge Division, Roselle, N.J.

The notice of investigation was published in the FEDERAL REGISTER on April 12, 1977 (42 FR 19182). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Bonney Forge Division, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, Industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment at the Roselle, N.J., plant of the Bonney Forge Division declined 48 percent in 1976 compared to 1975 and declined 58 percent in the first two months of 1977 compared to the same period in 1976. All workers were laid off on March 4, 1977.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production at the Roselle, N.J., plant declined 63 percent in 1976 compared to 1975 and declined 66 percent in first two months of 1977 compared to the same period in 1976. All production operations were terminated on February 25, 1977.

INCREASED IMPORTS

Imports of steel pipe fittings increased annually from 64.8 million pounds in 1973 to 185.9 million pounds in 1975. Imports declined to 113.0 million pounds in 1976. In the first quarter of 1977 imports declined to 22.7 million pounds from 36.7 million pounds in the first quarter of 1976.

Imports of steel pipe fittings increased relative to domestic production from 20.3 percent in 1973 to 47.6 percent in 1976. In the first quarter of 1977, imports as a percentage of production declined to 35.3 percent from 48.9 percent in the first quarter of 1976.

CONTRIBUTED IMPORTANTLY

Direct customers of the Bonney Forge Division did not purchase imports though they experienced reduced orders from their own customers because of imported steel pipe fittings. Companies who bought from Bonney Forge's customers were subsequently contacted and some of these companies indicated that they had switched purchases to steel pipe fittings of foreign origin.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with steel pipe fittings produced by Gulf & Western Industries, Bonney Forge Division, Roselle, N.J., contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers of Gulf & Western Industries, Bonney Forge Division, Roselle, N.J., who became totally or partially separated from employment on or after March 24, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-24384 Filed 8-22-77;8:45 am]

[TA-W-155T]

HARRISBURG MANUFACTURING CO.

Termination of Investigation

Pursuant to Section 223(d) of the Trade Act of 1974 and 29 CFR 90.17(d), a termination investigation was initiated on July 28, 1976 to determine, with respect to the certification issued on October 29, 1975, whether total or partial separations from the Harrisburg, Ark., plant of Harrisburg Manufacturing Co. are no longer attributable to the conditions specified in such certification.

Notice of investigation regarding termination of certification of eligibility to apply for worker adjustment assistance was published in the FEDERAL REGISTER on August 10, 1976 (41 FR 33596). No public hearing was requested and none was held.

The existing certification will expire on October 29, 1977. Since workers newly separated, totally or partially, after October 29, 1977 would be ineligible to apply for adjustment assistance, termination of the certification by the Secretary of Labor within 90 days from statutory termination would serve no purpose; consequently the investigaton has been terminated.

Signed at Washington, D.C., this 11th day of August 1977.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-1728]

I. J. WEXLER COATS

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223(d) of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-1728: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977, in response to a worker petition received on February 23, 1977, which was filed on behalf of workers and former workers producing ladies' coats and suits at I. J. Wexler Coats, Los Angeles, Calif.

The notice of investigation was published in the FEDERAL REGISTER on March 15, 1977 (42 FR 14185). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of I. J. Wexler Coats, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility re-

V 42 163 AUG 23 77 UM

quirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriation subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that criterion (4) has not been met.

The majority of I. J. Wexler's customers consisted of small specialty shops. A survey of customers indicated that those customers who decreased purchases from I. J. Wexler in 1976 from 1975 did not purchase imported ladies' coats and suits. Customers also indicated that they decreased purchases from I. J. Wexler due to a market demand for styles which were not offered by the firm. Customers who reduced purchases from I. J. Wexler switched to other domestic suppliers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies' coats and suits produced at I. J. Wexler Coats, Los Angeles, Calif., did not contribute importantly to the total or partial separations of the workers of that firm.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-24386 Filed 8-22-77;8:45 am]

[TA-W-1785, 1787]

JEM FASHIONS, INC., AND MEL MAR FASHIONS, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1785 and TA-W-1787: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 10, 1977, in response to worker petitions received on March 9, 1977, which were filed on behalf of workers and former workers producing women's coats at Jem Fashions, Inc., Asbury Park, N.J. (TA-W-1785) and on behalf of workers and former workers producing women's coats and sportswear at Mel Mar Fashions, Inc., Asbury Park, N.J. (TA-W-1787). The Department's investigation revealed that due to a change in company ownership, Jem Fashions went out of business in December 1976 and was reopened in January 1977 as Mel Mar Fashions, Inc. Thus, both petitions were combined into one investigation.

The notices of investigation were published in the FEDERAL REGISTER on March 25, 1977 (42 FR 16200). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Jem Fashions and of Mel Mar Fashions, their customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number of proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (4) has not been met.

Jem Fashions, Inc., was founded in 1962 as a clothing contractor, producing women's coats primarily for a clothing manufacturer in New York City. Jem Fashions was a one-plant company operating in a one-story building at 970 Monroe Avenue, Asbury Park, N.J.

Due to a change in company ownership, Jem Fashions went out of business in December 1976 and was reopened in January 1977 as Mel Mar Fashions, Inc. As a clothing contractor, Mel Mar Fashions continues to produce women's coats and is attempting to expand into the women's sportswear market. Mel Mar Fashions operates on the same premises and with the same machinery as did Jem Fashions. Former employees of Jem Fashions are now working for Mel Mar Fashions.

Unit production at the Asbury Park plant increased 28 percent in 1976 from 1975 and decreased 95 percent in the first quarter of 1977 compared to the first quarter of 1976. The production decline in the first quarter of 1977 can be directly attributed to the loss of contract work with a clothing manufacturer who had accounted for over 90 percent of Jem Fashions' production in 1975 and 1976. This clothing manufacturer had increased its contract work with Jem Fashions in 1976 from 1975 but discontinued its contract work with Mel Mar Fashions in January 1977.

The clothing manufacturer stated that it ceased business with Mel Mar Fashions because Mel Mar Fashions is regulated by a different set of union-employer regulations than was Jem Fashions. Although workers at both Jem Fashions and Mel Mar Fashions were represented by the International Ladies' Garment Workers Union, Jem Fashions, which produced women's coats, belonged to a different employers' association than Mel Mar Fashions, which produces women's coats and women's sportwear. The clothing manufacturer, however, can only award contract work to firms belonging to the employers' association to which Jem Fashions belonged. According to its union-employer association rules, therefore, the clothing manufacturer shifted contract work from Mel Mar Fashions to other domestic union shops. Mel Mar Fashions continues to perform contract work for other clothing manufacturers belonging to its new employers' association.

CONCLUSION

It is therefore concluded that imports of articles like or directly competitive with women's coats produced at Jem Fashions, Inc., and at Mel Mar Fashions, Inc., Asbury Park, N.J., did not contribute importantly to a decline in production at the Asbury Park plant.

Signed at Washington, D.C., this 15th day of August 1977.

HARRY GRUBERT,
Director, Office of Foreign Economic Research.

[FR Doc.77-24387 Filed 8-22-77;8:45 am]

[TA-W-124T]

JOHANSEN BROTHERS SHOE CO.

Termination of Investigation

Pursuant to Section 223(d) of the Trade Act of 1974 and 29 CFR Part 90.17 (d), a termination investigation was initiated on July 28, 1976, to determine, with respect to the certification issued on October 29, 1975, whether total or partial separations from the St. Louis, Mo., plant of Johansen Brothers Shoe Co. are no longer attributable to the conditions specified in such certification.

Notice of investigation regarding termination of certification of eligibility to apply for worker adjustment assistance was published in the FEDERAL REGISTER on August 10, 1976 (41 FR 33595). No public hearing was requested and none was held.

The existing certification will expire on October 29, 1977. Since workers newly separated, totally or partially, after October 29, 1977, would be ineligible to apply for adjustment assistance, termination of the certification by the Secretary of Labor within 90 days from statutory termination would serve no purpose; consequently the investigation has been terminated.

Signed at Washington, D.C., this 11th day of August 1977.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-1479; TA-W-1512; TA-W-1532]

JONES & LAUGHLIN STEEL CORP., PITTSBURGH WORKS

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W- 1479, 1512, and 1532: Investigations regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigations were initiated on December 20, 1976 (TA-W-1479) and December 22, 1976 (TA-W-1512) in response to worker petitions which were filed by the United Steelworkers of America on behalf of workers and former workers producing cold finished carbon steel bars, hot rolled carbon steel bars and shapes, hot rolled carbon steel sheet, cold rolled carbon steel sheet, galvanized sheet and hot rolled carbon steel plate at Jones & Laughlin Steel Corp., Pittsburgh Works, Pittsburgh (TA-W-1512) and Hazelwood, Pa. (TA-W-1479); and on December 15, 1976 (TA-W-1532) on behalf of nurses employed in support of production at the Pittsburgh Works. The Pittsburgh Works encompasses all production operations by Jones & Laughlin in the Pittsburgh area; thus, findings regarding the above-indicated petitions are combined in one determination.

The notices of investigation were published in the FEDERAL REGISTER on January 7, 1977 (42 FR 1535) and January 18, 1977 (42 FR 3373). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Jones & Laughlin Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that with respect to workers producing hot rolled plate and hot rolled sheet all of the above criteria have been met, and with respect to all other products and with respect to nurses employed in support of production operations at the Pittsburgh Works, criterion (2) has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at the Pittsburgh Works decreased 26.0 percent in 1975 from 1974. Employment during the period January–November 1976, while increasing compared to the same period in 1975, remained 13 percent below annual employment in 1974. The number of workers on layoff status increased more than four-fold in the fourth quarter of 1976 compared to the prior quarter.

The average number of weekly hours worked by production employees decreased 18.8 percent in 1975 from 1974 and increased 14.9 percent in the period January–November 1976 compared to the same period in 1975.

Workers are not separately identifiable by product line.

SALES OR PRODUCTION OR BOTH HAVE DECREASED ABSOLUTELY

Total shipments at the Pittsburgh Works increased 24.0 percent in the period January–November 1976 compared to the same period in 1975.

In 1976, shipments from the Pittsburgh Works included hot rolled bars and shapes, galvanized sheet, hot rolled plate, cold rolled sheet, cold finished bars, and hot rolled sheet. Shipments of products comprising 80 percent of total 1976 shipments—hot rolled bars and shapes, galvanized sheet, cold rolled sheet, and cold finished bars—each increased in January–November 1976 compared to January–November 1975.

Shipments of hot rolled plate, comprising 19 percent of total shipments, declined 19 percent in quantity in January–November 1976 compared to January–November 1975. Shipments of hot rolled sheet, comprising one percent of total shipments, declinde 93 percent in January–November 1976 compared to January–November 1975.

INCREASED IMPORTS

Imports of carbon steel plate decreased in 1973 from 1972 and then increased in 1974. Imports decreased 20 percent in 1975 from 1974 and then increased 15 percent from 1,353.0 thousand short tons in 1975 to 1,555.4 thousand short tons in 1976. The import/shipment and import/consumption ratios increased steadily from 16.4 percent and 14.5 percent, respectively, in 1973 to 27.7 percent and 21.9 percent, respectively, in 1976.

Imports of carbon hot rolled sheet declined absolutely in each year from 1972 through 1975. Imports declined 14.5 percent from 1974 to 1975 and then increased 8.4 percent from 1,509.2 thousand short tons in 1975 to 1,635.9 thousand short tons in 1976. Imports declined relative to domestic shipments and consumption from 1972 to 1973 and increased from 1973 through 1975. The ratios of imports to domestic shipments and consumption declined from 14.0 percent and 12.4 percent, respectively, in 1975 to 11.3 percent and 10.2 percent, respectively, in 1976.

Imports of hot rolled carbon steel bars decreased steadily from 804.1 thousand short tons in 1972 to 384.2 thousand short tons in 1976. The ratios of imports to domestic shipments and consumption decreased steadily from 12.8 percent and 11.5 percent, respectively, in 1972 to 7.0 percent and 6.6 percent, respectively, in 1976.

Imports of carbon steel bar-size light shapes decreased both absolutely and relative to domestic production and consumption in 1973 from 1972 and increased both absolutely and relatively in 1974 from 1973. Imports decreased 67.9 percent in 1975 from 1974, and decreased 1.7 percent in 1976 from 1975. The import/shipment and import/consumption ratios decreased steadily from 53.1 percent and 35.4 percent, respectively, in 1974 to 19.5 percent and 16.7 percent, respectively, in 1976.

Imports of galvanized steel sheet and strip decreased absolutely and relative to domestic shipments and consumption in 1973 from 1972 and increased both absolutely and relatively in 1974 from 1973. Imports decreased 42 percent in 1975 from 1974 and increased 99 percent from 739.0 thousand short tons in 1975 to 1,467.7 thousand short tons in 1976. The import/shipment and import/consumption ratios decreased from 21.0 percent and 17.6 percent, respectively, in 1974 to 19.9 percent and 16.7 percent, respectively, in 1975 and then increased to 28.3 percent and 22.2 percent, respectively, in 1976.

Imports of carbon steel cold rolled sheet declined absolutely in each year from 1972 through 1975. Imports declined 18.9 percent from 1974 to 1975 and then increased 13.7 percent from 2,067.1 thousand short tons in 1975 to 2,350.7 thousand short tons in 1976. Imports declined relative to domestic shipments and consumption from 1972 to 1973 and increased from 1973 through 1975. The ratios of imports to domestic shipments and consumption declined from 16.5 percent and 14.2 percent, respectively, in 1975 to 13.2 percent and 11.7 percent, respectively, in 1976.

Imports of cold finished carbon steel bars decreased in each year from 131.9 thousand short tons in 1972 to 65.6 thousand short tons in 1975 and then increased to 70.3 thousand short tons in

V42163 AUG 23 77 UM

1976. The ratios of imports to domestic shipments and consumption decreased from 9.5 percent and 8.8 percent, respectively, in 1972 to 5.3 percent and 5.0 percent, respectively, in 1976.

CONTRIBUTED IMPORTANTLY

Shipments of hot rolled plate and hot rolled sheet combined comprised 20 percent of total shipments by the Pittsburgh Works during the first eleven months of 1976. Shipments of both products declined during that period compared to the same eleven month period in 1975. Customers surveyed who purchase plate and hot rolled sheet from the Pittsburgh Works reduced purchases from the Pittsburgh Works while increasing purchases of imported plate and hot rolled sheet.

Total shipments by the Pittsburgh Works increased in the first eleven months of 1976 compared to the first eleven months of 1975. Workers employed in support functions, such as the nurses who petitioned under TA-W-1532, are not influenced by fluctuations in output of individual products, but by total plant output. Thus, notwithstanding declines in output of hot rolled plate and hot rolled sheet, total plant output increased 42 percent and 70 percent in the second and third quarters, of 1976 compared to the respective quarters of 1975.

Shipments of all products other than hot rolled plate and hot rolled sheet increased in January–November 1976 compared to January–November 1975.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with hot rolled plate and hot rolled sheet produced at the Pittsburgh Works of Jones & Laughlin Steel Corp. contributed importantly to declines in production and employment at that plant. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers engaged in employment related to the production of hot rolled plate and hot rolled sheet at the Pittsburgh Works (Pittsburgh and Hazelwood, Pa., plants) of Jones & Laughlin Steel Corp., who became totally or partially separated from employment on or after September 1, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further conclude that increases of imports of articles like or directly competitive with cold finished bars, hot rolled bars and shapes, cold rolled sheet, and galvanized sheet did not contribute importantly to separations of either workers producing such products at the Pittsburgh Works or nurses employed in support functions at the Pittsburgh Works of Jones & Laughlin Steel Corp.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1808]

R & P MANUFACTURING, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1808: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 15, 1977, in response to a worker petition received on March 14, 1977, which was filed on behalf of workers and former workers producing ladies' slacks and skirts at R&P Manufacturing, Inc., South River, N.J.

The notice of investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 18155). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of R&P Manufacturing, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the workers firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, criterion (4) has not been met.

Evidence developed in the Department's investigation revealed that customers representing 93 percent of R&P Manufacturing's sales of ladies skirts and slacks did not report purchasing imports of such products. These customers cited union jurisdictional complications as the reason for reducing or ceasing to place orders for ladies skirts and slacks with R&P Manufacturing.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's slacks and skirts produced by R&P Manufacturing, Inc., South River, N.J., did not contribute importantly to the decline in sales or production or separations of workers of that firm.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1959]

REEVES HOFFMAN DIVISION OF DYNAMICS CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1959: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 7, 1977, in response to a worker petition received on April 5, 1977, by three individual workers on behalf of workers and former workers producing electronic quartz crystals for time pieces at the McConnellsburg, Pa., plant of Reeves Hoffman Division of Dynamics Corp. of America.

The notice of investigation was published in the FEDERAL REGISTER on April 15, 1977 (42 FR 19939). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Reeves Hoffman Division of Dynamics Corp. of America, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at the McConnellsburg plant increased 87 percent in July 1976, increased 79 percent in August 1976, increased 40 percent in September 1976, and increased 31 percent in October 1976 when compared to the previous month, Average employment of production workers declined 1 percent in November 1976 when compared to October 1976, declined 4 percent in December 1976 when compared to November 1976, declined 39 percent in January 1977 when compared to December 1976, increased 2 percent in February 1977 when compared to January 1977, and increased 20 percent in March 1977 compared to February 1977. The plant closed on March 25, 1977.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total sales (both the Carlisle and McConellsburg plants) of electronic quartz crystals for time pieces, in quantity, increased 65 percent in 1976 compared to 1975 and increased 2 percent in the first quarter of 1977 compared to the first quarter of 1976. The above comparisons do not fully reflect the sales trend of Reeves Hoffman. Sales, in both quantity and value, were on an upward trend through the second quarter of 1976. Sales, in quantity, increased in each consecutive quarter from the first quarter in 1975 through the second quarter of 1976. In the second quarter of 1976 sales, in both quantity and value, peaked and then started on a downward trend. Because of this upward trend through the second quarter of 1976 the comparison of 1976 to 1975 shows an increase. Therefore, the following comparison is shown in order to illustrate the reverse in the sales trend that occurred in mid-1976. Sales, in quantity, increased 82 percent in the last six months of 1975 when compared to the first six months in 1975. Sales, in quantity, declined 23 percent in the last six months of 1976 when compared to the first six months of 1976. Therefore, it is shown that not only did sales decrease in the last six months of 1976 when compared to the first six months but also that the reverse in the trend in mid-1976 is not of a seasonal nature.

Production, in quantity, at the McConnellsburg plant increased 175 percent in September 1976, increased 164 percent in October 1976, increased 79 percent in November 1976, and increased 198 percent in December 1976 when compared to the previous month. Production then declined 14 percent in January 1977 when compared to December 1976, declined 2 percent in February 1977 when compared to January 1977, and declined 97 percent in March 1977 when compared to February 1977. The plant closed on March 25, 1977.

INCREASED IMPORTS

Imports of quartz crystals for electronic watches increased absolutely in 1974 and 1975 when compared to the previous year and increased 345 percent in 1976 compared to 1975. The ratio of imports to domestic production increased from 16.7 percent in 1975 to 32.7 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers indicated they decreased purchases of electronic quartz crystals for time pieces from Reeves Hoffman Division of Dynamics Corp. of America and increased purchases of imports.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with electronic quartz crystals for time pieces produced at the McConnellsburg, Pa., plant of Reeves Hoffman Division of Dynamics Corp. of America contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the McConnellsburg, Pa., plant of Reeves Hoffman Division of Dynamics Corp. of America who became totally or partially separated from employment on or after November 1, 1976, and before June 1, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All workers totally or partially separated on or after June 1, 1977, are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C., this 15th day of August 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[TA-W-2049]

REEVES HOFFMAN DIVISION OF DYNAMICS CORP. OF AMERICA

Certification Rearding Eligibility To Apply for Worker Adjustment Asssitance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2049: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 10, 1977, in response to a worker petition received on May 5, 1977, on behalf of workers and former workers producing electronic quartz crystals for timepieces at the Carlisle, Pa., plant of Reeves Hoffman Division of Dynamics Corp. of America.

The notice of investigation was published in the FEDERAL REGISTER on May 27, 1977 (42 FR 27330). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Reeves Hoffman Division of Dynamics Corp. of America, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATION

Average employment of all production workers at the Carlisle plant increased 7 percent in 1975 compared to 1974, increased 11 percent in 1976 compared to 1975. and decreased 59 percent in the first quarter of 1977 compared to the first quarter of 1976. Average employment of production workers at the Carlisle plant started declining in July 1976 and has decreased in each consecutive month until the plant stopped producing electronic quartz crystals for time pieces on May 16, 1977.

The number of employees engaged in employment not related to the production of electronic quartz crystals at the Carlisle plant has remained relatively unchanged over the period from 1974 through the first quarter of 1977. Employees not engaged in employment related to the production of electronic quartz crystals constituted approximately 13 percent of total employment in 1975 and 12 percent in 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total sales (both the Carlisle and McConnellsburg plants) of electronic quartz crystals for time pieces, increased in quantity 65 percent in 1976 compared to 1975 and increased 2 percent in the first quarter of 1977 compared to the first quarter of 1976. The above comparisons do not fully reflect the sales trend of Reeves Hoffman. Sales, in both quantity and value, were on an upward trend through the second quarter of 1976. Sales, in quantity, increased in each consecutive quarter from the first quarter in 1975 through the second quarter of 1976. In the second quarter of 1976, sales, in both quantity and value, peaked and then started on a downward trend. Because of this upward trend through the second quarter of 1976 the comparison of 1976 to 1975 shows an increase. Therefore, the following comparison is shown in order to illustrate the reverse in the

sales trend that occurred in mid-1976. Sales, in quantity, increased 82 percent in the last six months of 1975 when compared to the first six months of 1975. Sales, in quantity, declined 23 percent in the last six months of 1976 when compared to the first six months of 1976. Therefore, it is shown that not only did sales decrease in the last six months of 1976 when compared to the first six months, but also that the reverse in the trend in mid-1976 is not of a seasonal nature.

Production, in quantity, at the Carlisle plant increased 69 percent in 1976 compared to 1975 and declined 44 percent in the first quarter of 1977 when compared to the first quarter of 1976. The above comparisons do not fully reflect the production trend of Reeves Hoffman. Production, in both quantity and value, were on an upward trend through the second quarter of 1976. Production, in both quantity and value, peaked in the second quarter of 1976 and then started on a downward trend. Because of this upward trend through the second quarter of 1976 the comparison of 1976 to 1975 shows an increase. Therefore, the following comparison is shown in order to illustrate the reverse in the production trend that occurred in mid-1976. Production, quantity, declined 18 percent in the six month period from July 1976 through December 1976 when compared to the previous six month period from January 1976 through June 1976. The plant stopped producing electronic quartz crystals for time pieces on May 16, 1977.

INCREASED IMPORTS

Imports of quartz crystals for electronic watches increased absolutely in 1974 and 1975 when compared to the previous year and increased 345 percent in 1976 compared to 1975. The ratio of imports to domestic production increased from 16.7 percent in 1975 to 32.7 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers indicated they decreased purchases of electronic quartz crystals for time pieces from Reeves Hoffman Division of Dynamics Corp. of America and increased purchases of imports.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with electronic quartz crystals for time pieces produced at the Carlisle, Pa., plant of Reeves Hoffman Division of Dynamics Corp. of America contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of electronic quartz crystals for time pieces at the Carlisle, Pa., plant of Reeves Hoffman Division of Dynamics Corp. of America who became totally or partially separated from employment on or after July 1, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of August 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[TA-W-1831]

SHARMAT, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1831: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 21, 1977, in response to a worker petition received on March 18, 1977, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing women's dresses at Sharmat, Inc., Luzerne, Pa.

The notice of investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 18158). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Sharmat, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation revealed that criterion (4) has not been met.

Production of women's dresses at Sharmat, Inc., Luzerne, Pa., increased 14.6 percent in 1975 compared to 1974, before declining 3.2 percent in 1976 compared to 1975. Production then increased 4.3 percent in the first four months of 1977 compared to the same period of 1976.

Jobbers representing 100 percent of the contract work done by Sharmat in 1976 experienced increased sales during the period from 1974 through the first four months of 1977 and generally increased contract work with Sharmat during the same period. The jobbers do not use foreign contractors.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the women's dresses produced at Sharmat, Inc., Luzerne, Pa., did not contribute importantly to the total or partial separations of the workers at that firm.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-24393 Filed 8-22-77;8:45 am]

[TA-W-1658]

SKILL KNIT FABRICS, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1658: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 16 1977, in response to a worker petition received on February 8, 1977, which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing circular knit fabric at Skill Knit Fabrics, Inc.

The notice of investigation was published in the FEDERAL REGISTER on March 8, 1977 (42 FR 13093). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Skill Knit Fabrics, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 22 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision thereof have become totally or partially separated, or are threatened to become totally or partially separated:

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely:

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, criteria (2) and (4) have not been met.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales and production at Skill Knit are equal since the company only produces for order on a commission basis. Sales and production decreased 37.1 percent in quantity and 33.2 percent in value in 1975 from 1974. In 1976, sales and production increased 23.8 percent in quantity and 34.5 percent in value compared to 1975.

Total sales and production at Skill Knit increased in 1976 compared to 1975. Production declines in the first and third quarter of 1976 compared to the immediately preceding quarters reflect the seasonal trend at Skill Knit. Skill Knit is a commission knitter whose production patterns follow those of the manufacturers Skill Knit serves. Periods of decreased production at Skill Knit reflect the slower production seasons of customers.

CONTRIBUTED IMPORTANTLY

Skill Knit's major customer, who represented over 65 percent of total sales in 1976, indicated that he does not purchase imported fabric.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales and production of circular knit fabric produced at Skill Knit Fabrics, Inc., did not decline and that increases of imports of articles like or directly competitive with circular knit fabric produced at Skill Knit Fabrics, Inc., did not contribute importantly to declines in production and employment at that plant.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-24394 Filed 8-22-77;8:45 am]

[TA-W-1250]

TERRACE FOOTWEAR, INC.

Revised Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 222 of the Trade Act of 1974 and in accordance with Section 223(a) of such Act, on March 11, 1977, the Department of Labor issued a certification of eligibility to apply for ajustment assistance applicable to workers and former workers producing women's casual footwear at the Norwalk, Conn., plant of Terrace Footwear, Inc.

The notice of certification was published in the FEDERAL REGISTER March 22, 1977 (42 FR 15481). A revised certification was issued April 14, 1977, to include six additional workers who were separated after the termination date because of their required presence to close out the plant. The notice of revised certification was published in the FEDERAL REGISTER (42 FR 21871) April 29, 1977.

Subsequent to the publication of the revised determination, the Office of Trade Adjustment Assistance received an inquiry on behalf of workers separated prior to the July 1, 1976, impact date. A review of statistical evidence obtained in the course of the original investigation revealed layoffs associated with the adverse affects of increased imports of women's casual footwear actually began in May 1976.

CONCLUSION

Based on a review of the entire record and in accordance with the provisions of the Act, I have determined that the following certification is hereby made as follows:

All workers at Terrace Footwear, Inc., Norwalk, Conn., who became totally or partially separated from employment on or after April 30, 1976, and on or before October 30, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974, except that the following identified employees of Terrace Footwear, Inc., shall be eligible to apply for adjustment assistance even if they become totally or partially separated after October 30, 1976.

1. Genevieve Cuneo, 17 Joemar Rd., South Norwalk, Conn.
2. Oscar Greenberg, 20 Friendly Dr., Norwalk, Conn.
3. Jeffrey Waldron, 400 North Main St., Ansonia, Conn.
4. Preston Fryr, 408A Washington Village, South Norwalk, Conn.
5. Angel Morales, 16 Pine St., South Norwalk, Conn.
6. Charles Nastro, 432 Rowayton Ave., South Norwalk, Conn.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1835]

TINA DRESS CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1835: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 21, 1977, in response to a worker petition received on March 18, 1977, which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing women's dresses and sportswear at Tina Dress Co., Wilkes-Barre, Pa.

The notice of investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 18158). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Tina Dress Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated:

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, criterion (4) has not been met.

The Department's investigation has revealed that the only apparel manufacturer for which Tina Dress produced women's dresses and sportswear (which includes blouses, shirts, skirts, vests, jackets, slacks, and shorts) does not import finished products for sale to its retail customers and does not contract with firms outside the United States. This manufacturer increased contracts with other domestic contractors from 1975 to 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with women's dresses, blouses, shirts, skirts, vests, jackets, slacks, and shorts produced by Tina Dress Co. have not contributed importantly to the decline in sales or production of the firm or to the total or partial separations of workers of that firm as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of August 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

V 42 16 3 AUG 23 77 UM

[TA-W-2031 and TA-W-2032]

TOWNSEND FASTENING SYSTEMS, DIVISION OF TEXTRON, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2031 and TA-W-2032: Investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 26, 1977, in response to a worker petition received on April 25, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing specialty fasteners and rivets at the Ellwood City, Pa., plant and the Fallston, Pa., plant of Townsend Fastening Systems, Division of Textron, Inc.

The notice of investigation was published in the FEDERAL REGISTER on May 10, 1977 (42 FR 23655). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Townsend Fastening Systems, the U.S. Department of Commerce; the U.S. International Trade Commission, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met.

(1) That a significant number or proportion of the workers in th workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (3) has not been met.

Production of specialty fasteners comprises 85 percent of Townsend Fastening System's output.

The evidence developed in the Department's investigation reveals that there are no known identifiable imports of specialty fasteners.

Production of rivets comprises 15 percent of Townsend Fastening System's output.

Imports of rivets relative to domestic production decreased from 3.3 percent in 1974 to 2.6 percent in 1975 and 2.2 percent in 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with specialty fasteners and rivets produced by the Ellwood City, Pa., plant and the Fallston, Pa., plant of Townsend Fastening Systems, Division of Textron, Inc., have not increased either actually or relative to domestic production as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-2180]

TRUE TEMPER CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2180: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 27, 1977, in response to a worker petition received on June 24, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing shovels and spades at the Dunkirk, N.Y., plant of True Temper Corp.

The notice of investigation was published in the FEDERAL REGISTER on July 12, 1977 (42 FR 35904). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from the United Steelworkers of America and officials of True Temper Corp.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the decreased in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any other criteria have been met, criterion (1) has not been met.

The Dunkirk, N.Y., plant of the True Temper Corp. produces shovels and spades.

Pursuant to the requirements of 29 CFR 90.2 total separations must be the equivalent to a total unemployment of five percent or 50 workers, whichever is less. Evidence developed in the Department's investigation revealed that the total separations which occurred during the period of possible coverage amounted to less than five percent of the workforce employed at the Dunkirk plant of True Temper Corp. The total number of workers experiencing separations during the period May 6, 1976, one year prior to the signature date of the petition, to the present was less than 50 workers. There is no indication that current workers are threatened with any involuntary separations.

Pursuant to the requirements of 29 CFR 90.2, "partial separation" means, that the worker's hours of work have been reduced to 80 percent of less of the worker's average weekly hours at the firm or appropriate subdivision thereof. Evidence developed in the Department's investigation revealed that the worker's average weekly hours of work increased 14 percent in the first half of 1977 compared to the same period of 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at the Dunkirk, N.Y., plant of the True Temper Corp. have not become totally or partially separated as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1432]

U.S. STEEL CORP., CUYAHOGA WORKS

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1432: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976, in response to a worker petition received on December 15, 1976, which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel wire and carbon steel wire rods at the Cleveland, Ohio (Cuyahoga Works) of the United States Steel Corp.

The notice of investigation was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 902). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of U.S. Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that without regard to whether any of the other criteria have been met, the fourth criterion has not been met.

The Cuyahoga Works of the U.S. Steel Corp. produces carbon steel wire and carbon steel wire rod.

Most customers of the Cuyahoga Works surveyed indicated that they did not purchase imported wire or wire rods in 1976. Those customers that did purchase imports increased purchases from the Cuyahoga Works in 1976 compared to 1975. The increased purchases by customers in 1976 compared to 1975 followed the increased activity in the construction industry following the slow year in 1975.

The response of customers is consistent with industry trends. U.S. domestic shipments of carbon steel wire and wire rod rose substantially from 1975 to 1976. Consequently, imports relative to domestic shipments declined from 65.1 percent in 1975 to 35.7 percent in 1976 for wire rods while the import to shipments ratio for carbon steel wire and wire products remained relatively unchanged from 1975 to 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with carbon steel wire and carbon steel wire rod produced at the Cleveland, Ohio (Cuyahoga Works) of the U.S. Steel Corp. did not contribute importantly to the total or partial separations of the workers at that plant.

Signed at Washington, D.C., this 12th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1989]

WEBSTER ENTERPRISES, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1989: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 18, 1977, in response to a worker petition received on that date which was filed on behalf of workers formerly engaged in employment related to the production of squeeze toys at Webster Enterprises, Inc., Cleveland, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on April 29, 1977 (42 FR 21872). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Webster Enterprises, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers at Webster Enterprises, Inc., increased 80 percent in the first three Employment of production workers decreased 80 percent in the first three quarters of 1976 compared to the like period in 1975.

All employment ceased when the plant closed in August 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales at Webster Enterprises, Inc., adjusted for price changes, increased 100 percent in value from 1974 to 1975. Adjusted sales decreased 15 percent in value in the first three quarters of 1976 compared to the like period in 1975.

All sales ceased when the plant closed in August 1976.

INCREASED IMPORTS

Imports of squeeze toys increased absolutely from 1972 to 1973, then decreased from 1973 to 1974, and 1974 to 1975. Imports increased 38 percent absolutely from 1975 to 1976, and the ratio of imports to domestic production increased from 139.1 percent in 1975 to 151.7 percent in 1976. Imports increased 26 percent absolutely in the first three quarters of 1976 compared to the like period in 1975.

CONTRIBUTED IMPORTANTLY

Customers of Webster Enterprises, Inc., who were surveyed by OTAA, decreased purchases of squeeze toys from Webster in 1976 compared to 1975, and increased purchases from other domestic sources manufacturing squeeze toys offshore.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with squeeze toys produced at Webster Enterprises, Inc., Cleveland, Ohio, contributed importantly to the total or partial separation of the workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at Webster Enterprises, Inc., Cleveland, Ohio, who became totally or partially separated from employment on or after April 12, 1976, and before October 1, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. All workers who became totally or partially separated after October 1, 1976, are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C., this 15th day of August 1977.

BRIAN TURNER,
Executive Assistant to Deputy Under Secretary for International Affairs.

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

CLOSED MEETINGS

Annual Report

In compliance with Sections 10(d) and 13 of the Federal Advisory Committee Act, a summary report is hereby submitted on the partially closed meeting of the National Advisory Council on the Education of Disadvantaged Children held during calendar year 1976. The closed meeting, hereby referred to as the "closed executive session," which had been previously approved by the Commissioner of Education on April 6, 1976, was held on April 29, 1976 from 4–5 p.m. The meeting was held at the San Francisco Hotel, Mason & O'Farrell Streets, San Francisco, California.

The National Advisory Council on the Education of Disadvantaged Children (NACEDC) is established under section

148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

The purpose of the closed executive session was for Council to discuss personnel matters and internal personnel rules and practices of the Council. Ten members were in attendance and no conclusions were reached.

Record of this meeting is found in the NACEDC's 1976 Report to the Commissioner. This report is available for public inspection at the office of the National Advisory Council on the Education of Disadvataged Children, located at 425 Thirteenth Street NW., Suite 1012, Washington, D.C., and is also available from the Commissioner of Education, U.S. Office of Education, Washington, D.C.

Signed at Washington, D.C. on August 17, 1977.

GLORIA STRICKLAND,
Acting Executive Director.

FEDERAL PROCUREMENT DATA SYSTEM

Proposed New Data Elements; Comments Requested

To implement Sec. 6(d)5 of P.L. 93-400, which makes the Office of Federal Procurement Policy (OFPP) responsible for "• • • establishing a system for collecting, developing, and disseminating procurement data which takes into account the needs of the Congress, the executive branch, and the private sector • • •", the OFPP is developing the design of a Federal Procurement Data System (FPDS). Generally, the procurement information to be reported by each executive agency to the FPDS is currently available in each agency's contracting office.

The purpose of this Notice for Comment is to obtain views on two new data elements proposed for inclusion in the FPDS which are not currently available in the executive agencies. These items of new information must therefore be collected from prospective Federal contractors during the solicitation phase of the procurement process. It is proposed that each bid, proposal, or quotation for contracts in excess of $10,000 contain the following two items: (1) a statement that the firm is, or is not, female owned, and (2) with respect to contracts for supplies or equipment a statement showing the percent of total contract price which represents foreign content.

Comments or suggestions submitted in response to this Notice will be thoroughly considered by the OFPP in the final development of the Federal Procurement Data System design. Questions may be addressed to Mr. Wm. W. Thybony, Assistant Administrator for Contract Placement, telephone (202) 395-4946.

Interested parties have until September 30, 1977 to submit comments.

Dated: August 17, 1977.

LESTER A. FETTIG,
Administrator.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

[Doc. No. 301-13]

TANNER'S COUNCIL OF AMERICA, INC.

Section 301 Committee: Notice of Complaint

On August 4, 1977, the Chairman of the Section 301 Committee received from Thomas F. Shannon, Esquire, and Lauren Oldak, Esquire, Counsel to the Tanner's Council of America, a petition alleging unfair trade practices by Japan. The complaint alleges that Japan has maintained quantitative restrictions and excessive tariffs that adversely affect U.S. exports of leather. Relief is requested under section 301 of the Trade Act of 1974 (Pub. L. 93-618; 88 Stat. 1978). The text of the complaint is as follows:

BEFORE THE OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

Complaint on Behalf of the Tanners' Council of America, Inc. Filed Pursuant to Section 301 of the Trade Act of 1974 Against the Tariff and Non-Tariff Barriers Restricting Exports of Leather to Japan.

Thomas F. Shannon, Lauren R. Oldak, 1055 Thomas Jefferson Street NW., Washington, D.C. 20007. *Counsel to the Tanners' Council of America, Inc.*

Collier, Shannon, Rill, Edwards & Scott, Washington, D.C. 20007, 202-337-6000, August 4, 1977.
1055 Thomas Jefferson Street NW.,

BEFORE THE OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

Tanners' Council of America, Inc., Complainant.

Complaint Pursuant to Section 301 of the Trade Act of 1974.

COMPLAINT

Pursuant to Section 301 of the Trade Act of 1974, 19 U.S.C. § 2411 (Supp. 1977) and Section 2006.0 et seq. of Title 15 of the Code of Federal Regulations, the Tanners' Council of America, Inc. (TCA), a nonprofit trade association that represents virtually the entire leather tanning industry in the United States, charges that Japan has maintained quantitative restrictions and excessive tariffs on imports of leather (TSUS 121.10-TSUS 121.65) into its home market, thereby frustrating the attempts of the U.S. leather industry to export its products to Japan.

Such trade barriers violate the prohibitions contained in Section 301(a)(1) of the Trade Act of 1974 which expressly authorizes Presidential action when a foreign country "maintains unjustifiable or unreasonable tariff or other import restrictions which impair the value of trade commitments made to the United States or which burden, restrict, or discriminate against United States commerce • • • ." 19 U.S.C. § 2411(a)(1) (Supp. 1977).

Because these unreasonable and unjustifiable impediments to international trade have contributed to the decline of the American leather industry which has lost more than 30 percent of its production and employment in recent years, relief is clearly merited under the provisions of Section 301 of the Trade Act of 1974. Complainant requests a public hearing pursuant to Section 301(d)(2) of the Trade Act of 1974, 19 U.S.C. § 2411(d)(2) (Supp. 1977), and declares that it has not filed for other forms of relief available under the Trade Act of 1974 or any other provisions of law.

I. Japanese Tariff and Non-Tariff Barriers Affecting Imports of Leather Have Burdened, Restrained and Discriminated Against U.S. Commerce.

A. Japanese Tariff and Non-Tariff Barriers. In order to restrict access to their leather market, the Japanese government has maintained high tariffs and quantitative restrictions on imports of leather. See Exhibit I. In 1976, the duties on cattlehide, calf skin, sheep skin and goat skin leather were 20 percent, in contrast to the 5 percent duty assessed by the United States on imported cattlehide leather and the average 6 percent duty levied on all imported leather.

In addition to this excessive tariff, Japan imposes import quotas on leather, setting a total quota estimated to be $8.7 million last year. For the United States, it is estimated that the quota was limited to $2.5 million. This contrasts sharply with the estimated size of the Japanese leather market as indicated by Japanese imports of leather-making raw material of $290 million in 1976 (see Exhibit II), from which an estimated $600 million worth of leather was produced.[1]

Besides the numerical limitations of the Japanese import quota system, there are also administrative obstacles that further inhibit the ability of U.S. tanners to sell in this market.

(1) There are difficulties in determining the quota ceiling and identifying holders of the quota.

(2) Often Japanese quota holders will restrict access to them for competitive or other reasons.

(3) The import quotas have a price.

(4) The ambiguous nature of the system makes it impossible for either a willing seller or willing buyer to make plans for the utilization of the available quotas.

B. Injury Resulting from Restrictive Trade Practices. The consequences to the U.S. leather industry in the Japanese market are obvious. Because of the infinitesimal size of the quotas and the administrative difficulties placed in the way of their implementation, even the small quotas available to U.S. tanners have not been filled. In 1976, U.S. firms were only able to sell $1.6 million worth of leather to Japan, even though the U.S. quota was an estimated $2.5 million. It is therefore unprofitable for both the U.S. seller and Japanese buyer to expend a great deal of effort for so limited an opportunity.

However, the inability of U.S. tanners to sell their leather in Japan is clearly not due to either price or quality considerations. During March 1977, the Tanners' Council presented a leather show in Tokyo featuring leather produced by 28 American firms. Customer response to the leathers on display was favorable. Unfortunately, the restrictive Japanese trade polices and practices almost completely negated efforts of buyers and sellers to trade.

That U.S. exports of leather to Japan would be much higher if these trade barriers were removed is obvious from recent export statistics. In the past several years, the U.S. tanning industry has made a major effort to expand its exports of leather and it has been highly successful. Total exports of leather have more than doubled from $66.7 million in 1972 to more than $139 million in 1976. See Exhibit III. Exports to other Far Eastern countries including Korea, Taiwan, Hong Kong and the Philippines have almost tripled, in sharp contrast to exports to Japan which have remained almost constant during this same period. See Exhibit III. In fact, it is probable that the U.S. leather industry would have had even greater success in selling to the Japanese market, given the fact that Japanese labor costs for the production of leather are considerably higher than those in the other Far Eastern countries.

Unfortunately, the burden on the U.S. industry is not even limited to the restrictions on access to the Japanese market. As a result of these protectionist policies, the flow of leather-making raw material, leather and finished products has been completely distorted. With the umbrella of a completely protected home market, the Japanese have been able to operate in the U.S. raw material market without relevance to actual market value. Using hide purchasing methods which are comparable to the operations of nonmarket or controlled economies, Japan was able to absorb more than 20 percent of all U.S. hides last year. Because Japan buyers have been able to preempt supply, domestic tanning companies who must operate in an

[1] However, even this $600 million figure underestimates the size of the Japanese leather market because leather produced from Japanese hides is not taken into account because there are no statistics available on Japanese hide production.

VOL 42 NO 163 TUE AUG 23 77 UM

open marketplace have been shut out of their own customary sources of supply.

In addition, the United States tanning industry has also been adversely affected by restrictive Japanese trade policy in third world markets. At leather trade shows held in March and April of this year in Korea, the Republic of China and Hong Kong, it became evident that Japanese tanners dominated the market. They were able to considerably undersell American companies in these countries, possibly because the profits earned in their protected home market where the prices of Japanese leather were significantly higher than U.S. prices for comparable leathers enabled them to charge less abroad.

Thus, not only is the American leather industry prevented from selling its products in Japan because of these insurmountable trade barriers, they are also rapidly losing the raw materials in the United States to these same Japanese competitors who profit considerably from their protected home market and place American tanners at a competitive disadvantage in other leather markets. Such restrictive trade practices clearly burden, restrict and discriminate against U.S. commerce within the meaning of Section 301(a)(1) of the Trade Act of 1974 and have contributed substantially to the injury suffered by this industry which has seen its production and employment drop by more than 30 percent in the past eight years.

II. Japanese Excessive Tariffs and Quantitative Restrictions Against Imports of U.S. Leather are Unreasonable Within the Meaning of Section 301

Section 301(a)(1) of the Trade Act of 1974 authorizes the President to take retaliatory action when a foreign country maintains "unreasonable tariff or other import restrictions" which the Senate Finance Committee Report defines as "restrictions which are not necessarily illegal but which nullify or impair benefits accruing to the United States under trade agreements or which otherwise discriminate against U.S. commerce."

In this instance, it is clear that the 20 percent ad valorem duties are unreasonable tariff restrictions in that they are meant to serve as trade barriers, not as sources of revenue, and as such contrast sharply with the average 6 percent duties levied by the United States on leather imports. In addition, the Senate Finance Committee Report specifically listed quotas and licensing systems among the practices which were to be considered discriminatory against U.S. commerce.

It was without question the intent of Congress that immediate and effective action be taken to eliminate such unreasonable trade practices. According to the Report, "[t]he Committee's intention generally has been to assure a swift and certain response to foreign import restrictions * * *," emphasizing that "these powers be exercised vigorously to insure fair and equitable conditions for U.S. commerce." The Committee warned that it did not intend the President's retaliation authority to be "a dead letter," stating:

Foreign trading partners should know that we are willing to do business with them on a fair and free basis, but if they insist on maintaining unfair advantages, swift and certain retaliation against their commerce will occur. The Committee feels that the authorities contained in this provision will serve as negotiating leverage to eliminate those barriers to, and other distortions of trade which Title I of this bill gives the President broad authority to harmonize, reduce or eliminate on a reciprocal basis. The authority in this section should not be used frivolously or without justification. *The Committee feels, however, that there must be a credible threat of retaliation whenever a foreign nation treats the commerce of the United States unfairly.* (Emphasis added.)

It is therefore clear that the President has and must exercise the authority to take retaliatory action against Japan for the trade barriers it has erected against imports of American leather. Insurmountable tariff barriers and impenetrable quantitative restrictions halt the free flow of trade and must be stricken in the interests of fair international trade.

III. The quantitative Restrictions Imposed on Imports of U.S. Leather Into Japan Are Unjustifiable Within the Meaning of Section 301

The quotas imposed on imports of U.S. leather into Japan are also an unjustifiable restriction which burdens, restricts and discriminates against U.S. commerce within the meaning of Section 301(a)(1) of the Trade Act of 1974. According to the Senate Finance Committee Report, an unjustifiable restriction is one which is "illegal under international law or inconsistent with international obligations." Although a trade practice need not be illegal to warrant retaliatory action, the quantitative restrictions maintained by Japan in the instant case directly contravene the General Agreement on Tariffs and Trade (GATT).

The first paragraph of Article XI of the GATT expressly prohibits quantitative restrictions:

No prohibitions or restrictions other than duties, taxes or other charges, *whether made effective through quotas,* import or export licenses or other measures, *shall be instituted* or maintained by any contracting party on the importation of any product of the territory of any other contracting party or on the exportation or sale for export of any product destined for the territory of any other contracting party. (Emphasis added.)

The critical necessity for abolishing all quantitative restrictions was underscored in the preparatory work for the GATT obligations and was most vehemently expressed by one of the chief U.S. negotiators:

> Quantitative restrictions * * * impose rigid limits on the volume of trade. They insulate domestic prices and production against the changing requirements of the world economy. They freeze trade into established channels. They are likely to be discriminatory in purpose and effect. They give the guidance of trade to public officials; they cannot be divorced from politics. They require public allocation of imports and exports among private traders and necessitate increasing regulation of domestic business. Quantitative restrictions are among the most effective methods that have been devised for the purpose of restricting trade. They make for bilateralism, discrimination, and the regimentation of private enterprise.

Thus, the Japanese quotas on leather violate the express ban on quantitative restrictions contained in the General Agreement. Nor do the Japanese quotas fall within the scope of any of the limited exceptions to this GATT prohibition. Quotas on imports of leather were not imposed as a temporary measure to "prevent or relieve" critical shortages of "foodstuffs" or "other products essential to the exporting contracting party" and are not "necessary to the application of standards or regulations for the classification, grading or marketing of commodities in international trade. * * *" Nor are they agricultural or fisheries products which need quotas to implement governmental programs involving restricted domestic production and price support systems.

But perhaps most importantly, these particular quantitative restrictions do not qualify for the balance-of-payments exception permitted by the General Agreement. Although that justification might have been persuasive in the post-World War II period, it can no longer be used to rationalize this discrimination against U.S. commerce. Clearly, the Japanese cannot now meet the criteria for this exception which permits a country to impose quotas in order to "forestall the imminent threat of, or to stop, a serious decline in its monetary reserves" or "to achieve a reasonable rate of increase in its very low reserves" on the express condition that it "progressively relax" the quantitative restrictions as balance of payments improve and "eliminate the restrictions when conditions would no longer justify their institution or maintenance. * * *"

Even the Japanese have acknowledged the dubiousness of this justification. In a communique issued by the GATT in March 1963, contracting parties were advised that the Japanese government had informed the executive secretary "that in view of the improvement in its balance-of-payments situation, Japan no longer claims balance-of-payments justification under Article XII of the GATT for the maintenance of import restrictions." In fact, three years later, bovine, sheepskin, goatskin and patent leather were included in Japan's list of articles which were subject to "quantitative import restrictions applied contrary to GATT and not covered by waivers."

With the evaporation of this rationale for the maintenance of quantitative restrictions on leather, the Japanese now insist that they cannot discontinue the quotas because most leather tanning is performed by a minority group, the Buraku-Min, which is unemployable in other vocations. However, such a justification is suspect since the Japanese leather industry has increased by a factor of 12 in the 30 years since the imposition of restrictive measures and it is inconceivable that this minority group could have grown at a comparable rate during the same period of time.

Moreover, the General Agreement on Tariffs and Trade does not authorize restrictions on international trade for the purpose of providing permanent protection to a domestic industry after balance-of-payment excuses wane. In fact, commentators on the GATT have expressed grave concern over such residual restrictions:

> Although quantitative restrictions may originally be imposed for balance-of-payments reasons, they provide protection for domestic industry. When balance-of-payments considerations no longer justify retention of such restrictions, the domestic firms involved may have become so dependent upon the protection thus afforded that they no longer have the competitive vigor to survive the return of international competition. In some cases balance-of-payments-motivated restrictions may lead to the development of new domestic industries that never could be viable in international competition. An attempt to suspend those restrictions when payments imbalances finally disappear may present political and social problems of major dimensions.

Such a situation is directly contrary to the letter and spirit of the GATT; yet, it has apparently happened in the instant case. Although the Japanese may not legally restrict trade under the General Agreement because of its minority employment problem, it has proceeded to do so in derogation of the principles of free international trade and to the detriment of the employees in the U.S. leather tanning industry, many of whom are also members of minority groups and who

are frequently located in rural areas where alternative employment is unavailable.

It is therefore clear that the continued imposition of quotas on U.S. leather exports to Japan violates the ban on quantitative restrictions in Article XI of the General Agreement on Tariffs and Trade and, regardless of its legality under Article XII, constitutes a prima facie nullification and impairment of the benefits and objectives of the General Agreement as provided in Article XXIII of the GATT.

IV. Conclusion

The United States does not maintain any quantitative restrictions on leather and levies duties which average 6 percent. The open market of the U.S. stands in stark contrast to the protected market of Japan which is insurmountably surrounded by 20 percent tariffs and stringent quotas. The American leather tanning industry, one of the most efficient and productive in the world, merely asks for an equal opportunity to trade its product freely in Japan so that it can regain the employment and production that it has lost as a result of such restrictive practices. The Tanners' Council of America, Inc., therefore seeks remedial action under the provisions of Section 301 of the Trade Act of 1974.

Respectfully submitted,

THOMAS F. SHANNON,
LAUREN R. OLDAK,
Counsel for the Tanners' Council of America, Inc.

HEARINGS

I. The complainant has requested that hearings be held on this matter. Such hearings will be held at 10 a.m. on Tuesday, October 11, 1977, and if necessary will continue on October 12 at the Office of the Special Representative for Trade Negotiations, 1800 G Street NW., Washington, D.C., Room 730.

II. Requests to present oral testimony and accompanying briefs must be received on or before October 3, 1977. Interested persons are advised to refer to the regulations promulgated by the Office of the Special Representative for Trade Negotiations covering procedures to be followed in all Section 301 proceedings, 15 CFR 2006, (40 FR 39497—August 28, 1975), except that all communications to the Chairman of the Section 301 Committee should be addressed to the Office of the Special Representative for Trade Negotiations, *Room 715*, 1800 G Street NW., Washington, D.C., 20506, instead of Room 725 as specified in the regulations.

1. *Submission of Briefs and Requests to Present Oral Testimony.* Requests for oral testimony and submission of written briefs should conform to the procedures set forth in 15 CFR 2006.6 and 2006.7 (40 FR 39497—August 28, 1975).

2. *Rebuttal Briefs.* In order to assure parties the opportunity to contest information provided by other interested parties, rebuttal briefs may be filed by any party within 15 days after the close of the hearings. The requirement that written briefs be submitted in 20 copies is waived with regard to rebuttal briefs.

3. *Attendance at Hearings.* The hearings will be open to the public.

C. MICHAEL HATHAWAY,
Chairman, Section 301 Committee, Office of the Special Representative for Trade Negotiations.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 9894; 812-4117]

COLONIAL OPTION INCOME FUND, INC. AND COLONIAL MANAGEMENT ASSOCIATES, INC.

Order To Permit an Offer of Exchange and for an Exemption

AUGUST 17, 1977.

Colonial Option Income Fund, Inc. ("Fund") 75 Federal Street, Boston, Massachusetts 02110, an open-end, diversified, management investment company registered under the Investment Company Act of 1940 ("Act"), and Colonial Management Associates, Inc., the investment adviser to and the principal underwriter for the Fund (collectively "Applicants"), filed an application on April 4, 1977, and an amendment thereto on July 5, 1977, for an order of the Commission (1) pursuant to Section 11(a) of the Act, to permit the Fund to offer its shares in exchange for those shares of Standard & Poor's/InterCapital Liquid Asset Fund, Inc. ("S&P") which were originally acquired with proceeds from the redemption of Fund shares and from additional S&P shares received through reinvestment of dividends and capital gains distributions, upon payment of a $5 exchange fee, and (2) pursuant to Section 6(c) of the Act, to exempt Applicants from Section 22(d) of the Act and the rules thereunder to the extent necessary to permit the sale of Fund shares through such exchange offers without the customary sales charge.

On July 21, 1977, a notice (Investment Company Act Release No. 9863) was issued of the filing of said application. The notice gave interested persons an opportunity to request a hearing and stated that an order disposing of the application would be issued as of course unless a hearing should be ordered. No request for a hearing has been filed and the Commission has not ordered a hearing.

The matter has been considered and it is found that the granting of the application is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Accordingly,

It is ordered, pursuant to section 11(a) of the Act, that the proposed exchange offers be, and hereby are, approved, effective forthwith; and

It is further ordered, pursuant to section 6(c) of the Act, that the application for exemption from section 22(d) of the Act and the rules thereunder, to the extent requested, be, and hereby is, granted, effective forthwith.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc 77-24335 Filed 8-22-77;8:45 am]

[Rel. No. 9895; 812-4139]

E. I. DU PONT DE NEMOURS & CO.

Filing of Application for Order of Exemption

AUGUST 17, 1977.

Notice is hereby given that E. I. du Pont de Nemours and Company ("Applicant") 1007 Market Street, Wilmington, Delaware 19898, a Delaware corporation, has filed an application on May 25, 1977, pursuant to Section 17(b) of the Investment Company Act of 1940 ("Act") for an order exempting from the provisions of Section 17(a) of the Act Applicant's proposed grant to Mitsui Fluorochemicals Company, Ltd. ("Mitsui"), a Japanese corporation, of an exclusive license, with the right to grant sublicenses, to certain patent rights and technical information. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The application states that Mitsui, a manufacturer and seller of fluorinated hydrocarbon products since 1963, seeks to acquire an exclusive license, with the right to grant sublicenses, to use certain technology developed by Applicant relating to fluorocarbon resin pellets ("PFA polymers") for use in molding a variety of products which require high resistance to strong chemicals and extremely high temperatures.

According to the application, Applicant and Mitsui have executed an agreement (the "Agreement") providing for the grant of such a license. The application states that, under the Agreement, the transfer of Mitsui of Japanese patent rights and technical information is nonexclusive pending receipt of the exemptive order requested in the application, and that approval of the transaction by appropriate Japanese governmental authorities was received on April 19, 1975. The application also states that, pursuant to the Agreement, Mitsui has agreed to pay Applicant a royalty of 5% of the Net Selling Price, as defined in the Agreement, of all quantities of PFA polymers used or sold by Mitsui or any Mitsui sublicensee during the ten-year period beginning as of the first day of the calendar quarter immediately succeeding the date of the first sale or use for commercial purposes of PFA polymers made by Mitsui or any sublicensee of Mitsui after January 17, 1975; that those royalties are payable by Mitsui within 60 days after the end of each calendar quarter during such ten-year period; and that, as of May 23, 1977, Mitsui has paid Applicant $17,886.79 in such royalties.

The application states that Christiana Securities Company ("Christiana"), a non-diversified, closed-end management investment company registered under the Act, owns approximately 27.7% of the outstanding common stock of Applicant, which in turn owns 50% of the outstanding common stock of Mitsui. The application further states that the remaining 50% of Mitsui's outstanding common stock is owned by Mitsui Petrochemical Industries, Ltd., a Japanese corporation. Applicant concludes that both Applicant and Mitsui are (1) presumed to be controlled by Christiana, and (2) affiliated persons of Christiana, for purposes of the Act.

Section 17(a) of the Act provides, in part, that it shall be unlawful for any affiliated person of a registered investment company, or any affiliated person of such a person, acting as principal, knowingly to sell to or purchase from such registered company, or any company controlled by such company, any security or other property. Applicant states that the proposed grant to Mitsui of the exclusive rights described above may be prohibited by Section 17(a), and it therefore requests an order exempting that proposed grant from the provisions of Section 17(a).

Section 17(b) of the Act provides that the Commission, upon application, shall exempt a proposed transaction from the provisions of Section 17(a) of the Act if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

Applicant asserts that the terms of the proposed transaction are reasonable and fair and do not involve overreaching on the part of any person, and that the royalties payable on PFA polymers and the future rights to technology developed by Applicant reasonably reflect the value of the patent rights and technical information conveyed by the Agreement.

The application states that Mitsui maintains only a limited research and development organization and, therefore, must purchase technology from others. The application also states that Mitsui desires the above-described patent rights and technical information because of the lower cost advantages of domestic production and the broader product base they would bring to Mitsui. Applicant asserts that its granting of access to such technology to Mitsui would provide Applicant with an opportunity to capitalize on such technology in the Japanese market.

Finally, Applicant submits that the proposed transaction is consistent with the policies of Christiana and with the general purposes of the Act.

Notice is further given that any interested person may, not later than September 9, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

H.R. 10 PPROFIT SHARING PLAN OF PEPPER, HAMILTON & SCHEETZ

Notice of Filing of Application for an Order of Exemption

AUGUST 16, 1977.

Notice is hereby given that the law firm of Peper, Hamilton & Scheetz, ("Applicant" or the "Firm") 123 South Broad Street, Philadelphia, Pa. 19109, a Philadelphia partnership, has by application filed March 15, 1977, applied for an exemption from the registration requirements of the Securities Act of 1933 (the "Act") for any participations or interests issued in connection with Applicant's H.R. 10 Profit Sharing Plan. All interested persons are referred to these documents, which are on file with the Commission, for the facts and representations contained therein, which are summarized below.

I. INTRODUCTION

The Plan, as of September 1, 1976, covered 215 participants, of whom 49 were partners, 44 were associates, and 122 were clerical, secretarial and other staff employees of Applicant. During the period prior to August 31, 1976, no solicitation of voluntary contributions was made and no persons other than partners of the Firm ever made voluntary contributions. The Plan is of the type commonly referred to as a "Keogh" plan, which covers persons (in this case Applicant's partners) who are employees within the meaning of Section 401(c)(1) of the Internal Revenue Code of 1954, as amended ("Code"), and therefore, the exemption provided by Section 3(a)(2) of the Securities Act is inapplicable to the Plans. Section 3(a)(2) provides, however, that "the Commission, by rules and regulations or order, shall exempt from the provisions of [Section 5 of the Securities Act] any interest or participation issued in connection with a stock bonus, pension, profit-sharing, or annuity plan which covers employees some or all of whom are employees within the meaning of (S)ection 401(c)(1) of the (Code), if and to the extent that the Commission determines this to be necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of (the Securities Act)."

II. DESCRIPTION AND ADMINISTRATION OF THE PLAN

The Plan was originally adopted in 1968. The present plan, as amended to comply with revisions of the Code and ERISA requirements, has been in effect since September 1, 1976. Applicant has submitted the Plan, as revised, to the Internal Revenue Service for a determination that the Plan is qualified under Section 401(a) of the Code. Applicant contributes to the Plan on behalf of participants out of the net earnings of the Firm in an amount equal to 15% of each participant's compensation up to the maximum compensation subject to Federal Insurance Contributions Act taxes plus 8¾% of each participant's compensation in excess thereof up to $100,000 of total compensation. Under the Plan, participants may make voluntary contributions to the Plan of up to 10% of such participant's aggregate compensation for all years during which the person had been a participant subject to certain limitations. By administrative rule voluntary contributions will be accepted only during the last two weeks of the last month of each quarter.

Funds held by the Plan are invested in two collective investment funds maintained solely and separately for the investment of assets of the Plan. No funds

V42163 AUG 77 UM

of any other plan or person are commingled or invested with these funds. Assets of the Plan are divided between a discretionary fund having as its objectives long term growth and low risk to the extent consistent with such long term growth and an income fund having as its objectives the long term preservation of capital, minimization of interim principal volatility and high current income return. The Plan's discretionary fund invests in equity securities of companies with a past record of consistency in growth of earnings and dividends, relatively high profit margins and ability to finance growth internally with little or no dependence on external capital sources. The portfolio of the discretionary fund will be managed by Cooke & Bieler, Inc., a registered investment adviser. The income fund will invest in agency bonds such as bonds of the Federal Home Loan Bank, bank certificates of deposit, bankers' acceptances, commercial paper, convertible debentures, industrial and finance company bonds and United States Treasury bills. The portfolio of the income fund will be managed by The Fidelity Bank.

Monies contributed by the Firm are maintained in an Employer Account; voluntary contributions by participants are maintained in an Employee Account. Each participant may direct that the partnership contributions allocated to the Employer Account be invested entirely in the income fund or partially in the discretionary fund and partially in the income fund. At the beginning of each Plan year each participant may also direct that the investment of voluntary contributions be allocated between the discretionary fund and the income fund in such proportions as he may desire.

Administration of the Plan is in the following persons: the Executive Committee of the Partnership, the Committee appointed by the Executive Committee of the Partnership, a Plan Administrator, The Fidelity Bank which acts as Trustee to the Plan, and Cooke & Bieler, Inc. which acts as adviser to the discretionary account. The Executive Committee has the duty and authority to appoint and remove trustees, the members of the Committee and any Investment Manager. The Committee designates the investment policies, interprets the Plan and makes decisions with respect to distribution of Plan funds to the extent provided in the Plan.

The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA") and Applicant will comply with all of the ERISA reporting and disclosure requirements. A summary Plan description, written in language understandable by the average participant will be delivered to each participant. A summary annual report will be delivered to each participant and persons currently receiving benefits. Each participant and person receiving benefits will be informed that the full annual report for the Plan will be available upon request. All reports and other basic documents relating to the Plans will be made available to participants for their review. Copies thereof will be supplied to participants at no charge upon request. Each participant will be furnished, upon request, not more than once a year, with a statement of his accrued and vested benefits under the Plan. An ERISA notice briefly describing to participants their rights to information has been distributed.

Applicant states that if the partnership were a corporation, interests and participants in the H.R. 10 Profit Sharing Plan would be exempt under Section 3(a)(2) of the Securities Act. Applicant further submits that the intent of Congress in excluding from the exemption plans in which self-employed persons were participants was to prevent the sale without registration of interests in prepackaged plans offered by financial institutions to self-employed persons lacking the sophistication to protect themselves and their employees and that the provision permitting the Commission to grant exemption upon application was included in Section 3(a)(2) of the Securities Act to make available an exemption for partnership plans where the plan and the entity involved are comparable to corporate plans exempted by Section 3(a)(2).

Applicant states that the Plan covers partners and employees of a single firm and assets of the Plan will not be commingled in collective investment funds with the assets of the plans of other employers.

Applicant concludes that for the foregoing reasons, granting the requested exemptive order would be appropriate in the public interest, consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than September 15, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application, accompanied by a statement of the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed to: George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Pepper, Hamilton & Scheetz, 123 South Broad Street, Philadelphia, Pennsylvania 19109, Attn: Allison Page, Esq. Proof of such service (by affidavit or, in the case of any attorney-at-law, by certificate) shall be filed contemporaneously with the request.

GEORGE A. FITZSIMMONS,
Secretary.

PURITAN FUND, INC. AND FIDELITY MANAGEMENT & RESEARCH CO.

Order Exempting a Proposed Exchange of Shares Permitting Consumation of Certain Proposed Transactions

AUGUST 17, 1977.

On July 21, 1977, a notice was issued (Investment Company Act Release No. 9865) of an application filed on March 25, 1977, and an amendment thereto on June 17, 1977, by Puritan Fund, Inc. ("Puritan"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, and Fidelity Management & Research Company ("FMR"), 82 Devonshire Street, Boston, Massachusetts 02109, investment adviser to Puritan, for an order of the Commission pursuant to Section 6(c) of the Act exempting from the provisions of Section 22(c), Rule 22c-1 and Section 22(d) of the Act the proposed exchange of Puritan shares at net asset value without a sale charge and at a price other than the price next determined after receipt of a purchase order for substantially all of the assets of Blanchard Investment Company, Inc., a personal holding company; and an order pursuant to Section 17(d) of the Act and Rule 17d-1 thereunder permitting an agreement between Puritan and FMR calling for Puritan and FMR each to bear one-half of Puritan's out-of-pocket expenses related to the above proposed exchange of shares up to a maximum of $5,000, and for all of such out-of-pocket expenses in excess of $5,000 to be borne by FMR.

The notice gave interested persons an opportunity to request a hearing, and stated that an order disposing of the application would be issued as of course unless a hearing should be ordered. No request for a hearing has been filed and the Commission has not ordered a hearing.

The matter has been considered, and it is found that the granting of the requested exemptions is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act, and that the participation by Puritan in the proposed transactions is consistent with the provisions, policies and purposes of the Act and is not on a basis less advantageous than that of any other participant. Accordingly,

It is ordered, pursuant to Section 6(c) of the Act, that the application for exemption from Sections 22(c), Rule 22c-1 and 22(d) of the Act, to the extent requested, be, and hereby is, granted, effective forthwith.

It is further ordered, pursuant to Section 17(d) of the Act and Rule 17d-1 thereunder, that said application to permit the consummation of the proposed transactions between Puritan and FMR be, and hereby is, granted, effective forthwith.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

TRUST FUND SPONSORED BY SCHOLARSHIP CLUB, INC.

Proposal to Terminate Registration

AUGUST 17, 1977.

Notice is hereby given that the Commission proposes, pursuant to Section 8(f) of the Investment Company Act of 1940 ("Act"), to declare by order on its own motion, that the Trust Fund Sponsored by the Scholarship Club, Inc. ("Fund") c/o Calvert Courtney, P.O. Box 998, Palmetto, Florida 33561, registered under the Act as a closed-end management investment company, has ceased to be an investment company as defined in the Act.
